PART I - BACKGROUND AND STAFF RECOMMENDATION

A. SUMMARY OF APPLICATION

1. APPLICANT/REPRESENTATIVES:

Barbara Heine

2. REQUEST:

Amend Policy 18.1.16 to remove language that acknowledges that significant deviations may be made from Chapter 32 of the Land Development Code to accommodate development of a Compact Planned Development within Area 9 of the University Community.

B. STAFF RECOMMENDATION AND FINDINGS OF FACT SUMMARY

1. RECOMMENDATION:

Staff recommends that the Board of County Commissioners *not transmit* the proposed amendment to the Future Land Use Element of the Lee Plan.

2. BASIS AND RECOMMENDED FINDINGS OF FACT:

- The proposed privately initiated amendment to the Lee Plan was received on November 18, 2014.
- Policy 18.1.16 is specific to one property within the University Community Future Land Use Category, which is currently owned by Alico West Fund LLC.
- Policy 18.1.16, as currently written, acknowledges that the developer of the Alico West Area 9 property may need deviations from the Land Development Code to accommodate development.
- Florida Statute 163.3194 requires that all development be consistent with the Comprehensive Plan. Lee Plan Policy 18.1.16 has been reviewed by the state reviewing agencies and has been determined to be consistent with applicable Florida Statutes and the Lee Plan.
- Deviations from Chapter 32 of the Land Development Code could continue to be permitted even if the provision regarding “significant deviations” was deleted.
- Section 32-502(d) and (e) of the Land Development Code allows for deviations from the Land Development Code.

C. BACKGROUND INFORMATION

The University Community future land use category was initially adopted into the Lee Plan and Future Land Use Map on October 27, 1992 by Ordinance 92-47, which adopted PAM/T 92-02, Florida’s Tenth University. This Lee Plan amendment adopted the University Community future land use category descriptor policy, Policy 1.1.9, and Goal 20 (later renumbered to Goal 18): University Community, which provided generalized descriptions of the development that was anticipated to surround what is now Florida Gulf Coast University.

The University Community area was expanded in 2010 to include a 9th area. This was accomplished through an amendment to the Lee Plan adopted on October 20, 2010 by Ordinance 10-40 (Attachment 1), which adopted CPA2009-00001, Alico West. The Alico West Lee Plan amendment included details about the development of Area 9 of the University Community. The property that was the subject of Area 9 was previously an aggregate mine and was not originally included in the University Community area because it was not consistent with the desired uses. A South Florida Water Management District (SFWMD) Environmental Resource Permit (ERP) dated January 12, 2015 states that there are approximately 70 acres of wetlands on the lands that were added to the University Community.

Pursuant to Policy 18.1.16, development within Area 9 must be achieved under a Compact Planned Development rezoning and meet the requirements of Chapter 32 of the Land Development Code. Compact Planned Developments utilize a form based code.

PART II - STAFF ANALYSIS

A. STAFF DISCUSSION

The Subject Lee Plan text amendment proposes to amend Policy 18.1.16 of the Lee Plan as shown below in strike through formatting:

POLICY 18.1.16: *For those lands in Area 9, all development must be designed to enhance and support the University. All rezonings in this area must include a specific finding that the proposed uses qualify as Associated Support Development, as that term is defined in the glossary. The final design and components will be determined as part of the rezoning process and must be consistent with the following development standards:*

- 1. Mixed Use:*** *Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Alico West, Area 9, must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, ~~recognizing there may be significant deviations to accommodate the proposed development.~~ The following minimum and maximum development parameters per use are approved for Area 9, subject to transportation mitigation requirements:*

Residential: Minimum 800 units, maximum 1,950 units;

Retail: Minimum 200,000 square feet, maximum 543,000 square feet (Retail maximum may be reduced, to no less than the 200,000 square feet, to allow additional Office or Research and Development square feet at a 1 to 1 rate.);

Office/Research/Development: Minimum 400,000 square feet, maximum of 918,000 square feet (additional Office/Research/Development square feet may be added to the maximum if the maximum retail is reduced as described in the Retail parameters above);

Donation Site to University: Minimum 40,000 square feet, maximum 400,000 square feet; and

Hotel: Minimum 0 rooms, maximum 250 rooms.

Policy 18.1.16 is specific to Area 9 of the University Community, which was created as a result of CPA2009-00001, Alico West. As previously stated, development within Area 9 of the University Community is required to be rezoned as a Compact Planned Development

utilizing Chapter 32 of the Land Development Code. Because this form of development approval has not previously been utilized at the scale anticipated within Area 9 of the University Community, the applicant of CPA2009-00001 requested that the Lee Plan acknowledge significant deviations may be required to accommodate the form of development required by the Land Development Code. The adoption of Lee Plan Policy 18.1.16 did not create a mechanism to permit deviations from the Land Development Code; therefore deleting the portion as proposed by the applicant would not remove the ability of a developer to request deviations.

The approval process for a Compact Planned Development as outlined in the Chapter 32 of the Land Development Code allows for deviations to be requested from Chapter 32 as well as Chapters 10 and 34 as provided below:

*(d) **Deviations From Chapter 32** An applicant must clearly identify deviations requested from the specific standards of chapter 32. The Board of County Commissioners will decide whether to accept, modify, or reject each proposed deviation during the planned development rezoning process based on a determination as to the consistency of each deviation with this chapter, good planning practice for compact communities, and the deviation criteria in chapters 10 and 34. Potential deviations specific to compact communities include the following:*

(1) Modified block standards (section 32-225).

(2) For street types shown in article II, modified cross-sections (section 32-226) and/or modified streetscape standards (section 32-227).

(3) Additional street types, accompanied by proposed cross-sections (section 32-226) and streetscape standards (section 32-227).

(4) For lots types shown in article II, modified transect zone assignments (table 32-241), modified property development regulations (table 32-243), and/or modified use regulations (table 32-244).

(5) Additional lot types, accompanied by allowable transect zone assignments (table 32-241), proposed property development regulations (table 32-243), and proposed use regulations (table 32-244).

*(e) **Deviations From Other Chapters.** Deviations from other chapters of this Code may be requested as provided in chapters 10 and 34.*

(Ord. No. 10-25 , § 3, 6-8-10)

Consistent with Land Development Code Section 32-502 (d) and (e), Policy 18.1.16 acknowledges that the developer of the Alico West property may receive deviations from the Land Development Code. However, Policy 18.1.16 does not allow for deviations from the Lee Plan consistent with Florida Statute 163.3194, which requires that all development shall be consistent with the local Comprehensive Plans. Lee Plan Policy has been reviewed by the state reviewing agencies and has been determined to be consistent with applicable Florida Statutes and the Lee Plan.

CONSISTENCY WITH THE LEE PLAN

The proposed amendment would not impact consistency with the Lee Plan. However staff finds that the intent of the language that is proposed for deletion under the subject application was clear at the time CPA2009-00001, Alico West, was adopted. The intent, at the request of the Alico West applicant, was to provide flexibility within the Compact Planned Development zoning process necessary to assure that the resulting development of Area 9 of the University Community was able to provide associated support development to Florida Gulf Coast University while remaining consistent with Policy 18.1.16 of the Lee Plan.

CONSISTENCY WITH FEDERAL AND STATE REQUIREMENTS

The amendment would not have any impact on federal or state requirements.

B. STAFF RECOMMENDATION

Staff recommends that the Board of County Commissioners *not transmit* the proposed amendment to the Future Land Use Element of the Lee Plan. In addition, the County Attorney's office objects to the request and recommends that the Board not transmit the proposed amendment due to the fact the amendment would apply to a specific property that is not owned by the applicant for CPA2014-00009.

**PART III - LOCAL PLANNING AGENCY
REVIEW AND RECOMMENDATION**

DATE OF PUBLIC HEARING: February 23, 2015

A. LOCAL PLANNING AGENCY REVIEW

Staff gave a brief presentation regarding the proposed amendment, making a recommendation that the BOCC not transmit the proposed amendment. One Member of the LPA asked a question about the ownership of the affected property. The County Attorney's Office provided a response clarifying that the applicant did not own the affected property.

The applicant provided background information and outlined the proposed amendment. The applicant provided a handout that was distributed during the meeting (Attachment 2).

A representative for the affected property addressed the LPA concerning the proposed amendment. The representative requested that the LPA recommend non-transmittal to the BOCC. No other public input was received, so the public portion segment was closed.

One member of the LPA noted that he would be abstaining from a vote on this item because he had performed some land management work for the affected property's owner.

Please see attached minutes from the February 23, 2015 LPA Hearing for more details (Attachment 3).

A motion was made that the LPA recommend the BOCC *not transmit* the proposed change. The motion was called and passed 5-0.

B. LOCAL PLANNING AGENCY RECOMMENDATION AND FINDINGS OF FACT SUMMARY

1. RECOMMENDATION:

The LPA agreed with staff and recommends that the Lee County Board of County Commissioners *not transmit* the proposed Lee Plan amendment.

2. BASIS AND RECOMMENDED FINDINGS OF FACT:

The LPA accepted the basis and recommended findings of fact as advanced by staff.

C. VOTE:

LEE COUNTY ORDINANCE NO. 10-40

(Alico West)
(CPA2009-00001)

AN ORDINANCE AMENDING THE LEE COUNTY COMPREHENSIVE PLAN, COMMONLY KNOWN AS THE "LEE PLAN," ADOPTED BY ORDINANCE NO. 89-02, AS AMENDED, SO AS TO ADOPT AMENDMENT CPA2009-00001 (PERTAINING TO ALICO WEST) APPROVED DURING THE COUNTY'S 2009/2010 REGULAR COMPREHENSIVE PLAN AMENDMENT CYCLE; PROVIDING FOR PURPOSE, INTENT, AND SHORT TITLE; AMENDMENTS TO ADOPTED TEXT, TABLE 1b, AND FUTURE LAND USE MAP SERIES MAPS 1, 6, 7, AND 16; LEGAL EFFECT OF "THE LEE PLAN"; GEOGRAPHICAL APPLICABILITY; SEVERABILITY, CODIFICATION, SCRIVENER'S ERRORS, AND AN EFFECTIVE DATE.

WHEREAS, the Lee County Comprehensive Plan ("Lee Plan") Policy 2.4.1. and Chapter XIII, provides for adoption of amendments to the Plan in compliance with State statutes and in accordance with administrative procedures adopted by the Board of County Commissioners ("Board"); and,

WHEREAS, the Board, in accordance with Section 163.3181, Florida Statutes, and Lee County Administrative Code AC-13-6 provide an opportunity for the public to participate in the plan amendment public hearing process; and,

WHEREAS, the Lee County Local Planning Agency ("LPA") held a public hearing on the proposed amendment in accordance with Florida Statutes and the Lee County Administrative Code on May 24, 2010; and,

WHEREAS, the Board held a public hearing for the transmittal of the proposed amendment on June 16, 2010. At that hearing, the Board approved a motion to send, and did later send, proposed amendment CPA2009-00001 pertaining to Alico West to the Department of Community Affairs ("DCA") for review and comment; and,

WHEREAS, at the June 16, 2010 meeting, the Board announced its intention to hold a public hearing after the receipt of DCA's written comments commonly referred to as the "ORC Report." DCA issued their ORC report on August 27, 2010; and,

WHEREAS, on October 20, 2010, the Board held a public hearing and adopted the proposed amendment to the Lee Plan set forth herein.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF LEE COUNTY, FLORIDA, THAT:

SECTION ONE: PURPOSE, INTENT AND SHORT TITLE

The Board of County Commissioners of Lee County, Florida, in compliance with Chapter 163, Part II, Florida Statutes, and with Lee County Administrative Code AC-13-6, conducted public hearings to review proposed text, table, and map amendments to the Lee Plan. The purpose of this ordinance is to adopt the amendments to the Lee Plan discussed at those meetings and approved by a majority of the Board of County Commissioners. The short title and proper reference for the Lee County Comprehensive Land Use Plan, as hereby amended, will continue to be the "Lee Plan." **This amending ordinance may be referred to as the "2009/2010 Regular Amendment Cycle, Alico West Ordinance."**

SECTION TWO: ADOPTION OF LEE COUNTY'S 2009/2010 REGULAR COMPREHENSIVE PLAN AMENDMENT CYCLE

The Lee County Board of County Commissioners amends the existing Lee Plan, adopted by Ordinance Number 89-02, as amended, by adopting text, tables, and map amendments, as revised by the Board on October 20, 2010, known as CPA2009-00001 Alico West.

The amendments consist of revisions to certain Policies and Table 1b (Year 2030 Acreage Allocation) set forth in Exhibits A and B respectively. Underscored text in those exhibits represents additions to the Lee Plan. Strike-through text represents deletions from the Lee Plan.

The substance of the amendments to the Future Land Use Map Series include:

Map 1: The reclassification of property from Density Reduction Groundwater Resource to University Community.

Map 6: The inclusion of property in the Future Water Service Area.

Map 7: The inclusion of property in the Future Sewer Service Area.

Map 16: Reassignment of property from the Southeast Lee County to the San Carlos Planning Community.

Proposed amendments to text, tables, and Future Land Use Map Series are attached as Exhibits A (Text), B (Table 1b), C (Map 1), D (Map 6), E (Map 7) and F (Map 16).

The corresponding Staff Reports and Analysis, along with all attachments for this amendment are adopted as "Support Documentation" for the Lee Plan.

SECTION THREE: LEGAL EFFECT OF THE "LEE PLAN"

No public or private development will be permitted except in conformity with the Lee Plan. All land development regulations and land development orders must be consistent with the Lee Plan as amended.

SECTION FOUR: GEOGRAPHIC APPLICABILITY

The Lee Plan is applicable throughout the unincorporated area of Lee County, Florida, except in those unincorporated areas included in joint or interlocal agreements with other local governments that specifically provide otherwise.

SECTION FIVE: SEVERABILITY

The provisions of this ordinance are severable and it is the intention of the Board of County Commissioners of Lee County, Florida, to confer the whole or any part of the powers herein provided. If any of the provisions of this ordinance are held unconstitutional by a court of competent jurisdiction, the decision of that court will not affect or impair the remaining provisions of this ordinance. It is hereby declared to be the legislative intent of the Board that this ordinance would have been adopted had the unconstitutional provisions not been included therein.

SECTION SIX: INCLUSION IN CODE, CODIFICATION, SCRIVENERS' ERROR

It is the intention of the Board of County Commissioners that the provisions of this ordinance will become and be made a part of the Lee County Code. Sections of this ordinance may be renumbered or relettered and the word "ordinance" may be changed to "section," "article," or other appropriate word or phrase in order to accomplish this intention; and regardless of whether inclusion in the code is accomplished, sections of this ordinance may be renumbered or relettered. The correction of typographical errors that do not affect the intent, may be authorized by the County Manager, or his or her designee, without need of public hearing, by filing a corrected or recodified copy with the Clerk of the Circuit Court.

SECTION SEVEN: EFFECTIVE DATE

The plan amendments adopted herein are not effective until a final order is issued by the DCA or Administrative Commission finding the amendment in compliance with Section 163.3184(9), Florida Statutes, or until the Administrative Commission issues a final order determining the adopted amendment to be in compliance in accordance with 163.3184(10), Florida Statutes, whichever occurs earlier. No development orders, development permits, or land uses dependent on this amendment may be issued or commence before the amendment has become effective. If a final order of noncompliance is issued by the Administration Commission, this amendment may nevertheless be made effective by adoption of a resolution affirming its effective status. A copy of such resolution

will be sent to the DCA, Bureau of Local Planning, 2555 Shumard Oak Boulevard, Tallahassee, Florida 32399-2100.

THE FOREGOING ORDINANCE was offered by Commissioner Manning, who moved its adoption. The motion was seconded by Commissioner Judah. The vote was as follows:

John E. Manning	Aye
Brian Bigelow	Nay
Ray Judah	Aye
Tammara Hall	Aye
Frank Mann	Aye

DONE AND ADOPTED this 20th day of October 2010.

ATTEST:
CHARLIE GREEN, CLERK

LEE COUNTY
BOARD OF COUNTY COMMISSIONERS

BY: *Lisa L. Green*
Deputy Clerk

BY: *Ray Judah*
Tammara Hall, Chair

DATE: 10/20/10

Approved as to form by:

Donna Marie Collins
Donna Marie Collins
County Attorney's Office

EXHIBIT A
Policy Text Amendments

POLICY 1.1.9: The University Community land use category provides for Florida's 10th University, Florida Gulf Coast University (FGCU), and for associated support development. The location and timing of development within this area must be coordinated with the development of the University and the provision of necessary infrastructure. All development within the University Community must be designed to enhance and support the University. In addition to all other applicable regulations, development within the University Community will be subject to cooperative master planning with, and approval by, the Board of Regents of the State University System Florida Gulf Coast University Board of Trustees.

Prior to development in the University Community land use category, there will be established a Conceptual Master Plan which includes a generalized land use plan and a multi-objective water management plan. These plans will be developed through a cooperative effort between the property owner, Lee County, and South Florida Water Management District.

Within the University Community are two distinct sub-categories: University Campus and the University Village. The University Window overlay, although not a true sub-category, is a distinct component of the total university environment. Together these functions provide the opportunity for a diversity of viable mixed use centers. Overall residential development within average density for the University Village will not exceed 6,510 dwelling units^{2.5} units per acre. None of the 6,510 dwelling units may be used on or transferred to lands located outside of the University Community land use boundaries as they exist on (insert here the date of adoption of CPA 2009-01). Clustered densities within the area may reach fifteen units per acre to accommodate university housing. The overall average intensity of non-residential development within the University Village will be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to Map 16 and Table 1(b). Specific policies related to the University Community are included within the Lee Plan under Goal 18.

POLICY 1.3.5: The University Village Interchange land use category is designed to accommodate both interchange land uses and non-residential land uses related to the University. Development within this interchange area may or may not be related to, or justified by the land use needs of the University. Land uses allowed within this area include those allowed in the Industrial Commercial Interchange category and the associated support development allowed in the University Village. The overall average intensity of non-residential development will be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to Map 16 and Table 1(b). See the definition of Associated Support Development in the Glossary. Cooperative master planning and approval by the Board of Regents Florida Gulf Coast University Board of Trustees will be required prior to development within this land use category. Additionally, any development ~~within this land use category~~ which meets or exceeds the Development of Regional Impact thresholds, either alone or through aggregation, must conform to the requirements of Chapter 380 F.S.

GOAL 6: Commercial Land Uses to POLICY 6.1.2, paragraph 8 contain no proposed changes.

- (9) The location standards in this policy are not applicable in the Interchange land use category, or in Lehigh Acres where commercial uses are permitted in accordance with Goal 32, or within the Captiva community in the areas identified by Policy 13.2.1., or in Area 9 of the University Community Conceptual Master Plan.

POLICY 6.1.2, paragraph 10 to POLICY 6.1.2, paragraph 13 contain no proposed changes.

GOAL 18: University Community to POLICY 18.1.3 contain no proposed changes.

POLICY 18.1.4: Lee County will maintain and as necessary adopt regulations further defining how densities for individual parcels within the University Community will be determined. The regulations will address how the total number of units will be tallied to ensure that the overall total number of residential units within the University Village do not exceed 6,510 dwelling units-average density of 2.5 units an acre will be maintained. The regulations will provide a mechanism for clustering densities within the University Community.

POLICY 18.1.5: In order to create a cohesive community, site design within the University Community must utilize alternative modes of transportation such as pedestrian networks, mass transit opportunities, sidewalks, bike paths and similar facilities. Site design must link related land uses through the use of alternative modes of transportation thus reducing automobile traffic within the University Community. The county will work cooperatively with the University on these matters as the University proceeds through the Campus Master Plan Process.

Prior to local Development Order approval on property within Area 9 of the University Community, the developer must demonstrate that the proposed plan of development supports pedestrian, bicycle and transit opportunities. A multi-modal interconnection between the property and the FGCU campus must be provided at no cost to Lee County. The owner/developers must dedicate the right of way for the 951 extension between Alico Road and Corkscrew Road to Lee County prior to Development of Regional Impact Development Order approval. The value of the right of way on the date of dedication must not reflect the added value of the lands changed from DR/GR to University Community by virtue of CPA 2009-01. The county will issue road impact fee credits for the dedication.

POLICY 18.1.6 to POLICY 18.1.8 contain no proposed changes.

POLICY 18.1.9: Prior to the commencement of development within the University Community land use category, an area-wide Conceptual Water Management Master Plan must be submitted to and approved by Lee County and South Florida Water Management District staff. This water management plan will be integrated with the Conceptual Master

Plan and be prepared through a cooperative effort between the property owner, Lee County, and South Florida Water Management District. This master plan will ensure that the water management design of any development within the University Community will maintain or improve the currently existing quality and quantity of groundwater recharge. This plan must be consistent with the drainage basin studies that were prepared by Johnson Engineering, and approved by the SFWMD. Lee County will amend the county land development regulations to require all new development to be consistent with the appropriate basin study. Development of Regional Impact, zoning and Development Order approvals within the University Community Area 9 must provide an environmental assessment that includes a fines relocation/disposal plan to be implemented at the time of development of the property. Prior to zoning or Development Order approval on any portion of Area 9, the developer must demonstrate through modeling, accepted by Lee County staff, that the proposed development will not create significant impacts on present or future water resources.

POLICY 18.1.10: Development within the University Community land use category will be consistent with the Generalized Land Use Map and the eight area descriptions contained on or between pages 6 through 10 of the University Community Conceptual Master Plan, dated April 1994. The University Community Conceptual Master Plan is hereby amended to include a new Area 9 which is east and north of areas 5 and 8 and bounded on the east side by the Florida Power and Light easement and the north by Alico Road.

POLICY 18.1.11 contains no proposed changes.

POLICY 18.1.12: To encourage a variety of wildlife habitats and university study sites, special consideration will be given in the Conceptual Master Plan to the preservation of portions of the most pristine and diverse wildlife habitat areas (such as, pine flatwoods, palmetto prairies, and major cypress slough systems) as an incentive to reduce, on a one-for-one basis, open space requirements in other developments within the University Community. The implementation of this policy will occur at the time of zoning and development review. The development of the lands in Area 9 at the county's request, may include the construction of a rookery island, funded by the developer, within the existing mining lake that separates the Area 9 property from the Miromar Lakes residential community. The rookery island would provide wildlife habitat and would be made available to FGCU for use as an environmental study site.

POLICY 18.1.13 to POLICY 18.1.15 contain no proposed changes.

POLICY 18.1.16: For those lands in Area 9, all development must be designed to enhance and support the University. All rezonings in this area must include a specific finding that the proposed uses qualify as Associated Support Development, as that term is defined in the glossary. The final design and components will be determined as part of the DRI/rezoning process and must be consistent with the following development standards:

- 1. Mixed Use:** Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Area 9 must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, recognizing there may be significant deviations to accommodate the proposed development. The following minimum and maximum development parameters per use are approved for Area 9, subject to transportation mitigation requirements:

Residential Minimum 800 units, maximum 1,950 units;

Retail Minimum 200,000 square feet, maximum 543,000 square feet (Retail maximum may be reduced, to no less than the 200,000 square feet, to allow additional Office or Research and Development square feet at a 1 to 1 rate.);

Office/Research/
Development Minimum 400,000 square feet, maximum of 918,000 square feet (additional Office/Research/Development square feet may be added to the maximum if the maximum retail is reduced as described in the Retail parameters above);

Donation Site to
University Minimum 40,000 square feet, maximum 400,000 square feet;

and

Hotel Minimum 0 rooms, maximum 250 rooms.

- 2. Main Street Town Center:** The development must provide an area for a main street town center that is supportive of FGCU, with mixed use development employing the Traditional Neighborhood Development (TND) form as defined in the glossary of the Plan. This portion of the development must contain mixed use buildings but may also contain some single use buildings. The Town Center must be a minimum of 25 Gross Acres. The minimum Residential Units within the area defined as the Town Center will be 200. Commercial Uses, including retail, office, employment, institutional or civic uses within the Town Center must provide a minimum total of 125,000 square feet. Coupled with the applicable Policy Framework, the required minimum percentage of non-residential land uses in the Town Center will be as follows:

<u>Retail /Commercial:</u>	<u>50% MIN</u>
<u>Office / Employment:</u>	<u>25% MIN</u>
<u>Public, Institutional & Civic:</u>	<u>5% MIN</u>

3. **Density:** To ensure the creation of a development that has sufficient residential mass to support the proposed main street town center while providing a mixture of housing types to meet the needs and accommodate the varying lifestyles of persons related directly and indirectly to the University as required by policy 18.1.2, the total project net density within the residential component area of Area 9 must be a minimum of 5 units per acre, but not to exceed a total of 1,950 dwelling units.

4. **Retail Uses:** The total retail floor area for Area 9 will not exceed a maximum of 543,000 square feet. Retail uses should be appropriately sized to enhance FGCU and private residential development in the area. While individual structures may be larger in size, the maximum floor area limitations for single user retail stores are as follows:
 - a. One (1) grocery store may be constructed to a maximum of 45,000 square feet;
 - b. Up to two (2) retail stores may be constructed not exceeding a total of 60,000 square feet per store, with no more than 30,000 square feet per floor;
 - c. Up to three (3) retail stores may be constructed not exceeding 30,000 square feet per store; and,
 - d. At build out, at least 50 % of all finished retail square footage must be utilized by retail stores smaller than 10,000 square feet but may be contained in multi-use buildings.

The Site Location Standards described in Goal 6 of the Lee Plan are not applicable to University Community Area 9.

5. **Research and Development Facilities:** Research and development facilities and office buildings are encouraged which will attract the targeted industries as established by the State of Florida and by Lee County to create economic diversity and to create synergy between FGCU and private facilities. As required by policy 18.1.1, the emphasis will be on University related scientific research and high technology development activities but may also include and allow a diversity of activities that support the University and private development within Area 9 in keeping with the predominant land uses as established by Policy 18.2.2.

6. **Development Acreage:** The previous mining and crushing operations in Area 9 have rendered a large portion of the property unsuitable for development. Some areas that were previously mined have been filled with materials left over from the crushing operations known as fines. These and other activities have left an area of approximately 350 acres that has never been mined that remains suitable for

development of structures and other site improvements. Development is therefore limited to this area. The previously impacted areas may only be used for reclamations and development as unoccupied open space. Property may be designated for residential use, non-residential use, or a combination of uses classified as mixed use. Out of the 350 acres available for development, 40 acres of developable land, not including right-of-way which is intended to serve as the connection between Area 9 and FGCU, will be dedicated to FGCU concurrent with DRI approval. The 40 acres dedicated to FGCU will become part of the FGCU campus and development there will not be calculated against the maximum residential unit count, nor maximum commercial square footage otherwise allowed.

7. **Connectivity to FGCU:** To further implement Policy 18.1.5 relative to alternative modes of transportation, Area 9 will be designed with a connection to the easterly portion of FGCU. This connection will be a pedestrian-friendly multi-modal facility, with traffic calming, multi use paths, and student safety features. Prior to vertical development on Area 9 this connection must be in place.
8. **Pedestrian Friendly Design:** The development will be designed as a pedestrian-friendly community with student safety features, including traffic calming, sidewalks on both sides of the road system, safety call boxes, and facilities to accommodate the FGCU Eagle Express and other alternative modes of transportation.
9. **Golf Course Prohibited:** In order to facilitate a compact design, maximize the use of the developable area within Area 9, and to accomplish the goals established in Policy 18.2.2 to develop and support a viable University Community, Area 9 is prohibited from having a golf course facility.
10. **Parking:** Parking in Area 9 should be minimized to the furthest extent possible in order to create a walkable community that considers the needs of pedestrians and recognizes the possibility for internal trip capture. Parking may be minimized by using on-street parking, shared parking, or structured parking. All parking must be consistent with the requirements identified below:
 - A. **Within the Town Center/Core Area of Area 9 parking requirements are as follows:**
 1. **A minimum of 50% of the required parking will be contained in parking structures.**
 2. **A maximum of 25% of the parking required for the Town Center/Core Area may be surface parking lots, in an area no greater than 10 acres. The 10 acres will not include any water management features of the development.**

3. A minimum of 25% of the required parking would be on street parking in a TND design.
 4. Off-street surface parking must be located to minimize the presence of the surface parking facility by shielding the parking areas with liner buildings, courtyards and buffers. Further, the developer is encouraged to reduce the amount of surface parking by designing the development in a manner that promotes shared parking agreements, mixed uses, internal trip capture, and alternative modes of transportation such as transit, biking and walking, whenever possible.
- B. Within the remainder of the Area 9 on-street parking may be provided to offset off-street parking requirements. Off-street parking must be located to minimize the presence of any surface parking facilities by shielding such parking with liner buildings, courtyards and buffers. Further the developer is encouraged to reduce the amount of surface parking by designing the development in a manner that promotes shared parking agreements, use of on-street parking, mixed uses, internal trip capture, and alternative modes of transportation such as transit, biking and walking, whenever possible.
- C. Deviations from the number of parking spaces required by the Land Development Code may be appropriate in Area 9.
11. **Residential Uses:** Single-family residential units and zero lot line units, as defined in the Land Development Code, will each be limited to 195 units. All single-family residential units and zero lot line units must be constructed on lots smaller than 6,500 square feet.
 12. **Entertainment District:** Area 9 may contain public and private entertainment venues, including but not limited to facilities such as amphitheaters, theaters, bars and cocktail lounges, restaurants, bowling alleys, batting cages, arcades, as well as passive recreation facilities.
 13. **Landscaping:** All plantings used in buffers and landscaping must be installed using xeriscape principles. Xeriscape principles include water conservation through drought-tolerant landscaping, the use of appropriate plant material, mulching, and the reduction of turf areas. All development must hook-up to water re-use lines when they become available. At least 75 percent of all landscaping must be native landscaping.
 14. **Reclamation:** Development within Area 9 must include reclamation of the adjacent mine pit, including installation of appropriate littoral zones.

15. **Florida Gulf Coast University Participation:** The owner or agent for any Development of Regional Impact or Planned Development rezoning requests must conduct two meetings with the President of FGCU or his designees and will provide detailed information to such representatives at those meetings relating to the Site Plan and Master Concept Plan for any proposed development within Area 9. The developer must invite Lee County zoning and planning staff to participate in such meetings. These meetings must be conducted before the application can be found sufficient. The applicant is fully responsible for providing the meeting space and providing security measures as needed. Subsequent to this meeting, the applicant must provide County staff with a meeting summary document that contains the following information: the date, time, and location of the meetings, list of attendees; a summary of the concerns or issues that were raised at the meetings; and a proposal of how the applicant will respond to any issues that were raised.

16. **Stormwater Retention for adjacent transportation facilities:** Area 9 will accommodate stormwater detention/retention requirements for the Alico Road widening and County Road 951 extension adjacent to the property, if constructed.

17. **Development Within Five Years of Comprehensive Plan Amendment approval:** Development within five years of the comprehensive plan amendment for Area 9, including the 40 acre parcel to be donated to FGCU, is limited as follows: 105,000 square feet of commercial-retail development, 45,000 square feet of general office development, 200 residential units of which a maximum of 100 units may be either single family or zero lot line or a combination thereof, and 40,000 square feet of development on the University parcel. Approval of Development Orders after the first five years or beyond these limitations must address transportation deficiencies through one or more of the mitigation options afforded by the DRI process.

OBJECTIVE 18.2 to POLICY 18.2.2 contain no proposed changes.

POLICY 18.2.3: The University Window Overlay includes the area within 100 feet on both sides of the right-of-way of the following roadway segments:

Treeline Avenue	From Alico Road to Corkscrew Road
Alico Road	From I-75 to Treeline Avenue <u>the Future Extension of County Road 951</u>
Corkscrew Road	From I-75 to Treeline Avenue
Koreshan Boulevard <u>Esterio Parkway</u>	From I-75 to Treeline Avenue

With input from affected property owners, Lee County and the ~~Board of Regents~~ Florida Gulf Coast University Board of Trustees will develop mutually agreed upon standards for the University Window addressing landscaping, signage and architectural features visible from the designated roadway segments.

POLICY 38.1.8: The County may pursue a joint funding mechanism (such as an MSTU/MSBU) to pay for the widening of Alico Road east of Ben Hill Griffin Parkway to encourage economic development in the Alico Road area. Properties that generate traffic on the segment of Alico Road east of Ben Hill Griffin Parkway that have not already fully mitigated traffic impacts will be required to participate in the funding mechanism. Participation will be creditable against future road impact fees or DRI proportionate share obligations consistent with County regulations. Property that was subject to CPA2009-01 will donate 75 feet of right-of-way along the entire frontage of Alico Road. The donation of right-of-way along Alico Road will not be creditable against road impact fees or DRI proportionate share obligations.

General Notes

1. All building footprint sizes and shapes are for informational purposes only and may be subject to change, however, the location of building lot types will remain consistent.
2. All storm water lines are approximate in size and location and may be subject to change.
3. The proposed development will maintain or improve the existing quality and quantity of stormwater recharge and will not cause significant impacts on present or future water resources.
4. FGCU Donation Parcel is not included in this development.

Lee Plan Text References

TRADITIONAL NEIGHBORHOOD DEVELOPMENT (TND) - A form of development that creates mixed-use, mixed-income neighborhoods that are compact, diverse and walkable. (Added by Ordinance No. 07-14)

POLICY 18.1.2: The University Community will provide a mix of housing types with densities sufficient to meet the needs of and designed to accommodate the varying lifestyles of students, faculty, administration, other university personnel and employees of the associated support development. (Amended by Ordinance No. 00-22)

1. **Mixed Use:** Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan.

2. **Main Street Town Center:** The development must provide an area for a main street town center that is supportive of FGCU, with mixed use development employing the Traditional Neighborhood Development (TND) form as defined in the glossary of the Plan. This portion of the development must contain mixed use buildings but may also contain some single use buildings. The Town Center must be a minimum of 25 Gross Acres. The minimum Residential Units within the area defined as the Town Center will be 200.

POLICY 1.5.1: Permitted land uses in Wetlands consist of very low density residential uses and recreational uses that will not adversely affect the ecological functions of wetlands. All development in Wetlands must be consistent with Goal 114 of this plan. The maximum density is one dwelling unit per twenty acres (1 du/20 acre) except as otherwise provided in Table 1(a) and Chapter XIII of this plan. (Amended by Ordinance No. 94-30)

POLICY 114.1.1: Development in wetlands is limited to very low density residential uses and uses of a recreational, open space, or conservation nature that are compatible with wetland functions. The maximum density in the Wetlands category is one unit per 20 acres, except that one single family residence will be permitted on lots meeting the standards in Chapter XIII of this plan.

POLICY 114.1.2: The county's wetlands protection regulations will be consistent with the following:

4. Every reasonable effort will be required to avoid or minimize adverse impacts on wetlands through the clustering of development and other site planning techniques. On- or off-site mitigation will only be permitted in accordance with applicable state standards.

Referenced from the DCI2013-00023 Staff Report

14. Deviation from Number of Building Floors

Deviation from Section 32-243 which requires lined building lots to have a minimum height of 2 stories to allow 30% of the retail lined building lots to have one story.

Staff recommends **approval** of this deviation. The request for one story buildings is to be able to provide a stepped height transition into the CenterPlace development from Alico Road and from the adjacent, surrounding 2 story multi-family residential to the Town Center.

18. Deviation from Minimum dwelling Units

Deviation from Section 32-274(4)b. which requires at least 10 dwelling units per acre within all Core Transect Zones **to allow no dwelling units.**

Staff recommends **approval** of this deviation. CenterPlace has been designed to consider the interaction between uses, residents, and visitors at the build out of the project. The Core Transect has been designed to represent the most intense uses within the proposed project. The Core Transect has been designed consistent with traditional neighborhood development to promote on-street activities, gathering spaces, and public access.

28. Deviation to Allow no Residential in Mixed Use Building Lots

Deviation from Section 32-241(d)(3) which defines a Mixed Use Building Lot as a lot located and designed to accommodate a multi-story building with multiple dwellings in upper stories and various commercial uses in any story **to allow no dwelling units in the upper stories.**

Staff recommends **approval** of this deviation. The Core and Center Transects have been designed to represent the more intense uses. The Central Core is proposed to capture most intense uses on-site and the buildings as proposed do not mix uses vertically. Rather various commercial uses will occur vertically within a mixed use building. This proposal is still consistent with traditional neighborhood development and will promote on-street activities, gathering spaces, and public access. To ensure these activities do not disturb the proposed residents, the Apartment Buildings are proposed proximate to the Core but buffered from the activities within the Core by placement and orientation.

JULY 24, 2014, DAY TWO OF HEARING

HEARING EXAMINER: Please, everyone again, if you can't hear or you're having any trouble hearing or understanding, please raise your hand so we can address that immediately.

Good morning, Donna Marie Collins, Hearing Examiner. Today is the second day of hearing in the CenterPlace case. The date is July 24th, 2014.

MR. BASINAIT: Good morning.

HEARING EXAMINER: Good morning.

MR. BASINAIT: We have David Depew as our next witness.

MR. DEPEW: Good morning, madam hearing examiner. I was sworn yesterday. I assume I'm still under oath.

HEARING EXAMINER: Yes.

MR. DEPEW: My name is David Depew. I am a planner. I'm representing the applicant. My resume is on file, and I appear before you today in my guise as an expert in planning and zoning issues which I have been certified in as an expert in this forum on many occasions in the past and would seek such certification once more.

HEARING EXAMINER: Okay. Proceed.

(Mr. Depew still speaking; below)

9

1 as part of the county's future through this
2 process.

3 We talked at some length about the site plans
4 that are associated with this. I want to make a
5 couple of points about these, and what I would
6 like to do that as well is ask the hearing
7 examiner as you're looking at this to keep in mind
8 the Chapter 32 requirements.

9 This is really the first large project that's
10 come in under Chapter 32, and as such, and we'll
11 get into this in a little bit more detail, as
12 such, it's exposed some of the challenges
13 associated with Chapter 32, and as such, the
14 interesting elements of Chapter 32 that we've been
15 working through with staff over time have, I
16 think, created a unique awareness on the part of
17 not only the applicant but also the staff of some
18 of the elements of Chapter 32 that are going to
19 ultimately be addressed over time.

20 First and probably most significant in terms
21 of how Chapter 32 relates to this particular
22 project is that Chapter 32 and the compact
23 community code is oriented towards single family,
24 and much of the effort in Chapter 32 to describe
25 the land form that is intended to evolve deals

(Mr. Depew still speaking; below)

10

1 with different kinds of single family
2 configurations with regard to lots and alleys and
3 detached garages and rear-entry residences and lot
4 sizes and lot perimeters and front porches and
5 front yard setbacks, things like that, so the
6 residential component is slanted very strongly
7 toward single family.

8 This project doesn't have any single family in
9 it at the moment. This is all multi-family in one
10 form or another, and in fact, the comprehensive
11 plan provisions, which again, we'll talk about in
12 a little bit more detail, I'm just trying to set
13 the stage for some of this, the comprehensive plan
14 components associated with this project have a
15 serious restriction on the amount of single family
16 that you can put on this project. They strongly
17 orient it towards multi-family.

18 When we first put this together under the
19 comprehensive plan amendment back in 2009 and
20 2010, that wasn't fully appreciated, I think, but
21 what's happened as a result of that is that -- and
22 happily, everybody agreed that the language in the
23 designation suggested that deviations might indeed
24 be necessary, but what's happened as we worked
25 through this, and I would commend staff, they've

13

(Mr. Depew is still speaking; below)

1 development itself along with the geometry of the
2 lake, you see the development itself stretching
3 here along Alico Road, then clustering around the
4 town center area, and ultimately coming over here
5 to the research and development area with a
6 variety of different residential types, and yet by
7 doing this, even though it has stretched out a
8 bit, we've also attempted to provide very strong
9 interconnections from a variety of sources, both
10 pedestrian connections and bicycle connections,
11 but also shuttle and transit connections as well
12 as automobile connections.

13 The Chapter 32 requires a series of plans that
14 ultimately control what development is going to
15 take place on a subject property, and it does that
16 by putting in various types of transects. In this
17 instance, we have a core transect which is this
18 red color. We have a center transect which is
19 this orange, and then we have a general transect
20 which is the yellow.

21 We've had to add the R and D, sorry, that's a
22 civic one there. We've had to -- I'll go back to
23 regulating plan. Whoops. We talk about -- we're
24 going to talk about the R and D, but we've got a
25 civic transect, and then finally we have a storm

20

(Mr. Depew still speaking; below)

1 and go through these as quickly as I can. A lot
2 of these we're got going to spend a lot of time
3 on. These two, they're fairly standard.

4 The illustrative plan and the detailed
5 regulating plan, I believe we've got new dates on
6 those, but, you know, again, we'll use whatever
7 the latest dates are, and clearly, this is the
8 development application here of limitation of the
9 development.

10 The conditions talk about the schedule of
11 uses. I talked about the certain kinds of
12 buildings. The schedule of uses, and this is
13 what's so different about Chapter 32. Instead of
14 saying we're going to have and have this long list
15 of uses, what they do is they tell you certain
16 kinds of buildings have certain kinds of uses, so
17 that's why it looks like this, and again, Chapter
18 32, there's a table in there, and it basically
19 says, you know, for line buildings, you get all
20 the uses in RM-2 and CC and blah, blah, and all
21 these different things, so that's how they've got
22 them done rather than have them set out like they
23 do in Chapter 34 with these long tables with
24 different kind of uses in them.

25 So what I've tried to do here is just simply

21

(Mr. Depew still speaking; below)

1 go on what staff has been saying, but I've also,
 2 when we get to apartment buildings, attempted to
 3 modify those uses somewhat and drop down, and I
 4 believe that the staff is in agreement with us,
 5 drop some of the uses that you would normally see
 6 in an apartment building type of setting out of
 7 that particular type of use.

8 So for lined buildings, which are generally
 9 the buildings that you'll find in the core and
 10 center transects, the uses that are intended to go
 11 in those, and remember that we're promoting these
 12 mixed uses, are all the RM-2 uses, attached
 13 dwelling units, live/work units, all uses allowed
 14 in community commercial, hotel/motel, all uses
 15 allowed in CF-2 and all uses allowed in CF-3.
 16 CF-2 being community facilities two and community
 17 facilities three.

18 Similarly, in the mixed use buildings, it's
 19 the same, almost the same set of uses. It drops
 20 out the hotel/motel uses. I'm sorry, it leaves in
 21 hotel/motel uses, but -- so it's all the same set
 22 of uses, so there's really not much difference in
 23 terms of line buildings and mixed use buildings,
 24 and again, those are the buildings you find in the
 25 core and center transects, so, you know, those are

28

(Mr. Depew still speaking; below)

1 regulations as part of the set of conditions that
 2 you're going to be reviewing, and again, what's
 3 happened in Chapter 32 is they give you a chart
 4 that provides you with all the various different
 5 types of uses and the various lot areas, lot
 6 widths, frontage percentages, lot coverage, and
 7 all the other characteristics that you see across
 8 here on this particular table.

9 This has been modified in order to use the
 10 uses that we proposed in this particular project,
 11 so we have the line, the mixed use, the apartment,
 12 R and D, and all of the various uses that you see
 13 there on that table, and then what we've done is
 14 we've come across the table and provided
 15 characteristics for each one of the elements that
 16 you see on the table as you go through.

17 And what this is intended to do is to go along
 18 with all the various uses and tell you how
 19 ultimately you're going to develop this particular
 20 piece of property, and in this particular
 21 instance, we show the core, the center, and the
 22 general transects as to where things are going.

23 We've also included the research and
 24 development lots and civic buildings and all the
 25 other stuff over here under lot type, and so

29

(Mr. Depew still speaking; below)

1 that's where -- what happens is you start to blend
2 back together the elements of these steps for
3 different plans and show how the development is
4 going to look ultimately in anyone of the given
5 transects or anyone of the given lot types, and so
6 --

7 HEARING EXAMINER: There's a reduction in the
8 height, I understand, in the core and center area?

9 MS. MONTGOMERY: Please speak into the
10 microphone again, please.

11 MR. DEPEW: Yes, ma'am. There's a reduction
12 in height in a couple of the transects, and
13 there's an increase in height in one or two of the
14 transects as well.

15 So if you compare this to the chart that's in
16 Chapter 32, it's a little bit different when you
17 get over into these areas here, especially in
18 these two, the core and center for the lined
19 building and I believe the mixed use building, and
20 then when you get to the apartment building in the
21 general transect, it's a little bit taller. So
22 that's -- those are the basic differences.

23 Additionally, as you see, we've got an
24 asterisk in a couple of the locations, and those
25 areas we're talking about the potential of up to

48

1 opportunity, not just for me, but for the county,
2 for the developer, all parties involved. I was
3 immediately interested in it.

4 I understood that the code was new. I read
5 through the code cover to cover, I'll say multiple
6 times, and read a lot of things within that code
7 that I've read in many other codes before. There
8 were some differences.

9 Knowing that the county had just adopted this
10 code, we had several, I'll call, meeting slash
11 workshops with the county at various stages of the
12 evolution of the plan, and during those meetings,

13 I tried my best to communicate that there were
14 some issues with the code in terms of things that
15 were missing, things that we needed to address to
16 make our project even more successful. So I think
17 in certain regards, we've actually helped improve,
18 you know, improve upon the code in the design of
19 our project.

20 This slide really speaks to my first meeting
21 with the client actually here in Fort Myers, and
22 these were some images that I had pulled very
23 early on in the design process, probably before
24 pen even went to paper to talk about the urban
25 design considerations. Knowing we had to design

(Mr. Depew still speaking; below)

50

1 center, and we think we've tried to do that in
2 accordance with that.

3 These town center minimum areas and units,
4 again, are out of the comprehensive plan. We
5 believe we've met all of these criteria, and we
6 think that this is all a part of the design that
7 we ended up having to implement on this particular
8 site, and you know, frankly it's one of the
9 reasons that project looks like it does because
10 these particular criteria are in there.

11 The single family and zero lot line number
12 limitations. As I indicated to you in my
13 prefatory remarks, the single-family residential
14 and zero lot line units are limited to 195 units
15 out of the total. So we've got 1,950 units and
16 195 of them can be single family. Well, we don't
17 have any single family in here at this point, so
18 but you see what happens when you get -- when you
19 look at that Chapter 32, you'll see there's an
20 awful lot of effort that's been expended on
21 showing how you're going to fit single family
22 cottage style, Celebration, Watercolor, Seaside
23 type units into a compact community.

24 We don't have that in this thing. It's not
25 that kind of animal. It's a different sort of

(Mr. Depew still speaking; below)

51

1 animal, and the design is reflective of that, and
2 candidly, the number of deviations that are
3 requested are reflective of that as well, and of
4 the fact that the compact community code, which is
5 really the first major project that's come in
6 under that, and we're still evolving that.

7 So excavation of fines. Again, this is all
8 about protecting water quality. Discharge into
9 the attenuation lake is prohibited, and anything
10 that we -- anything we excavate of fine materials
11 have to be handled properly and not discharged
12 into the attenuation lakes.

13 Dedicate 951 extension. There was some
14 discussion about this because the original
15 language on this was about all the way down to
16 Corkscrew Road, but this project doesn't control
17 all the way down the Corkscrew Road, so all we can
18 do is give you to the end of the project, and
19 that's -- so that's what that does.

20 We talked about perimeter setback and
21 buffering requirements, and the condition requires
22 a 45-foot building setback on the northwest corner
23 of the site where it abuts Miromar Lakes. I'm
24 relatively certain you're going to get some
25 testimony about that later today, but that's this

74

(Mr. Depew is still speaking; below)

1 intended as part of the location of these
 2 transects and of the compact code.

3 29 requires four different lot types within
 4 the general and center lot types with no one lot
 5 type representing more than 60 percent. What
 6 we're doing is trying to modify this so that we
 7 have three different lot types in the general and
 8 center transect, and we think this is consistent
 9 with what's going on.

10 Again, the inherent bias towards the detached
 11 single-family development that you find in Chapter
 12 32 causes a development like this that has
 13 basically only multi-family, not single family, to
 14 lack one of the lot types that you would normally
 15 anticipate or normally was anticipated by the
 16 drafters of Chapter 32, and as such, we simply
 17 have to request a deviation to only have three
 18 different lot types in the general and center
 19 transects because we don't have enough lot types
 20 in those areas based on the fact that it's only
 21 multi-family.

22 Almost done with this part.

23 Deviation 30 is one to allow 20 percent of the
 24 individual lake and shoreline to consist of
 25 bulkheads, riprap, geotex tubes, or other

97

(Mr. Depew still speaking; below)

1 talked about this, and the fines management plan
 2 is to be implemented as part of the development of
 3 the property.

4 The CenterPlace has worked very closely with
 5 staff. There were really more meetings than I can
 6 remember with staff and with natural resources
 7 staff specifically to make sure that we do not
 8 create any negative impacts on present or future
 9 water resources.

10 For Policy 18.1.10, the design has been
 11 undertaken consistent with the FGCU master plan.
 12 We believe that all the various criteria that you
 13 can find in the master plan will address those
 14 issues.

15 18.1.11. We have clearly made infrastructure
 16 connections and interconnections between
 17 CenterPlace and FGCU. We have had a number of
 18 meetings coordinating those interconnections with
 19 the university, and you've heard from
 20 representatives of the university already.

21 We are not providing any septic tanks
 22 consistent with 18.1.13.

23 We are providing extension of utilities at our
 24 -- on our dime consistent with 18.1.4.

25 At 18.1.15, we are attempting to comply as we

137

1 because you're a low talker

2 MR. BADAMTCHIAN: Sorry. I'll try to speak
3 louder.

4 Good afternoon, my name is Chahram
5 Badamtchian. I'm from the county zoning. I was
6 recognized as expert in zoning and land use
7 issues. I would like to be recognized as such at
8 this time.

9 HEARING EXAMINER: Yes, please proceed.

10 MR. BASINAIT: No objection.

11 MR. BADAMTCHIAN: Thank you. Well, I was
12 prepared to have a slide show with 96 slides, but
13 unfortunately, you ruled that we should not bring
14 up issues already discussed, so it's going to be
15 very brief.

16 This is a rezone to compact planned
17 development. This is the second rezone compact
18 planned development in Lee County. The first one
19 was three-quarter of an acre in size.

20 Unfortunately, I was the planner on that one, and
21 that's the reason I'm the planner on this one.
22 And this one is 886 acres.

23 HEARING EXAMINER: I could see why. They're
24 so similar.

25 MR. BADAMTCHIAN: And as was already

138

1 mentioned, they're asking for 1,950 residential
2 dwelling units, 250 hotel rooms, and 246,400
3 square feet of commercial retail, 100,000 square
4 feet of office, and 300,000 square feet of
5 research and development.

6 The master concept plan that goes with the
7 regular zoning is not applicable here, so we have
8 illustrative plans, and we have detailed
9 regulating plans, and we have basically transects
10 that was already explained, so I'm not going to
11 labor over it.

12 They are proposing five different transects
13 and nine different lot types, and they are
14 requesting this in the form of a compact
15 development because of the Lee Plan amendment
16 which required them to develop this project as a
17 transit oriented or traditional neighborhood
18 design. And that's why they are going with the
19 compact community.

20 When staff reviewed this request, they are
21 asking for 31 deviations and most of them because
22 of our code has some glitches and some issues. It
23 was never tested for a large project, and after
24 this, we may need to amend our code a little bit
25 to make it work properly. That's the reason for

158

1 MR. DUNN: There's been some discussion about
2 how this is a unique set of provisions within the
3 plan, and I kind of would like to explain why, why
4 this is different.

5 Prior to CPA 2009-01 or ordinance 10-40, the
6 subject property was in the DR/GR. Utilizing the
7 DR/GR future land use category, the subject
8 property could have been approved for
9 approximately 88 single-family dwelling units and
10 no commercial.

11 When the applicant initially approached staff
12 about the proposed redesignation to university
13 community, staff identified this as an opportunity
14 to achieve some of the goals of the university
15 community that had not been realized by the then
16 -- this is back in 2009/2010 -- existing plan
17 development.

18 Staff also had two general concerns. These
19 are big picture concerns. There were some other
20 concerns, but the big picture concerns really
21 helped shape the Lee Plan amendments that were
22 adopted by ordinance 10-40. These include the
23 development -- that the development would take the
24 same form as other development within the
25 university community, and therefore, not truly

(Mr. Dunn still speaking; below)

159

1 provide the associated support development for
2 FGCU that Lee County was looking for, and also,
3 that the subject property was at the time located
4 in the DR/GR.

5 It was these two concerns that necessitated
6 the expansive Lee Plan amendments to address the
7 concerns that the majority of the -- to address
8 these concerns. The majority of the amendments,
9 specifically Policy 10.1.16, deal with the subject
10 site's design and impacts to the Lee County's
11 water resources.

12 The design related provisions included
13 specific requirements for parking design,
14 multimodal interconnections, maximums and minimums
15 for different uses such as commercial and
16 residential, a limitation on single-family homes,
17 a prohibition on a golf course, and a requirement
18 to utilize compact PD rezoning.

19 Although it should be noted that significant
20 deviations from Chapter 32, the compact PD may be
21 granted based on Policy 10.1.16.1 in order to
22 accommodate the proposed development.

23 There were other design things that were also
24 identified within the plans.

25 The provisions that addressed impacts to Lee

754

1 program.

2 MR. BADAMTCHIAN: You're talking about those
3 1,100 and something.

4 MR. ELGIN: 1,140 in phase one, yes.

5 MR. BADAMTCHIAN: The remainder, there's no
6 footnote saying rental housing.

7 MR. ELGIN: There is a footnote that says
8 rental housing. Would you like me? I mean, I'm
9 just reading from the application.

10 If there's another definition to apartment
11 that's not footnoted rental housing, then I'll be
12 more than happy to hear that and clarify my
13 comments earlier that led me to that conclusion.

14 MR. BADAMTCHIAN: The footnote says student
15 housing, has a number next to it. At the bottom,
16 it says rental housing. Then it has multi-family
17 and townhouse, multi-family, and those do not have
18 the note saying rental housing. Only that student
19 housing has rental.

20 MR. ELGIN: But student housing is listed as
21 1,140, multi-family is at 320, and town center
22 multi-family is at 165, so if student housing is
23 1,140, I'm not sure what you're suggesting.

24 MR. BADAMTCHIAN: What I'm saying, it's not a
25 rental community. Because it has a large student

755

1 housing, large number of student housing, but the
2 remainder is not -- is not designated as rental
3 housing.

4 MR. ELGIN: Looking at that schedule, could
5 you tell me what the percentage of student housing
6 would be on the project? I don't know the answer
7 to that. If I've read it inappropriately, then I
8 apologize, but I'd like you to clarify what I've
9 read and what that number is. I don't know.

10 MR. BADAMTCHIAN: I would say 55, 60 percent
11 student housing, but the remaining 40 --

12 MR. ELGIN: Which is 1,140 out of the 1,950
13 which is denoted as rental housing.

14 MR. BADAMTCHIAN: Correct. Those are the
15 student housing. I'm talking about the remaining
16 eight, nine hundred units.

17 MR. ELGIN: Okay.

18 MR. BADAMTCHIAN: There's no footnote saying
19 those are student housing or rental housing.

20 HEARING EXAMINER: Chahram, this might be
21 something that would be better addressed during
22 your rebuttal.

23 MR. BADAMTCHIAN: It's not a rental community
24 per se. It's a community with student housing.

25 MR. ELGIN: If you're over 50 percent, would

1250

1 MR. BASINAIT: Dave, skip over that. I think
2 we have sufficient testimony in the record of
3 that.

4 MR. DEPEW: I'm going to skip on to the next
5 element. That's natural resources. We've had
6 plenty of talk about that. Again, I think we're
7 not going to address any of those because we've
8 already talked about that. I'll let that
9 particular slide stand for itself.

10 We've had a fair amount of talk about the
11 noise and the amplified music. I don't think I
12 need to go into that. We have made some
13 modifications as a result of the input, but in
14 some of those other elements, we think that the
15 restrictions proposed by Miromar and some of the
16 residents are simply not reflective of the current
17 student profiles that are found at FGCU.

18 Additionally, the lighting, we've modified
19 some of the lighting by limiting the elevated
20 beach to 12 feet and the pier lighting to 42
21 inches. Some of the other elements, we think,
22 simply do not consider the elements that are
23 confined -- found in --

24 HEARING EXAMINER: Did you skip a slide?

25 MR. DEPEW: I'm sorry?

**PART III - LOCAL PLANNING AGENCY
REVIEW AND RECOMMENDATION**

DATE OF PUBLIC HEARING: **May 24, 2010**

A. LOCAL PLANNING AGENCY REVIEW

Staff gave a presentation to the Local Planning Agency concerning the proposed Lee Plan Amendment. Staff stated that this was a difficult decision because the proposed amendment was to redesignate DR/GR lands to University Community. However staff stated that this site was unique which would allow this site to be differentiated from other properties within the DR/GR and also provided opportunities that would not be available on other properties now or in the future. Members of the Local Planning Agency asked questions of staff and made comments about improvements that could be made to the proposed amendment. This was followed with a presentation by the applicant's consultants, which detailed the applicant's proposal and discussed issues that the applicant was not in agreement with staff. These included the proposed policies limiting the Retail Uses and Parking. One member of the LPA asked why this project should not be required to use the TDR program that was being developed in the DR/GR lands. Other general comments were made by members of the Local Planning Agency.

Two members of the public addressed the Local Planning Agency concerning this amendment. They expressed concerns included chipping away at the DR/GR, and the costs that the county may incur due to the proposed project.

Following the public comments, general discussion ensued between the members of the Local Planning Agency. These comments included the generous benefits that the applicant would receive from these entitlements and the minimum benefits that the county would receive if the proposed amendment were to be adopted. Also discussed were the unresolved issues of retail development and parking. The Local Planning Agency requested that the applicant and staff continue to work on the retail uses and parking issues and provide additional findings of fact about the benefit to Florida Gulf Coast University, the University Community density, and impacts to the water recharge value. A motion was made to continue this item until June 7, 2010 to allow time for resolution of these issues.

DATE OF PUBLIC HEARING: **June 7, 2010**

A. LOCAL PLANNING AGENCY REVIEW

Staff presented a modified recommendation and findings of fact to the Local Planning Agency. The modified recommendation included revised provisions for the parking and retail use requirements, as well as a few additional changes that were made to be consistent with other aspects of the Lee Plan. One member of the public addressed the LPA and expressed concern about the effect the proposal would have on water recharge rates of the property.

Following the public comment the members of the Local Planning Agency asked questions of staff and provided general comments about the proposal. One member of the LPA suggested that the public participation provision should be modified to require that the Florida Gulf Coast University invite staff to the meetings that are required prior to development of the site. Staff agrees with this concept, as it would assure that development of the site would take the anticipated form. However, staff would recommend that the meetings, as written in the proposed text amendments are the responsibility of the developer, therefore staff is proposing the following modifications to the public participation provision in strikethrough and double underline:

STAFF REPORT FOR
CPA2009-01

Lee Plan Amendment CPA2014-00009

October 13, 2010
PAGE 39 OF 52

Page 39

- 15. Florida Gulf Coast University Participation: The owner or agent for any Development of Regional Impact or Planned Development rezoning request must conduct two meetings with the President of FGCU and/or his designees and will provide detailed information to such representatives at those meetings relating to the Site Plan and Master Concept Plan for any proposed development within Area 9, Alico West. The developer must invite Lee County encourages zoning and planning staff to participate in such meetings. These meetings must be conducted before the application can be found sufficient. The applicant is fully responsible for providing the meeting space and providing security measures as needed. Subsequent to this meeting, the applicant must provide County staff with a meeting summary document that contains the following information: the date, time, and location of the meetings, list of attendees; a summary of the concerns or issues that were raised at the meetings; and a proposal of how the applicant will respond to any issues that were raised.

One member of the Local Planning agency recommended that the proposed development should be subject to the Compact Communities provisions that are currently being advanced by Lee County, this was later included in the motion. Staff concurs with this, and proposes that the Compact Communities request could be accommodated with the following revisions to the mixed use provision of the proposed text amendments:

- 1. Mixed Use: Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Alico West, Area 9, must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code.

The LPA suggested that if the development was developed in a compact form that lands that were unused could be reverted to DR/GR and Wetlands during the Development of Regional Impact (DRI) process to lessen the affect of removing lands from the DR/GR. Staff understands the view of the LPA, but believes that these issues will be addressed during the review and approval of the required Development of Regional Impact and will be sufficiently addressed by the DRI development order.

A motion was made to recommend that the Board of County Commissioners transmit the proposed amendment as recommended by staff. The motion failed 3-4.

A second motion was made to recommend that the Board of County Commissioners transmit the amendment with staff's recommendations; the LPA recommendations, including the modified provisions shown above; and modify the future land use categories following the adoption of the DRI. The motion passed 5-2.

An additional motion was made that directed staff to convey to the Board of County Commissioners the need for a policy to articulate mitigation measures that should be required when removing lands from the DR/GR. The motion passed 5-2.

B. LOCAL PLANNING AGENCY RECOMMENDATION AND FINDINGS OF FACT SUMMARY

1. RECOMMENDATION:

The Local Planning Agency recommends that the Board of County Commissioners transmit the amendment with staff's recommendations, including modified provisions for compact communities, have Florida Gulf Coast University include County staff in site development meetings, and modify the future land use categories following adoption of the DRI.

2. BASIS AND RECOMMENDED FINDINGS OF FACT:

The Local Planning Agency accepted the findings of fact as advanced by staff.

**PART IV - BOARD OF COUNTY COMMISSIONERS
HEARING FOR TRANSMITTAL OF PROPOSED AMENDMENT**

DATE OF TRANSMITTAL HEARING: June 16, 2010

A. BOARD REVIEW:

Staff provided a brief presentation addressing the proposed comprehensive plan amendment. This was followed by a presentation from the Applicant's consultants, and a representative from the Florida Gulf Coast University. The applicant proposed two policy revisions as related to staff recommendation. These included revisions to Policy 1.1.9 of the Lee Plan and revisions to proposed Policy 18.1.16, paragraph 1 and a new paragraph 16. The latter two both addressed and were meant to replace the requirement to comply with the Compact Communities Code.

There were 12 members of the public who addressed the Board of County Commissioners concerning the proposed amendment. The members of the public were evenly divided on this project, with six against the development and six who favored the development. The most cited reasons for opposition of the development was removal of DR/GR lands and environmental reasons. The most cited reasons for support of the development was benefits to FGCU and environmental reasons.

The Board of County Commissioners started off their discussion on the item by showing support for the type of development proposed, but also expressed concern regarding the removal of lands from the DR/GR.

One Commissioner stated that several additional requirements were needed. These included a commitment by the applicant for conservation easements across the property to the east. The second requirement was a donation of 75 feet for right-of-way on the south side of Alico Road. Another suggested requirement for the property would be to store stormwater for the improvements that would be made to Alico Road and potential County Road 951. The Commission supported the applicant-proposed revision to Policy 1.1.9, which would prohibit any further transfer of dwelling units that had been allocated to the University Community land use category to adjacent DR/GR lands.

Staff expressed support for the revision proposed by the applicant to Lee Plan Policy 1.1.9. The Policy, with the applicants proposed revisions shown in double underline, would read as follows:

POLICY 1.1.9: The University Community land use category provides for Florida's 10th University, Florida Gulf Coast University (FGCU), and for associated support development. The location and timing of development within this area must be coordinated with the development of the University and the provision of necessary infrastructure. All development within the University Community must be designed to enhance and support the University. In addition to all other applicable regulations, development within the University Community will be subject to cooperative master planning with, and approval by, the Board of Regents of the State University System Florida Gulf Coast University Board of Trustees.

Prior to development in the University Community land use category, there will be established a Conceptual Master Plan which includes a generalized land use plan and a multi-objective water management plan. These plans will be developed through a cooperative effort between the property owner, Lee County, and South Florida Water Management District.

Within the University Community are two distinct sub-categories: University Campus and the University Village. The University Window overlay, although not a true sub-category, is a distinct component of the total university environment. Together these functions provide the opportunity for a diversity of viable mixed use centers. Overall residential development within average density for the University Village will not exceed 6,510 dwelling units^{2.5} units per acre. None of the 6,510 dwelling units may be used on or transferred to lands located outside of the University Community land use boundaries as they exist on (insert here the date of adoption of CPA 2009-01). Clustered densities within the area may reach fifteen units per acre to accommodate university housing. The overall average intensity of non-residential development within the University Village will be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to Map 16 and Table 1(b). Specific policies related to the University Community are included within the Lee Plan under Goal 18.

Staff was asked by the Board of County Commissioners if the language suggested by the applicant concerning the compact communities would work. Staff stated that the changes proposed by the applicant to the Compact Communities requirement were not necessary due to the flexibility built into Lee County's Compact Communities Code. Staff expressed support for the recommendation made by the LPA. The Board requested that staff revise proposed Lee Plan Policy 18.1.16 Paragraph 1, to clarify that significant deviations may be necessary, as follows:

1. Mixed Use: Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Alico West, Area 9, must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, recognizing there may be significant deviations to accommodate the proposed development.

The Board of County Commissioners also requested that the landscaping requirements include a requirement to have no less than 75 percent native vegetation.

There was a motion to transmit the proposed amendment including: 1) revisions to Policy 1.1.9 and proposed Policy 18.1.16, paragraph 1; 2) a requirement for the developer to donate 75 feet of right-of-way along the property's boundary along Alico Road; 3) a requirement for the site to accommodate the stormwater runoff associated with future improvements to Alico Road and future County Road 951; and, 4) a requirement that 75 percent of the xeriscape landscaping must consist of native species.

One member did not support the motion expressing concern over removing lands from the DR/GR.

The Motion was approved 3 to 1.

B. CHANGES REQUESTED BY THE BOARD OF COUNTY COMMISSIONERS

To accommodate the changes that were transmitted by the Board of County Commissioners, staff is making the changes, shown with double underline, to the proposed amendment, as shown below:

POLICY 1.1.9: The University Community land use category provides for Florida's 10th University, Florida Gulf Coast University (FGCU), and for associated support development. The location and timing of development within this area must be coordinated with the development of the University and the provision of necessary infrastructure. All development within the University

Community must be designed to enhance and support the University. In addition to all other applicable regulations, development within the University Community will be subject to cooperative master planning with, and approval by, the Board of Regents of the State University System Florida Gulf Coast University Board of Trustees.

Prior to development in the University Community land use category, there will be established a Conceptual Master Plan which includes a generalized land use plan and a multi-objective water management plan. These plans will be developed through a cooperative effort between the property owner, Lee County, and South Florida Water Management District.

Within the University Community are two distinct sub-categories: University Campus and the University Village. The University Window overlay, although not a true sub-category, is a distinct component of the total university environment. Together these functions provide the opportunity for a diversity of viable mixed use centers. Overall residential development within average density for the University Village will not exceed 6,510 dwelling units/2.5 units per acre. None of the 6,510 dwelling units may be used on or transferred to lands located outside of the University Community land use boundaries as they exist on (insert here the date of adoption of CPA 2009-01). Clustered densities within the area may reach fifteen units per acre to accommodate university housing. The overall average intensity of non-residential development within the University Village will be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to Map 16 and Table 1(b). Specific policies related to the University Community are included within the Lee Plan under Goal 18.

POLICY 18.1.16: For those lands in Area 9, Alico West, all development must be designed to enhance and support the University. All rezonings in this area must include a specific finding that the proposed uses qualify as Associated Support Development, as that term is defined in the glossary. The final design and components will be determined as part of the DRI/rezoning process and must be consistent with the following development standards:

- 1. **Mixed Use:** Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Alico West, Area 9, must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, recognizing there may be significant deviations to accommodate the proposed development.

No changes are proposed to paragraphs 2 through 12.

- 13. **Landscaping:** All plantings used in buffers and landscaping must be installed using xeriscape principles. Xeriscape principles include water conservation through drought-tolerant landscaping, the use of appropriate plant material, mulching, and the reduction of turf areas. All development must hook-up to water re-use lines when they become available. At least 75 percent of all landscaping must be native landscaping.

No changes are proposed to paragraphs 14 and 15.

- 16. **Stormwater Retention for adjacent transportation facilities:** Area 9, Alico West will accommodate stormwater detention/retention requirements for the Alico Road widening and County Road 951 extension adjacent to the property, if constructed.

POLICY 38.1.8: The County may pursue a joint funding mechanism (such as an MSTU/MSBU) to pay for the widening of Alico Road east of Ben Hill Griffin Parkway to encourage economic development in the Alico Road area. Properties that generate traffic on the segment of Alico Road east of Ben Hill Griffin Parkway that have not already fully mitigated traffic impacts will be required to participate in the funding mechanism. Participation will be creditable against future road impact fee or DRI proportionate share obligations consistent with County regulations. Property that was subject to CPA2009-01 will donate 75 feet of right-of-way along the entire frontage of Alico Road. The donation of right-of-way along Alico Road will not be creditable against road impact fees or DRI proportionate share obligations.

C. BOARD ACTION AND FINDINGS OF FACT SUMMARY:

1. BOARD ACTION:

The Board of County Commissioners transmitted the proposed amendment including the revisions decided above.

2. BASIS AND RECOMMENDED FINDINGS OF FACT:

The Board of County Commissioners accepted the findings of fact as advanced by staff and the LPA.

FRANKLIN B. MANN	_____	AYE

**PART V - DEPARTMENT OF COMMUNITY AFFAIRS OBJECTIONS,
RECOMMENDATIONS, AND COMMENTS (ORC) REPORT**

DATE OF ORC REPORT: **August 27, 2010**

A. DCA OBJECTIONS, RECOMMENDATIONS AND COMMENTS

The Florida Department of Community Affairs (DCA) Objection, Recommendation, and Comments (ORC) Report contained the following concerning this proposed amendment:

The proposed amendment includes the following: (1) change 919.5 acres (Alico West parcel) on the Future Land Use Map (FLUM) from Density Reduction/Groundwater Resource (DR/GR) to University Community; (2) text amendments to the Future Land Use Element and Transportation Element; (3) amendments to FLUM Maps 6 and 7 to include the subject parcel in the Lee County future water service area and future sewer service area; and (4) amendment to FLUM Map 16 to move the subject parcel from the Southeast Lee County Planning Community into the San Carlos Planning Community. The Department raises the following objections to the proposed Amendment CPA2009-01:

1. Objection (Land Use): *The proposed amendment Future Land Use Element Policy 18.1.16 requires that development on the subject Alico West property must provide an area for a main street town center that is supportive of Florida Gulf Coast University with mixed use development. The proposed amendment allows a mix of residential and non-residential uses (retail, research and development, and office) within the 350 acre developable portion of the Alico West parcel. Proposed Policy 18.1.6 does not establish meaningful and predictable guidelines and standards defining the minimum size (acres) of the main street town center, the percentage distribution of mix among the land uses within the main street town center, and the percentage distribution of mix among the land uses for the overall 350 acre developable portion.*

Rules 95-5.005(6); 9J-5.006(3)(c) 1 ; and 9J-5.006(4)(c), Florida Administrative Code (F.A.C.); and Section 163.3 177(6)(a), Florida Statutes (F.S.).

Recommendation: *Revise the policy to establish meaningful and predictable guidelines and standards defining: (1) the minimum size (acres) of the main street town center; (2) the percentage distribution of mix among the land uses within the main street town center; and (3) the percentage distribution of mix among the land uses for the overall 350 acre developable portion.*

2. Objection (Planning Communities; FLUM Allocation Table 1(b)): *The Lee County Comprehensive Plan divides the County into Planning Communities as depicted on FLUM Map 16 (Planning Communities), and the currently adopted Future Land Use Element Policy 1.7.6 establishes an Acreage Allocation Table 1(b), which identifies the total number of acres in each Planning Community and allocates acreage amounts of residential, commercial, and industrial development for year 2030 for each Planning Community. The amendment proposes to move the subject Alico West parcel from the Southeast Lee County Planning Community into the San Carlos Planning Community by amending FLUM Map 16. However, the amendment does not propose to amend the Acreage Allocation Table 1(b) to revise the total number of acres in the Southeast Lee County Planning Community and San Carlos Planning Community to reflect the proposed FLUM*

Rules 9J-5.005(2)(a), (j), and (6); 9J-5.006(2)(a), and (3)(b)1.; 93-5.016(1)(a), (2), (3)(b)1., and (4)(a) and (b); 95-5.019(2), (3), (4), and (5)(b)2, F.A.C.; and Sections 163.3 177(6)(a), (6)(b), and (6)(c); and 163.3 177(2), (3), (a)? and (10)(e), F.S.

Recommendation: *Support the amendment with a transportation analysis based on the maximum development potential of the amendment (and growth in background trips) that addresses the transportation facilities that are needed to achieve and maintain the adopted level of service standards of roads and demonstrates coordination of any needed transportation facility improvements with the Transportation Element, Capital Improvements Element, plans and programs of the Florida Department of Transportation, and the Metropolitan Planning Organization Long Range Transportation Plan and Transportation Improvement Program. Revise the amendment, Future Transportation Map, and Capital Improvements Element (Five year Schedule of Capital Improvements, and policies if needed) to be supported by and consistent with the data and analysis. If road improvements are needed to address deficiencies in the short-term (five-year) planning time frame, the improvements should be included in the Capital Improvements Element Five-year Schedule of Capital Improvements. If public facilities are projected to be deficient in the long-term planning time frame, the County should maintain in the adopted portion of the Capital Improvements Element a list of the improvements that are projected to be needed in the planning time frame but beyond the five years covered by the adopted Capital Improvements Schedule. This list need not include any cost estimates for the improvements. The County must use this list when it adopts the mandatory annual update of the Capital Improvements Schedule. Improvements needed to achieve and maintain adopted level of service standards within the next five years should be moved from the list into the financially feasible five-year schedule, along with a cost estimate.*

B. STAFF RESPONSE

The applicant submitted a response that included additional analysis and revised language to address the concerns raised by DCA. Staff assisted the applicant with the response to ensure that DCA's concerns were addressed and to ensure that the site is developed as a Mixed Use Center serving the university community. The full response to DCA is attached to the Staff Report, entitled "Response to Objections, Recommendations and Comments for Lee County Amendment 10-2, Alico West CPA." A summary of the Response is provided below. The applicant's proposed policy revisions have been slightly modified to remove the word "shall" and replaces them with another word such as will or must where appropriate.

DCA's first concern is that Policy 18.1.16 does not establish meaningful and predictable guidelines and standards to define the main street town center and the overall development. The applicant and staff have collaborated to address this concern by adding language to proposed Policy 18.1.16.1. The additional language establishes the minimum and maximum development permitted on the Alico West property. Proposed Policy 18.1.16.1 has been revised as follows:

1. Mixed Use: Development must be in the Traditional Neighborhood Development form, as defined in the Glossary section of the Lee Plan, and consistent with the intent of Goal 4: Sustainable Development Design of the Lee Plan. Development on Alico West, Area 9, must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, recognizing there may be significant deviations to accommodate the proposed development. The following minimum and maximum development parameters per use are approved for Area 9, subject to transportation mitigation requirements:

<u>Residential</u>	<u>Minimum 800 units, maximum 1,950 units;</u>
<u>Retail</u>	<u>Minimum 200,000 square feet, maximum 543,000 square feet (Retail maximum may be reduced, to no less than the 200,000 square feet, to allow additional Office or Research and Development square feet at a 1 to 1 rate.);</u>
<u>Office/Research/Development</u>	<u>Minimum 400,000 square feet, maximum of 918,000 square feet (additional Office/Research/Development square feet may be added to the maximum if the maximum retail is reduced as described in the Retail parameters above);</u>
<u>Donation Site to University</u>	<u>Minimum 40,000 square feet, maximum 400,000 square feet; and</u>
<u>Hotel</u>	<u>Minimum 0 rooms, maximum 250 rooms.</u>

BRIAN BIGELOW	<u>NAY</u>
TAMMARA HALL	<u>AYE</u>
RAY JUDAH	<u>AYE</u>
FRANKLIN B. MANN	<u>AYE</u>
JOHN MANNING	<u>AYE</u>

The applicant has revised Proposed Policy 18.1.16.2: Main Street Town Center to identify the percentage mix of commercial uses within the Main Street Town Center, as requested by the DCA. Proposed Policy 18.1.16.2 has been revised as follows:

2. **Main Street Town Center:** The development must provide an area for a main street town center that is supportive of FGCU, with mixed use development employing the Traditional Neighborhood Development (TND) form as defined in the glossary of the Plan. This portion of the development must contain mixed use buildings but may also contain some single use buildings. The Town Center must be a minimum of 25 Gross Acres. The minimum Residential Units within the area defined as the Town Center will be 200. Commercial Uses, including retail, office, employment, institutional or civic uses within the Town Center must provide a minimum total of 125,000 square feet. Coupled with the applicable Policy Framework, the required minimum percentage of non-residential land uses in the Town Center will be as follows:

<u>Retail /Commercial:</u>	<u>50% MIN</u>
<u>Office / Employment:</u>	<u>25% MIN</u>
<u>Public, Institutional & Civic:</u>	<u>5% MIN</u>

DCA's second concern is that the amendment did not revise Acreage Allocation Table 1(b) to reflect the proposed FLUM amendment. DCA found that the proposed amendment would cause an internal inconsistency between Policy 1.7.6 and the Acreage Allocation Table 1(b) unless the number of acres in the Southeast Lee County and the San Carlos Planning Communities were revised. Staff has acknowledged that this needs to be corrected, or there would be an internal inconsistency. Staff provided a response to the applicant with the necessary revisions to Table 1(b) of the Lee Plan. The plan amendment has been revised to reflect adjustments to the acreage totals to address DCA's second objection.

Planning Community Year 2030 Allocations Table – Table 1(b) has now been revised to re-allocate 920 acres from the Southeast Lee County to the San Carlos Planning Community. The Conservation (wetlands) allocation will be adjusted by moving 171 acres from the Southeast Lee County to the San

Agenda Item 1 – Call to Order, Review of Affidavit of Publication/Pledge of Allegiance

Mr. Joyce, Chair, called the meeting to order at 8:30 a.m. in the Board Chambers of the Old Lee County Courthouse, 2120 Main Street, Fort Myers, FL 33901.

Ms. Neysa Borkert, Assistant County Attorney, certified the affidavit of publication and stated it was legally sufficient as to form and content.

Mr. Joyce announced that a request had been made to move Agenda Item 5 - Lee Plan Amendment - CPA2014-00009 (Policy 18.1.16 Text Change) ahead of Agenda Item 4 (Roads and Schools Impact Fee Studies). He noted that staff did not oppose this change or have any concerns with it. The reason for the request was that the two attorneys involved with the Lee Plan Amendment have a hearing later this morning. The LPA agreed to grant the request.

Agenda Item 2 – Public Forum - None

Agenda Item 3 – Approval of Minutes – January 26, 2015

Mr. Joyce noted an error on the top of the first page. David Mulicka was present and Jim Ink's name needed to be removed.

Mr. Andress made a motion to approve the January 26, 2015 meeting minutes with the above corrections, seconded by Mr. Brown. The motion was called and passed 6-0.

Agenda Item 5 – Lee Plan Amendments

CPA2014-00009 – Policy 18.1.16 Text Change

Mr. Dunn, planner for this case, stated the following:

- This is a proposed amendment to amend Policy 18.1.16 of the Lee Plan. This policy was adopted as part of CPA2009-00001 (known as the Alico West Amendment). Their request was to redesignate approximately 900 acres of land from DRGR to University Community.

- University Community lands are generally located in proximity to FGCU and are required to have development that supports and enhances the University. To ensure that the lands being added to the University Community would develop in ways that supported and enhanced the University, it was required that the Alico West property would be rezoned as a Compact Planned Development which utilizes a form based code.
- At the time Policy 18.1.16 was adopted, it included language acknowledging that there would be flexibility during the implementation of that code by including the phrase *“recognizing there may be significant deviations to accommodate the proposed development.”*
- The current case CPA2014-09 is a private amendment to remove that phrase from Policy 18.1.16 of the Lee Plan.
- Staff recommends that the BOCC *not transmit* because the proposed amendment would not have the affect desired by the applicant. In addition, Policy 18.1.16 of the Lee Plan is applicable to one specific property within Lee County which is not controlled by the applicant.

Mr. Church referred to Item III on Page 3 of the application, which says **“PROPERTY SIZE AND LOCATION OF AFFECTED PROPERTY.”** To him, this means the applicant wants this change to occur on property which is actually a lot in Miromar Lakes that has a deed associated with it. Although he understood what the applicant was trying to do, he noted the application is specific to one property that is not even subject to this policy.

Mr. Jacob concurred that the applicant has no interest in the actual property that is subject to the case. From the County Attorney’s standpoint, it is not sufficient. He noted that, unfortunately, the County’s Comprehensive Plan does not preclude someone from filing this request yet it also does not allow the County to grant it.

Ms. Barbara Heine, applicant, provided background information and outlined her reasons for her application request along with a handout that was distributed during the meeting (attached). For the specifics of this presentation, please listen to the audio at the following link:

<http://www.leegov.com/gov/dept/dcd/Planning/Amendments/Pages/amendment.aspx?aid=649>

Mr. Joyce opened this item for public comment.

Mr. Charles Basinait, Attorney with Henderson Franklin Starnes and Holt, stated his firm was representing the interest of Alico West Fund LLC, which is a subsidiary of Private Equity Group. He gave a rebuttal to her application request and requested that the LPA recommend non-transmittal to the BOCC.

Mr. Andress asked for a status to the 25 acre Town Center which was supposed to be an integral part of the project.

Mr. Basinait stated there was a 25 acre Town Center on the site and that it was an integral part of the project. He noted it was located in the northwest corner of the property, not the portion of the project that runs along Alico Road. This 25 acre site has a hotel convention center, green space, restaurants, office space, and residential units. In addition, a cinema is planned for the future.

No other public input was received, so the public portion segment was closed.

Mr. Joyce noted that he would be abstaining from a vote on this item because he had performed some land management work for the owner. He filed the appropriate Voting Conflict Form - 8B (attached).

Mr. Andress stated that many times the LPA has deliberations at these meetings in an attempt to vet changes in policy as fully as possible. In this instance, the language that was inserted at the BOCC level was never vetted in front of the LPA even though it is a major policy change for that area. He felt this should have been vetted during an LPA meeting before it went on to the County Commissioners. As a result, he felt a change was made without any discussion before the LPA. He noted that the LPA donates their time as volunteers, yet many times their comments do not get incorporated into the final report that goes to the BOCC. He expressed concern with that and hoped we would no longer be continuing in that direction. **However, due to the legality of this issue and the fact that the change is not being proposed by the property owner, he made a motion that the LPA recommend the BOCC *not transmit* the proposed change, seconded by Mr. Church. The motion was called and passed 5-0. Mr. Joyce abstained.**

Agenda Item 4 – Review of Roads and Schools Impact Fee Studies
Ordinance Amending Land Development Code Chapter 2

Ms. Gibbs, DCD Director, stated the following:

- Two years ago, the Board of County Commissioners (BOCC) reduced the impact fee collection rate by 80% in order to stimulate development and economic activity. This reduction will end on March 13, 2015 and the impact fee collection rates will revert back to 100% unless there is further action by the BOCC.
- Last September, the Commissioners directed staff to have the consultant update the studies for roads and schools because they had not been updated in three years. The County's ordinance requires they be updated every three years. The Board wants to see the updated information before making a decision in March.
- Two public hearings have been scheduled. The first one is scheduled for March 3rd and will be for the purpose of looking at the fee schedule itself. The fee schedule is Chapter 2 of the Land Development Code, which is the 100% collection rate. Florida law says the County must use the most recent localized data. The second public hearing will be to discuss what should be done with the collection rate. The County is not required to collect 100% and may choose to pick a different percentage.
- What staff is presenting to the LPA today is the methodology the consultant used that went into setting the 100% rate. The LPA can determine whether or not it is consistent with the Comprehensive Plan. The collection rate is a BOCC policy decision so the LPA will not need to vote on that. Staff has been taking this item to various committees in order to collect input for the Board.

Ms. Gibbs introduced the consultant, Clancy Mullen from Duncan and Associates.

Mr. Mullen reviewed the studies along with a PowerPoint presentation (attached) and was available for questions.

Mr. Church asked for clarification that the capital costs per student in the study was ascertained by taking a number of different school districts, adding up their capital construction costs, and dividing it by the number of students.

Mr. Mullen confirmed this was correct. He noted they had not looked at other school districts. They only looked at Lee County. In addition, the State has guidelines on the maximum of what a student station should cost. Lee County is well under those guidelines.

Mr. Church referred to Item (10) on Page 5 under Section 2-264 and noted there was verbiage in this section that will allow impact fees to be used for other things besides building roads. He asked if there had been any metric on the cost of non-vehicular miles traveled. In other words, what does it cost for a person on a bicycle or if we are building those facilities.

Mr. Mullen stated the Florida Department of Transportation has developed some standards for capacity of bicycle and pedestrian facilities; however, he did not take that into consideration or try to factor that into the formula. The formula is based on recent improvements or planned improvements in Lee County that have added lanes to roads. This allows you to get a clear connection between the cost and how many vehicle miles of capacity are added. He noted that all counties in Florida have the ability to use impact fee money for other kinds of improvements to roadways, for example, intersection improvements. You need complex modeling to figure out how many vehicle miles of capacity will be added. It is generally accepted that it does add capacity. Since it is a growth induced need, impact fee money is typically spent on it. Lee County has also historically spent about 5% of road impact fee money on improvements to bicycle and pedestrian improvements that are unrelated to strictly a road project. For instance, a roadway might exist, but it was not built with sidewalks or bike lanes adjacent to it. Those can be retrofitted with some of the impact fee money.

Mr. Andress asked how this updated data is going to be used when setting the fee.

Mr. Mullen stated the data is supposed to be used to calculate the fee. The fees that the communities calculate can be less than the amount the data indicates, but the data provides a maximum fee that can be charged, so the County and its communities cannot charge more than that maximum fee.

Ms. Gibbs also noted that this most recent localized data will be adopted into Chapter 2 of the Land Development Code. The fee schedule that is a part of Chapter 2 will show the 100% figures.

Mr. Andress referred to an earlier report that recommended an 85% charge on impact fees.

Ms. Gibbs clarified that the 85% figure was discussed at a BOCC workshop in January. The figure was for traffic.

Mr. Getch explained that staff had asked the BOCC what their transportation priorities were. In response, the Board outlined four roadway segments. The 85% figure is the amount of impact fees that would need to be collected in order to maintain those four priority projects in the CIP. He noted that any reduction from 100% is going to reduce something out of the CIP.

Mr. Andress asked what would happen if the County does not collect those fees. In other words, where would the revenue come from to deal with the congestion on the roads if we did not make the improvements recommended by Lee County DOT?

Mr. Getch stated that would be a policy decision by the BOCC. There are other funding options.

Mr. Andress stated he felt there was a lot of misunderstanding in the community because he believed that the 20% rate is currently funding 15% of the CIP for transportation. If we go to the 100% rate, we will be funding 80% of the transportation CIP. There are people who believe hardly any of the impact fees collected actually fund transportation. He wanted to clarify that this statement is false and that a 100% rate would fund 80% of the transportation CIP. The gas tax and other sources can be used as well so that growth pays for growth. If this is not done, we will not have the revenue sources from either an increase in taxes or other revenue sources to make up this shortfall.

Mr. Tasman stated he never believed impact fees were the correct way to pay for that growth. He did not feel it made sense to adversely affect the builders and developers that are providing the housing that we most want such as workforce and professional types of housing. These types of housing are impacted by the increase in the impact fees. The most active part of this housing market is the \$100,000 to \$200,000 price range. The margins on these homes are not enough to cover the projected increases of the impact fees even at 45%. Therefore, we should find another source of income. We will end up building houses that people cannot afford or not build homes at all which will be devastating to the community.

Mr. Andress stated reasons he did not feel impact fees would be a deterrent to future construction of Lee County.

Ms. Borkert clarified that the LPA was looking at changes to Chapter 2 of the Land Development Code and their consistency with the Comprehensive Plan. The ordinance that was provided as a supplement in the package would be a policy decision made by the BOCC. The LPA will not be voting on the ordinance and the collection rate will not be in the Land Development Code.

Ms. Gibbs stated the only reason she included the ordinances in the LPA meeting packet was so that the LPA would be apprised of everything that was taking place.

Mr. Joyce opened this item for public comment.

Ms. Ami Desamours, Assistant Superintendent for Business and Finance, stated she was representing the School District of Lee County. She noted the School District is very supportive of the County's work and she appreciated that the LPA was treating this issue seriously. She stated her office would be willing to provide any information/data that might be needed. Ms. Desamours stated that their Board Chair spoke at the last BOCC meeting and was on record as saying that the restoration of impact fees are very important to the School District. It has been noted on record that they have a Capital Funding crisis due to the loss of funds that has taken place over the past five years. Due to growth in the area, the School District is in need of three schools over the next five years with no revenue source to complete this. Therefore, every revenue source is important to them.

Mr. Marc Mora, Director of Planning, Growth, and School Capacity for the School District, stated that in addition to the three schools needed over the next five years, the School District also needs 24 schools over the next 20 years. The School district has 22 buildable sites currently and 31 total properties. Some of them are adjacent to current properties enabling the School District to expand some of the campuses. However, there is a shortfall of sites because some of the properties owned by the School District do not fit where the growth is occurring now. Since demographics shift, the School District is always looking for new school sites. He also reiterated that the School District would offer support if needed in terms of data.

Mr. Joe Cameratta stated he was a land developer in Southwest Florida (mainly residential communities). He felt certain housing developments should be factored into the data because there are age restricted communities and other developments that have seniors in them who are only in the area seasonally. Neither group typically has children with them. Therefore, they impact roads and schools differently than other communities yet everyone pays the same impact fee for any residential community.

Mr. Mullen stated there was a provision in the ordinance where you can do an independent assessment. If you are deed restricted and 55 years or older, you do not have to pay impact fees for schools and roads. You basically pay an average impact. Since neighborhoods change over the years, you cannot say that there are mainly older people in a particular community. A new housing unit will have multiple occupants over the years so the County looks for the long term impact.

Ms. Gibbs referred to the clarifying language in Section 2-264 (10) and noted a couple of the committees did not like this language. One committee felt the impact fees should only be used for roads and not for bike paths. However, the Bicycle and Pedestrian Advisory Committee will be sending a letter to the BOCC stating not enough funds are being spent on bike paths.

Mr. Church referred to Number (10) on Page 5 of the Ordinance, under Section 2-264 and recommended removing the words *“by providing alternative travel modes and.”* He also recommended adding a sentence that reads *“Before allocations for such improvements shall be made, those improvements will be reviewed on a case by case basis demonstrating effectiveness at providing capacity improvements.”* Therefore, Item (10) will read as follows:

(10) Alternative roadway capacity improvements that accommodate vehicle trips ~~*by providing alternative travel modes and*~~ by taking pedestrians, bicyclists, and buses out of travel lanes including, but not limited to, sidewalks and other pedestrian improvements, bikeways, and bus pull out lanes along arterial and collector roads. *Before allocations for such improvements shall be made, those improvements will be reviewed on a case by case basis demonstrating effectiveness at providing capacity improvements.*

Mr. Church stated that his concern was that the current verbiage gives “cart blanche” on how to use impact fees. For instance, they could conceivably be used to buy buses and bus pull offs. Mr. Church stated he was not opposed to those uses, but he wanted to add some language in here so that the impact fees would be judiciously used.

Ms. Borkert felt the sentence that Mr. Church added deals with the actual use of funds. Therefore, she suggested it be located under Section 2-270 (Use of Funds). She explained that Section 2-264 basically defines what Capital Improvements are. The definition of a Capital Improvement will include these alternative roadway improvements.

Mr. Church stated he did not object to it being located in Section 2-270.

Mr. Church made a motion to: 1) approve the revised impact fee schedule and modify this ordinance such that line (10) under Capital Improvements deletes the words *by providing alternative travel modes and*; 2) Add a sentence under Section 2-270 to be placed after the second sentence so that it will read as follows, *“Such improvements must increase roadway capacity and be of the type made necessary by the new development.” “Before allocations for such improvements shall be made, those improvements will be reviewed on a case by case basis demonstrating effectiveness at providing capacity improvement.”* and, 3) find that it is consistent with the Comprehensive Plan, seconded by Mr. Address. The motion was called and passed 6-0.

Agenda Item 6 – Other Business

Impact Fee Comparison – Lee, Charlotte, Collier

Mr. Brown asked what the impact fee value was compared to Charlotte and Collier County.

Ms. Gibbs stated that at the 100% rate, Charlotte County is considerably lower. They are similar to what Lee County has now. Collier County is much higher. In fact, she noted that Collier County is one of the highest in the state.

Mr. Church asked if Charlotte County was lower in the base or in what they are charging.

Mr. Andress stated Charlotte County is lower in the base and noted that, despite this, they are not getting much permit activity in their area.

Agenda Item 7 – Adjournment

The next Local Planning Agency meeting is scheduled for Monday, March 23, 2015, at 8:30 a.m. in the Board Chambers, Old Lee County Courthouse, 2120 Main Street, Fort Myers, FL 33901.

Mr. Andress made a motion to adjourn. The meeting adjourned at 10:20 a.m.

Lee County Board of County Commissioners
Department of Community Development
Division of Planning
Post Office Box 398
Fort Myers, FL 33902-0398
Telephone: (239) 533-8585
FAX: (239) 485-8344

APPLICATION FOR A COMPREHENSIVE PLAN AMENDMENT

PROJECT NAME: TEXT CHANGE

PROJECT SUMMARY: TEXT CHANGE

Plan Amendment Cycle: Normal Small Scale DRI

APPLICANT – PLEASE NOTE:

Answer all questions completely and accurately. Please print or type responses. If additional space is needed, number and attach additional sheets. The total number of sheets in your application is: 14

Submit 6 copies of the complete application and amendment support documentation, including maps, to the Lee County Division of Planning. Up to 90 additional copies will be required for Local Planning Agency, Board of County Commissioners hearings and the Department of Community Affairs' packages. Staff will notify the applicant prior to each hearing or mail out.

I, the undersigned owner or authorized representative, hereby submit this application and the attached amendment support documentation. The information and documents provided are complete and accurate to the best of my knowledge.

Barbara Heine
Signature of Owner or Authorized Representative

11-17-14
Date

BARBARA HEINE
Printed Name of Owner or Authorized Representative

RECEIVED
NOV 18 2014
COMMUNITY DEVELOPMENT
CPA2014-00009

I. **APPLICANT/AGENT/OWNER INFORMATION** (Name, address and qualification of additional planners, architects, engineers, environmental consultants, and other professionals providing information contained in this application.)

* Applicant: BARBARA HEINE
Address: 11711 VIA SAVONA CT
City, State, Zip: MIROMAR LAKES FL 33913
Phone Number: 239-641-0178 Email: BHEINE@projectsanddesign.com

Agent*: _____
Address: _____
City, State, Zip: _____
Phone Number: _____ Email: _____

Owner(s) of Record: BARBARA + FREDERICK HEINE
Address: SAME AS ABOVE
City, State, Zip: _____
Phone Number: _____ Email: _____

* This will be the person contacted for all business relative to the application.

II. **REQUESTED CHANGE**

A. TYPE: (Check appropriate type)

- Text Amendment
 Future Land Use Map Series Amendment (Maps 1 thru 24)
List Number(s) of Map(s) to be amended: _____

1. Future Land Use Map amendments require the submittal of a complete list, map, and two sets of mailing labels of all property owners and their mailing addresses, for all property within 500 feet of the perimeter of the subject parcel. An additional set of mailing labels is required if your request includes a change to the Future Land Use Map (Map 1, page 1). The list and mailing labels may be obtained from the Property Appraisers office. The map must reference by number or other symbol the names of the surrounding property owners list. The applicant is responsible for the accuracy of the list and map.

At least 15 days before the Local Planning Agency (LPA) hearing, the applicant will be responsible for posting signs on the subject property, supplied by the Division of Planning, indicating the action requested, the date of the LPA hearing, and the case number. An affidavit of compliance with the posting requirements must be submitted to the Division of Planning prior to the LPA hearing. The signs must be maintained until after the final Board adoption hearing when a final decision is rendered.

III. PROPERTY SIZE AND LOCATION OF AFFECTED PROPERTY (for amendments affecting development potential of property)

A. Property Location:

1. Site Address: 11711 VIA SAVONA CT MIROMAR LAKES FL 33913
2. STRAP(s): 1346-25-03-00000.0160

B. Property Information:

Total Acreage of Property: 2.5
Total Acreage included in Request: N/A
Total Uplands: _____
Total Wetlands: _____
Current Zoning: RESIDENTIAL - UNIVERSITY COMMUNITY
Current Future Land Use Designation: UNIVERSITY OVERLAY - UNIVERSITY COMMUNITY - RESIDENTIAL
Area of each Existing Future Land Use Category: N/A
Existing Land Use: RESIDENTIAL

N/A

C. State if the subject property is located in one of the following areas and if so how does the proposed change affect the area:

Lehigh Acres Commercial Overlay: _____
Airport Noise Zone 2 or 3: _____
Acquisition Area: _____
Joint Planning Agreement Area (adjoining other jurisdictional lands): _____
Community Redevelopment Area: _____

D. Proposed change for the subject property:

N/A

E. Potential development of the subject property:

N/A

1. Calculation of maximum allowable development under existing FLUM:

Residential Units/Density _____
Commercial intensity _____
Industrial intensity _____

N/A

2. Calculation of maximum allowable development under proposed FLUM:

Residential Units/Density _____
Commercial intensity _____
Industrial intensity _____

IV. AMENDMENT SUPPORT DOCUMENTATION

At a minimum, the application shall include the following support data and analysis. These items are based on comprehensive plan amendment submittal requirements of the State of Florida, Department of Community Affairs, and policies contained in the Lee County Comprehensive Plan. Support documentation provided by the applicant will be used by staff as a basis for evaluating this request. To assist in the preparation of amendment packets, the applicant is encouraged to provide all data and analysis electronically. (Please contact the Division of Planning for currently accepted formats.)

A. General Information and Maps

NOTE: For each map submitted, the applicant will be required to provide a reduced map (8.5" x 11") for inclusion in public hearing packets.

The following pertains to all proposed amendments that will affect the development potential of properties (unless otherwise specified).

1. Provide any proposed text changes. *SEE ATTACHMENT*
2. Provide a current Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources. *SEE LINK ON ATTACHMENT*
- N/A* 3. Provide a proposed Future Land Use Map at an appropriate scale showing the boundaries of the subject property, surrounding street network, surrounding designated future land uses, and natural resources.
- N/A* 4. Map and describe existing land uses (not designations) of the subject property and surrounding properties. Description should discuss consistency of current uses with the proposed changes.
- N/A* 5. Map and describe existing zoning of the subject property and surrounding properties.
- N/A* 6. The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.
7. A copy of the deed(s) for the property subject to the requested change. *SEE ATTACHED*
8. An aerial map showing the subject property and surrounding properties. *SEE ATTACHMENT*
9. If applicant is not the owner, a letter from the owner of the property authorizing the applicant to represent the owner.

N/A

B. Public Facilities Impacts

NOTE: The applicant must calculate public facilities impacts based on a maximum development scenario (see Part II.H.).

1. Traffic Circulation Analysis: The analysis is intended to determine the effect of the land use change on the Financially Feasible Transportation Plan/Map 3A (20-year horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit the following information:

Long Range – 20-year Horizon:

- a. Working with Planning Division staff, identify the traffic analysis zone (TAZ) or zones that the subject property is in and the socio-economic data forecasts for that zone or zones;
- b. Determine whether the requested change requires a modification to the socio-economic data forecasts for the host zone or zones. The land uses for the proposed change should be expressed in the same format as the socio-economic forecasts (number of units by type/number of employees by type/etc.);
- c. If no modification of the forecasts is required, then no further analysis for the long range horizon is necessary. If modification is required, make the change and provide to Planning Division staff, for forwarding to DOT staff. DOT staff will rerun the FSUTMS model on the current adopted Financially Feasible Plan network and determine whether network modifications are necessary, based on a review of projected roadway conditions within a 3-mile radius of the site;
- d. If no modifications to the network are required, then no further analysis for the long range horizon is necessary. If modifications are necessary, DOT staff will determine the scope and cost of those modifications and the effect on the financial feasibility of the plan;
- e. An inability to accommodate the necessary modifications within the financially feasible limits of the plan will be a basis for denial of the requested land use change;
- f. If the proposal is based on a specific development plan, then the site plan should indicate how facilities from the current adopted Financially Feasible Plan and/or the Official Trafficways Map will be accommodated.

Short Range – 5-year CIP horizon:

- a. Besides the 20-year analysis, for those plan amendment proposals that include a specific and immediated development plan, identify the existing roadways serving the site and within a 3-mile radius (indicate laneage, functional classification, current LOS, and LOS standard);
- b. Identify the major road improvements within the 3-mile study area funded through the construction phase in adopted CIP's (County or Cities) and the State's adopted Five-Year Work Program;
Projected 2030 LOS under proposed designation (calculate anticipated number of trips and distribution on roadway network, and identify resulting changes to the projected LOS);
- c. For the five-year horizon, identify the projected roadway conditions (volumes and levels of service) on the roads within the 3-mile study area with the programmed improvements in place, with and without the proposed development project. A methodology meeting with DOT staff prior to submittal is required to reach agreement on the projection methodology;
- d. Identify the additional improvements needed on the network beyond those programmed in the five-year horizon due to the development proposal.

2. Provide an existing and future conditions analysis for (see Policy 95.1.3):
 - a. Sanitary Sewer
 - b. Potable Water
 - c. Surface Water/Drainage Basins
 - d. Parks, Recreation, and Open Space
 - e. Public Schools.

Analysis should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- Franchise Area, Basin, or District in which the property is located;
- Current LOS, and LOS standard of facilities serving the site;
- Projected 2030 LOS under existing designation;
- Projected 2030 LOS under proposed designation;
- Existing infrastructure, if any, in the immediate area with the potential to serve the subject property.
- Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements; and
- Anticipated revisions to the Community Facilities and Services Element and/or Capital Improvements Element (state if these revisions are included in this amendment).
- Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water.

In addition to the above analysis for Potable Water:

- Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
- Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:
 - a. Fire protection with adequate response times;
 - b. Emergency medical service (EMS) provisions;
 - c. Law enforcement;
 - d. Solid Waste;
 - e. Mass Transit; and
 - f. Schools.

In reference to above, the applicant should supply the responding agency with the information from Section's II and III for their evaluation. This application should include the applicant's correspondence to the responding agency.

N/A

C. Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed use upon the following:

1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
2. A map and description of the soils found on the property (identify the source of the information).
3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
4. A map delineating the property boundaries on the Flood Insurance Rate Map effective August 2008.
5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

N/A

D. Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

1. A map of any historic districts and/or sites, listed on the Florida Master Site File, which are located on the subject property or adjacent properties.
2. A map showing the subject property location on the archeological sensitivity map for Lee County.

E. Internal Consistency with the Lee Plan

N/A

1. Discuss how the proposal affects established Lee County population projections, Table 1(b) (Planning Community Year 2030 Allocations), and the total population capacity of the Lee Plan Future Land Use Map.
2. List all goals and objectives of the Lee Plan that are affected by the proposed amendment. This analysis should include an evaluation of all relevant policies under each goal and objective. *SEE ATTACHMENT*

N/A

3. Describe how the proposal affects adjacent local governments and their comprehensive plans.
4. List State Policy Plan and Regional Policy Plan goals and policies which are relevant to this plan amendment. *SEE ATTACHMENT*

N/A

F. Additional Requirements for Specific Future Land Use Amendments

1. Requests involving Industrial and/or categories targeted by the Lee Plan as employment centers (to or from)
 - a. State whether the site is accessible to arterial roadways, rail lines, and cargo airport terminals,
 - b. Provide data and analysis required by Policy 2.4.4,
 - c. The affect of the proposed change on county's industrial employment goal specifically policy 7.1.4.

2. Requests moving lands from a Non-Urban Area to a Future Urban Area
 - a. Demonstrate why the proposed change does not constitute Urban Sprawl. Indicators of sprawl may include, but are not limited to: low-intensity, low-density, or single-use development; 'leap-frog' type development; radial, strip, isolated or ribbon pattern type development; a failure to protect or conserve natural resources or agricultural land; limited accessibility; the loss of large amounts of functional open space; and the installation of costly and duplicative infrastructure when opportunities for infill and redevelopment exist.
 3. Requests involving lands in critical areas for future water supply must be evaluated based on policy 2.4.2.
 4. Requests moving lands from Density Reduction/Groundwater Resource must fully address Policy 2.4.3 of the Lee Plan Future Land Use Element.
- G. Justify the proposed amendment based upon sound planning principles
Be sure to support all conclusions made in this justification with adequate data and analysis. *SEE ATTACHMENT*
- H. Planning Communities/Community Plan Area Requirements
If located in one of the following planning communities/community plan areas, provide a meeting summary document of the required public informational session.
- Not Applicable

Subject: HEINE - Text Change Amendment Attachment to Application

A. General Information:

1. Text Change

POLICY 18.1.16.1 :

Mixed Use: ... must be rezoned to a Compact Planned Development as specified by the Lee County Land Development Code, ~~recognizing there may be significant deviations to accommodate the proposed development.~~

2. See included link to Lee County FLUM. No changes.

http://www.leegov.com/gov/dept/dcd/Documents/Maps/LeePlan/Map01_01.pdf

(Link provided to assist in electronic filing request.)

5. My property is located in the University Overlay, University Community, residential area just north of the college. The surrounding areas are residential, University Village, DRGR and wetlands.

8. Aerial map link:

<http://www.bing.com/maps/default.aspx?name=11711+Via+Savona+Ct%2c+Miromar+Lakes%2c+FL+33913&where1=26.47727,-81.76715&lvl=14&FORM=INFOCM>

E. Internal Consistency with the Lee Plan

2. The removal of the text relating to "significant deviations" allows the specificity and intended meaning of all goals and policies in the Lee Plan to be understood, including the definitions of traditional neighborhood development, associated support development and University Community. It enables the specifics of Goal 4 for a sustainable development design of the Lee Plan, Chapter 32 of the compact plan development code and Policy 18 to be understood by removing ambiguity and arbitrary interpretation. A predicible outcome can be sought or measured.

4. 163.3177 (1) The comprehensive plan shall provide the principles, guidelines, standards, and strategies for the orderly and balanced future economic, social, physical, environmental, and fiscal development of the area that reflects community commitments to implement the plan and its elements. These principles and strategies shall guide future decisions in a consistent manner... The plan shall establish meaningful and predictable standards for the use and development of land and provide meaningful guidelines for the content of more detailed land development and use regulations.

G. Proposal Justification - Sound planning principle require that plan language be specific and not ambiguous. A predicible outcome should be expected by following the policies that have been planned. Language must advance compatibility with the comprehensive plan. The removal of the text allowing for significant deviation enables that development can be carried out as planners planned.

Special Warranty Deed

This Special Warranty Deed made this 6th day of May, 2014, between Barbara Heine, a married woman, joined by her husband, Frederick Heine, whose address is 11711 Via Savona Ct., Miromar Lakes, FL 33913 GRANTOR, and Barbara Heine and Frederick Heine, wife and husband, whose post office address is 11711 Via Savona Ct., Miromar Lakes, FL 33913, GRANTEE.

Witnesseth, that said grantor, for and in consideration of the sum TEN AND NO/100 DOLLARS (\$10.00) and other good and valuable considerations to said grantor in hand paid by said grantee, the receipt whereof is hereby acknowledged, has granted, bargained, and sold to the said grantee, and grantees heirs and assigns forever, the following described land, situate, lying and being in Lee County, Florida, to-wit:

Lot 16, Miromar Lakes Unit XIII-Costa Amalfi, according to the plat thereof as recorded in Instrument No. 2008000338718, Public Records of Lee County, Florida, together with Grantor's interest in a certain Ingress and Egress Easement recorded in Instrument No. 2011000174476.

Together with all the tenements, hereditaments and appurtenances thereto belonging or in anywise appertaining, and subject to property taxes for the year 2014 and all subsequent years.

To Have and to Hold, the same in fee simple forever.

And the grantor hereby covenants with said grantee that the grantor is lawfully seized of said land in fee simple; that the grantor has good right and lawful authority to sell and convey said land; that the grantor hereby fully warrants the title to said land and will defend the same against the lawful claims of all persons claiming by, through or under grantors.

In Witness Whereof, grantor has hereunto set grantor's hand and seal the day and year first above written.

SPECIAL WARRANTY DEED

THIS SPECIAL WARRANTY DEED made this 29th day of September 2009, by **Miromar Lakes LLC**, a Florida limited liability company, whose mailing address is, 10801 Corkscrew Road, Suite 305, Estero, FL 33928, as Grantor to **Barbara Heine**, A Married Person, whose mailing address is 2 Dolphin Lane, W. Islip, NY 11795, as Grantee;

WITNESSETH: The Grantor, for and in consideration of the sum of TEN and NO/100 (\$10.00) DOLLARS, and other good and valuable consideration, the receipt of which is acknowledged, grants, bargains, sells, conveys and confirms unto the Grantee and its heirs and assigns forever, all that certain parcel of land situated in the County of Lee, State of Florida, more particularly described as follows:

Lot 16, Miromar Lakes Unit XIII-Costa Amalfi, according to the plat thereof as recorded in Instrument No. 2008000338718, of the Public Records of Lee County, Florida.

SUBJECT TO taxes for the year 2009 and subsequent years.

FURTHER SUBJECT TO the covenants, easements, restrictions and other matters of public record.

Parcel No. 13-46-25-03-00000.0160

TOGETHER WITH all tenements, hereditaments and appurtenances, with every privilege, right, title, interest and estate, remainder and easements belonging or in anywise appertaining to it.

AND the Grantor covenants to the Grantee that at the time of delivering this Special Warranty Deed it is lawfully seized of the premises, that it has good right and lawful authority to sell and convey it; and the Grantor fully warrants the title to the land, and will defend it against lawful claims of all persons whomsoever claiming by, through or under the Grantor but against no others.

This property is taken subject to the Declaration of Covenants, Conditions, Restrictions and Easements

for the Miromar Lakes Master Association, Inc., recorded in OR Book 3343, page 0294-0434, Public Records of Lee County, Florida, as supplemented and amended.

The Grantor has executed this special warranty deed as of the day and year first written above.
