(Adopted by BOCC January 22, 2014)

EXHIBIT A

Note: Text depicted with underscores represents additions to the Lee Plan. Strike-through text represents deletions from the Lee Plan.

POLICY 18.1.5: In order to create a cohesive community, site design within the University Community must utilize alternative modes of transportation such as pedestrian networks, mass transit opportunities, sidewalks, bike paths and similar facilities. Site design must link related land uses through the use of alternative modes of transportation thus reducing automobile traffic within the University Community. The county will work cooperatively with the University on these matters as the University proceeds through the Campus Master Plan Process.

Prior to local Development Order approval on property within Area 9, the University Community, the developer must demonstrate that the proposed plan of development supports pedestrian, bicycle and transit opportunities. A multi-modal interconnection between the property and the FGCU campus must be provided at no cost to Lee County. The owner/developers must dedicate the right of way for the 951 extension between Alico Road and Corkscrew Road to Lee County prior to ~~Development of Regional Impact Development Order~~ rezoning approval. The value of the right of way on the date of dedication must not reflect the added value of the lands changed from DR/GR to University Community by virtue of CPA 2009-01. The county will issue road impact fee credits for the dedication.

No changes proposed to Policy 18.1.6 through 18.1.15

POLICY 18.1.16: For those lands in Area 9, all development must be designed to enhance and support the University. All rezonings in this area must include a specific finding that the proposed uses qualify as Associated Support Development, as that term is defined in the glossary. The final design and components will be determined as part of the ~~DR~~/rezoning process and must be consistent with the following development standards:

No changes proposed to Policy 18.1.16 numbered paragraphs 1 through 5.

6. Development Acreage: The previous mining and crushing operations in Area 9 have rendered a large portion of the property unsuitable for development. Some areas that were previously mined have been filled with materials left over from the crushing operations known as fines. These and other activities have left an area of approximately 350 acres that has never been mined that remains suitable for development of structures and other site improvements. Development is therefore limited to this area. The previously impacted areas may only be used for reclamations and development as unoccupied open space. Property may be designated for residential use,

non-residential use, or a combination of uses classified as mixed use. Out of the 350 acres available for development, 40 acres of developable land, not including right-of-way which is intended to serve as the connection between Area 9 and FGCU, will be dedicated to FGCU concurrent with ~~DRI~~rezoning approval. The 40 acres dedicated to FGCU will become part of the FGCU campus and development there will not be calculated against the maximum residential unit count, nor maximum commercial square footage otherwise allowed.

No changes proposed to Policy 18.1.16 numbered paragraph 7 to Policy 18.2.1

POLICY 18.2.2: The University Village is an area which provides the associated support development and synergism to create a viable University Community. This sub-category allows a mix of land uses related to and justified by the University and its development. Predominant land uses within this area are expected to be residential, commercial, office, public and quasi-public, recreation, and research and development parks. ~~In addition to complying with the Conceptual Master Plan required by Policy 18.1.10, all property within the University Village must undergo a Development of Regional Impact review.~~
