II. REQUESTED CHANGE (Please see Item 1 for Fee Schedule)

A. TYPE: (Check appropriate type)

Text Amendment

Future Land Use Map Series Amendment
(Maps 1 thru 24)

List Number(s) of Map(s) to be amended:

Maps 6 and 7 Lee County Utilities Future Service

1. Future Land Use Map amendments require the submittal of a complete list, map, and two sets of mailing labels of all property owners and their mailing addresses, for all property within 500 feet of the perimeter of the subject parcel. An additional set of mailing labels is required if your request includes a change to the Future Land Use Map (Map 1, page 1). The list and mailing labels may be obtained from the Property Appraisers office. The map must reference by number or other symbol the names of the surrounding property owners list. The applicant is responsible for the accuracy of the list and map.

At least 15 days before the Local Planning Agency (LPA) hearing, the applicant will be responsible for posting signs on the subject property, supplied by the Division of Planning, indicating the action requested, the date of the LPA hearing, and the case number. An affidavit of compliance with the posting requirements must be submitted to the Division of Planning prior to the LPA hearing. The signs must be maintained until after the final Board adoption hearing when a final decision is rendered.

B. SUMMARY OF REQUEST (Brief explanation):

To extend the service area of Lee County Utilities Potable Water and Sanitary Sewer Service to the subject property.

III. PROPERTY SIZE AND LOCATION OF AFFECTED PROPERTY (for amendments affecting development potential of property)

A. Property Location:

1. Site Address: Please see attached exhibit

2. STRAP(s): Please see attached exhibit

B. Property Information:

Total Acreage of Property: ±75

Total Acreage included in Request: ±75

Total Uplands: ±65.29 acres

Total Wetlands: ±9.71 acres

Current Zoning: AG-2

Current Future Land Use Designation: DRGR

Area of each Existing Future Land Use Category: DRGR – 34.07 Wetlands – 40.93

Existing Land Use: Vacant Single Family Residential Lots

C. State if the subject property is located in one of the following areas and if so how does the proposed change affect the area:

Lehigh Acres Commercial Overlay: NA

Airport Noise Zone 2 or 3: NA

Acquisition Area: NA

Joint Planning Agreement Area (adjoining other jurisdictional lands): NA

Community Redevelopment Area: NA

D. Proposed change for the subject property:

Amend Maps 6 and 7 to include the subject property within the service area.

E. Potential development of the subject property:

1. Calculation of maximum allowable development under existing FLUM:

Residential Units/Density	59 Lots, see Instrument 2007000298830
Commercial intensity	_____
Industrial intensity	_____

2. Calculation of maximum allowable development under proposed FLUM:

Residential Units/Density	59 Lots, see Instrument 2007000298830
Commercial intensity	_____
Industrial intensity	_____

IV. AMENDMENT SUPPORT DOCUMENTATION

At a minimum, the application shall include the following support data and analysis. These items are based on comprehensive plan amendment submittal requirements of the State of Florida, Department of Community Affairs, and policies contained in the Lee County Comprehensive Plan. Support documentation provided by the applicant will be used by staff as a basis for evaluating this request. To assist in the preparation of amendment packets, the applicant is encouraged to provide all data and analysis electronically. (Please contact the Division of Planning for currently accepted formats.)

A. General Information and Maps

NOTE: For each map submitted, the applicant will be required to provide a reduced map (8.5" x 11") for inclusion in public hearing packets.

The following pertains to all proposed amendments that will affect the development potential of properties (unless otherwise specified).

1. Provide any proposed text changes.
2. Provide a current Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources.
3. Provide a proposed Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources.
4. Map and describe existing land uses (not designations) of the subject property and surrounding properties. Description should discuss consistency of current uses with the proposed changes.
5. Map and describe existing zoning of the subject property and surrounding properties.
6. The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be

ted to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

7. A copy of the deed(s) for the property subject to the requested change.
8. An aerial map showing the subject property and surrounding properties.
9. If applicant is not the owner, a letter from the owner of the property authorizing the applicant to represent the owner.

B. Public Facilities Impacts

NOTE: The applicant must calculate public facilities impacts based on a maximum development scenario (see Part II.H.).

1. Traffic Circulation Analysis

The analysis is intended to determine the effect of the land use change on the Financially Feasible Transportation Plan/Map 3A (20-year horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit the following information:

Long Range – 20-year Horizon:

- a. Working with Planning Division staff, identify the traffic analysis zone (TAZ) or zones that the subject property is in and the socio-economic data forecasts for that zone or zones;
- b. Determine whether the requested change requires a modification to the socio-economic data forecasts for the host zone or zones. The land uses for the proposed change should be expressed in the same format as the socio-economic forecasts (number of units by type/number of employees by type/etc.);
- c. If no modification of the forecasts is required, then no further analysis for the long range horizon is necessary. If modification is required, make the change and provide to Planning Division staff, for forwarding to DOT staff. DOT staff will rerun the FSUTMS model on the current adopted Financially Feasible Plan network and determine whether network modifications are necessary, based on a review of projected roadway conditions within a 3-mile radius of the site;
- d. If no modifications to the network are required, then no further analysis for the long range horizon is necessary. If modifications are necessary, DOT staff will determine the scope and cost of those modifications and the effect on the financial feasibility of the plan;
- e. An inability to accommodate the necessary modifications within the financially feasible limits of the plan will be a basis for denial of the requested land use change;
- f. If the proposal is based on a specific development plan, then the site plan should indicate how facilities from the current adopted Financially Feasible Plan and/or the Official Trafficways Map will be accommodated.

Short Range – 5-year CIP horizon:

- a. Besides the 20-year analysis, for those plan amendment proposals that include a specific and immediated development plan, identify the existing roadways serving the site and within a 3-mile radius (indicate laneage, functional classification, current LOS, and LOS standard);
 - b. Identify the major road improvements within the 3-mile study area funded through the construction phase in adopted CIP's (County or Cities) and the State's adopted Five-Year Work Program;
Projected 2030 LOS under proposed designation (calculate anticipated number of trips and distribution on roadway network, and identify resulting changes to the projected LOS);
 - c. For the five-year horizon, identify the projected roadway conditions (volumes and levels of service) on the roads within the 3-mile study area with the programmed improvements in place, with and without the proposed development project. A methodology meeting with DOT staff prior to submittal is required to reach agreement on the projection methodology;
 - d. Identify the additional improvements needed on the network beyond those programmed in the five-year horizon due to the development proposal.
2. Provide an existing and future conditions analysis for (see Policy 95.1.3):
- a. Sanitary Sewer
 - b. Potable Water
 - c. Surface Water/Drainage Basins
 - d. Parks, Recreation, and Open Space
 - e. Public Schools.

Analysis should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- Franchise Area, Basin, or District in which the property is located;
- Current LOS, and LOS standard of facilities serving the site;
- Projected 2030 LOS under existing designation;
- Projected 2030 LOS under proposed designation;
- Existing infrastructure, if any, in the immediate area with the potential to serve the subject property.
- Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements; and
- Anticipated revisions to the Community Facilities and Services Element and/or Capital Improvements Element (state if these revisions are included in this amendment).
- Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water.

In addition to the above analysis for Potable Water:

- Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
- Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:
 - a. Fire protection with adequate response times;
 - b. Emergency medical service (EMS) provisions;
 - c. Law enforcement;
 - d. Solid Waste;
 - e. Mass Transit; and
 - f. Schools.

In reference to above, the applicant should supply the responding agency with the information from Section's II and III for their evaluation. This application should include the applicant's correspondence to the responding agency.

C. Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed use upon the following:

1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
2. A map and description of the soils found on the property (identify the source of the information).
3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
4. A map delineating the property boundaries on the Flood Insurance Rate Map effective August 2008.
5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

D. Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

1. A map of any historic districts and/or sites, listed on the Florida Master Site File, which are located on the subject property or adjacent properties.
2. A map showing the subject property location on the archeological sensitivity map for Lee County.

E. Internal Consistency with the Lee Plan

1. Discuss how the proposal affects established Lee County population projections, Table 1(b) (Planning Community Year 2030 Allocations), and the total population capacity of the Lee Plan Future Land Use Map.

2. List all goals and objectives of the Lee Plan that are affected by the proposed amendment. This analysis should include an evaluation of all relevant policies under each goal and objective.
3. Describe how the proposal affects adjacent local governments and their comprehensive plans.
4. List State Policy Plan and Regional Policy Plan goals and policies which are relevant to this plan amendment.

F. Additional Requirements for Specific Future Land Use Amendments

1. Requests involving Industrial and/or categories targeted by the Lee Plan as employment centers (to or from)
 - a. State whether the site is accessible to arterial roadways, rail lines, and cargo airport terminals,
 - b. Provide data and analysis required by Policy 2.4.4,
 - c. The affect of the proposed change on county's industrial employment goal specifically policy 7.1.4.
2. Requests moving lands from a Non-Urban Area to a Future Urban Area
 - a. Demonstrate why the proposed change does not constitute Urban Sprawl. Indicators of sprawl may include, but are not limited to: low-intensity, low-density, or single-use development; 'leap-frog' type development; radial, strip, isolated or ribbon pattern type development; a failure to protect or conserve natural resources or agricultural land; limited accessibility; the loss of large amounts of functional open space; and the installation of costly and duplicative infrastructure when opportunities for infill and redevelopment exist.
3. Requests involving lands in critical areas for future water supply must be evaluated based on policy 2.4.2.
4. Requests moving lands from Density Reduction/Groundwater Resource must fully address Policy 2.4.3 of the Lee Plan Future Land Use Element.

G. Justify the proposed amendment based upon sound planning principles. Be sure to support all conclusions made in this justification with adequate data and analysis.

Item 1: Fee Schedule

Map Amendment Flat Fee	\$2,000.00 each
Map Amendment > 20 Acres	\$2,000.00 and \$20.00 per 10 acres
Small Scale Amendment (10 acres or less)	\$1,500.00 each
Text Amendment Flat Fee	\$2,500.00 each

Corkscrew Ranch Small Scale Comprehensive Plan Amendment PUBLIC FACILITIES IMPACTS

Corkscrew Ranch is an existing subdivision within the Southeast Lee County Planning Community. The property was platted into 59 single family lots by Instrument 2007000298830 in September 2007. The subdivision has completed infrastructure per Development Order 891201800D. Currently, no homes are constructed within the subdivision. Future residential development would require a private well and septic system.

The applicant desires central potable water and sanitary sewer to be available to the existing single family lots. The proposed Comprehensive Plan Amendment would extend the Potable Water and Sanitary Sewer Service Area for Lee County Utilities to cover the 59 lot residential subdivision.

Potable Water

The subject property is within the service area limits for the Corkscrew Water Treatment Plant provided by Lee County Utilities. According to the 2012 Concurrency Report the Corkscrew WTP has a capacity of 15,000,000 gallons per day. In 2010 8,358,000 gallons per day and in 2011 12,553,097 gallons per day were actually used. 2012 estimated usage was 14,250,000 and 2013 is projected at 14,300,000 gallons per day. Lee County Utilities has confirmed from June 2012 to May 2013, the annual average daily finished water produced by the facility was 9.25 MGD. The anticipated needs of the proposed project are well within the remaining capacity of the Corkscrew Water Treatment Plant. A potable water transmission line exists along Corkscrew Road adjacent to the subject property to provide a point of connection. The LOS Standard for Potable Water is 250 gallons per residential connection.

Proposed Water Use

59 single family homes X 250 gallons = 14,750 gallons

Sanitary Sewer

The subject property is within the service area limits for the Three Oaks Regional Sewage Treatment Plant provided by Lee County Utilities. According to the 2012 Concurrency Report the Three Oaks Regional WWTP has a capacity of 6,000,000 gallons per day. In 2010, 2,789,000 gallons per day and in 2011 3,181,000 gallons per day were actually used. 2012 estimated usage was 3,400,000 and 2013 is projected at 3,500,000 gallons per day. The anticipated needs of the proposed project are well within the remaining capacity of the 2,500,000 gallons of the Three Oaks Regional Sewage Treatment Plant. The LOS Standard for Sanitary Sewer is 200 gallons per residential connection.

Proposed Sanitary Sewer Use

59 single family homes X 200 gallons = 11,800 gallons

Solid Waste – Lee County Waste to Energy Facility

The proposed amendment will not create any additional solid waste.

Surface Water/Drainage Basins – South Florida Water Management District

The proposed amendment will not alter the existing approved surface water management system.

Parks, Recreation, Open Space

The proposed amendment will not alter the existing approved open space nor will it increase need for parks and recreation opportunities.

Public School

The proposed amendment will not increase need for public schools.

Corkscrew Ranch Small Scale Comprehensive Plan Amendment LEE PLAN CONSISTENCY

Corkscrew Ranch is an existing, platted 59 lot subdivision that currently requires a potable water well and septic system. The applicant desires central potable water and sanitary sewer to be available to the subject property. The proposed Comprehensive Plan Amendment would extend the Potable Water and Sanitary Sewer Service Area for Lee County Utilities to cover the existing 59 lots. In compliance with Standard 11.1: Water and Standard 11.2: Sewer, the applicant has prepared this application to request that the service area of the adjacent water and sanitary sewer utility be extended to incorporate the Corkscrew Ranch Subdivision.

The existing, approved development will remain as currently approved. Therefore the application will not impact Lee County population projections, adjacent local governments, the DR/GR land use category, environmental and natural resources, or surrounding roadways.
