STAFF REPORT FOR
COMPREHENSIVE PLAN AMENDMENT
PAT 96-13**

	This Document Contains the Following Reviews:
	Staff Review
	Local Planning Agency Review and Recommendation
	Board of County Commissioners Hearing for Transmittal

STAFF REPORT PREPARATION DATE: October 27, 1997

PART I - BACKGROUND AND STAFF RECOMMENDATION

A. SUMMARY OF APPLICATION

1. APPLICANT:

LEE COUNTY BOARD OF COUNTY COMMISSIONERS
REPRESENTED BY LEE COUNTY DIVISION OF PLANNING

2. REQUEST:

Amend the Future Land Use Map Series, Maps 16, the *Year 2010 Overlay Sub-districts*, and Map 17, the *Year 2010 Overlay Map*, and Future Land Use Element Policies: 1.1.1, 1.1.9, 1.3.5, 1.7.6, 2.1.3, and 2.2.2, converting the Lee Plan's planning horizon to the year 2020, deleting current overlay sub-districts, creating new community based planning districts, and allocating land uses through the Year 2020.

B. BACKGROUND INFORMATION

This amendment was initiated by the Board of County Commissioners on February 1, 1996. Staff brought this item forward to address concerns that if the existing 2010 Overlay, proposed for elimination through the Evaluation and Appraisal Report (EAR) process, were to remain in effect the allocations in the overlay would need to be revised. Staff's primary concern was that since its initial conception the 2010 baseline data had been found to be less than acceptable and a reevaluation was needed. Also, the Overlay had not been periodically updated as anticipated by Policy 1.7.6 and needed a reevaluation.

Final Order No. AC-96-11 was issued on July 25, 1996. The Final Order specified that the 1994 EAR based amendments, which proposed the deletion of the Year 2010 Overlay, were not in compliance with Chapter 163, Part II, F.S., and Rule 9J-5, FAC. The Final Order required Lee County to rescind, and not make effective, all of the amendments which sought to delete the Year 2010 Overlay, to bring the remaining plan amendments as a whole into compliance. Therefore, the Year 2010 Overlay remains a regulatory requirement of the Lee Plan. This fact

brings to the forefront the issue of the problems inherent in the overlay and the time horizon conflict between the 2010 Overlay and the 2020 based Lee Plan

C. STAFF RECOMMENDATION AND FINDINGS OF FACT SUMMARY

1. **RECOMMENDATION:** Planning staff recommends that the Board of County Commissioners transmit this proposed amendment to the Future Land Use Element and the Future Land Use Map Series. Future Land Use Map 16 is to be replaced with the attached Map 16. Future Land Use Map 17 is deleted and held in reserve. A new table, Table 1(b) Acreage Allocation Table, will replace the function of Map 17. The text of the Future Land Use Element should be amended as follows:

POLICY 1.1.1: The Future Land Use Map contained in this element is hereby adopted as the pattern for future development and substantial redevelopment within the unincorporated portion of Lee County. Maps 16 and ~~17~~ Table 1(b) are an integral part of the Future Land Use Map series (see Policies 1.7.6 and 2.2.2). They depict the extent of development through the year ~~2010~~ 2020. No ~~final~~ development orders or extensions to ~~final~~ development orders will be issued or approved by Lee County which would allow the Planning Community's acreage totals for ~~any land use category on these maps~~ residential, commercial or industrial uses established in Table 1(b) to be exceeded (see Policy 1.7.6). The cities of Fort Myers, Cape Coral, and Sanibel are depicted on these maps only to indicate the approximate intensities of development permitted under the comprehensive plans of those cities. Residential densities are described in the following policies and summarized in Table 1. (Amended by Ordinance No. 94-29)

POLICY 1.1.9: The University Community land use category provides for Florida's 10th University and for associated support development. The location and timing of development within this area shall be coordinated with the development of the University and the provision of necessary infrastructure. All development within the University Community shall be designed to enhance and support the University. In addition to all other applicable regulations, development within the University Community shall be subject to cooperative master planning with, and approval by, the Board of Regents of the State University System.

Prior to development in the University Community land use category, there shall be established a Conceptual Master Plan which includes a generalized land use plan and a multi-objective water management plan. These plans shall be developed through a cooperative effort between the property owner, Lee County, and South Florida Water Management District.

Within the University Community are two distinct sub-categories: University Campus and the University Village. The University Window overlay, although not a true sub-category, is a distinct component of the total university environment. Together these functions provide the opportunity for a diversity of viable mixed use centers. Overall

average density for the University Village shall not exceed 2.5 units per acre. Clustered densities within the area may reach fifteen units per acre to accommodate university housing. The overall average intensity of non-residential development within the University Village shall be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to ~~the Year 2010 Overlay Map 16 and Table 1(b).~~ Specific policies related to the University Community are included within the Lee Plan under Goal 18. (Added by Ordinance No. 92-47) (Amended by Ordinance No. 94-30)

POLICY 1.3.5: The University Village Interchange land use category is designed to accommodate both interchange land uses and non-residential land uses related to the University. Development within this interchange area may or may not be related to, or justified by the land use needs of the University. Land uses allowed within this area include those allowed in the Industrial Commercial Interchange category and the associated support development allowed in the University Village. The overall average intensity of non-residential development shall be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to ~~the Year 2010 Overlay Map 16 and Table 1(b).~~ See the definition of Associated Support Development in the Glossary. Cooperative master planning and approval by the Board of Regents shall be required prior to development within this land use category. Additionally, any development within this land use category which meets or exceeds the Development of Regional Impact thresholds, either alone or through aggregation, shall conform to the requirements of Chapter 380 F.S. (Added by Ordinance No. 92-47) (Amended by Ordinance No. 94-30)

POLICY 1.7.6: The ~~Year 2010 Overlay~~ Planning Communities Map and Acreage Allocation Table (see Maps 16 and ~~17~~ Table 1(b) and Policies 1.1.1 and 2.2.2) depicts the proposed distribution, extent, and location of generalized land uses for the year ~~2010~~ 2020. Acreage totals are provided for land in each ~~subdistrict~~ Planning Community in unincorporated Lee County. No final development orders or extensions to final development orders will be issued or approved by Lee County which would allow the acreage totals for any land use category residential, commercial or industrial uses on these maps contained in Table 1(b) to be exceeded. This policy shall be implemented as follows: (Amended by Ordinance No. 94-29)

1. For each ~~2010 Overlay subdistrict~~, Planning Community the County shall maintain ~~or generate, as needed, records showing all final development orders, building permits and certificates of occupancy issued within the last twelve (12) months a parcel based database of existing land use. No later than September 30, 1994, the County shall have generated a baseline of existing developed acreage in each 2010 Overlay subdistrict.~~ The ~~baseline~~ database shall be periodically updated at least ~~once every twelve (12) months~~ twice every year, in September and March, for each 2010 Overlay subdistrict Planning Community. ~~The first comprehensive updating shall occur on or before September 30, 1995.~~

2. Project reviews for ~~final~~ development orders shall include a review of the ~~predicted amount of existing Overlay~~ capacity, in acres, that will be consumed by

~~buildout of the development order to be permitted at buildout. Subsequent to the effective date of this provision, no final~~ No development order, or extension of a final development order, shall be issued or approved if the project acreage, when added to the acreage contained in the updated existing land use database, exceeds the limitation established by Table 1(b), Acreage Allocation Table ~~is greater than the acreage remaining in the updated 2010 Overlay subdistrict (Maps 16 and 17~~ regardless of other project approvals in that ~~overlay subdistrict~~ Planning Community.

3. No later than the regularly-scheduled date for submission of the Lee Plan Evaluation and Appraisal Report, and every five years thereafter, the County shall conduct a comprehensive evaluation of the ~~2010 Overlay~~ Planning Community Map and the Acreage Allocation Table system, including but not limited to, the appropriateness of land use distribution ~~in the Overlay~~, problems with administrative implementations, if any, and areas where the ~~overlay~~ Planning Community Map and the Acreage Allocation Table system might be improved.

POLICY 2.1.3: All land use categories and ~~Year 2010 Overlay districts~~ Planning Community Map areas permit the consideration of churches and schools (except in Wetlands and Airport Noise Zones), public uses and buildings, public utilities and resource recovery facilities, public recreational uses (including franchised quasi-commercial uses in conjunction with a public use), and sites for compatible public facilities when consistent with the goals, objectives, policies, and standards in this plan and applicable zoning and development regulations. (Amended by Ordinance No. 94-30)

POLICY 2.2.2: Map 1 of the Future Land Use Map series indicates the uses and density ranges that will ultimately be permitted on a given parcel. However, it is not a guarantee that such densities or uses are immediately appropriate, as the map provides for the county's growth over the coming 26 years. During the rezoning process the Board of County Commissioners will balance the overall standards and policies of this plan with three additional factors:

1. ~~Whether~~ Whether a given proposal would further burden already overwhelmed existing and committed public facilities such that the approval should be delayed until the facilities can be constructed; and
2. ~~Whether~~ Whether a given proposal is for land so far beyond existing development or adequate public facilities that approval should be delayed in an effort to encourage compact and efficient growth patterns; and
3. ~~Whether~~ Whether a given proposal would result in unreasonable development expectations which may not be achievable because of acreage limitations ~~on the "Year 2010 Overlay" contained in the Acreage Allocation Table~~ (see Policy 1.7.6 and Maps 16 and ~~17~~ Table 1(b)).

In all cases where rezoning is approved, such approval does not constitute a determination that the minimum acceptable levels of service (see Policy 70.1.3) will be available concurrent with the impacts of the proposed development. Such a determination must be made prior to the issuance of additional development permits, based on conditions which exist at that time, as required by Lee County's concurrency management system. (Amended by Ordinance No. 94-30).

2. BASIS AND RECOMMENDED FINDINGS OF FACT: As stated in Part II Section

B. Conclusions, of this report the following facts support this proposed amendment:

- The current Year 2010 Overlay system was not based on an accurate existing land use inventory;
- Projecting accurate long range future land use into small geographic is extremely difficult and does not constitute a good planning practice;
- The original boundaries for the Year 2010 Overlay sub-districts were erroneous, often crossing property or development lines;
- Elimination of the Year 2010 Overlay is not practical at this time;
- The planning horizon of the 2010 Overlay is not consistent with the horizon of other comprehensive planning efforts.
- Major modifications to the overlay should be considered for adoption;
- Larger, community based planning districts should be utilized and the proposed new Map 16 should replace the current map;
- The previous EAR population projections have been shown over time to be too high;
- The BEBR Mid-Range population projection for the year 2020 are the most appropriate projections and should be used for the county's planning efforts;
- Planning staff has created a reliable parcel based database of existing land use, suitable for tracking development patterns;
- Utilizing a 25% buffer above the expected incremental increase in population is an accepted planning practice;
- Planning staff has performed an in-depth evaluation of future land use needs and concludes that, for a planning horizon of 2020 the county should use the proposed Table 1(b) Acreage Allocation Table as a replacement for Map 17;
- The regulatory aspect which limits Residential, Commercial, and Industrial should be retained; and,
- The regulatory aspect which limits Parks and Public, Active and Passive Agriculture, Vacant, and Conservation acres should be eliminated.

PART II - STAFF ANALYSIS

A. STAFF DISCUSSION

Origin of the Year 2010 Overlay

The original 2010 Overlay was a result of the 1989 Settlement Agreement with the Department of Community Affairs (DCA). This agreement required the County to amend the Future Land Use Map Series by designating the proposed distribution, extend, and location of the generalized land uses required by Rule 9J-5.006(4)(a)1.-9 for the year 2010. This was accomplished by creating 115 sub-districts, generally nesting within the existing adopted Planning Districts, and allocating projected acreage totals, for each generalized land uses, needed to accommodate the projected 2010 population. Policies were added to the plan that provided that no development approvals would be issued in a sub-district that would cause the acreage total set for that land use category to be exceeded. The Overlay, in plain terms, was a device designed to reconcile the population accommodation capacity of the Future Land Use Map (estimated to be 70 years in 1989) with the 20-year time frame in the text of the element. It was also designed to provide more certainty as to the extent and location of future commercial and industrial development.

The Methodology Behind the Year 2010 Overlay

Residential acreage allocations were derived by projecting dwelling unit control totals for the year 2010 for each of the County's 15 planning districts. These units were then distributed into the sub-districts following an analysis of existing units, and buildout units for each sub-district. Units were changed to acres by applying a density factor based on land use category. Unfortunately, the base data for existing dwelling units was unreliable. The county did not have adequate data on any existing land use. This lack of an accurate inventory made it extremely difficult to project accurate needs and required acreage figures. In addition, there was no safety or flexibility factor included in the residential projections.

A Countywide commercial acreage figure was established by a consultant. Alternatively, socio-economic data from the metropolitan Planning organization was used equated to existing acreage resulting in an employee per acre figure. A straight line projection was made by Planning District. These figures were then disaggregated into the sub-districts.

Industrial allocations were based on the acreage figures for the Industrial Development, Industrial Interchange, Airport Commerce, and Industrial/ Commercial Interchange categories and the employment goal in Policy 7.1.3. All of these figures were reviewed in light of data generated in other studies and the inventory of existing uses in an effort to make the final figures consistent with reality.

Problems with the Implementation of the Year 2010 Overlay

The Year 2010 Overlay has been exceptionally difficult to administer. Some of the initial problems experienced by the staff included the inadequacy of the original inventory, the lack of a reliable existing land use database, and difficulty in explaining the concept and regulatory nature of the overlay to the public. A major effort has been directed at resolving some of these problems. The establishment of a reliable database identifying the current baseline of uses was essential for the establishment and

monitoring of a workable overlay. There are some issues with the existing overlay, however, that probably cannot be resolved in a principled and satisfactory manner. These include:

1. Sub-districts proved to be too small to allow needed flexibility. The average sub-district size is 4,000 acres (not including those totally located within one of the municipalities;
2. The sub-district boundaries, originally based on traffic analysis zones, are erroneous. Many existing and proposed developments (even parcels) cross sub-district lines;
3. The treatment of quasi-public uses, such as churches and schools;
4. The treatment of recreational facilities in residential developments;
5. The treatment of platted subdivisions with existing roads, but few houses;
6. The treatment of mineral extraction;
7. The treatment of DRIs with lengthy buildout periods;
8. The treatment of large lot developments and in general developments that are vastly different from the assumptions in the Lee Plan; and,
9. The apparent need to prohibit conservation, agricultural and recreational uses that exceed the acreage thresholds.

It was possible to devise rules to deal with all of these situations; these rules, however, are relatively arbitrary and provide the County with little valuable information for infrastructure planning purposes.

The commercial allocations have caused the most controversy, due to the speculative nature of the employee projections, the inaccurate data in the initial inventory, and the absence of alternatives to the crude straight-line averaging of the existing and buildout employees per acre ratios described in the previous section. Some of the allocations in the Overlay were inadequate to accommodate even the existing uses, and others have been exceeded as the result of a single zoning case or development order application. The County has responded to the capacity deficits by delaying the legal effectiveness of the overlay until the last point permitted by the 1989 settlement agreement. Procrastination, however, will not solve the problem; it may, in fact, make it worse by increasing the expectations of the affected property owners and financial institutions.

The sub-districts used for the allocations in the Year 2010 Overlay have proved to be very problematic. Of the 115 sub-districts, 10 contained no unincorporated lands and therefore have no land use allocations. Of the remaining 105 sub-districts, 22 exceeded their residential allocation with 77 exceeding at least one residential allocation in one of the Future Land Use Categories. Additionally, of the remaining 105 sub-districts, 40 exceeded their industrial allocation, 12 exceeded their commercial allocation, and 80 exceeded their Parks and Public allocation.

Proposed EAR Elimination of the Overlay

In response to the shortcomings in the Year 2010 Overlay, the County, as part of its Evaluation and Appraisal Report (EAR) amendments, proposed the elimination of the overlay. The DCA took strong opposition to this proposal and found the amendment not in compliance. The finding of non-compliance also included several other objections to the proposed EAR amendments. By far the main point of contention was eliminating the overlay. Upon completion of the Administrative Hearing and issuance of the Recommended Final Order by the Hearing Judge, the County and DCA entered into negotiations to resolve the remaining issues. There were several meetings and some progress was made, but ultimately a mutually agreed upon settlement could not be reached. The case went before the Governor and his Cabinet and the Final Order specifically required the County to keep the overlay. Final Order No. AC-96-11 was issued on July 25, 1996. The Final Order specified that the 1994 EAR based amendments, which proposed the deletion of the Year 2010 Overlay, were not in compliance with Chapter 163, Part II, F.S., and Rule 9J-5, FAC. The Final Order required Lee County to rescind, and not make effective, all of the amendments which sought to delete the Year 2010 Overlay to bring the plan amendments as a whole into compliance. Therefore, the Year 2010 Overlay remains a regulatory requirement of the Lee Plan.

The Final Order did recognize that the Year 2010 Overlay was not the only mechanism to address the issues at hand. The order states this "determination does not mean that Lee County must retain the 2010 Overlay indefinitely, or that the 2010 Overlay is the only planning tool appropriate for Lee County. The 2010 Overlay can be deleted from the Lee Plan if alternative planning controls are established to compensate for the deletion of the overlay." This is exactly what this proposed amendment is intended to do.

During the negotiations the County and DCA had several discussions on appropriate alternatives to the overlay. There were several themes the department felt were necessary components of an alternative. The department felt strongly that communities should be utilized as planning areas, a concept that planning staff agrees with. Regarding mixed-use categories, it was the department's belief that percentage distribution between uses was the best way to regulate the mix. They did concur that the acreage limitations contained in the overlay were a way to satisfy this requirement. The department was also concerned with hurricane evacuation and the population at risk. As these negotiations continued the County and DCA found much common ground. Every attempt has been made in this proposed replacement to the Year 2010 Overlay to address all of the departments concerns.

Proposed Amendment to Replace the Year 2010 Overlay

The goal of this amendment is to configure a replacement for the Year 2010 Overlay that will address many of the identified shortfalls of the overlay yet keep the Lee Plan in compliance with the minimum criteria rule and Florida Statutes. Many of the issues that were discussed during the negotiations mentioned above are being incorporated. The new proposal has three basic tenets: to simplify the overlay by reducing the number of districts; to expand the planning horizon to the year 2020 to be consistent with the rest of the plan; and, to utilize the Bureau of Economic and Business Research (BEBR) Mid-Range 2020 population projections replacing the projections from the EAR.

Perhaps the biggest problem with the overlay is the large number of sub-districts. A large number of sub-districts translate into geographically small districts. Long range planning on small and numerous geographic areas is close to impossible. The Planning Communities Map proposed to replace Map 16

identifies 20 distinct areas within the County. The number and size of the districts was the subject of much debate. The number should be small enough to avoid the long range planning allocation problem yet large enough to assure some certainty in the location of the controlled uses. Planning staff brought a preliminary map to the Local Planning Agency (LPA) in the spring. After discussion the number 20 was agreed upon. One LPA member suggested the phrase "20 for 2020" as a promotional tool. The proposed replacement for Map 16, is a reasonable consensus which should help resolve the Year 2010 Overlay problems and still serve to provide a level of certainty.

Map 17 of the original overlay was initially intended to provide a graphic representation of the development potential of each sub-district. The map, which is not a map at all, fell horribly short of this aspiration. While it was refined over time to better perform this task, it makes sense to call it what it is, a table with acreage limitations in it. Therefore, this amendment proposes to eliminate Map 17 and add a new table, Table 1(b) Acreage Allocation Table, to the Lee Plan.

B. METHODOLOGY

Population

The Division of Planning conducted a review of its adopted population projections from the Evaluation and Appraisal Report (EAR) against the annual population estimates from the Bureau of Economic and Business Research's (BEBR) for the years since the EAR projection was adopted. This review showed that the EAR population projections were exceeding the annual population estimates. The EAR projections were completed in 1993 and included population projections for every half decade. By 1995 these projections were exceeding the annual BEBR estimate by more than 10%. Planning Staffs review also showed that the EAR projections were between 25% and 35% higher than the BEBR projections by the year 2020.

The estimates done by staff in the spring of 1997, which included four more years of historical data, showed that Lee County's population growth projections were more closely following the BEBR "Mid-Range" population projections. The BEBR "Mid-Range" projections are also being used by other agencies and by other County divisions to develop long range plans. Most notable would be the MPO's intention to use these numbers for the update of the 2020 Transportation Plan. Therefore, the Division of Planning has based the re-evaluation of the Year 2020 Overlay on the BEBR Mid-Range population projections.

Residential Use

The BEBR population projection of 602,000 is being used as the countywide control total for residential use. The goal was to distribute this figure into the newly created Planning Communities in a rational and defensible manner. To assist planning staff in this effort a sophisticated spreadsheet was developed. Utilizing the existing land use database, dwelling unit counts for each Planning Community were determined and entered into the spreadsheet. Due to the very nature of the various communities, population characteristics will vary. Planning staff compiled certain demographic components for the individual Planning Communities and evaluated them for inclusion in the spreadsheet. These components were persons per household and occupancy rates. While staff recognized that differences in persons per households (PPH) exist between the 20 Planning Communities, a reliable trend could not be formulated for each of the communities. Limitations with census geography and changes in census methodology over time were hindrances in the effort to

produce a reliable PPH estimate for each community. Therefore, staff felt it was appropriate to utilize the countywide PPH estimates from the Persons Per Household Study completed for the latest Lee Plan Evaluation and Appraisal Report. Staff was better able to collect occupancy rate information from the census for each community. A greater level of confidence was obtained from utilizing the different occupancy rates for each community. Unlike the PPH estimates, which varied greatly between the various census data for some communities, the community occupancy rates were generally consistent and summed at or near the county average for each census. Therefore, staff felt comfortable in establishing a weighted average for occupancy rates for each community. As a reality check, the variables, by community, were applied to the 1996 units and that generated population was compared to the BEBR 1996 estimate. The figures were within a percentage of each other, validating the spreadsheet methodology.

The next task was to generate unit projections for each community for the year 2020. To start, the population projections for the City of Cape Coral, City of Fort Myers, and City of Sanibel were directly input from information provided to the Division of Planning from these municipalities. The Town of Fort Myers Beach has not completed its comprehensive plan and has no officially adopted population projection for the year 2020, therefore the Town of Fort Myers Beach's population projection was calculated in the same as the other Planning Communities. Lehigh Acres also had an agreed upon population figure, generated by the Commercial Land Use Study, and it was input into the accommodation model. The remaining unincorporated community population projections were evaluated using the approved Planned Development and subdivision information and the historical growth trends for the last six years for each community. Each community's dwelling units (DU) were trended out to the year 2020 with a built in cap based on the Future Land Use Map's potential additional units allowed on the existing undeveloped land and adopted Lee Plan Assumptions. These trends were also compared to the amount of available land in a community to assess whether or not the projections could be accommodated. In some areas it was discovered that projected trend would exceed the Lee Plan assumed number of units. There were also communities where the amount of approved residential development exceeded the assumed residential percentages from the Lee Plan. Likewise, there are instances where the amount of pre-approved (some existing some only planned) non-residential development in a community makes it impossible for the residential component to achieve the percentage assumed in the Lee Plan. After fully scrutinizing this data a number for new dwelling units, units to be built by the year 2020, was projected for each community. These unit numbers were entered into the spreadsheet where they were multiplied by the estimated community vacancy rate and the county PPH to determine the community's 2020 population.

The spreadsheet was designed to evaluate the increment of new dwelling units. The 1996 dwelling unit count from the existing land use database was considered the starting point. The difference in population from 1996 to 2020 was used as target for determining the need for new dwelling units. To allow for fluctuations in the market, and in keeping with good planning practice, an additional buffer of 25% was added to this figure. The proper way to allow for a flexibility factor was the subject of considerable debate during the administrative hearing. Utilizing 125% of the incremental growth was supported by recognized planning literature. The initial determination for needed new units expected by 2020 determined above were evaluated for each of the new Planning Community. Adjustments were made to assure that the population increment plus 25% was not exceeded.

The next step, and one that brings less certainty into the equation, is to determine acreage figures for these units. The finalized unit projections were then distributed into appropriate future land use categories. The projected units were then multiplied by the assumed unit per acre figure of the category. This was done to determine the appropriate residential acreage allocation. This DU per acre figure was modified in some areas to adjust for the fact that this overlay is based on net acres while the Lee Plan assumptions are based on gross acres which is also how density is determined for consistency with the Lee Plan density. Also taken into consideration were developments, approved prior to the existence of the Lee Plan, where vacant land that is approved for densities higher than the allowable Lee Plan densities. Factors, such as one recently approved development that has taken advantage of the Planned Development District Option (PDDO), which allows up to 6 units per gross acre in a category that allows 1 unit per gross acre were also considered. Normally this land use category would and assumes 0.8 units per gross acre. In this specific case, the approved units/net acres are 5.64. Likewise, some developments have been approved with densities (both gross and net) substantially less than the Lee Plan assumptions. Therefore the assumed density for each Future Land Use Map designation varies between Planning Communities

The corresponding acreage figures were only estimated for the unincorporated portions of the county. Therefore, the acreage allocation table for the Sanibel Community shows no acreage. There is, however, an input unit count for Sanibel that corresponds to the projected population, adjusted for PPH and occupancy rate. The Town of Fort Myers Beach is included on the allocation table for two reasons. The first was that the data was available and the second was there were no 2020 population projections for this area. The Planning Communities map for Fort Myers Beach includes no unincorporated lands.

Commercial

Future commercial needs for Lee County is not easy to pinpoint. Lee County's commercial component can not merely be based on the number of county residents. In addition, each community is not necessarily self-supporting in its commercial needs, therefore some areas may grow faster commercially than they do residentially and visa versa. Between 1980 and 1990 commercial square feet grew by 100% while the population grew by only 53% for the unincorporated area. Furthermore, from 1990 through the end of 1996, the unincorporated population has grown by 21% while commercial growth was 31%. Based on these trends, it is obvious that commercial growth in of Lee County is not totally tied or dependent on residential growth. Part of the growth not related to the residential aspect can be explained by the fact that Lee County is a resort area that caters to tourists and winter visitors.

In 1986 Lee County commissioned Thomas Roberts, of Thomas Roberts and Associates, to perform a commercial needs study. The final document was entitled "Commercial Land Use Needs in Lee County." This study identified an estimate of 11,483 commercially developed acres by the year 2010. In accordance with the study's methodology, this figure should then be multiplied by a safety factor of 10% (to allow for inaccuracies in projecting the need) to produce 12,631 acres. The study then utilizes a flexibility factor of 15% (to allow for competition and choice, land held back for speculation, etc.) to produce a grand total of 14,526 acres. The original study was based on a BEBR Mid-Range 2010 population of 499,500.

In 1989 the Board of County Commissioners revised its population projection and adopted the BEBR High-Range number of 640,500. At that time Mr. Roberts was asked to adjust the commercial needs figure. In a December 10, 1989 memorandum he proposed the following methodology to amend the previous projection. The pre-factored area of 11,483 acres should be multiplied by $640,500/499,500$, or 1.282, producing a new pre-factored area of 14,721 acres. He goes on to modify this figure with a safety factor and a flexibility factor. He does, however recommend that because the higher population projection is being utilized, the safety factor should be reduced to 5%. Doing the math produces a figure of 18,622 acres, which he recommends the County use.

Utilizing a like methodology, planning staff recalculated the future commercial needs. The proposed population for this amendment is the BEBR Mid-Range number for 2020 of 602,000. Adjusting the original 11,483 acres by the ratio $602,000/499,500$, or 1.205, produces a new pre-factored figure of 13,837 acres. Utilizing a safety factor of 10%, justified by the mid-range number, and a flexibility factor of 15% the countywide commercial need calculates to 17,504 acres. Further adjustments to either remove the incorporated areas or indicate allocations for them still need to be performed.

Staff realizes that, historically, the City of Fort Myers has provided more than its proportionate share of commercial development. However, the city is approaching buildout and is currently making an effort to stabilize its residential neighborhoods. The unincorporated county will be required to absorb a greater share of new commercial development. This trend is currently being demonstrated by the fact that in this decade no new "Big Box" retailers have located in the City of Fort Myers. Only one large shopping center has been constructed in Fort Myers in the last decade.

Likewise, the City of Cape Coral has somewhat limited opportunities for commercial development. The vast majority of the land in Cape Coral is platted into single family lots. Opposition to introducing new commercial uses within residential areas has surfaced in the past. According the city planners only ### acres of land are programmed for commercial development. Staff allocates 7216 acres of commercial to the municipalities leaving 10,288 acres for distribution to the unincorporated Planning Communities.

In addition to the Robert's projection, commercial projections were compiled based on projected total unit counts per community, in order to make allowances for seasonal residents, and the historical trends of commercial square feet per unit and floor area ratio. The county control total for commercial is in square feet and is based on historical trends of commercial growth. The projected commercial square feet needed by the year 2020 are projected to be 46,117,550. This is approximately 9,000,000 square feet less than that which would be projected using individual community historical community trends. The lower of these projections was chosen based on a higher correlation for the historical trends and the fact that the community based projections does not consider the fact that some of these areas are near buildout already. For example, as the coastal communities reach buildout, the growth in the tourist commercial demand will also begin to level out. The county wide control total is next applied to the communities to allocate the commercial uses throughout the County. This allows the results to be compared to the total available/undeveloped acreage remaining in each community.

This countywide acreage need was then disaggregated across the county into the unincorporated Planning Communities. This was accomplished by allocating commercial acreage based on the

existing development, approved developments, and areas designated for commercial development. The amount of vacant commercial zoning was also taken into account in the disaggregation.

Industrial Use

Future Industrial needs for Lee County were originally studied and projected in a study completed in August 1983 by Thomas H Roberts. This study has been revised and modified over time and was most recently revised during the litigation process of the EAR. However, this study and its revisions focused on how much land Lee County needed to designate on the Future Land Use Map as industrial. These studies were concerned with providing enough land for future industrial development and its ancillary uses. The Lee Plan allows for limited commercial development in industrially designated lands to support the surrounding industrial uses. This means the some uses that are envisioned to occur within these industrial areas will not be inventoried as industrial uses. For example, a small deli who's customer base is from a surrounding industrial park will be inventoried as a commercial use even though it may be located within an area designated as Industrial on the Future Land Use Map. Therefore, it is important to further refine the accepted industrial study from the existing Lee Plan Support Documentation to ascertain how much land will need to be allocated for industrial uses for the Year 2020. Staff has concluded that the appropriate unit of measure for the industrial component of the 2020 allocations is acres. Much of Lee County's industrial uses occur out of doors such as concrete batch plants, lumber yards, and distribution centers. The location of industrial uses, while not limited to areas designated as Industrial Development, Industrial Interchange, Industrial Commercial Interchange, and Airport Commerce, are primarily located in these areas. Staff has made the following effort to determine the appropriate allocation of industrial uses for the year 2020.

To accomplish this task, the original Thomas Roberts study was modified to focus on how much land will be utilized by industrial uses by the year 2020. The data in the study was also updated to include the latest National Planning Association data which has been consistently used in the industrial needs study, and is recognized as one source of best available data. The primary change in the methodology was the elimination of the number of acres needed to support the ancillary uses associated with industrial developments. These uses will be inventoried under in the database under their appropriate use category whether it is a commercial, public, or conservation use. Furthermore some uses have always be assumed to have locations which may be out of industrial land use categories. For example, only 50% of warehouse uses were assumed to be located in industrial land use categories in the original Roberts study and its subsequent revisions. However, in reality, approximately 75% of these types of uses are inventoried as industrial in the Lee County Land Use Inventory. There are ancillary commercial uses associated with this type of use that have and will be inventoried as commercial uses. The breakdown of percentages for the inventory's purposes are shown in table Year 2020 Industrial Allocation Needs along with its estimated 2020 employment figure. These employment figures were then utilized in the same manner as the previous industrial studies to estimate the need for industrial lands. First the assumption is 7 employees per acre to determine the minimum acreage need. A market safety factor was then applied to this acreage figure and subsequently a flexibility factor is applied to this figure. Since the allocations are for the unincorporated county the amount of industrial lands in the cities were removed from this figure. Mirroring the discussion in the discussion under Commercial Uses, areas for true industrial development are not abundant in the county's municipalities. Clearly, the "industry" in the county's coastal communities, Sanibel and Fort Myers Beach, is tourism. The desire of Lee Plan Policy 7.1.4 is to afford an opportunity to expand the County's economic base beyond tourism. As with commercial development, the City of Cape Coral has limited opportunities

for industrial uses equal to its expected population base. Taking all this into consideration, this final unincorporated industrial need for Lee County is calculated to be 6,799 acres.

This countywide acreage need was then disaggregated across the county into the unincorporated Planning Communities. This was accomplished by allocating industrial acreage based on the existing development, approved developments, and areas designated for industrial development. The amount of vacant industrial zoning was also taken into account in the disaggregation.

Parks and Public

The countywide allocations in the original Year 2010 Overlay were exceeded in only two areas Parks and Public, and Active AG. The under allocation in the Parks and Public category can be attributed to a difference between the allocation and inventorying methods. The Parks and Public allocation was based on how much land was designated Public Facilities in each Sub-district. The first problem with this technique is that only parcels 20 acres or more in size were mapped. Furthermore, not all publicly owned lands were included in this designation. Properties designated as Public Facilities were generally schools, parks, hospitals, and utility plants. Lands owned by the state and other agencies for conservation purposes were not consistently mapped as Public Facilities. The main discrepancy is with no publicly owned lands which are inventoried in the Park and Public category but are not owned by a public agency. These uses include, but are not limited to, golf courses developed within a residential community, other residential amenities, government buildings, clubs, open space within private developments, and churches.

Staff can see no useful purpose in regulating an upper limit in the Parks and Public land use. The acreage figure contained in the Acreage Allocation Table for this use should not be regulatory. To do so would be counter productive. Staff admits there is merit in tracking this acreage figure and intends to update this use in the database.

Active and Passive Agriculture

The Active Agriculture component of the land use inventory also exceeds its allocation. In reality this should be expected. Although the current Year 2010 Overlay is not written this way, it is expected that, in an urbanizing county such as Lee County, over time agricultural uses will be displaced with other non-agricultural uses. However, it cannot be assumed that there will only be a reduction in the amount of agricultural acreage in all areas of the county. While agricultural uses are displaced in some areas of the county they are expanding in other areas of the county primarily in the areas designated as Rural and Density Reduction/Groundwater Resource. Therefore, the acreage projections should be used as 2020 targets and not as a regulatory number that cannot be exceeded or fallen below. This also applies to Passive Agricultural uses. Currently, Lee County exceeds its projected combined 2010 agricultural acreage allocation by approximately 3,050 acres. Clearly in a county that is urbanizing as Lee County is requiring the retention of passive agriculture use in lands designate within the urban boundary is counter productive. Staff, again, sees the merit of maintaining the database inventory of these uses, but believes the regulatory requirement not to let the 2020 component of this use be exceeded in the present is unwise.

Vacant Land

Similar to the agricultural uses, the amount of vacant land should also be expected to reduce over time. Lands classified as a vacant use are only those with no structures and no other use. For example, a

vacant commercial building will still be classified as a commercial use and a parcel used as open space with no building will be classified as Public Open Space. Therefore, unlike, agricultural uses, vacant lands will not decline in one area and increase in other areas, with the exception of some demolitions of condemned/damaged buildings and also the occasional agricultural use which is abandoned and reverts back to vacant. For these reasons, the vacant acreage allocation, if used as a regulatory number, should be viewed as a number that cannot be fallen below during the life of the overlay.

Conservation Land

The Conservation Allocation is also one that is impractical to regulate. The current allocations in the Year 2010 Overlay are based on the amount of land designated on the 1989 Lee Plan Future Land Use Map as RPA (resource protection areas) and TZ (transition zones). Since these areas were digitized off of 1987 quad sheet maps which were at a 1" to 2000' scale there accuracy, while good for the illustrative purposes they were intended for, are not precise enough for a regulatory acreage figure. Furthermore, since the original mapping of these areas, the definition of what lands qualify as wetland has also changed. Staff has review possible methods to improve the original mapping of wetlands. In a pilot project staff used the jurisdictional boundaries at Florida Gulf Coast University and compared them to several wetland and soils maps. No single mapped system showed superior results in identifying the ground truthed wetlands. Staff concluded that the current mapping system was the best available.

Recent revisions to the Lee Plan have moved the county from a regulatory roll in wetlands to one more of enforcement. If the county does not regulate this use, the acreage allocations can not be regulatory. Staff, again, sees the merit of maintaining the database inventory of these uses, but believes the regulatory requirement not to let the 2020 component of this use be exceeded in the present is unwise.

B. CONCLUSIONS

In accordance with Policy 1.7.6.3 planning staff has conducted this comprehensive evaluation of the Year 2010 Overlay system. Upon completion of this analysis planning staff concludes the following:

- The current Year 2010 Overlay system was not based on an accurate existing land use inventory;
- Projecting accurate long range future land use into small geographic is extremely difficult and does not constitute a good planning practice;
- The original boundaries for the Year 2010 Overlay sub-districts were erroneous, often crossing property or development lines;
- Elimination of the Year 2010 Overlay is not practical at this time;
- The planning horizon of the 2010 Overlay is not consistent with the horizon of other comprehensive planning efforts.
- Major modifications to the overlay should be considered for adoption;
- Larger, community based planning districts should be utilized and the proposed new Map 16 should replace the current map;
- The previous EAR population projections have been shown over time to be too high;
- The BEBR Mid-Range population projection for the year 2020 are the most appropriate projections and should be used for the county's planning efforts;
- Planning staff has created a reliable parcel based database of existing land use, suitable for tracking development patterns;

- Utilizing a 25% buffer above the expected incremental increase in population is an accepted planning practice;
- Planning staff has performed an in-depth evaluation of future land use needs and concludes that, for a planning horizon of 2020 the county should use the proposed Table 1(b) Acreage Allocation Table as a replacement for Map 17;
- The regulatory aspect which limits Residential, Commercial, and Industrial should be retained; and,
- The regulatory aspect which limits Parks and Public, Active and Passive Agriculture, Vacant, and Conservation acres should be eliminated.

C. STAFF RECOMMENDATION

Planning staff recommends that the Board of County Commissioners transmit this proposed amendment to the Future Land Use Element and the Future Land Use Map Series. Future Land Use Map 16 is to be replaced with the attached Map 16. Future Land Use Map 17 is deleted and held in reserve. A new table, Table 1(b) Acreage Allocation Table, will replace the function of Map 17. The text of the Future Land Use Element should be amended as indicated in Part I, Section C. of this report.

PART III - LOCAL PLANNING AGENCY REVIEW AND RECOMMENDATION

PUBLIC HEARING DATE. October 27, 1997

A. LOCAL PLANNING AGENCY REVIEW

The LPA formally heard this proposed amendment at their October 27, 1997 Public Hearing. Prior to the date, the LPA and planning staff had discussions at all of the previous amendment hearings regarding this proposal. Conceptual approval of the proposed Map 16 was indicated fairly early on in this process. Other areas of discussion were commercial acreage allocation and population projections.

LPA members had several questions regarding the methodology for determining need and allocation. Staff knew that the process that was utilized could not be easily translated to a written document and was prepared to answer the questions. Planning staff did answer all of the questions concerning the methodology to the LPA's satisfaction. Staff also informed the LPA that they were planning on dealing directly with DCA staff to walk them through this somewhat complicated process. The LPA identified three areas where they had concerns regarding the final allocations. Ultimately, there was only one recommendation for increasing or decreasing allocations. Staff did offer to take a closer look at these areas between the transmittal and adoption hearings. The LPA also expressed interest in including a footnote on Table 1(b) indicating the uses that are being regulated and those that are not.

Also discussed was the lack of residential allocation in the wetland category. No solution to this issue was proposed. Staff was concerned that such an allocation would encourage new development in the wetland areas. Under Chapter 13 of the Lee Plan, legally existing lots in the wetland areas do have the advantage of the single family residential provision.

Two members of the public addressed the LPA on this issue. The first suggested some additional language for Policy 1.7.6 to clarify the intent to adjust the allocations if necessary as part of the EAR review. The LPA concurred with this, as did staff. This person also suggested that the staff report include a discussion, similar to the one in the commercial use section, that highlights the limitations of the municipalities to accommodate industrial development. The LPA and staff agreed. The third request was to include the sections 1, 2, and 3 of Township 48 South, Range 26, East in the Bonita Springs Planning Community. The LPA made a motion to this effect. The second speaker urged the LPA to adopt the amendment and complimented staff's efforts on this amendment.

The LPA offered two motions concerning this amendment. The first, as mentioned above, was to include the specified sections in the Bonita Springs Planning Community, and to also move the rural residential allocation, which applied directly to these three sections, on Table 1(b) Acreage Allocation Table.

B. LOCAL PLANNING AGENCY RECOMMENDATION AND FINDINGS OF FACT SUMMARY

- 1. RECOMMENDATION:** Motion #1 The LPA recommended that the BoCC includes sections 1, 2, and 3 of Township 48 South, Range 26, East in the Bonita Springs

Planning Community and to also move the rural residential allocation, which applied directly to these three sections, on Table 1(b) Acreage Allocation Table.

Motion #2 The LPA recommended the BoCC transmit this amendment as recommended by staff and amended by the above motion.

1. **BASIS AND RECOMMENDED FINDINGS OF FACT:** Motion #1 This area is more closely associated with the Bonita Springs Planning Community.

Motion #2 As contained in the staff analysis.

**PART IV - BOARD OF COUNTY COMMISSIONERS
HEARING FOR TRANSMITTAL OF PROPOSED AMENDMENT**

DATE OF TRANSMITTAL HEARING: November 5, 1997

- A. BOARD REVIEW:** Two issues were brought up during board review and were discussed by the public and the Board. First, the three sections of land designated "Rural" in the southeast portion of Lee County were discussed. A member of the public brought up this issue, a local land use attorney, and was agreed upon by the board. The board agreed that the entire strip of land south of Bonita Beach Road should be in the Bonita Community. They also concurred that the Rural allocation that was included in the LPA staff report for the Southeast Lee County Community should be added to the proposed Rural allocation in the Bonita Community.

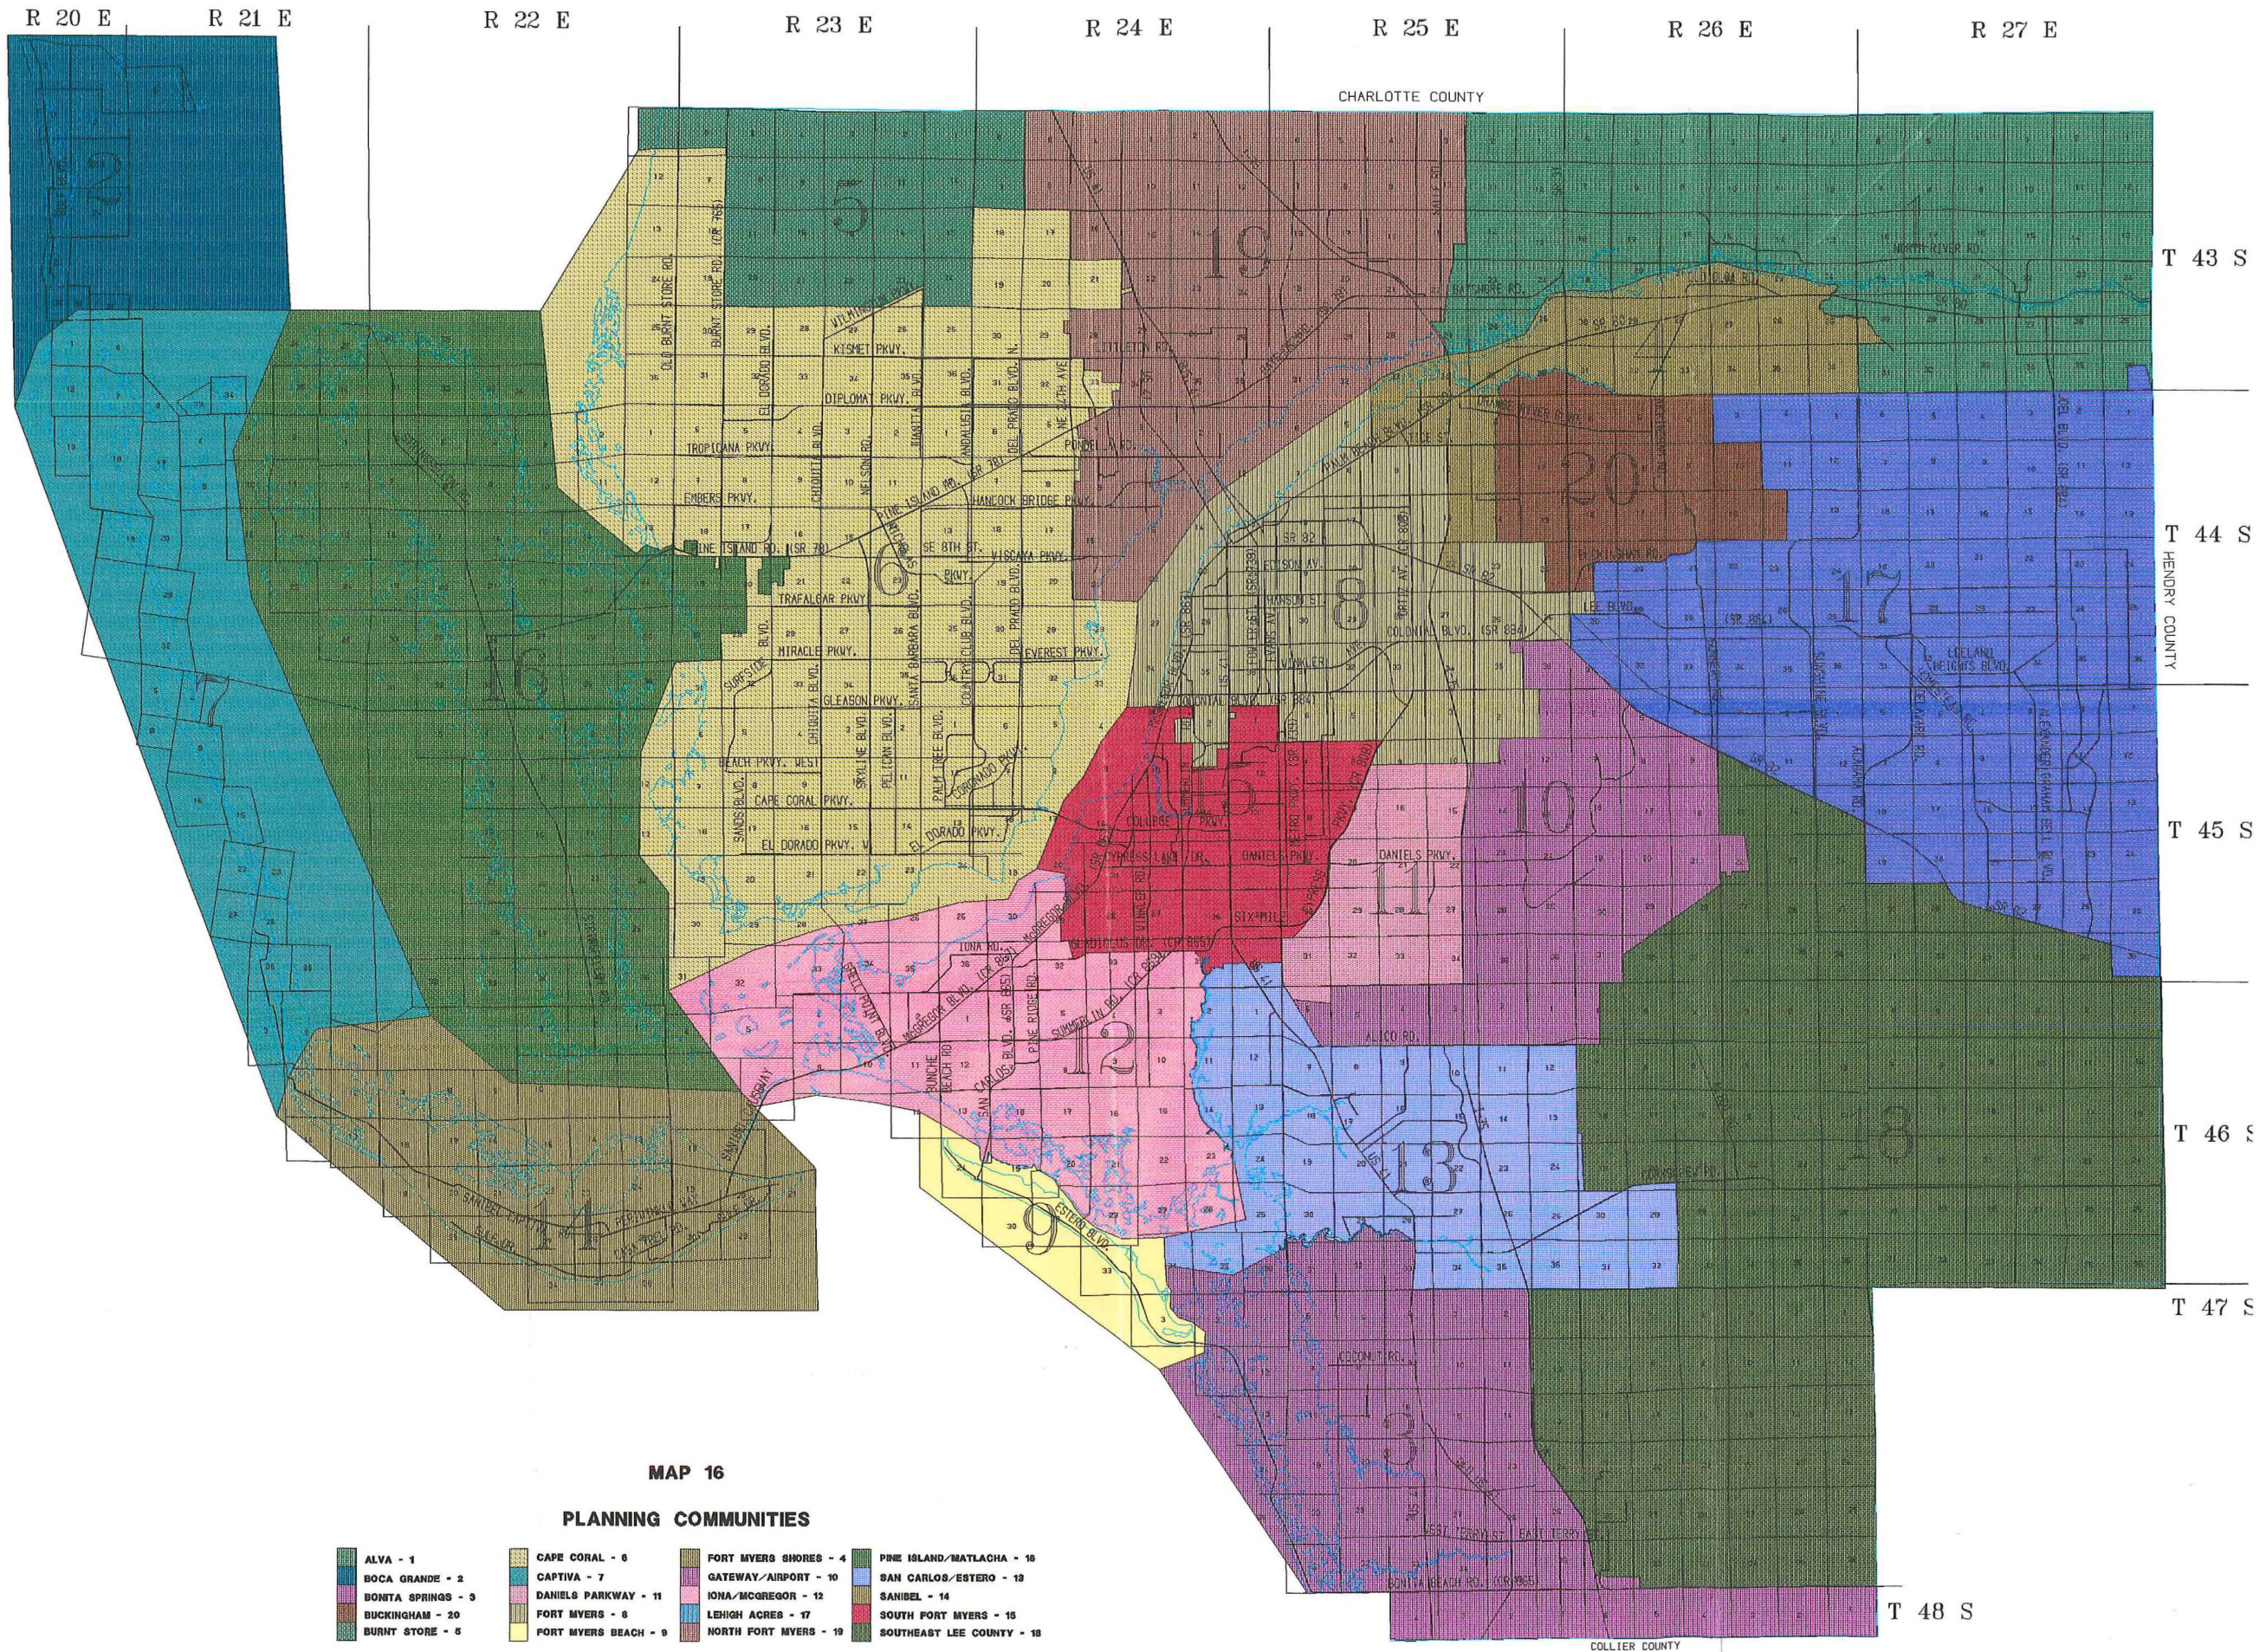

The second issue addressed was the allocations in the San Carlos/Estero Community. The concern brought forward by a member of the public, also a land use attorney, was that the allocations do not accommodate all the development approved in the Corkscrew Road CRSA. The board agreed with the concern and instructed staff to review the San Carlos/Estero Community allocations prior to the adoption hearing.

B. BOARD ACTION AND FINDINGS OF FACT SUMMARY:

- 1. BOARD ACTION:** The Board voted to transmit this amendment with revisions to the Bonita Springs and Southeast Lee County Planning Communities.
- 2. BASIS AND RECOMMENDED FINDINGS OF FACT:** The Board accepted the findings of fact as advanced by staff and the LPA with the direction to staff to "re-look" at the San Carlos/Estero Community

	This Document Contains the Following Reviews:
	Staff Review
	Local Planning Agency Review and Recommendation
	Board of County Commissioners Hearing for Transmittal

STAFF REPORT PREPARATION DATE: October 27, 1997

PART I - BACKGROUND AND STAFF RECOMMENDATION

A. SUMMARY OF APPLICATION

1. APPLICANT:

LEE COUNTY BOARD OF COUNTY COMMISSIONERS
REPRESENTED BY LEE COUNTY DIVISION OF PLANNING

2. REQUEST:

Amend the Future Land Use Map Series, Maps 16, the *Year 2010 Overlay Sub-districts*, and Map 17, the *Year 2010 Overlay Map*, and Future Land Use Element Policies: 1.1.1, 1.1.9, 1.3.5, 1.7.6, 2.1.3, and 2.2.2, converting the Lee Plan's planning horizon to the year 2020, deleting current overlay sub-districts, creating new community based planning districts, and allocating land uses through the Year 2020.

B. BACKGROUND INFORMATION

This amendment was initiated by the Board of County Commissioners on February 1, 1996. Staff brought this item forward to address concerns that if the existing 2010 Overlay, proposed for elimination through the Evaluation and Appraisal Report (EAR) process, were to remain in effect the allocations in the overlay would need to be revised. Staff's primary concern was that since its initial conception the 2010 baseline data had been found to be less than acceptable and a reevaluation was needed. Also, the Overlay had not been periodically updated as anticipated by Policy 1.7.6 and needed a reevaluation.

Final Order No. AC-96-11 was issued on July 25, 1996. The Final Order specified that the 1994 EAR based amendments, which proposed the deletion of the Year 2010 Overlay, were not in compliance with Chapter 163, Part II, F.S., and Rule 9J-5, FAC. The Final Order required Lee County to rescind, and not make effective, all of the amendments which sought to delete the Year 2010 Overlay, to bring the remaining plan amendments as a whole into compliance. Therefore, the Year 2010 Overlay remains a regulatory requirement of the Lee Plan. This fact

brings to the forefront the issue of the problems inherent in the overlay and the time horizon conflict between the 2010 Overlay and the 2020 based Lee Plan

C. STAFF RECOMMENDATION AND FINDINGS OF FACT SUMMARY

1. **RECOMMENDATION:** Planning staff recommends that the Board of County Commissioners transmit this proposed amendment to the Future Land Use Element and the Future Land Use Map Series. Future Land Use Map 16 is to be replaced with the attached Map 16. Future Land Use Map 17 is deleted and held in reserve. A new table, Table 1(b) Acreage Allocation Table, will replace the function of Map 17. The text of the Future Land Use Element should be amended as follows:

POLICY 1.1.1: The Future Land Use Map contained in this element is hereby adopted as the pattern for future development and substantial redevelopment within the unincorporated portion of Lee County. Maps 16 and ~~17~~ Table 1(b) are an integral part of the Future Land Use Map series (see Policies 1.7.6 and 2.2.2). They depict the extent of development through the year ~~2010~~ 2020. No ~~final~~ development orders or extensions to ~~final~~ development orders will be issued or approved by Lee County which would allow the Planning Community's acreage totals for any land use category on these maps residential, commercial or industrial uses established in Table 1(b) to be exceeded (see Policy 1.7.6). The cities of Fort Myers, Cape Coral, and Sanibel are depicted on these maps only to indicate the approximate intensities of development permitted under the comprehensive plans of those cities. Residential densities are described in the following policies and summarized in Table 1. (Amended by Ordinance No. 94-29)

POLICY 1.1.9: The University Community land use category provides for Florida's 10th University and for associated support development. The location and timing of development within this area shall be coordinated with the development of the University and the provision of necessary infrastructure. All development within the University Community shall be designed to enhance and support the University. In addition to all other applicable regulations, development within the University Community shall be subject to cooperative master planning with, and approval by, the Board of Regents of the State University System.

Prior to development in the University Community land use category, there shall be established a Conceptual Master Plan which includes a generalized land use plan and a multi-objective water management plan. These plans shall be developed through a cooperative effort between the property owner, Lee County, and South Florida Water Management District.

Within the University Community are two distinct sub-categories: University Campus and the University Village. The University Window overlay, although not a true sub-category, is a distinct component of the total university environment. Together these functions provide the opportunity for a diversity of viable mixed use centers. Overall

average density for the University Village shall not exceed 2.5 units per acre. Clustered densities within the area may reach fifteen units per acre to accommodate university housing. The overall average intensity of non-residential development within the University Village shall be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to ~~the Year 2010 Overlay Map 16 and Table 1(b).~~ Specific policies related to the University Community are included within the Lee Plan under Goal 18. (Added by Ordinance No. 92-47) (Amended by Ordinance No. 94-30)

POLICY 1.3.5: The University Village Interchange land use category is designed to accommodate both interchange land uses and non-residential land uses related to the University. Development within this interchange area may or may not be related to, or justified by the land use needs of the University. Land uses allowed within this area include those allowed in the Industrial Commercial Interchange category and the associated support development allowed in the University Village. The overall average intensity of non-residential development shall be limited to 10,000 square feet of building area per non-residential acre allowed pursuant to ~~the Year 2010 Overlay Map 16 and Table 1(b).~~ See the definition of Associated Support Development in the Glossary. Cooperative master planning and approval by the Board of Regents shall be required prior to development within this land use category. Additionally, any development within this land use category which meets or exceeds the Development of Regional Impact thresholds, either alone or through aggregation, shall conform to the requirements of Chapter 380 F.S. (Added by Ordinance No. 92-47) (Amended by Ordinance No. 94-30)

POLICY 1.7.6: The ~~Year 2010 Overlay~~ Planning Communities Map and Acreage Allocation Table (see Maps 16 and ~~17~~ Table 1(b) and Policies 1.1.1 and 2.2.2) depicts the proposed distribution, extent, and location of generalized land uses for the year ~~2010~~ 2020. Acreage totals are provided for land in each ~~subdistrict~~ Planning Community in unincorporated Lee County. No final development orders or extensions to final development orders will be issued or approved by Lee County which would allow the acreage totals for ~~any land use category~~ residential, commercial or industrial uses ~~on these maps~~ contained in Table 1(b) to be exceeded. This policy shall be implemented as follows: (Amended by Ordinance No. 94-29)

1. For each ~~2010 Overlay subdistrict~~, Planning Community the County shall maintain ~~or generate, as needed, records showing all final development orders, building permits and certificates of occupancy issued within the last twelve (12) months a parcel based database of existing land use. No later than September 30, 1994, the County shall have generated a baseline of existing developed acreage in each 2010 Overlay subdistrict. The baseline database shall be periodically updated at least once every twelve (12) months twice every year, in September and March, for each 2010 Overlay subdistrict Planning Community. The first comprehensive updating shall occur on or before September 30, 1995.~~

2. Project reviews for ~~final~~ development orders shall include a review of the ~~predicted amount of existing Overlay~~ capacity, in acres, that will be consumed by

~~buildout of the development order to be permitted at buildout. Subsequent to the effective date of this provision, no final~~ No development order, or extension of a final development order, shall be issued or approved if the project acreage, when added to the acreage contained in the updated existing land use database, exceeds the limitation established by Table 1(b), Acreage Allocation Table ~~is greater than the acreage remaining in the updated 2010 Overlay subdistrict (Maps 16 and 17 regardless of other project approvals in that overlay subdistrict~~ Planning Community.

3. No later than the regularly-scheduled date for submission of the Lee Plan Evaluation and Appraisal Report, and every five years thereafter, the County shall conduct a comprehensive evaluation of the ~~2010 Overlay~~ Planning Community Map and the Acreage Allocation Table system, including but not limited to, the appropriateness of land use distribution ~~in the Overlay~~, problems with administrative implementations, if any, and areas where the ~~overlay~~ Planning Community Map and the Acreage Allocation Table system might be improved.

POLICY 2.1.3: All land use categories and ~~Year 2010 Overlay districts~~ Planning Community Map areas permit the consideration of churches and schools (except in Wetlands and Airport Noise Zones), public uses and buildings, public utilities and resource recovery facilities, public recreational uses (including franchised quasi-commercial uses in conjunction with a public use), and sites for compatible public facilities when consistent with the goals, objectives, policies, and standards in this plan and applicable zoning and development regulations. (Amended by Ordinance No. 94-30)

POLICY 2.2.2: Map 1 of the Future Land Use Map series indicates the uses and density ranges that will ultimately be permitted on a given parcel. However, it is not a guarantee that such densities or uses are immediately appropriate, as the map provides for the county's growth over the coming 26 years. During the rezoning process the Board of County Commissioners will balance the overall standards and policies of this plan with three additional factors:

1. ~~Whether~~ Whether a given proposal would further burden already overwhelmed existing and committed public facilities such that the approval should be delayed until the facilities can be constructed; and
2. ~~Whether~~ Whether a given proposal is for land so far beyond existing development or adequate public facilities that approval should be delayed in an effort to encourage compact and efficient growth patterns; and
3. ~~Whether~~ Whether a given proposal would result in unreasonable development expectations which may not be achievable because of acreage limitations ~~on the "Year 2010 Overlay" contained in the Acreage Allocation Table~~ (see Policy 1.7.6 and Maps 16 and ~~17~~ Table 1(b)).

In all cases where rezoning is approved, such approval does not constitute a determination that the minimum acceptable levels of service (see Policy 70.1.3) will be available concurrent with the impacts of the proposed development. Such a determination must be made prior to the issuance of additional development permits, based on conditions which exist at that time, as required by Lee County's concurrency management system. (Amended by Ordinance No. 94-30).

2. BASIS AND RECOMMENDED FINDINGS OF FACT: As stated in Part II Section B. Conclusions, of this report the following facts support this proposed amendment:

- The current Year 2010 Overlay system was not based on an accurate existing land use inventory;
- Projecting accurate long range future land use into small geographic is extremely difficult and does not constitute a good planning practice;
- The original boundaries for the Year 2010 Overlay sub-districts were erroneous, often crossing property or development lines;
- Elimination of the Year 2010 Overlay is not practical at this time;
- The planning horizon of the 2010 Overlay is not consistent with the horizon of other comprehensive planning efforts.
- Major modifications to the overlay should be considered for adoption;
- Larger, community based planning districts should be utilized and the proposed new Map 16 should replace the current map;
- The previous EAR population projections have been shown over time to be too high;
- The BEBR Mid-Range population projection for the year 2020 are the most appropriate projections and should be used for the county's planning efforts;
- Planning staff has created a reliable parcel based database of existing land use, suitable for tracking development patterns;
- Utilizing a 25% buffer above the expected incremental increase in population is an accepted planning practice;
- Planning staff has performed an in-depth evaluation of future land use needs and concludes that, for a planning horizon of 2020 the county should use the proposed Table 1(b) Acreage Allocation Table as a replacement for Map 17;
- The regulatory aspect which limits Residential, Commercial, and Industrial should be retained; and,
- The regulatory aspect which limits Parks and Public, Active and Passive Agriculture, Vacant, and Conservation acres should be eliminated.

PART II - STAFF ANALYSIS

A. STAFF DISCUSSION

Origin of the Year 2010 Overlay

The original 2010 Overlay was a result of the 1989 Settlement Agreement with the Department of Community Affairs (DCA). This agreement required the County to amend the Future Land Use Map Series by designating the proposed distribution, extend, and location of the generalized land uses required by Rule 9J-5.006(4)(a)1.-9 for the year 2010. This was accomplished by creating 115 sub-districts, generally nesting within the existing adopted Planning Districts, and allocating projected acreage totals, for each generalized land uses, needed to accommodate the projected 2010 population. Policies were added to the plan that provided that no development approvals would be issued in a sub-district that would cause the acreage total set for that land use category to be exceeded. The Overlay, in plain terms, was a device designed to reconcile the population accommodation capacity of the Future Land Use Map (estimated to be 70 years in 1989) with the 20-year time frame in the text of the element. It was also designed to provide more certainty as to the extent and location of future commercial and industrial development.

The Methodology Behind the Year 2010 Overlay

Residential acreage allocations were derived by projecting dwelling unit control totals for the year 2010 for each of the County's 15 planning districts. These units were then distributed into the sub-districts following an analysis of existing units, and buildout units for each sub-district. Units were changed to acres by applying a density factor based on land use category. Unfortunately, the base data for existing dwelling units was unreliable. The county did not have adequate data on any existing land use. This lack of an accurate inventory made it extremely difficult to project accurate needs and required acreage figures. In addition, there was no safety or flexibility factor included in the residential projections.

A Countywide commercial acreage figure was established by a consultant. Alternatively, socio-economic data from the metropolitan Planning organization was used equated to existing acreage resulting in an employee per acre figure. A straight line projection was made by Planning District. These figures were then disaggregated into the sub-districts.

Industrial allocations were based on the acreage figures for the Industrial Development, Industrial Interchange, Airport Commerce, and Industrial/ Commercial Interchange categories and the employment goal in Policy 7.1.3. All of these figures were reviewed in light of data generated in other studies and the inventory of existing uses in an effort to make the final figures consistent with reality.

Problems with the Implementation of the Year 2010 Overlay

The Year 2010 Overlay has been exceptionally difficult to administer. Some of the initial problems experienced by the staff included the inadequacy of the original inventory, the lack of a reliable existing land use database, and difficulty in explaining the concept and regulatory nature of the overlay to the public. A major effort has been directed at resolving some of these problems. The establishment of a reliable database identifying the current baseline of uses was essential for the establishment and

monitoring of a workable overlay. There are some issues with the existing overlay, however, that probably cannot be resolved in a principled and satisfactory manner. These include:

1. Sub-districts proved to be too small to allow needed flexibility. The average sub-district size is 4,000 acres (not including those totally located within one of the municipalities;
2. The sub-district boundaries, originally based on traffic analysis zones, are erroneous. Many existing and proposed developments (even parcels) cross sub-district lines;
3. The treatment of quasi-public uses, such as churches and schools;
4. The treatment of recreational facilities in residential developments;
5. The treatment of platted subdivisions with existing roads, but few houses;
6. The treatment of mineral extraction;
7. The treatment of DRIs with lengthy buildout periods;
8. The treatment of large lot developments and in general developments that are vastly different from the assumptions in the Lee Plan; and,
9. The apparent need to prohibit conservation, agricultural and recreational uses that exceed the acreage thresholds.

It was possible to devise rules to deal with all of these situations; these rules, however, are relatively arbitrary and provide the County with little valuable information for infrastructure planning purposes.

The commercial allocations have caused the most controversy, due to the speculative nature of the employee projections, the inaccurate data in the initial inventory, and the absence of alternatives to the crude straight-line averaging of the existing and buildout employees per acre ratios described in the previous section. Some of the allocations in the Overlay were inadequate to accommodate even the existing uses, and others have been exceeded as the result of a single zoning case or development order application. The County has responded to the capacity deficits by delaying the legal effectiveness of the overlay until the last point permitted by the 1989 settlement agreement. Procrastination, however, will not solve the problem; it may, in fact, make it worse by increasing the expectations of the affected property owners and financial institutions.

The sub-districts used for the allocations in the Year 2010 Overlay have proved to be very problematic. Of the 115 sub-districts, 10 contained no unincorporated lands and therefore have no land use allocations. Of the remaining 105 sub-districts, 22 exceeded their residential allocation with 77 exceeding at least one residential allocation in one of the Future Land Use Categories. Additionally, of the remaining 105 sub-districts, 40 exceeded their industrial allocation, 12 exceeded their commercial allocation, and 80 exceeded their Parks and Public allocation.

Proposed EAR Elimination of the Overlay

In response to the shortcomings in the Year 2010 Overlay, the County, as part of its Evaluation and Appraisal Report (EAR) amendments, proposed the elimination of the overlay. The DCA took strong opposition to this proposal and found the amendment not in compliance. The finding of non-compliance also included several other objections to the proposed EAR amendments. By far the main point of contention was eliminating the overlay. Upon completion of the Administrative Hearing and issuance of the Recommended Final Order by the Hearing Judge, the County and DCA entered into negotiations to resolve the remaining issues. There were several meetings and some progress was made, but ultimately a mutually agreed upon settlement could not be reached. The case went before the Governor and his Cabinet and the Final Order specifically required the County to keep the overlay. Final Order No. AC-96-11 was issued on July 25, 1996. The Final Order specified that the 1994 EAR based amendments, which proposed the deletion of the Year 2010 Overlay, were not in compliance with Chapter 163, Part II, F.S., and Rule 9J-5, FAC. The Final Order required Lee County to rescind, and not make effective, all of the amendments which sought to delete the Year 2010 Overlay to bring the plan amendments as a whole into compliance. Therefore, the Year 2010 Overlay remains a regulatory requirement of the Lee Plan.

The Final Order did recognize that the Year 2010 Overlay was not the only mechanism to address the issues at hand. The order states this "determination does not mean that Lee County must retain the 2010 Overlay indefinitely, or that the 2010 Overlay is the only planning tool appropriate for Lee County. The 2010 Overlay can be deleted from the Lee Plan if alternative planning controls are established to compensate for the deletion of the overlay." This is exactly what this proposed amendment is intended to do.

During the negotiations the County and DCA had several discussions on appropriate alternatives to the overlay. There were several themes the department felt were necessary components of an alternative. The department felt strongly that communities should be utilized as planning areas, a concept that planning staff agrees with. Regarding mixed-use categories, it was the department's belief that percentage distribution between uses was the best way to regulate the mix. They did concur that the acreage limitations contained in the overlay were a way to satisfy this requirement. The department was also concerned with hurricane evacuation and the population at risk. As these negotiations continued the County and DCA found much common ground. Every attempt has been made in this proposed replacement to the Year 2010 Overlay to address all of the departments concerns.

Proposed Amendment to Replace the Year 2010 Overlay

The goal of this amendment is to configure a replacement for the Year 2010 Overlay that will address many of the identified shortfalls of the overlay yet keep the Lee Plan in compliance with the minimum criteria rule and Florida Statutes. Many of the issues that were discussed during the negotiations mentioned above are being incorporated. The new proposal has three basic tenets: to simplify the overlay by reducing the number of districts; to expand the planning horizon to the year 2020 to be consistent with the rest of the plan; and, to utilize the Bureau of Economic and Business Research (BEBR) Mid-Range 2020 population projections replacing the projections from the EAR.

Perhaps the biggest problem with the overlay is the large number of sub-districts. A large number of sub-districts translate into geographically small districts. Long range planning on small and numerous geographic areas is close to impossible. The Planning Communities Map proposed to replace Map 16

identifies 20 distinct areas within the County. The number and size of the districts was the subject of much debate. The number should be small enough to avoid the long range planning allocation problem yet large enough to assure some certainty in the location of the controlled uses. Planning staff brought a preliminary map to the Local Planning Agency (LPA) in the spring. After discussion the number 20 was agreed upon. One LPA member suggested the phrase "20 for 2020" as a promotional tool. The proposed replacement for Map 16, is a reasonable consensus which should help resolve the Year 2010 Overlay problems and still serve to provide a level of certainty.

Map 17 of the original overlay was initially intended to provide a graphic representation of the development potential of each sub-district. The map, which is not a map at all, fell horribly short of this aspiration. While it was refined over time to better perform this task, it makes sense to call it what it is, a table with acreage limitations in it. Therefore, this amendment proposes to eliminate Map 17 and add a new table, Table 1(b) Acreage Allocation Table, to the Lee Plan.

B. METHODOLOGY

Population

The Division of Planning conducted a review of its adopted population projections from the Evaluation and Appraisal Report (EAR) against the annual population estimates from the Bureau of Economic and Business Research's (BEBR) for the years since the EAR projection was adopted. This review showed that the EAR population projections were exceeding the annual population estimates. The EAR projections were completed in 1993 and included population projections for every half decade. By 1995 these projections were exceeding the annual BEBR estimate by more than 10%. Planning Staffs review also showed that the EAR projections were between 25% and 35% higher than the BEBR projections by the year 2020.

The estimates done by staff in the spring of 1997, which included four more years of historical data, showed that Lee County's population growth projections were more closely following the BEBR "Mid-Range" population projections. The BEBR "Mid-Range" projections are also being used by other agencies and by other County divisions to develop long range plans. Most notable would be the MPO's intention to use these numbers for the update of the 2020 Transportation Plan. Therefore, the Division of Planning has based the re-evaluation of the Year 2020 Overlay on the BEBR Mid-Range population projections.

Residential Use

The BEBR population projection of 602,000 is being used as the countywide control total for residential use. The goal was to distribute this figure into the newly created Planning Communities in a rational and defensible manner. To assist planning staff in this effort a sophisticated spreadsheet was developed. Utilizing the existing land use database, dwelling unit counts for each Planning Community were determined and entered into the spreadsheet. Due to the very nature of the various communities, population characteristics will vary. Planning staff compiled certain demographic components for the individual Planning Communities and evaluated them for inclusion in the spreadsheet. These components were persons per household and occupancy rates. While staff recognized that differences in persons per households (PPH) exist between the 20 Planning Communities, a reliable trend could not be formulated for each of the communities. Limitations with census geography and changes in census methodology over time were hindrances in the effort to

produce a reliable PPH estimate for each community. Therefore, staff felt it was appropriate to utilize the countywide PPH estimates from the Persons Per Household Study completed for the latest Lee Plan Evaluation and Appraisal Report. Staff was better able to collect occupancy rate information from the census for each community. A greater level of confidence was obtained from utilizing the different occupancy rates for each community. Unlike the PPH estimates, which varied greatly between the various census data for some communities, the community occupancy rates were generally consistent and summed at or near the county average for each census. Therefore, staff felt comfortable in establishing a weighted average for occupancy rates for each community. As a reality check, the variables, by community, were applied to the 1996 units and that generated population was compared to the BEBR 1996 estimate. The figures were within a percentage of each other, validating the spreadsheet methodology.

The next task was to generate unit projections for each community for the year 2020. To start, the population projections for the City of Cape Coral, City of Fort Myers, and City of Sanibel were directly input from information provided to the Division of Planning from these municipalities. The Town of Fort Myers Beach has not completed its comprehensive plan and has no officially adopted population projection for the year 2020, therefore the Town of Fort Myers Beach's population projection was calculated in the same as the other Planning Communities. Lehigh Acres also had an agreed upon population figure, generated by the Commercial Land Use Study, and it was input into the accommodation model. The remaining unincorporated community population projections were evaluated using the approved Planned Development and subdivision information and the historical growth trends for the last six years for each community. Each community's dwelling units (DU) were trended out to the year 2020 with a built in cap based on the Future Land Use Map's potential additional units allowed on the existing undeveloped land and adopted Lee Plan Assumptions. These trends were also compared to the amount of available land in a community to assess whether or not the projections could be accommodated. In some areas it was discovered that projected trend would exceed the Lee Plan assumed number of units. There were also communities where the amount of approved residential development exceeded the assumed residential percentages from the Lee Plan. Likewise, there are instances where the amount of pre-approved (some existing some only planned) non-residential development in a community makes it impossible for the residential component to achieve the percentage assumed in the Lee Plan. After fully scrutinizing this data a number for new dwelling units, units to be built by the year 2020, was projected for each community. These unit numbers were entered into the spreadsheet where they were multiplied by the estimated community vacancy rate and the county PPH to determine the community's 2020 population.

The spreadsheet was designed to evaluate the increment of new dwelling units. The 1996 dwelling unit count from the existing land use database was considered the starting point. The difference in population from 1996 to 2020 was used as target for determining the need for new dwelling units. To allow for fluctuations in the market, and in keeping with good planning practice, an additional buffer of 25% was added to this figure. The proper way to allow for a flexibility factor was the subject of considerable debate during the administrative hearing. Utilizing 125% of the incremental growth was supported by recognized planning literature. The initial determination for needed new units expected by 2020 determined above were evaluated for each of the new Planning Community. Adjustments were made to assure that the population increment plus 25% was not exceeded.

The next step, and one that brings less certainty into the equation, is to determine acreage figures for these units. The finalized unit projections were then distributed into appropriate future land use categories. The projected units were then multiplied by the assumed unit per acre figure of the category. This was done to determine the appropriate residential acreage allocation. This DU per acre figure was modified in some areas to adjust for the fact that this overlay is based on net acres while the Lee Plan assumptions are based on gross acres which is also how density is determined for consistency with the Lee Plan density. Also taken into consideration were developments, approved prior to the existence of the Lee Plan, where vacant land that is approved for densities higher than the allowable Lee Plan densities. Factors, such as one recently approved development that has taken advantage of the Planned Development District Option (PDDO), which allows up to 6 units per gross acre in a category that allows 1 unit per gross acre were also considered. Normally this land use category would and assumes 0.8 units per gross acre. In this specific case, the approved units/net acres are 5.64. Likewise, some developments have been approved with densities (both gross and net) substantially less than the Lee Plan assumptions. Therefore the assumed density for each Future Land Use Map designation varies between Planning Communities

The corresponding acreage figures were only estimated for the unincorporated portions of the county. Therefore, the acreage allocation table for the Sanibel Community shows no acreage. There is, however, an input unit count for Sanibel that corresponds to the projected population, adjusted for PPH and occupancy rate. The Town of Fort Myers Beach is included on the allocation table for two reasons. The first was that the data was available and the second was there were no 2020 population projections for this area. The Planning Communities map for Fort Myers Beach includes no unincorporated lands.

Commercial

Future commercial needs for Lee County is not easy to pinpoint. Lee County's commercial component can not merely be based on the number of county residents. In addition, each community is not necessarily self-supporting in its commercial needs, therefore some areas may grow faster commercially than they do residentially and visa versa. Between 1980 and 1990 commercial square feet grew by 100% while the population grew by only 53% for the unincorporated area. Furthermore, from 1990 through the end of 1996, the unincorporated population has grown by 21% while commercial growth was 31%. Based on these trends, it is obvious that commercial growth in of Lee County is not totally tied or dependent on residential growth. Part of the growth not related to the residential aspect can be explained by the fact that Lee County is a resort area that caters to tourists and winter visitors.

In 1986 Lee County commissioned Thomas Roberts, of Thomas Roberts and Associates, to perform a commercial needs study. The final document was entitled "Commercial Land Use Needs in Lee County." This study identified an estimate of 11,483 commercially developed acres by the year 2010. In accordance with the study's methodology, this figure should then be multiplied by a safety factor of 10% (to allow for inaccuracies in projecting the need) to produce 12,631 acres. The study then utilizes a flexibility factor of 15% (to allow for competition and choice, land held back for speculation, etc.) to produce a grand total of 14,526 acres. The original study was based on a BEBR Mid-Range 2010 population of 499,500.

In 1989 the Board of County Commissioners revised its population projection and adopted the BEBR High-Range number of 640,500. At that time Mr. Roberts was asked to adjust the commercial needs figure. In a December 10, 1989 memorandum he proposed the following methodology to amend the previous projection. The pre-factored area of 11,483 acres should be multiplied by $640,500/499,500$, or 1.282, producing a new pre-factored area of 14,721 acres. He goes on to modify this figure with a safety factor and a flexibility factor. He does, however recommend that because the higher population projection is being utilized, the safety factor should be reduced to 5%. Doing the math produces a figure of 18,622 acres, which he recommends the County use.

Utilizing a like methodology, planning staff recalculated the future commercial needs. The proposed population for this amendment is the BEBR Mid-Range number for 2020 of 602,000. Adjusting the original 11,483 acres by the ratio $602,000/499,500$, or 1.205, produces a new pre-factored figure of 13,837 acres. Utilizing a safety factor of 10%, justified by the mid-range number, and a flexibility factor of 15% the countywide commercial need calculates to 17,504 acres. Further adjustments to either remove the incorporated areas or indicate allocations for them still need to be performed.

Staff realizes that, historically, the City of Fort Myers has provided more than its proportionate share of commercial development. However, the city is approaching buildout and is currently making an effort to stabilize its residential neighborhoods. The unincorporated county will be required to absorb a greater share of new commercial development. This trend is currently being demonstrated by the fact that in this decade no new "Big Box" retailers have located in the City of Fort Myers. Only one large shopping center has been constructed in Fort Myers in the last decade.

Likewise, the City of Cape Coral has somewhat limited opportunities for commercial development. The vast majority of the land in Cape Coral is platted into single family lots. Opposition to introducing new commercial uses within residential areas has surfaced in the past. According the city planners only ### acres of land are programmed for commercial development. Staff allocates 7216 acres of commercial to the municipalities leaving 10,288 acres for distribution to the unincorporated Planning Communities.

In addition to the Robert's projection, commercial projections were compiled based on projected total unit counts per community, in order to make allowances for seasonal residents, and the historical trends of commercial square feet per unit and floor area ratio. The county control total for commercial is in square feet and is based on historical trends of commercial growth. The projected commercial square feet needed by the year 2020 are projected to be 46,117,550. This is approximately 9,000,000 square feet less than that which would be projected using individual community historical community trends. The lower of these projections was chosen based on a higher correlation for the historical trends and the fact that the community based projections does not consider the fact that some of these areas are near buildout already. For example, as the coastal communities reach buildout, the growth in the tourist commercial demand will also begin to level out. The county wide control total is next applied to the communities to allocate the commercial uses throughout the County. This allows the results to be compared to the total available/undeveloped acreage remaining in each community.

This countywide acreage need was then disaggregated across the county into the unincorporated Planning Communities. This was accomplished by allocating commercial acreage based on the

existing development, approved developments, and areas designated for commercial development. The amount of vacant commercial zoning was also taken into account in the disaggregation.

Industrial Use

Future Industrial needs for Lee County were originally studied and projected in a study completed in August 1983 by Thomas H Roberts. This study has been revised and modified over time and was most recently revised during the litigation process of the EAR. However, this study and its revisions focused on how much land Lee County needed to designate on the Future Land Use Map as industrial. These studies were concerned with providing enough land for future industrial development and its ancillary uses. The Lee Plan allows for limited commercial development in industrially designated lands to support the surrounding industrial uses. This means the some uses that are envisioned to occur within these industrial areas will not be inventoried as industrial uses. For example, a small deli who's customer base is from a surrounding industrial park will be inventoried as a commercial use even though it may be located within an area designated as Industrial on the Future Land Use Map. Therefore, it is important to further refine the accepted industrial study from the existing Lee Plan Support Documentation to ascertain how much land will need to be allocated for industrial uses for the Year 2020. Staff has concluded that the appropriate unit of measure for the industrial component of the 2020 allocations is acres. Much of Lee County's industrial uses occur out of doors such as concrete batch plants, lumber yards, and distribution centers. The location of industrial uses, while not limited to areas designated as Industrial Development, Industrial Interchange, Industrial Commercial Interchange, and Airport Commerce, are primarily located in these areas. Staff has made the following effort to determine the appropriate allocation of industrial uses for the year 2020.

To accomplish this task, the original Thomas Roberts study was modified to focus on how much land will be utilized by industrial uses by the year 2020. The data in the study was also updated to include the latest National Planning Association data which has been consistently used in the industrial needs study, and is recognized as one source of best available data. The primary change in the methodology was the elimination of the number of acres needed to support the ancillary uses associated with industrial developments. These uses will be inventoried under in the database under their appropriate use category whether it is a commercial, public, or conservation use. Furthermore some uses have always be assumed to have locations which may be out of industrial land use categories. For example, only 50% of warehouse uses were assumed to be located in industrial land use categories in the original Roberts study and its subsequent revisions. However, in reality, approximately 75% of these types of uses are inventoried as industrial in the Lee County Land Use Inventory. There are ancillary commercial uses associated with this type of use that have and will be inventoried as commercial uses. The breakdown of percentages for the inventory's purposes are shown in table Year 2020 Industrial Allocation Needs along with its estimated 2020 employment figure. These employment figures were then utilized in the same manner as the previous industrial studies to estimate the need for industrial lands. First the assumption is 7 employees per acre to determine the minimum acreage need. A market safety factor was then applied to this acreage figure and subsequently a flexibility factor is applied to this figure. Since the allocations are for the unincorporated county the amount of industrial lands in the cities were removed from this figure. Mirroring the discussion in the discussion under Commercial Uses, areas for true industrial development are not abundant in the county's municipalities. Clearly, the "industry" in the county's coastal communities, Sanibel and Fort Myers Beach, is tourism. The desire of Lee Plan Policy 7.1.4 is to afford an opportunity to expand the County's economic base beyond tourism. As with commercial development, the City of Cape Coral has limited opportunities

for industrial uses equal to its expected population base. Taking all this into consideration, this final unincorporated industrial need for Lee County is calculated to be 6,799 acres.

This countywide acreage need was then disaggregated across the county into the unincorporated Planning Communities. This was accomplished by allocating industrial acreage based on the existing development, approved developments, and areas designated for industrial development. The amount of vacant industrial zoning was also taken into account in the disaggregation.

Parks and Public

The countywide allocations in the original Year 2010 Overlay were exceeded in only two areas Parks and Public, and Active AG. The under allocation in the Parks and Public category can be attributed to a difference between the allocation and inventorying methods. The Parks and Public allocation was based on how much land was designated Public Facilities in each Sub-district. The first problem with this technique is that only parcels 20 acres or more in size were mapped. Furthermore, not all publicly owned lands were included in this designation. Properties designated as Public Facilities were generally schools, parks, hospitals, and utility plants. Lands owned by the state and other agencies for conservation purposes were not consistently mapped as Public Facilities. The main discrepancy is with no publicly owned lands which are inventoried in the Park and Public category but are not owned by a public agency. These uses include, but are not limited to, golf courses developed within a residential community, other residential amenities, government buildings, clubs, open space within private developments, and churches.

Staff can see no useful purpose in regulating an upper limit in the Parks and Public land use. The acreage figure contained in the Acreage Allocation Table for this use should not be regulatory. To do so would be counter productive. Staff admits there is merit in tracking this acreage figure and intends to update this use in the database.

Active and Passive Agriculture

The Active Agriculture component of the land use inventory also exceeds its allocation. In reality this should be expected. Although the current Year 2010 Overlay is not written this way, it is expected that, in an urbanizing county such as Lee County, over time agricultural uses will be displaced with other non-agricultural uses. However, it cannot be assumed that there will only be a reduction in the amount of agricultural acreage in all areas of the county. While agricultural uses are displaced in some areas of the county they are expanding in other areas of the county primarily in the areas designated as Rural and Density Reduction/Groundwater Resource. Therefore, the acreage projections should be used as 2020 targets and not as a regulatory number that cannot be exceeded or fallen below. This also applies to Passive Agricultural uses. Currently, Lee County exceeds its projected combined 2010 agricultural acreage allocation by approximately 3,050 acres. Clearly in a county that is urbanizing as Lee County is requiring the retention of passive agriculture use in lands designate within the urban boundary is counter productive. Staff, again, sees the merit of maintaining the database inventory of these uses, but believes the regulatory requirement not to let the 2020 component of this use be exceeded in the present is unwise.

Vacant Land

Similar to the agricultural uses, the amount of vacant land should also be expected to reduce over time. Lands classified as a vacant use are only those with no structures and no other use. For example, a

vacant commercial building will still be classified as a commercial use and a parcel used as open space with no building will be classified as Public Open Space. Therefore, unlike, agricultural uses, vacant lands will not decline in one area and increase in other areas, with the exception of some demolitions of condemned/damaged buildings and also the occasional agricultural use which is abandoned and reverts back to vacant. For these reasons, the vacant acreage allocation, if used as a regulatory number, should be viewed as a number that cannot be fallen below during the life of the overlay.

Conservation Land

The Conservation Allocation is also one that is impractical to regulate. The current allocations in the Year 2010 Overlay are based on the amount of land designated on the 1989 Lee Plan Future Land Use Map as RPA (resource protection areas) and TZ (transition zones). Since these areas were digitized off of 1987 quad sheet maps which were at a 1" to 2000' scale there accuracy, while good for the illustrative purposes they were intended for, are not precise enough for a regulatory acreage figure. Furthermore, since the original mapping of these areas, the definition of what lands qualify as wetland has also changed. Staff has review possible methods to improve the original mapping of wetlands. In a pilot project staff used the jurisdictional boundaries at Florida Gulf Coast University and compared them to several wetland and soils maps. No single mapped system showed superior results in identifying the ground truthed wetlands. Staff concluded that the current mapping system was the best available.

Recent revisions to the Lee Plan have moved the county from a regulatory roll in wetlands to one more of enforcement. If the county does not regulate this use, the acreage allocations can not be regulatory. Staff, again, sees the merit of maintaining the database inventory of these uses, but believes the regulatory requirement not to let the 2020 component of this use be exceeded in the present is unwise.

B. CONCLUSIONS

In accordance with Policy 1.7.6.3 planning staff has conducted this comprehensive evaluation of the Year 2010 Overlay system. Upon completion of this analysis planning staff concludes the following:

- The current Year 2010 Overlay system was not based on an accurate existing land use inventory;
- Projecting accurate long range future land use into small geographic is extremely difficult and does not constitute a good planning practice;
- The original boundaries for the Year 2010 Overlay sub-districts were erroneous, often crossing property or development lines;
- Elimination of the Year 2010 Overlay is not practical at this time;
- The planning horizon of the 2010 Overlay is not consistent with the horizon of other comprehensive planning efforts.
- Major modifications to the overlay should be considered for adoption;
- Larger, community based planning districts should be utilized and the proposed new Map 16 should replace the current map;
- The previous EAR population projections have been shown over time to be too high;
- The BEBR Mid-Range population projection for the year 2020 are the most appropriate projections and should be used for the county's planning efforts;
- Planning staff has created a reliable parcel based database of existing land use, suitable for tracking development patterns;

- Utilizing a 25% buffer above the expected incremental increase in population is an accepted planning practice;
- Planning staff has performed an in-depth evaluation of future land use needs and concludes that, for a planning horizon of 2020 the county should use the proposed Table 1(b) Acreage Allocation Table as a replacement for Map 17;
- The regulatory aspect which limits Residential, Commercial, and Industrial should be retained; and,
- The regulatory aspect which limits Parks and Public, Active and Passive Agriculture, Vacant, and Conservation acres should be eliminated.

C. STAFF RECOMMENDATION

Planning staff recommends that the Board of County Commissioners transmit this proposed amendment to the Future Land Use Element and the Future Land Use Map Series. Future Land Use Map 16 is to be replaced with the attached Map 16. Future Land Use Map 17 is deleted and held in reserve. A new table, Table 1(b) Acreage Allocation Table, will replace the function of Map 17. The text of the Future Land Use Element should be amended as indicated in Part I, Section C. of this report.

PART III - LOCAL PLANNING AGENCY REVIEW AND RECOMMENDATION

PUBLIC HEARING DATE. October 27, 1997

A. LOCAL PLANNING AGENCY REVIEW

The LPA formally heard this proposed amendment at their October 27, 1997 Public Hearing. Prior to the date, the LPA and planning staff had discussions at all of the previous amendment hearings regarding this proposal. Conceptual approval of the proposed Map 16 was indicated fairly early on in this process. Other areas of discussion were commercial acreage allocation and population projections.

LPA members had several questions regarding the methodology for determining need and allocation. Staff knew that the process that was utilized could not be easily translated to a written document and was prepared to answer the questions. Planning staff did answer all of the questions concerning the methodology to the LPA's satisfaction. Staff also informed the LPA that they were planning on dealing directly with DCA staff to walk them through this somewhat complicated process. The LPA identified three areas where they had concerns regarding the final allocations. Ultimately, there was only one recommendation for increasing or decreasing allocations. Staff did offer to take a closer look at these areas between the transmittal and adoption hearings. The LPA also expressed interest in including a footnote on Table 1(b) indicating the uses that are being regulated and those that are not.

Also discussed was the lack of residential allocation in the wetland category. No solution to this issue was proposed. Staff was concerned that such an allocation would encourage new development in the wetland areas. Under Chapter 13 of the Lee Plan, legally existing lots in the wetland areas do have the advantage of the single family residential provision.

Two members of the public addressed the LPA on this issue. The first suggested some additional language for Policy 1.7.6 to clarify the intent to adjust the allocations if necessary as part of the EAR review. The LPA concurred with this, as did staff. This person also suggested that the staff report include a discussion, similar to the one in the commercial use section, that highlights the limitations of the municipalities to accommodate industrial development. The LPA and staff agreed. The third request was to include the sections 1, 2, and 3 of Township 48 South, Range 26, East in the Bonita Springs Planning Community. The LPA made a motion to this effect. The second speaker urged the LPA to adopt the amendment and complimented staff's efforts on this amendment.

The LPA offered two motions concerning this amendment. The first, as mentioned above, was to include the specified sections in the Bonita Springs Planning Community, and to also move the rural residential allocation, which applied directly to these three sections, on Table 1(b) Acreage Allocation Table.

B. LOCAL PLANNING AGENCY RECOMMENDATION AND FINDINGS OF FACT SUMMARY

- 1. RECOMMENDATION:** Motion #1 The LPA recommended that the BoCC includes sections 1, 2, and 3 of Township 48 South, Range 26, East in the Bonita Springs

Planning Community and to also move the rural residential allocation, which applied directly to these three sections, on Table 1(b) Acreage Allocation Table.

Motion #2 The LPA recommended the BoCC transmit this amendment as recommended by staff and amended by the above motion.

1. **BASIS AND RECOMMENDED FINDINGS OF FACT:** Motion #1 This area is more closely associated with the Bonita Springs Planning Community.

Motion #2 As contained in the staff analysis.

**PART IV - BOARD OF COUNTY COMMISSIONERS
HEARING FOR TRANSMITTAL OF PROPOSED AMENDMENT**

DATE OF TRANSMITTAL HEARING: November 5, 1997

- A. **BOARD REVIEW:** Two issues were brought up during board review and were discussed by the public and the Board. First, the three sections of land designated "Rural" in the southeast portion of Lee County were discussed. A member of the public brought up this issue, a local land use attorney, and was agreed upon by the board. The board agreed that the entire strip of land south of Bonita Beach Road should be in the Bonita Community. They also concurred that the Rural allocation that was included in the LPA staff report for the Southeast Lee County Community should be added to the proposed Rural allocation in the Bonita Community.

The second issue addressed was the allocations in the San Carlos/Estero Community. The concern brought forward by a member of the public, also a land use attorney, was that the allocations do not accommodate all the development approved in the Corkscrew Road CRSA. The board agreed with the concern and instructed staff to review the San Carlos/Estero Community allocations prior to the adoption hearing.

B. **BOARD ACTION AND FINDINGS OF FACT SUMMARY:**

1. **BOARD ACTION:** The Board voted to transmit this amendment with revisions to the Bonita Springs and Southeast Lee County Planning Communities.
2. **BASIS AND RECOMMENDED FINDINGS OF FACT:** The Board accepted the findings of fact as advanced by staff and the LPA with the direction to staff to "re-look" at the San Carlos/Estero Community

C. **VOTE:**
