## TABLE OF CONTENTS

COVER SHEET

APPLICATION FORM

SUPPORTING DOCUMENTS:

A. GENERAL INFORMATION AND MAPS:

1. PROPOSED TEXT CHANGES – (NONE PROPOSED)
2. CURRENT FUTURE LAND USE MAP
3. PROPOSED FUTURE LAND USE MAP
4. MAP OF EXISTING LAND USES
5. MAP AND DESCRIBE EXISTING ZONING
6. LEGAL DESCRIPTION AND SKETCH
7. DEED(S)
8. AERIAL MAP OF SUBJECT AND SURROUNDING PROPERTIES.
9. LETTER AUTHORIZATION

B. PUBLIC FACILITIES IMPACT:

1. TRAFFIC CIRCULATION ANALYSIS
  - a. LONG RANGE – 20-YEAR HORIZON:
  - b. SHORT RANGE – 5-YEAR CIP HORIZON:
2. EXISTING AND FUTURE CONDITIONS ANALYSIS FOR:
  - a. SANITARY SEWER
  - b. POTABLE WATER
  - c. SURFACE WATER/DRAINAGE BASINS
  - d. PARKS, RECREATION, AND OPEN SPACE
  - e. PUBLIC SCHOOLS.
3. LETTERS OF ADEQUACY FROM:
  - a. LEE COUNTY FIRE PROTECTION
  - b. LEE COUNTY EMERGENCY MEDICAL SERVICE (EMS)
  - c. LEE COUNTY SHERIFF'S OFFICE
  - d. LEE COUNTY SOLID WASTE
  - e. LEE COUNTY TRANSIT
  - f. LEE COUNTY SCHOOL DISTRICT
  - LETTER OF SERVICE AVAILABILITY LEE COUNTY UTILITIES FOR SANITARY SEWER AND POTABLE WATER.

C. ENVIRONMENTAL IMPACTS:

1. MAP FLORIDA LAND USE COVER AND CLASSIFICATION SYSTEM (FLUCCS).
2. SOILS MAP AND DESCRIPTION
3. TOPOGRAPHIC MAP
4. FLOOD INSURANCE RATE MAP EFFECTIVE AUGUST 2008.
5. MAP RARE & UNIQUE UPLANDS.
6. FLUCCS table

## TABLE OF CONTENTS

### D. IMPACTS ON HISTORIC RESOURCES:

1. LETTER OF CLEARANCE FROM FLORIDA DIVISION OF HISTORICAL RESOURCES
2. ARCHEOLOGICAL SENSITIVITY MAP

### E. INTERNAL CONSISTENCY WITH LEE PLAN

### F. ADDITIONAL REQUIREMENTS FOR SPECIFIC FUTURE LAND USE AMENDMENTS (INTENTIONALLY OMITTED - NOT APPLICABLE TO THIS REQUEST)

### G. JUSTIFICATION FOR PROPOSED AMENDMENT

## II. REQUESTED CHANGE (Please see Item 1 for Fee Schedule)

### A. TYPE: (Check appropriate type)

☐ Text Amendment

☒ Future Land Use Map Series Amendment  
(Maps 1 thru 22)

List Number(s) of Map(s) to be amended

1

1. Future Land Use Map amendments require the submittal of a complete list, map, and two sets of mailing labels of all property owners and their mailing addresses, for all property within 500 feet of the perimeter of the subject parcel. The list and mailing labels may be obtained from the Property Appraisers office. The map must reference by number or other symbol the names of the surrounding property owners list. The applicant is responsible for the accuracy of the list and map.

At least 15 days before the Local Planning Agency (LPA) hearing, the applicant will be responsible for posting signs on the subject property, supplied by the Division of Planning, indicating the action requested, the date of the LPA hearing, and the case number. An affidavit of compliance with the posting requirements must be submitted to the Division of Planning prior to the LPA hearing. The signs must be maintained until after the final Board adoption hearing when a final decision is rendered.

### B. SUMMARY OF REQUEST (Brief explanation):

Small scale map amendment to change land use on a parcel of 0.9 acres  
from Suburban land use category to General Commercial Interchange to allow  
the development of a large vehicle sale lot (RV's and/or Boats).

## III. PROPERTY SIZE AND LOCATION OF AFFECTED PROPERTY (for amendments affecting development potential of property)

### A. Property Location:

1. Site Address: 5236 ORANGE RIVER BLVD., Fort Myers, FL 33905

2. STRAP(s): #03-44-25-01-00061.0010

B. Property Information

Total Acreage of Property: 0.9

Total Acreage included in Request: 0.9

Total Uplands: 0.9

Total Wetlands: 0.9

Current Zoning: 0.9

Current Future Land Use Designation: Suburban

Area of each Existing Future Land Use Category: 0.9

Existing Land Use: Residential Single Family (Vacant House)

C. State if the subject property is located in one of the following areas and if so how does the proposed change effect the area:

*Lehigh Acres Commercial Overlay:* N/A

*Airport Noise Zone 2 or 3:* N/A

*Acquisition Area:* N/A

*Joint Planning Agreement Area (adjoining other jurisdictional lands):* N/A

*Community Redevelopment Area:* N/A

D. Proposed change for the subject property:

General Commercial Interchange

E. Potential development of the subject property:

1. Calculation of maximum allowable development under existing FLUM:

Residential Units/Density 6.33

Commercial intensity N/A

Industrial intensity N/A

2. Calculation of maximum allowable development under proposed FLUM:

Residential Units/Density N/A

Commercial intensity 9,000 sf

Industrial intensity N/A

#### IV. AMENDMENT SUPPORT DOCUMENTATION

At a minimum, the application shall include the following support data and analysis. These items are based on comprehensive plan amendment submittal requirements of the State of Florida, Department of Community Affairs, and policies contained in the Lee County Comprehensive Plan. Support documentation provided by the applicant will be used by staff as a basis for evaluating this request. To assist in the preparation of amendment packets, the applicant is encouraged to provide all data and analysis electronically. (Please contact the Division of Planning for currently accepted formats)

##### A. General Information and Maps

*NOTE: For each map submitted, the applicant will be required to provide a reduced map (8.5" x 11") for inclusion in public hearing packets.*

**The following pertains to all proposed amendments that will affect the development potential of properties (unless otherwise specified).**

1. Provide any proposed text changes.
2. Provide a current Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources.
3. Provide a proposed Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources.
4. Map and describe existing land *uses* (not designations) of the subject property and surrounding properties. Description should discuss consistency of current uses with the proposed changes.
5. Map and describe existing zoning of the subject property and surrounding properties.
6. The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

7. A copy of the deed(s) for the property subject to the requested change.
8. An aerial map showing the subject property and surrounding properties.
9. If applicant is not the owner, a letter from the owner of the property authorizing the applicant to represent the owner.

**B. Public Facilities Impacts**

*NOTE: The applicant must calculate public facilities impacts based on a maximum development scenario (see Part II.H.).*

**1. Traffic Circulation Analysis**

The analysis is intended to determine the effect of the land use change on the Financially Feasible Transportation Plan/Map 3A (20-year horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit the following information:

Long Range – 20-year Horizon:

- a. Working with Planning Division staff, identify the traffic analysis zone (TAZ) or zones that the subject property is in and the socio-economic data forecasts for that zone or zones;
- b. Determine whether the requested change requires a modification to the socio-economic data forecasts for the host zone or zones. The land uses for the proposed change should be expressed in the same format as the socio-economic forecasts (number of units by type/number of employees by type/etc.);
- c. If no modification of the forecasts is required, then no further analysis for the long range horizon is necessary. If modification is required, make the change and provide to Planning Division staff, for forwarding to DOT staff. DOT staff will rerun the FSUTMS model on the current adopted Financially Feasible Plan network and determine whether network modifications are necessary, based on a review of projected roadway conditions within a 3-mile radius of the site;
- d. If no modifications to the network are required, then no further analysis for the long range horizon is necessary. If modifications are necessary, DOT staff will determine the scope and cost of those modifications and the effect on the financial feasibility of the plan;
- e. An inability to accommodate the necessary modifications within the financially feasible limits of the plan will be a basis for denial of the requested land use change;
- f. If the proposal is based on a specific development plan, then the site plan should indicate how facilities from the current adopted Financially Feasible Plan and/or the Official Trafficways Map will be accommodated.

Short Range – 5-year CIP horizon:

- a. Besides the 20-year analysis, for those plan amendment proposals that include a specific and immediated development plan, identify the existing

- roadways serving the site and within a 3-mile radius (indicate laneage, functional classification, current LOS, and LOS standard);
  - b. Identify the major road improvements within the 3-mile study area funded through the construction phase in adopted CIP's (County or Cities) and the State's adopted Five-Year Work Program;  
Projected 2030 LOS under proposed designation (calculate anticipated number of trips and distribution on roadway network, and identify resulting changes to the projected LOS);
  - c. For the five-year horizon, identify the projected roadway conditions (volumes and levels of service) on the roads within the 3-mile study area with the programmed improvements in place, with and without the proposed development project. A methodology meeting with DOT staff prior to submittal is required to reach agreement on the projection methodology;
  - d. Identify the additional improvements needed on the network beyond those programmed in the five-year horizon due to the development proposal.
2. Provide an existing and future conditions analysis for (see Policy 95.1.3):
- a. Sanitary Sewer
  - b. Potable Water
  - c. Surface Water/Drainage Basins
  - d. Parks, Recreation, and Open Space
  - e. Public Schools.

Analysis should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- Franchise Area, Basin, or District in which the property is located;
- Current LOS, and LOS standard of facilities serving the site;
- Projected 2030 LOS under existing designation;
- Projected 2030 LOS under proposed designation;
- Existing infrastructure, if any, in the immediate area with the potential to serve the subject property.
- Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements; and
- Anticipated revisions to the Community Facilities and Services Element and/or Capital Improvements Element (state if these revisions are included in this amendment).
- Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water.

In addition to the above analysis for Potable Water:

- Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.

- Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
  - Include any other water conservation measures that will be applied to the site (see Goal 54).
3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:
    - a. Fire protection with adequate response times;
    - b. Emergency medical service (EMS) provisions;
    - c. Law enforcement;
    - d. Solid Waste;
    - e. Mass Transit; and
    - f. Schools.

*In reference to above, the applicant should supply the responding agency with the information from Section's II and III for their evaluation. This application should include the applicant's correspondence to the responding agency.*

**C. Environmental Impacts**

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed use upon the following:

1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
2. A map and description of the soils found on the property (identify the source of the information).
3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
4. A map delineating the property boundaries on the Flood Insurance Rate Map effective August 2008.
5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

**D. Impacts on Historic Resources**

List all historic resources (including structure, districts, and/or archeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

1. A map of any historic districts and/or sites, listed on the Florida Master Site File, which are located on the subject property or adjacent properties.
2. A map showing the subject property location on the archeological sensitivity map for Lee County.

E. Internal Consistency with the Lee Plan

1. Discuss how the proposal affects established Lee County population projections, Table 1(b) (Planning Community Year 2030 Allocations), and the total population capacity of the Lee Plan Future Land Use Map.
2. List all goals and objectives of the Lee Plan that are affected by the proposed amendment. This analysis should include an evaluation of all relevant policies under each goal and objective.
3. Describe how the proposal affects adjacent local governments and their comprehensive plans.
4. List State Policy Plan and Regional Policy Plan goals and policies which are relevant to this plan amendment.

F. Additional Requirements for Specific Future Land Use Amendments

1. Requests involving Industrial and/or categories targeted by the Lee Plan as employment centers (to or from)
  - a. State whether the site is accessible to arterial roadways, rail lines, and cargo airport terminals,
  - b. Provide data and analysis required by Policy 2.4.4,
  - c. The affect of the proposed change on county's industrial employment goal specifically policy 7.1.4.
2. Requests moving lands from a Non-Urban Area to a Future Urban Area
  - a. Demonstrate why the proposed change does not constitute Urban Sprawl. Indicators of sprawl may include, but are not limited to: low-intensity, low-density, or single-use development; 'leap-frog' type development; radial, strip, isolated or ribbon pattern type development; a failure to protect or conserve natural resources or agricultural land; limited accessibility; the loss of large amounts of functional open space; and the installation of costly and duplicative infrastructure when opportunities for infill and redevelopment exist.
3. Requests involving lands in critical areas for future water supply must be evaluated based on policy 2.4.2.
4. Requests moving lands from Density Reduction/Groundwater Resource must fully address Policy 2.4.3 of the Lee Plan Future Land Use Element.

- G. Justify the proposed amendment based upon sound planning principles. Be sure to support all conclusions made in this justification with adequate data and analysis.

**Item 1: Fee Schedule**

Map Amendment Flat Fee	\$2,000.00 each
Map Amendment > 20 Acres	\$2,000.00 and \$20.00 per 10 acres
Small Scale Amendment (10 acres or less)	\$1,500.00 each
Text Amendment Flat Fee	\$2,500.00 each

**AFFIDAVIT**

I, Everett E Henkel, III, certify that I am the owner or authorized representative of the property described herein, and that all answers to the questions in this application and any sketches, data, or other supplementary matter attached to and made a part of this application, are honest and true to the best of my knowledge and belief. I also authorize the staff of Lee County Community Development to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application.

## LETTER OF AUTHORIZATION

### TO LEE COUNTY COMMUNITY DEVELOPMENT

The undersigned do hereby swear or affirm that they are the fee simple title holders and owners of record of property commonly known as Gulf Shore Investments LLC and legally described in exhibit A attached hereto.

The property described herein is the subject of an application for zoning or development. We hereby designate Patrick C. Hunt as the legal representative of the property and as such, this individual is authorized to legally bind all owners of the property in the course of seeking the necessary approvals to develop. This authority includes but is not limited to the hiring and authorizing of agents to assist in the preparation of applications, plans, surveys, and studies necessary to obtain zoning and development approval on the site. This representative will remain the only entity to authorize development activity on the property until such time as a new or amended authorization is delivered to Lee County.

QUIT CLAIM DEED

THIS INDENTURE, made this 7th day of August, 2008, between Joseph W. Vickers, joined by his wife, Rosella Vickers, whose post office address is 5228 Orange River Boulevard, Fort Myers, FL 33905 and Carl H. Vickers, a single man, whose post office address is 5222 Orange River Boulevard, Fort Myers, FL 33905, party of the first part, and Gulf Shore Investments, LLC, a Florida limited liability company, whose post office address is P.O. Box 50340, Fort Myers, FL 33994, party of the second part,

WITNESSETH, that the said party of the first part in consideration of the sum of TEN DOLLARS and other good and valuable considerations, in hand paid by the said party of the second part, the receipt whereof is hereby acknowledged, has remised, released and quitclaimed, and by these presents does remise, release and quitclaim unto the said party of the second part all the right, title, interest claim and demand which the said party of the first part has in and to the following described lot, piece or parcel of land, situate lying and being in the County of Lee, State of Florida, to wit:

See Attached Exhibit A

TO HAVE AND TO HOLD the same, together with all and singular the appurtenances thereunto belonging or in anywise appertaining, and all the estate, right, title, interest and claim whatsoever of the said party of the said party of the first part, either in law or equity, to the only proper use, benefit and behoof of said party of the second part.

IN WITNESS WHEREOF, the said party of the first part has set his hand and seal the day and year first above written.

COMMUNITY DEVELOPMENT

A. SANITARY SEWER

Existing Available Service:

CPA 2010-00003

The proposed development is located within the City of Fort Myers North Wastewater Treatment Plant (a.k.a.: RALEIGH STREET WWTP ) service area. Utility service lines presently serve this site which is being converted from residential use to commercial uses. Connection to the franchise utility will continue with the proposed commercial uses.

Forecast Demand:

The proposed development assumes a 9,000 sf of gross floor area. As per F.A.C. 64E-6, the following calculations apply:

$$17 \text{ GPD per } 100 \text{ GFA}(9,000 \text{ SF}) = 1,530 \text{ GPD}$$

Concurrency report indicates the current capacity of City of Fort Myers North Wastewater Treatment Plant to be 11.0 MGPD. The usage for Estimated 2009 was 9.5 MGPD and Projected 2010 of 9.6 MGPD. This indicates more than adequate reserve capacity to serve this proposed development. The concurrency report for 2009 did not indicate any plans for expansion at that time.

Lee County Utilities has provided a Letter of Availability to serve the proposed commercial uses.

B. POTABLE WATER

Existing Available Service:

The proposed development is located within the Lee County Utilities Olga Water Treatment Plant service area. Utility service lines presently serve this site which is being converted from residential use to commercial uses. Connection to the franchise utility will continue with the proposed commercial uses.

Forecast Demand:

The proposed development assumes a 9,000 sf of gross floor area. As per F.A.C. 64E-6, the following calculations apply:

$$17 \text{ GPD per } 100 \text{ GFA}(9,000 \text{ SF}) = 1,530 \text{ GPD}$$

Concurrency report indicates the current capacity of Lee County Utilities Olga Water Treatment Plant to be 6.0 MGPD. The usage for Estimated 2009 was 3.0 MGPD and Projected 2010 of 3.1 MGPD. This indicates more than adequate reserve capacity to serve this proposed development. The concurrency report for 2009 did not indicate any plans for expansion at that time.

Lee County Utilities has provided a Letter of Availability to serve the proposed commercial uses.

## PUBLIC FACILITIES IMPACT

### EXISTING AND FUTURE CONDITIONS ANALYSIS

#### C. SURFACE WATER/DRAINAGE BASINS

##### Existing Available Service:

The applicant will provide a control structure at the time of Development Order application which will mimic the historic drainage patterns and discharge pre-treated stormwater runoff to the north into the street right of way. Historically the project area appears to drain as same. The master concept plan shows adequate area and volume to provide pretreatment of stormwater prior to discharge. A SFWMD permit is not required due to the small footprint of the site, less than 2 acres of impervious area.

##### Forecast Demand:

The total detention required is calculated to determine the greater of either: one-inch (1") rainfall over the entire site, or two and one-half inches (2.5") over the impervious area. The site is 39,565 sf but assuming 30% green area to remain due to the small footprint of the site and preservation of large oak trees along the southern portion of the property. Therefore the maximum impervious area would not exceed 27,759 sf. The greatest demand would be 5,783 c.f. of storage which can be provided on the site.

#### D. PARKS, RECREATION AND OPEN SPACE:

##### Existing Available Service:

The site is converting from residential to proposed commercial. A single family house is on the 0.9 acre lot. The population for a single family residence is estimated at 2.04 and is inconsequential for this analysis.

The 2009 Concurrency Report indicates that the regional and community parks have sufficient present capacity.

##### Forecast Demand:

For Regional and Community Parks the conversion from residential use to commercial uses will result in a net demand that is a positive impact and will result in a net surplus.

Open space is required to be a minimum of 30% of site for a new residential project, but the site is an existing developed residential lot with single family house. The small commercial open space minimum required is 20%, but due to the existing area along the south property line of large oak trees the open space on this site will be more than 30% so no net change.

## PUBLIC FACILITIES IMPACT

### EXISTING AND FUTURE CONDITIONS ANALYSIS

#### E. PUBLIC SCHOOLS:

##### Existing Available Service:

The site is converting from residential to proposed commercial. A single family house is on the 0.9 acre lot. The population for a single family residence is inconsequential for this analysis.

##### Forecast Demand:

The conversion from residential use to commercial uses will result in a net demand that is a positive impact and will result in a net surplus

RE: 5236 Orange River Blvd.  
Ft. Myers, FL 33905

To whom it may concern,

At the request of Patrick Hunt, the Tice Fire District reviewed the request for a land use amendment. The property is located at 5236 Orange River Blvd, Fort Myers, in Section 3, Township 44 South, Range 25 East, Lee County, Florida (District # 2). The Parcel I.D. # 03-44-25-01-00061.0010. The Tice Fire District does not object to the request for the change from residential to General Commercial Interchange. If you have any further questions , please contact me at (239) 694-2380.

Respectfully,

*Ted Ross Jr.*

### **Statement of Initial Review**

Lee County Emergency Medical Services (LCEMS) has performed a preliminary review of the project referenced herein. Based upon the limited amount of information provided, LCEMS has no initial concerns with the ability to provide service to this project.

The Small Scale Land Use Map Amendment is requested for 5236 Orange River Blvd, Fort Myers, in Section 3, Township 44 South, Range 25 East, Lee County, Florida (District #2), Parcel ID #03-44-25-01-00061.0010.

This current location is served by LCEMS Station 11, located at 10941 Palm Beach Blvd., which is approximately 3.23 miles away, and LCEMS Station 3, located at 1035 Terry St, which is approximately 3.26 miles away.

This statement does not indicate that any plans have been received, it just identifies that Lee County EMS has no initial concerns with the ability to provide service to this area.

Mr. Hunt,

The rezoning of property at 5236 Orange River Blvd., Parcel I.D. #03-44-25-01-00061.0010, would not affect the ability of the Lee County Sheriff's Office to provide core services at this time.

At the time of application for a development order or building permit, the applicant shall provide a Crime Prevention Through Environmental Design (CPTED) report done by the applicant and given to the Lee County Sheriff's Office for review and comments.

If you have any questions or need further information, please contact me.

Respectfully,

**SUBJECT: West Orange River CPD  
Small Scale Land Use Map Amendment**

Dear Mr. Hunt:

The Lee County Solid Waste Division is capable of providing commercial solid waste collection service for the subject property located at 5236 Orange River Blvd., Ft. Myers, FL through our franchised hauling contractors. Disposal of the solid waste from this commercial property will be accomplished at the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill. Plans have been made, allowing for growth, to maintain long-term disposal capacity at these facilities.

The Solid Waste Ordinance (08-10, Section 21) and the Lee County Land Development Code, Chapter 10, Section 10-261 have requirements for providing on-site space for placement and servicing of commercial solid waste containers. Please review these requirements when planning the project. If you have any questions, please call me at (239) 533-8000.

Sincerely,

William T. Newman  
Operations Manager  
Solid Waste Division

**Re: Letter of Service Availability  
West Orange River CPD – Small Scale Land Use Map Amendment**

Mr. Hunt:

Lee County Transit received your letter dated January 8, 2010 in reference to the Small Scale Land Use Map Amendment application for the parcel related to the subject site located at 5236 Orange River Boulevard. This location is within the established Palm Beach Blvd transit corridor and Lee County currently provides public transportation services through this corridor. We consider the subject property related to this Land Use Map Amendment Application to be within our existing service area. Our long range planning activities maintain this transit corridor and document the need for additional, enhanced services on the route providing service to this area. We anticipate the current capacity on this route to be sufficient to meet the needs of the proposed land use changes the applicant wishes to make.

If you have any questions please contact me at (239) 533-0333 or you can send an e-mail to [mhorsting@leegov.com](mailto:mhorsting@leegov.com).

Sincerely,

Michael Horsting, AICP

RE: Land Use Map Amendment request

Dear Mr. Hunt:

This letter is in response to your email dated March 1, 2010 for a land use map amendment request. This is located in the East Choice Zone, Sub Zone E-1.

This is an amendment to change from Suburban Land Use to General Commercial Interchange. After reviewing your request, the project has no impact on classroom needs.

Thank you for your attention to this issue. If I may be of further assistance, please call me at (239) 479-5661.

Sincerely,

Dawn Gordon, Community Development Planner  
Planning Department

**RE: POTABLE Water and Wastewater AVAILABILITY**  
**5236 ORANGE RIVER BLVD.**  
**STRAP #: 03-44-25-01-00061.0010**

Frank Mann  
District Five

Dear Mr. Hunt:

Karen B. Hawes  
County Manager

Potable water lines and wastewater lines are in operation in the vicinity of the proposed project mentioned above. However, in order to provide service to the subject parcels, developer funded system enhancements such as line extensions may be required.

David M. Owen  
County Attorney

Your firm has indicated that this project will consist of 1 commercial unit with an estimated flow demand of approximately 1,530 gallons per day. Lee County Utilities presently has sufficient capacity to provide potable water and sanitary sewer service as estimated above.

Diana M. Parker  
County Hearing Examiner

Availability of potable water and sanitary sewer service is contingent upon final acceptance of the infrastructure to be constructed by the developer. Upon completion and final acceptance of this project, potable water service will be provided through our Olga Water Treatment Plant.

Sanitary sewer service will be provided by the City of Fort Myers North Wastewater Plant. The Lee County Utilities' Operations Manual requires the project engineer to perform hydraulic computations to determine what impact this project will have on our existing system.

Prior to beginning design work on this project, a meeting should be scheduled with Thom Osterhout to determine the best point of connection and discuss requirements for construction.

With regard to effluent reuse service; there are currently no reuse facilities available in the vicinity of the project site therefore, Lee County does not have the capability of providing service at this time.

This letter should not be construed as a commitment to serve, but only as to the availability of service. Lee County Utilities will commit to serve only upon receipt of all appropriate connection fees, a signed request for service and/or an executed service agreement, and the approval of all State and local regulatory agencies.

Further, this letter of availability of Water and Wastewater service to be utilized for small scale land use amendment for this project only. Individual letters of availability will be required for the purpose of obtaining building permits.

Sincerely,

**LEE COUNTY UTILITIES**

5236 ORANGE RIVER - 03442501000610010.doc

JUSTIFICATION OF PROPOSED AMENDMENT  
EXHIBIT "G"

The proposed map amendment from Suburban to General Commercial Interchange is appropriate for the following reasons:

1. The subject property is part of what amounts to an enclave of residential property abutting more intense commercial uses.
2. The area is a part of the Palm Beach Boulevard Corridor which includes the southwesterly quadrant of the I-75 interchange and extends south beyond the limits of this property.
3. The property abuts a local deadend street which connects directly to signalized arterial intersection, Palm Beach Blvd.
4. The proposed commercial uses are compatible with the existing and projected uses in the area.

**RECEIVED**

MAR 17 2010

COMMUNITY DEVELOPMENT

LPA 2010-00003

Internal Consistency with the Lee Plan  
EXHIBIT "E"

**RECEIVED**  
MAR 17 2010

1. FLUM CAPACITY ANALYSIS

COMMUNITY DEVELOPMENT

This proposal has de minimus effects to Lee County population projections by reducing population by 2.09 as a result of eliminating one existing single family residence.

"Table 1(b) Year 2030 Allocations" to be modified by 0.9 acre or approximately one acre addition to the General Commercial Interchange and subtracted from Suburban. The proposal is a de minimus impact.

2. LEE PLAN ANALYSIS

**POLICY 1.3.3:** *"The General Commercial Interchange areas are intended primarily for general community commercial land uses: retail, planned commercial districts, shopping, office, financial, and business."* The request is consistent with this policy for the proposed commercial uses.

**OBJECTIVE 2.1: "DEVELOPMENT LOCATION.** *Contiguous and compact growth patterns will be promoted through the rezoning process to contain urban sprawl, minimize energy costs"* Property is adjacent to a 10 acre commercial development (North Trail RV) which is abutting I-75 in southwest quadrant of intersection with Palm Beach Blvd. It is located approximately 0.1 mile from a signalized intersection with Palm Beach Blvd providing convenient access to I-75. This proposal will serve to contain urban sprawl, minimize energy costs and conserve land by redevelopment near a major urban intersection.

**OBJECTIVE 2.2: "DEVELOPMENT TIMING.** *Direct new growth to those portions of the Future Urban Areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created."* The traffic analysis submitted with this application indicates that Palm Beach Blvd. will continue to operate at an adequate LOS with the approval of this proposed amendment. Public water and sewer are available, installed and adequate to serve.

**OBJECTIVE 2.4: "FUTURE LAND USE MAP AMENDMENTS.** *Regularly examine the Future Land Use Map in light of new information and changed conditions, and make necessary modifications."* Proposed amendment is adjacent to existing like category General Commercial Interchange and is the highest and best use of the property to amend to same category.

**POLICY 5.1.5:** *"Protect existing and future residential areas from any encroachment of uses that are potentially destructive to the character and integrity of the residential environment."* The proposed development will be reviewed as a CPD with all required buffers, shielded lighting and other measures which improve compatibility. Project abuts a more intense commercial use and will provide some level of shielding the more intense commercial uses from the residential area remaining.

Policy 6.1.2.9: *"The location standards in this policy are not applicable in the Interchange land use category"*.

Standards 11.1 and 11.2: The site is presently served by public water and sewer and the utility has provided letter of availability to serve this proposed development.

**Internal Consistency with the Lee Plan**  
**EXHIBIT "E"**

3. **EFFECTS TO ADJACENT LOCAL GOVERNMENTS**

The proposal is in the unincorporated area of Lee County and is not adjacent to the City of Fort Myers and has no effect on its comprehensive plan.

4. **CONSISTENCY WITH STATE AND REGIONAL PLANS**

This is a small scale amendment of only 0.9 acres and has de minimus effect on those plans.

Re: DHR No.: 2010-645/ Received by DHR: February 18, 2010  
West Orange River CPD- Rezoning of 0.91 Acre Parcel  
5236 Orange River Boulevard  
Parcel ID: 03-44-25-01-00061.0010  
Fort Myers, Lee County

Dear Mr. Hunt:

In accordance with the procedures contained in the Lee County local requirements, we reviewed the referenced parcel for possible impact to cultural resources (any prehistoric or historic district, site, building, structure, or object) listed, or eligible for listing, in the *National Register of Historic Places*, or otherwise of historical, archaeological, or architectural value.

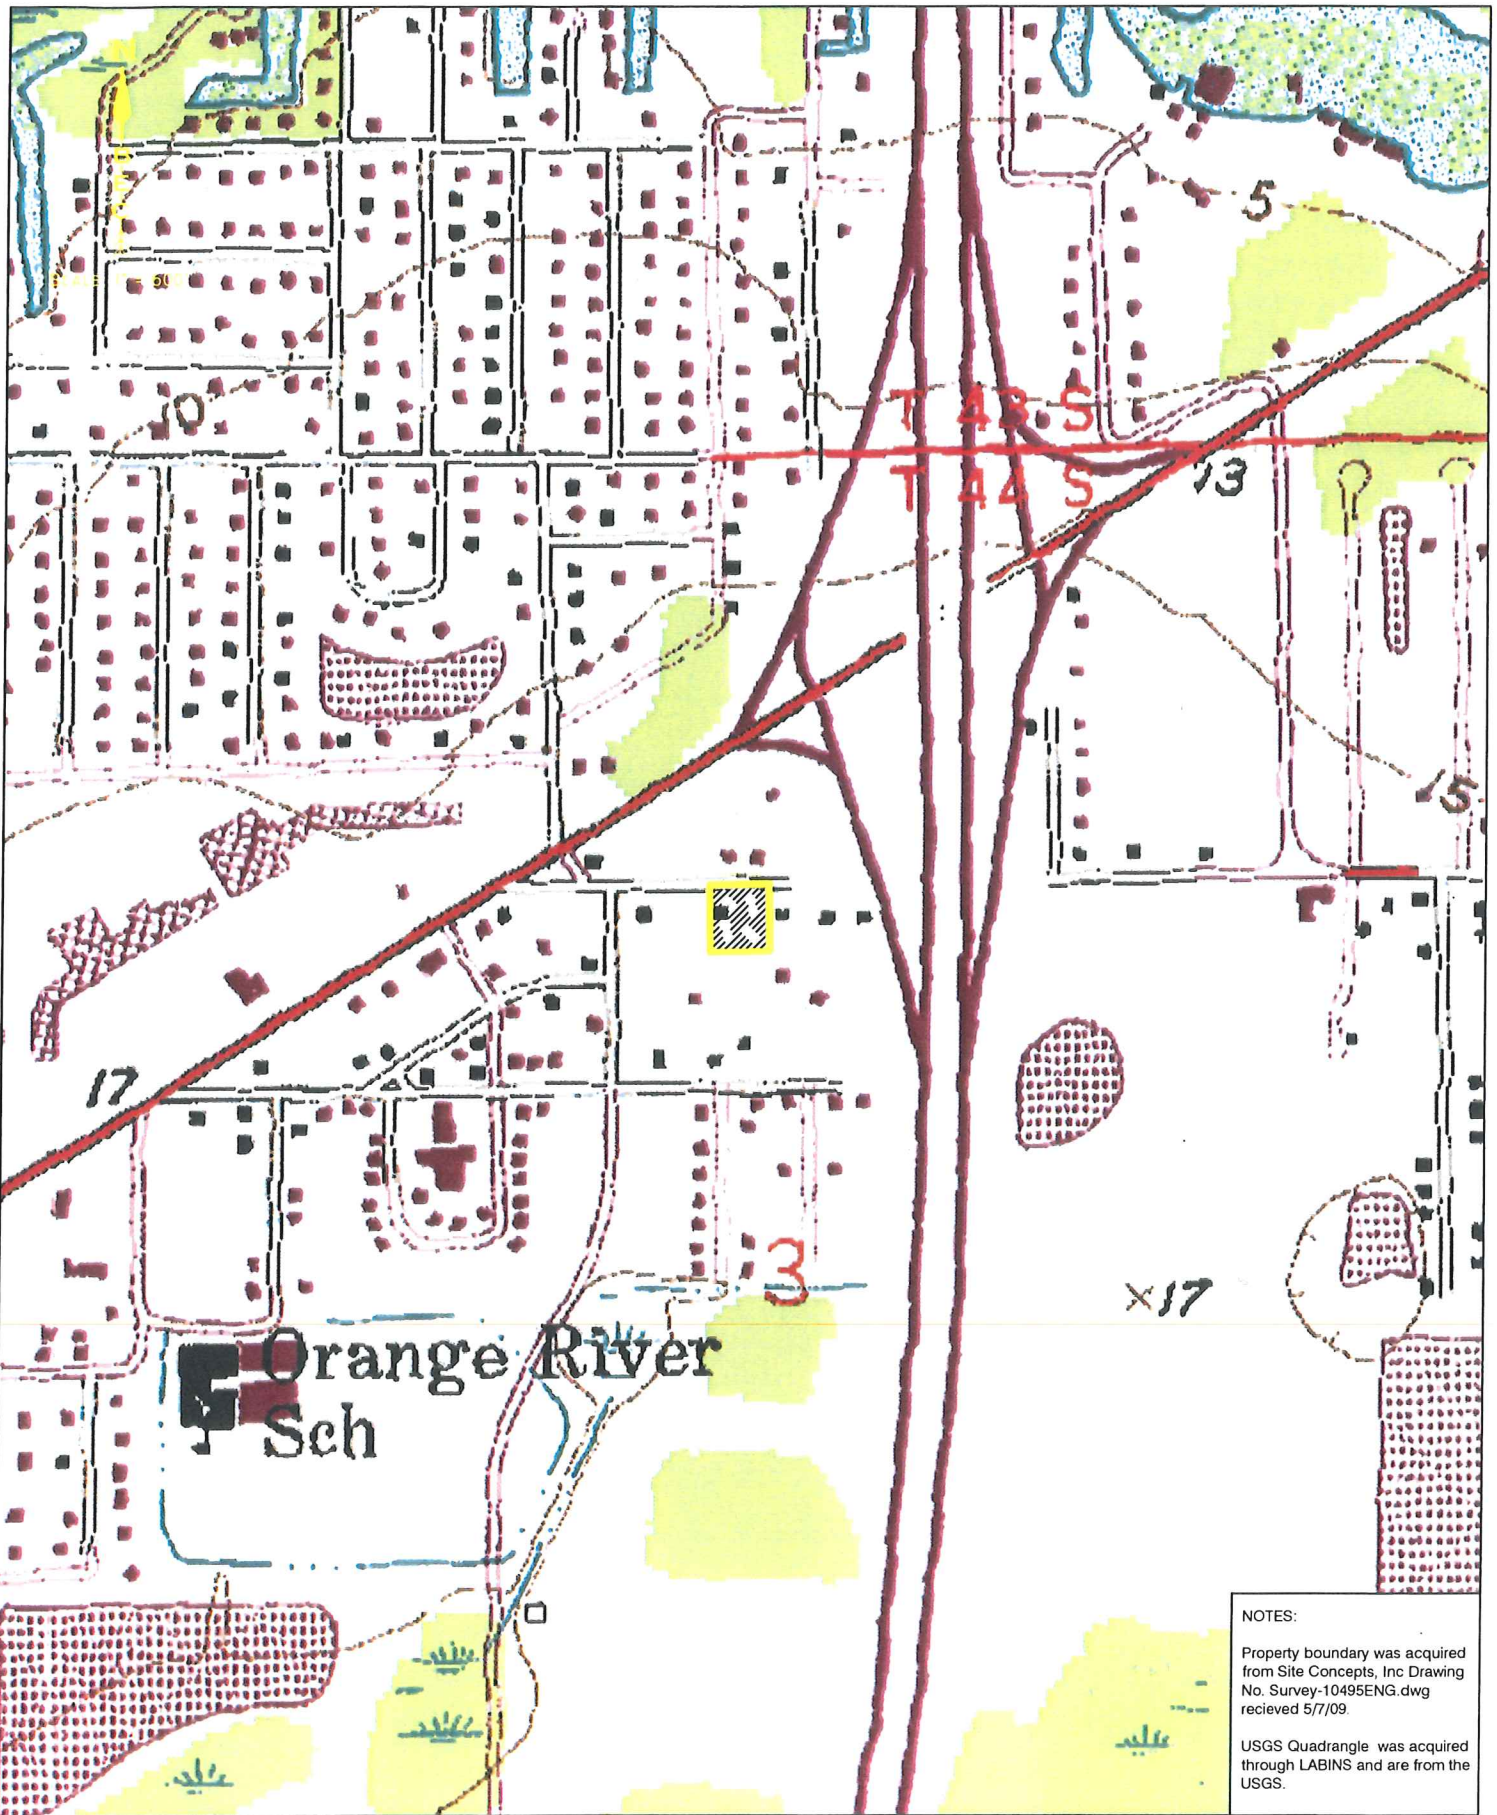

Based on the information provided, it is the opinion of this office that the building at the address listed above does not meet the criteria for listing in the *National Register*. In addition, a review of the Florida Master Site File indicates that no significant archaeological or historical resources are recorded within the project area. Therefore, the proposed undertaking will have no effect on historic properties.

If there are any questions concerning our comments or recommendations, please contact Katherine Peterson, Historic Sites Specialist, by phone at 850.245.6333, or by electronic mail at [kdpeterson@dos.state.fl.us](mailto:kdpeterson@dos.state.fl.us). We appreciate your continued interest in protecting Florida's historic properties.

Project No. 2010-2

## **INTRODUCTION**

Two environmental scientists from Boylan Environmental Consultants, Inc conducted a field investigation on the 0.86± acre property on May 19, 2009. The site is located in portions of Section 3, Township 44 South, Range 25 East, in Lee County, Florida. Specifically, it is situated west of I-75 and immediately south of Orange River Boulevard. Please see the attached Location Map Exhibit A.

The purpose of the field investigation was to identify and document the presence of any listed species and any potential listed (endangered, threatened, etc.) species inhabiting the site that are regulated by the U.S. Fish & Wildlife Service (FWS) and the Florida Fish & Wildlife Conservation Commission (FWC). The survey was conducted in the morning with temperatures in the low-mid 80's with a light breeze and mostly cloudy skies.

## **METHODOLOGY**

The survey method consisted of overlapping belt transects performed for all FLUCFCS communities onsite in compliance with the Lee County Endangered Species Ordinance No. 89-34. The specific methodology included pedestrian surveys of parallel transects conducted according to the survey methodology previously approved by Lee County.

This survey is comprised of a several step process. First, vegetation communities or land-uses on the study area are delineated using the Florida Land Use, Cover and Forms Classification System (FLUCFCS). Please see the attached FLUCFCS map (Exhibit B) and FLUCFCS map with aerial (Exhibit C). Next, the FLUCFCS codes are cross-referenced with the Lee County Protected Species List. This protected species list names the species which have a probability of occurring in any particular FLUCFCS community.

An intensive pedestrian survey is conducted using parallel belt transects that are approximately 10-40 feet apart, depending upon both the thickness of vegetation and visibility, as a means of searching for listed species. In addition, periodic "stop-look-listen" and quiet stalking methods are conducted for animals. Signs or sightings of these species are then recorded and are marked in the field with flagging tape. The table at end of the report lists the FLUCFCS communities found on the parcel and the corresponding species which have a probability of occurring in them.

Transects were walked approximately as shown on the attached protected species survey map (Exhibit D) and protected species survey map with aerial. Specific attention was placed on locating any gopher tortoise burrows.

**TABLE 1: SURVEY DATE AND WEATHER CONDITIONS**

<b>Survey Date</b>	<b>Survey Time</b>	<b>Weather Conditions</b>
May 19, 2009	Morning	Mostly cloudy with light winds and temperatures in the low-mid 80's

## **EXISTING SITE CONDITIONS**

*Site Details* – The boundary was obtained from Site Concepts Inc. and is assumed to be 0.91± acres. The site was undeveloped, but appears to have a long history of disturbance. In general, the property is composed of a residential home with a gravel parking pad and vacant land surrounding the home. The site is bordered by commercial and residential development and roadways.

*Soil Type* - The soils on the property have been mapped by the National Resource Conservation Service (NRCS, formerly the Soil Conservation Service). Please see the attached NRCS soils map (Exhibit E). These mappings are general in nature, but can provide a certain level of information about the site as to the possible extent of wetland area. The agencies commonly use these mappings as justification for certain wetland determinations. According to these mappings, the parcel is underlain by Myakka Fine Sand, soil number 11, non-hydric.

*Vegetation Communities* – Each community was mapped in the field according to the system in use by the agencies, the Florida Land Use Cover and Forms Classification System (FLUCFCS). Listed below are the vegetation communities or land-uses identified on the site. Vegetation is one parameter used in determining the presence of a wetland; the other parameters include the presence of wetland hydrology and hydric soils. These community mappings will generally reflect whether an area could be considered as wetlands. We did not identify any jurisdictional wetland communities on the site. The following descriptions correspond to the mappings on the attached FLUCFCS map. See Florida Land Use, Cover and Forms Classification System (Department of Transportation 1999) for definitions.

### **FLUCFCS CODES/DESCRIPTION**

#### **110 Residential (0.14± acres)**

These residential areas are occupied by single-family home sites and account for 0.14± acres of the property. This community should be considered uplands by regulatory agencies.

#### **740 Disturbed Land (0.77± acres)**

This upland area occupies 0.77± acres of the property. The canopy and sub-canopy was open. The ground cover includes dog fennel (*Eupatorium capillifolium*), ragweed (*Ambrosia artemisiifolia*), caesar weed (*Urena lobata*), hairy beggar-ticks (*Bidens alba*), sandspur (*Cenchrus echinatus*), Spanish needle (*Bidens bipinnata*), and bahia grass (*Paspalum notatum*). This community would be considered uplands by the regulatory agencies.

**TABLE 2: FLUCFCS COMMUNITY TABLE**

<b>FLUCFCS Code</b>	<b>Community Description</b>	<b>Upland Acres</b>
110	Residential	0.14± ac.
740	Disturbed Land	0.77± ac.
<b>Total:</b>		<b>0.91± ac.</b>

### **SPECIES PRESENCE**

The various listed species that may occur in the FLUCFCS communities have been tabulated on the attached table. In general, this site does not contain native, undisturbed community types in which protected species would typically inhabit. During the field survey for protected species on the property, no protected species or signs thereof were observed on-site. No nest-like structures or tree cavities were noted. No tortoise burrows were identified. There were two heritage live oak trees identified on-site, however, they are going to be preserved and incorporated into the site plan.

### **DISCUSSION**

The lack of tortoise burrows is likely due to the disturbed nature of the site and the historic land-use of the site. It is unlikely that this site supports or would provide habitat for protected species. The nearby roads also create a barrier and a hazard to other animals. Other non-listed animal species noted were a mocking bird and black vulture.

Community locations were estimated and drawn by using a non-rectified aerial with approximate property boundaries hence, their location, aerial extent, and acreage is approximate.

## **CONCLUSIONS**

### Off-Site Road Impact Mitigation Requirements

Based upon the analyses conducted by this Report, it has been concluded that the 5236 Orange River CPD will not have any negative impact upon the surrounding roadway infrastructure that warrant special mitigation needs. This conclusion is based upon the finding that the project does not significantly or negatively impact the surrounding roadways, and those roadways that will provide access to the project will operate at acceptable levels of service for 2015 and 2030 project build-out conditions. Furthermore, the project will not affect or require modifications to Lee County's 5-year Capital Improvement Program or 2030 Long-Term Financially Feasible Plan.

**Concurrency Review** – State Road 80 is classified as a six lane divided arterial having a performance standard of LOS E. A maximum service capacity of 2,920 vph during the 100<sup>th</sup> highest peak hour peak direction has been established for this road by the Lee County Concurrency Management Report. As determined, State Road 80 will have a 2015 and 2030 project build-out traffic volume of 1,159 vph and 1,589, respectively, which is a v/c ratio of 0.40 and 0.48, respectively. As such, this project is in conformance with the Lee County Government's Concurrency Management System.

## **PURPOSE OF REPORT**

The following Report has been prepared pursuant to the criteria set forth by the Traffic Impact Statement Guidelines as adopted by the Lee County Government for projects requesting a small-scale comprehensive land use amendment. More specifically, this Report examines the potential transportation related impacts that may occur as a result of the completion of this project.

## **SCOPE OF PROJECT**

The project (referred to as 5236 Orange River CPD) is a proposed mixed use commercial development that will have a maximum of 9,000 square feet of leasable floor space. The project site is located on the south side of West Orange River Boulevard and to the east of the Lexington Avenue/West Orange River Road intersection (refer to Figure 1 for a depiction of the site location).

The project will have one full access on West Orange River Boulevard. Project build-out is anticipated to occur by the year 2014.

## PROJECT GENERATED TRAFFIC

Traffic which can be expected to be generated West Orange River CPD has been estimated based upon the guidelines established by the Institute of Transportation Engineers, Trip Generation Manual, 8<sup>th</sup> Edition. That is, historical traffic data collected at similar type developments was relied upon in estimating the project's traffic. In referencing the historical data provided by the ITE Trip Generation Manual, it was concluded that Land Use Code "Shopping Center" (LUC 820) was most appropriate in estimating the anticipated traffic. *At this time, the project is proposing a wide range of commercial land uses. As such, the Report based its findings on the most intense development potential.*

Table 1 provides a detail of the calculations that were performed in estimating the project's anticipated traffic, which has been summarized below.

<b>Land Use</b>	<b>Build-out</b>	<b>New Trips Daily (ADT)</b>	<b>New Trips AM Peak (VPH)</b>	<b>New Trips PM Peak (VPH)</b>
LUC 820	9,000 S.F.	994 ADT	26 VPH	89 VPH

Based upon these results, the Report concludes that the project will generate less than 100 trip ends during the highest peak hour. As such, the Report investigated the traffic impacts based upon the criteria set forth by the Lee County Traffic Impact Statement Guidelines for developments generating "Less Than 100 Trips".

## EXISTING ROADWAY CONDITIONS

West Orange River Boulevard is two lane commercial grade local road.

State Road 80 is classified by the Lee County Government as a six lane divided arterial having a performance standard of LOS E. A maximum service capacity of 2,920 vph during the 100<sup>th</sup> highest peak hour peak direction has been established for this road by the Lee County Concurrency Management Report.

## AREA OF SIGNIFICANT IMPACT

The area of significant impact was determined based upon Lee County's 10% criteria (i.e., if the project's traffic is 10% or more of a roadway's adopted level of service LOS "C" capacity, then the project has a significant impact upon that link). Table 2A describes the project traffic distributions and the level of impact on the surrounding roadways. As shown, no roadways were found to be impacted by 10% or greater than its adopted level of service volume. As such, only State Road 80 is considered to be impacted by the project.

### **2015 & 2030 PROJECT BUILD-OUT CONDITIONS**

In order to establish 2015 and 2030 project build-out traffic conditions, traffic count data was adjusted for peak season conditions, peak hour conditions, peak direction, and an annual growth rate was then applied. The peak season/peak hour/peak direction factors as shown on Table 2B were derived from the 2009 Lee County Traffic Count Report. The annual growth rate was derived from historical traffic counts also described in the Traffic Count Report. After the correct adjustments were computed, the project generated traffic was then added to the 2015 and 2030 Background Traffic. Table 2C provides a detail of the 2015 and 2030 background plus project traffic conditions. As shown, State Road 80 will operate at an acceptable level of service for 2015 and 2030 project build-out conditions.

### **CONCURRENCY REVIEW**

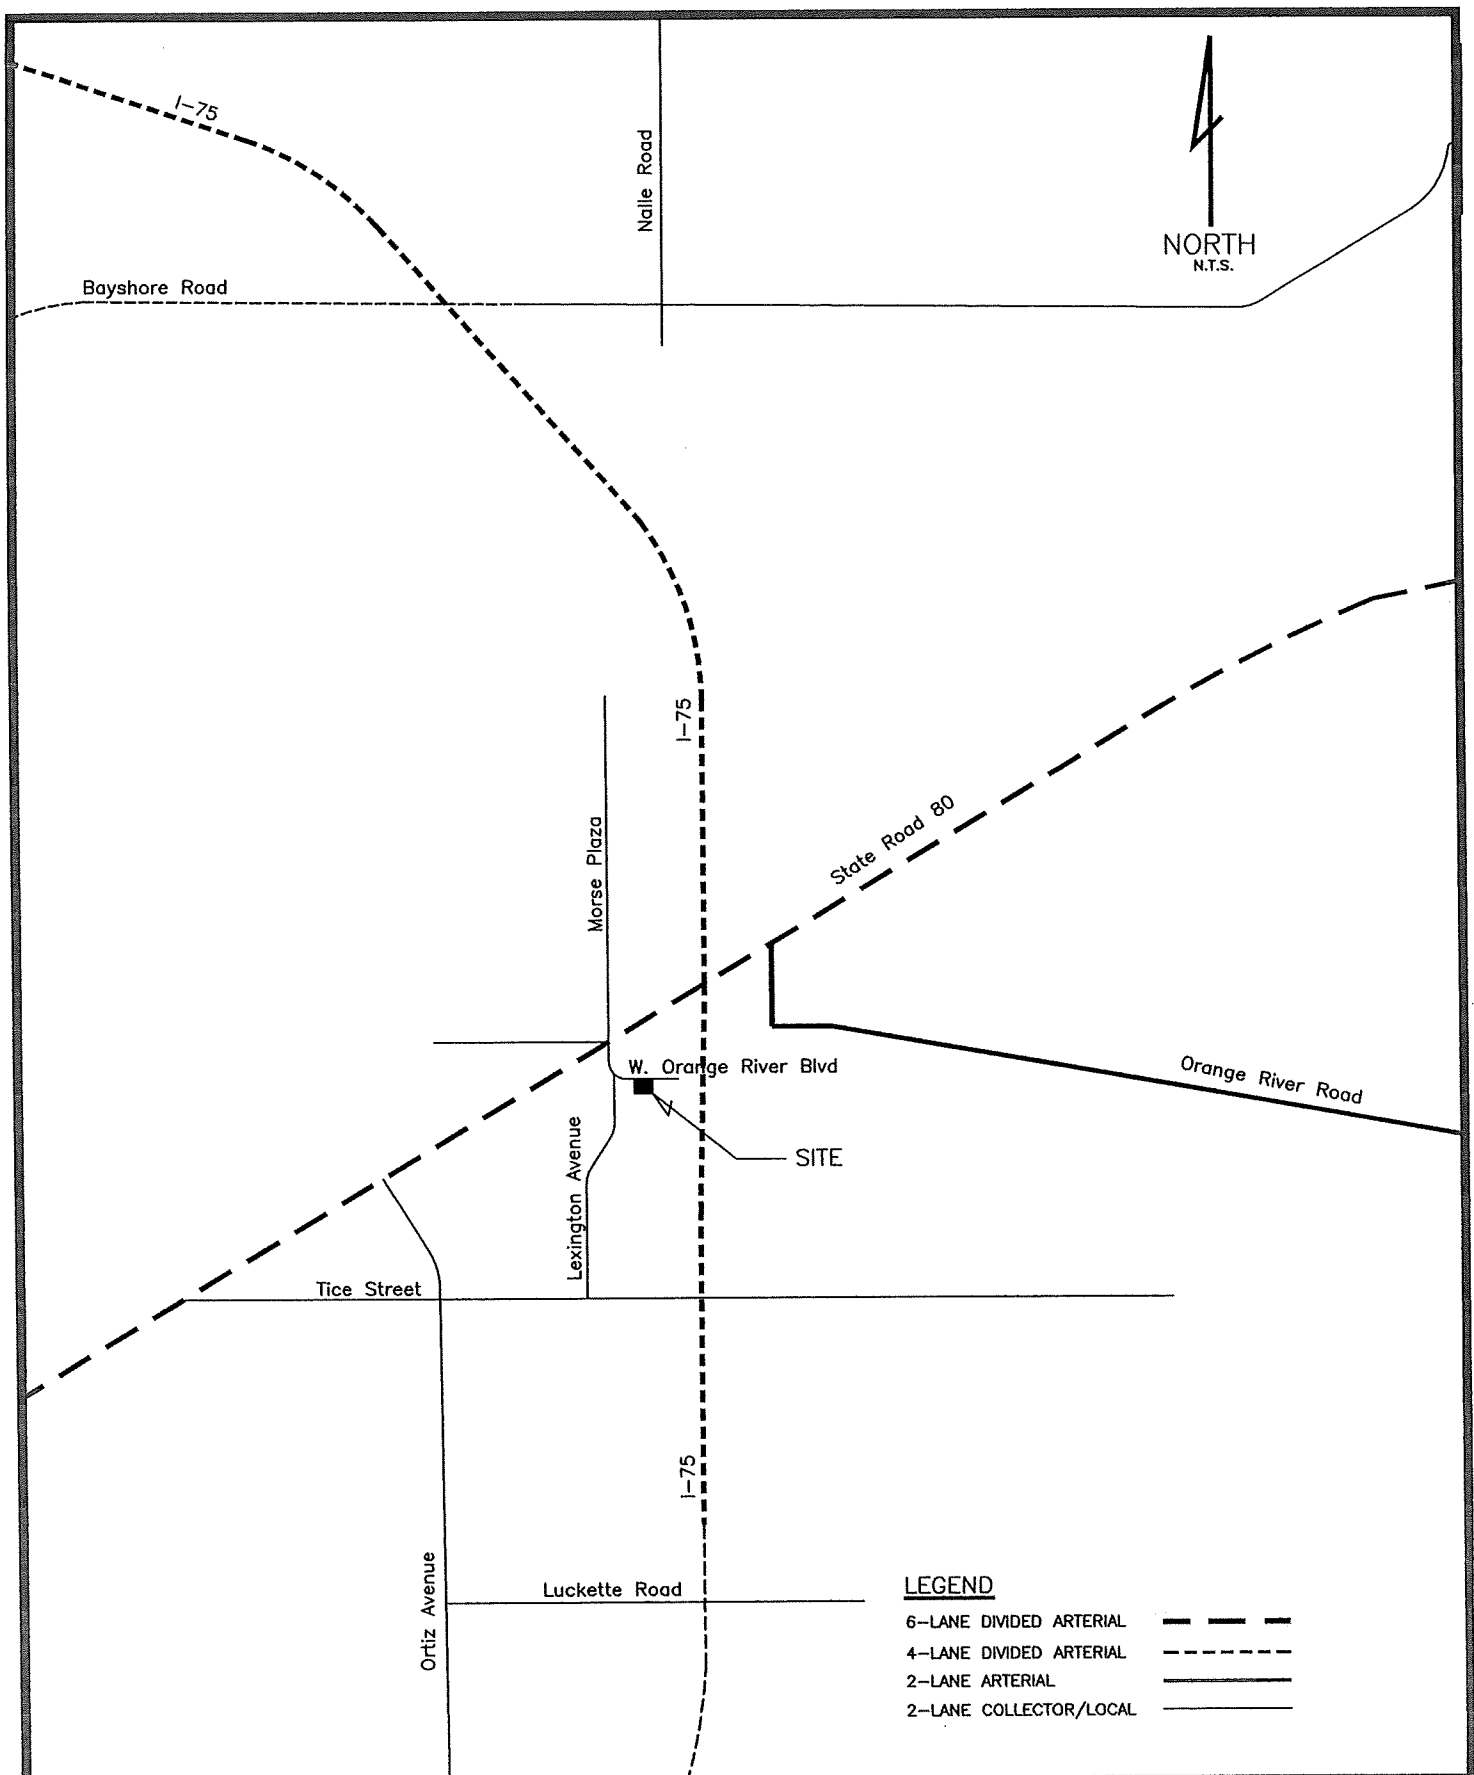

State Road 80 is classified as a six lane divided arterial having a performance standard of LOS E. A maximum service capacity of 2,920 vph during the 100<sup>th</sup> highest peak hour peak direction has been established for this road by the Lee County Concurrency Management Report. As determined, State Road 80 will have a 2015 and 2030 project build-out traffic volume of 1,159 vph and 1,589, respectively, which is a v/c ratio of 0.40 and 0.48, respectively. As such, this project is in conformance with the Lee County Government's Concurrency Management System.
