| | Calculation of maximum allowable development with proposed amendments: |
| | Residential Units/Density: <u>N/A</u> Commercial Intensity: <u>Per "LDC"</u> Industrial Intensity: <u>Per "LDC"</u> |

Public Facilities Impacts

Yes

NOTE: The applicant must calculate public facilities impacts based on the maximum development.

- 1. Traffic Circulation Analysis: The analysis is intended to determine the affect of the land use change on the Financially Feasible Highway Plan Map 3A (20-year plus horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit a Traffic Impact Statement (TIS) consistent with Lee County Administrative Code (AC)13-17.
 - a. Proposals affecting less than 10 acres, where development parameters are contained within the Traffic Analysis Zone (TAZ) or zones planned population and employment, or where there is no change in allowable density/ intensity, may be eligible for a TIS requirement waiver as outlined in the Lee County TIS Guidelines and AC-13-17. Identification of allowable density/intensity in order to determine socio-economic data for affected TAZ(s) must be coordinated with Lee County Planning staff. Otherwise a calculation of trip generation is required consistent with AC-13-17 and the Lee County TIS Guidelines to determine required components of analysis for:
 - i. Total peak hour trip generation less than 50 total trip ends trip generation.
 - ii. Total peak hour trip generation from 50 to 300 total trip ends trip generation, trip distribution and trip assignment (manual or Florida Standard Urban Transportation Modeling Structure (FSUTMS) analysis consistent with AC-13-17 and TIS Guidelines), short-term (5 year) and long-range (to current Lee Plan horizon year) segment LOS analysis of the nearest or abutting arterial and major collector segment(s) identified in the Transportation Inventory based on the trip generation and roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is recommended prior to submittal of the application to discuss use of FSUTMS, any changes to analysis requirements, or a combined CPA and Zoning TIS short term analysis.
 - iii. Total peak hour trip generation is over 300 total trip ends trip generation, mode split, trip distribution and trip assignment (manual or FSUTMS analysis consistent with AC-13-17 and TIS Guidelines), short-term (five-year) and long-range (to current Lee Plan horizon year) segment LOS analysis of arterial and collector segments listed in the Transportation Inventory. LOS analysis will include any portion of roadway segments within an area three miles offset from the boundary of the application legal description metes and bounds survey. LOS analysis will also include any additional segments in the study area based on the roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is required prior to submittal of the application.
 - **b.** Map amendment greater than 10 acres -Allowable density/intensity will be determined by Lee County Planning staff.

2. Provide an existing and future conditions analysis for the following (see Policy 95.1.3):

- a. Sanitary Sewer
- b. Potable Water
- c. Surface Water/Drainage Basins
- d. Parks, Recreation, and Open Space
- e. Public Schools

Analysis for each of the above should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- a Franchise Area, Basin, or District in which the property is located
- b. Current LOS, and LOS standard of facilities serving the site
- c. Projected 2030 LOS under existing designation
- d Projected 2030 LOS under proposed designation
- e Existing infrastructure, if any, in the immediate area with the potential to serve the subject property
- f Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements
- g. Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water

In addition to the above analysis, provide the following for potable water:

- a. Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- b. Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- c. Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
- d. Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:

- **a.** Fire protection with adequate response times
- b. Emergency medical service (EMS) provisions
- c. Law enforcement
- d. Solid Waste
- e. Mass Transit
- f. Schools

.\...

 \mathcal{N}^{0}

In reference to above, the applicant must supply the responding agency with the information from application items 5, 6, and 7 for their evaluation. This application must include the applicant's correspondence/request to the responding agency.

Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed change based upon the following:

- 1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
- 2. A map and description of the soils found on the property (identify the source of the information).
- 3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
- 4. A map delineating the property boundaries on the most recent Flood Insurance Rate Map.
- 5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
- 6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archaeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

- 1. A map of any historic districts and/or sites listed on the Florida Master Site File which are located on the subject property or adjacent properties.
- 2 A map showing the subject property location on the archaeological sensitivity map for LeeCounty.

Internal Consistency with the Lee Plan

- 1. Discuss how the proposal affects established Lee County population projections, Lee Plan Table 1(b) and the total population capacity of the Lee Plan Future Land Use Map.
- 2 List all goals and objectives of the Lee Plan that are affected by the proposed amendment or that affect the subject property.
- This analysis should include an evaluation of all relevant policies under each goal and objective.
- 3. Describe how the proposal affects adjacent local governments and their comprehensive plans.

State Policy Plan and Regional Policy Plan

List State Policy Plan and Regional Policy Plan goals, strategies and actions, and policies which are relevant to this plan amendment.

Justify the proposed amendment based upon sound planning principles

Support all conclusions made in this justification with adequate data and analysis.

Planning Communities/Community Plan Area Requirements

If located within a planning community/community plan area, provide a meeting summary document of the required public informational session [Lee Plan Goal 17].

Sketch and Legal Description

100

The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

SUBMITTAL REQUIREMENTS

Clearly label all submittal documents with the exhibit name indicated below.

For each map submitted, the applicant will be required to submit a 24"x36" version and 8.5"x11" reduced map for inclusion in public hearing packets.

MINIMUM SUBMITTAL ITEMS (3 Copies)

| Completed Application (Exhibit – M1) |
|--|
| Filing Fee (Exhibit – M2) |
| Disclosure of Interest (Exhibit – M3) |
| Surrounding Property Owners List, Mailing Labels, and Map For All Parcels Within 500 Feet of the Subject Property (Exhibit – M3) |
| Future Land Use Map - Existing and Proposed (Exhibit – M4) |
| Map and Description of Existing Land Uses (Not Designations) of the Subject Property and Surrounding Properties (Exhibit – M5) |
| Map and Description of Existing Zoning of the Subject Property and Surrounding Properties (Exhibit – M6) |
| Signed/Sealed Legal Description and Sketch of the Description for Each FLUC Proposed (Exhibit – M7) |
| Copy of the Deed(s) of the Subject Property (Exhibit – M8) |
| Aerial Map Showing the Subject Property and Surrounding Properties (Exhibit – M9) |
| Authorization Letter From the Property Owner(s) Authorizing the Applicant to Represent the Owner (Exhibit – M10) |
| Lee Plan Analysis (Exhibit – M11) |
| Environmental Impacts Analysis (Exhibit – M12) |
| Historic Resources Impact Analysis (Exhibit – M13) |
| Public Facilities Impacts Analysis (Exhibit – M14) |
| Traffic Circulation Analysis (Exhibit – M15) |
| Existing and Future Conditions Analysis - Sanitary Sewer, Potable Water, Surface Water/Drainage Basins, Parks and Rec, Open Space, Public Schools (Exhibit – M16) |
| Letter of Determination For the Adequacy/Provision of Existing/Proposed Support Facilities - Fire Protection, Emergency Medical Service, Law Enforcement, Solid Waste, Mass Transit, Schools (Exhibit – M17) |
| State Policy Plan and Regional Policy Plan (Exhibit – M18) |
| Justification of Proposed Amendment (Exhibit – M19) |
| Planning Communities/Community Plan Area Requirements (Exhibit – M20) |

APPLICANT – PLEASE NOTE:

Once staff has determined the application is sufficient for review, 15 complete copies will be required to be submitted to staff. These copies will be used for Local Planning Agency hearings, Board of County Commissioners hearings, and State Reviewing Agencies. Staff will notify the applicant prior to each hearing or mail out to obtain the required copies.

If you have any questions regarding this application, please contact the Planning Section at (239)533-8585.

Lee County Comprehensive Plan Map Amendment Application Form (5/2021)

AFFIDAVIT

I, Don Ershig _____, certify that I am the owner or authorized representative of the property described herein, and that all answers to the questions in this application and any sketches, data, or other supplementary matter attached to and made a part of this application, are honest and true to the best of my knowledge and belief. I also authorize the staff of Lee County Community Development to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made through this application.

10-8-21 Date

Signature of Applicant I Don Ershigas Manager of Luckett Landing, LLC Printed Name of Applicant

STATE OF FLORIDA COUNTY OF LEE

The foregoing instrument was sworn to (or affirmed) and subscribed before me by means of \mathbb{Z} physical presence or \Box onlinenotarization on ______(date) by

(name of person providing path or affirmation), who is personally known to me or who has produced

Netary Public atureo

(Name typed, printed or stamped)

DISCLOSURE OF INTEREST AFFIDAVIT

BEFORE ME this day appeared <u>Don R. Ershig</u>, who, being first duly sworn and deposed says:

1. That I am the record owner, or a legal representative of the record owner, of the property that is located at <u>9455 Old Luckett Drive</u> and is the subject of an application for zoning action (hereinafter the "Property").

2. That I am familiar with the legal ownership of the Property and have full knowledge of the names of all individuals that have an ownership interest in the Property or a legal entity owning an interest in the Property.

[OPTIONAL PROVISION IF APPLICANT IS CONTRACT PURCHASER: In addition, I am familiar with the individuals that have an ownership interest in the legal entity that is under contract to purchase the Property.]

3. That, unless otherwise specified in paragraph 6 below, no Lee County Employee, County Commissioner, or Hearing Examiner has an Ownership Interest in the Property or any legal entity (Corporation, Company, Partnership, Limited Partnership, Trust, etc.) that has an Ownership Interest in the Property or that has contracted to purchase the Property.

4. That the disclosure identified herein does not include any beneficial Ownership Interest that a Lee County Employee, County Commissioner, or Hearing Examiner may have in any entity registered with the Federal Securities Exchange Commission or registered pursuant to Chapter 517, whose interest is for sale to the general public.

5. That, if the Ownership Interest in the Property changes and results in this affidavit no longer being accurate, the undersigned will file a supplemental Affidavit that identifies the name of any Lee County Employee, County Commissioner, or Hearing Examiner that subsequently acquires an interest in the Property.

6. Disclosure of Interest held by a Lee County Employee, County Commissioner, or Hearing Examiner.

Luckett Landing

Narrative Description of Existing Land Uses Exhibit M5

Subject Property

The subject property is 16.56-acre parcel located at the northeast corner of Luckett Road and Enterprise Parkway northwest of the Luckett Road and I-75 exit ramp.

The lot was previously split from a 19.5 Acre parcel and a 7-Eleven site was constructed on 2.93 acres located near Enterprise Parkway. The property is bordered on the east by I-75

North and West

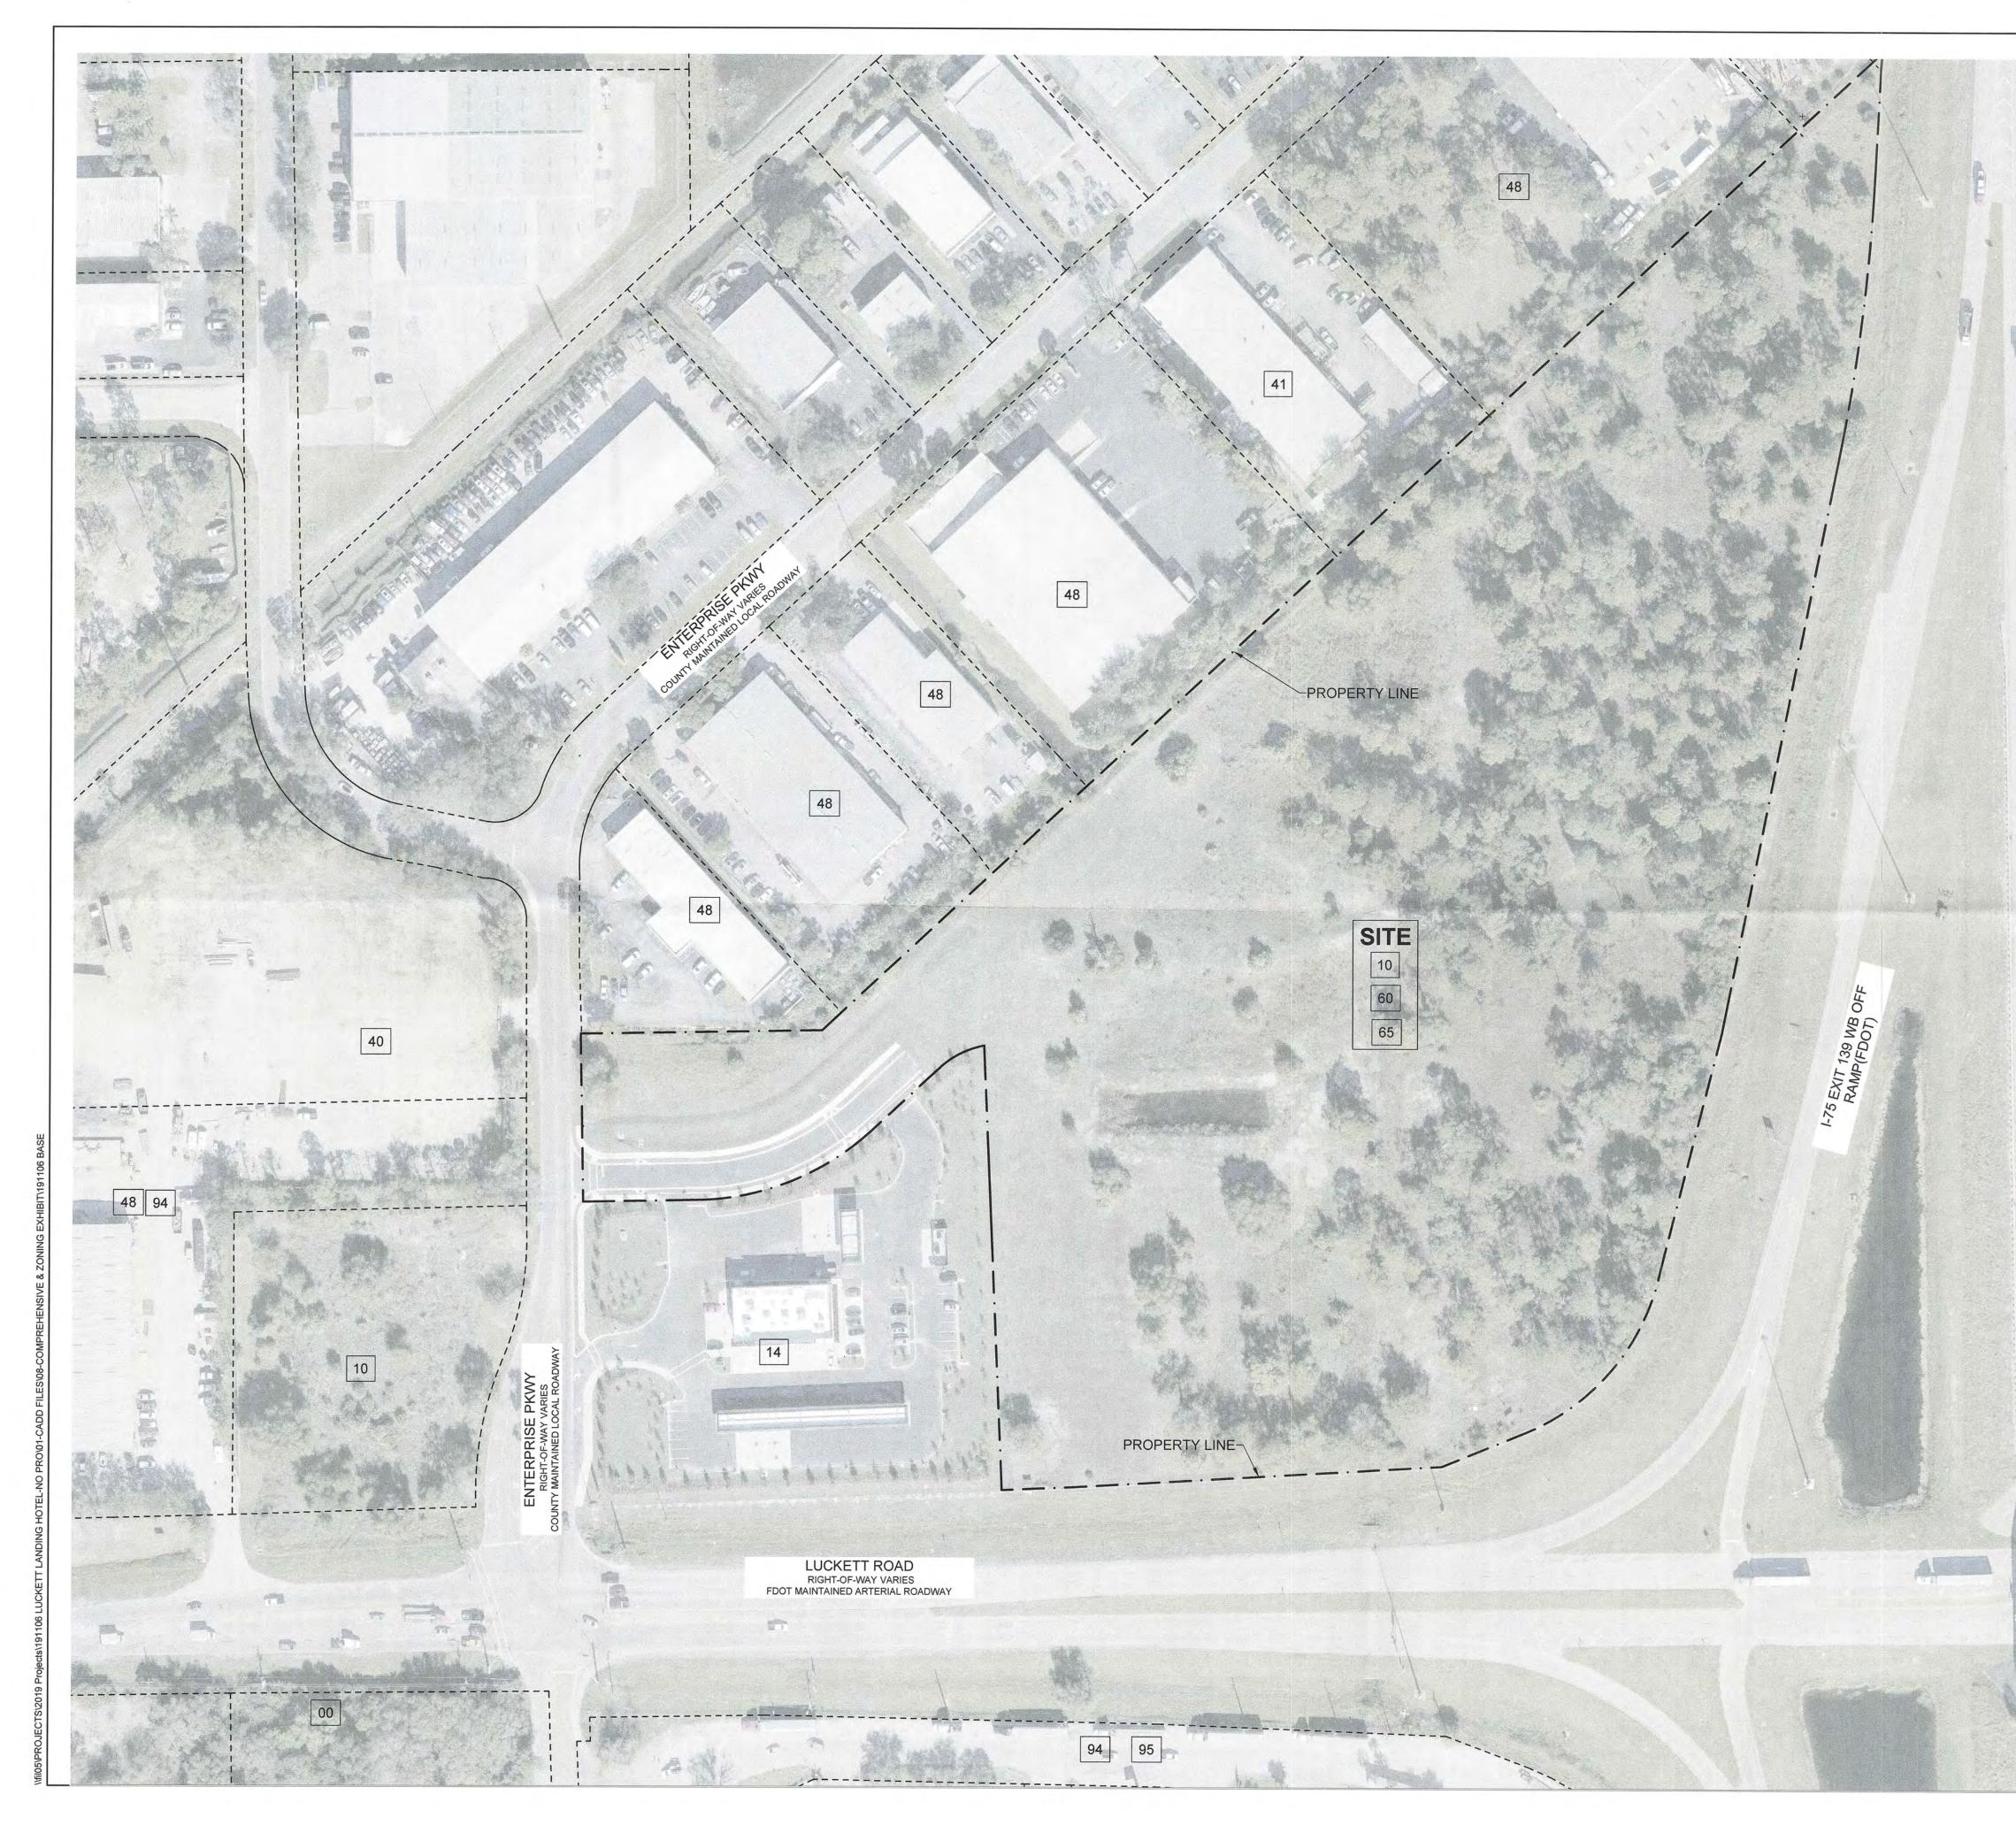

To the northwest is Billy Creek Commerce Center, a well-established Light Industrial Subdivision.

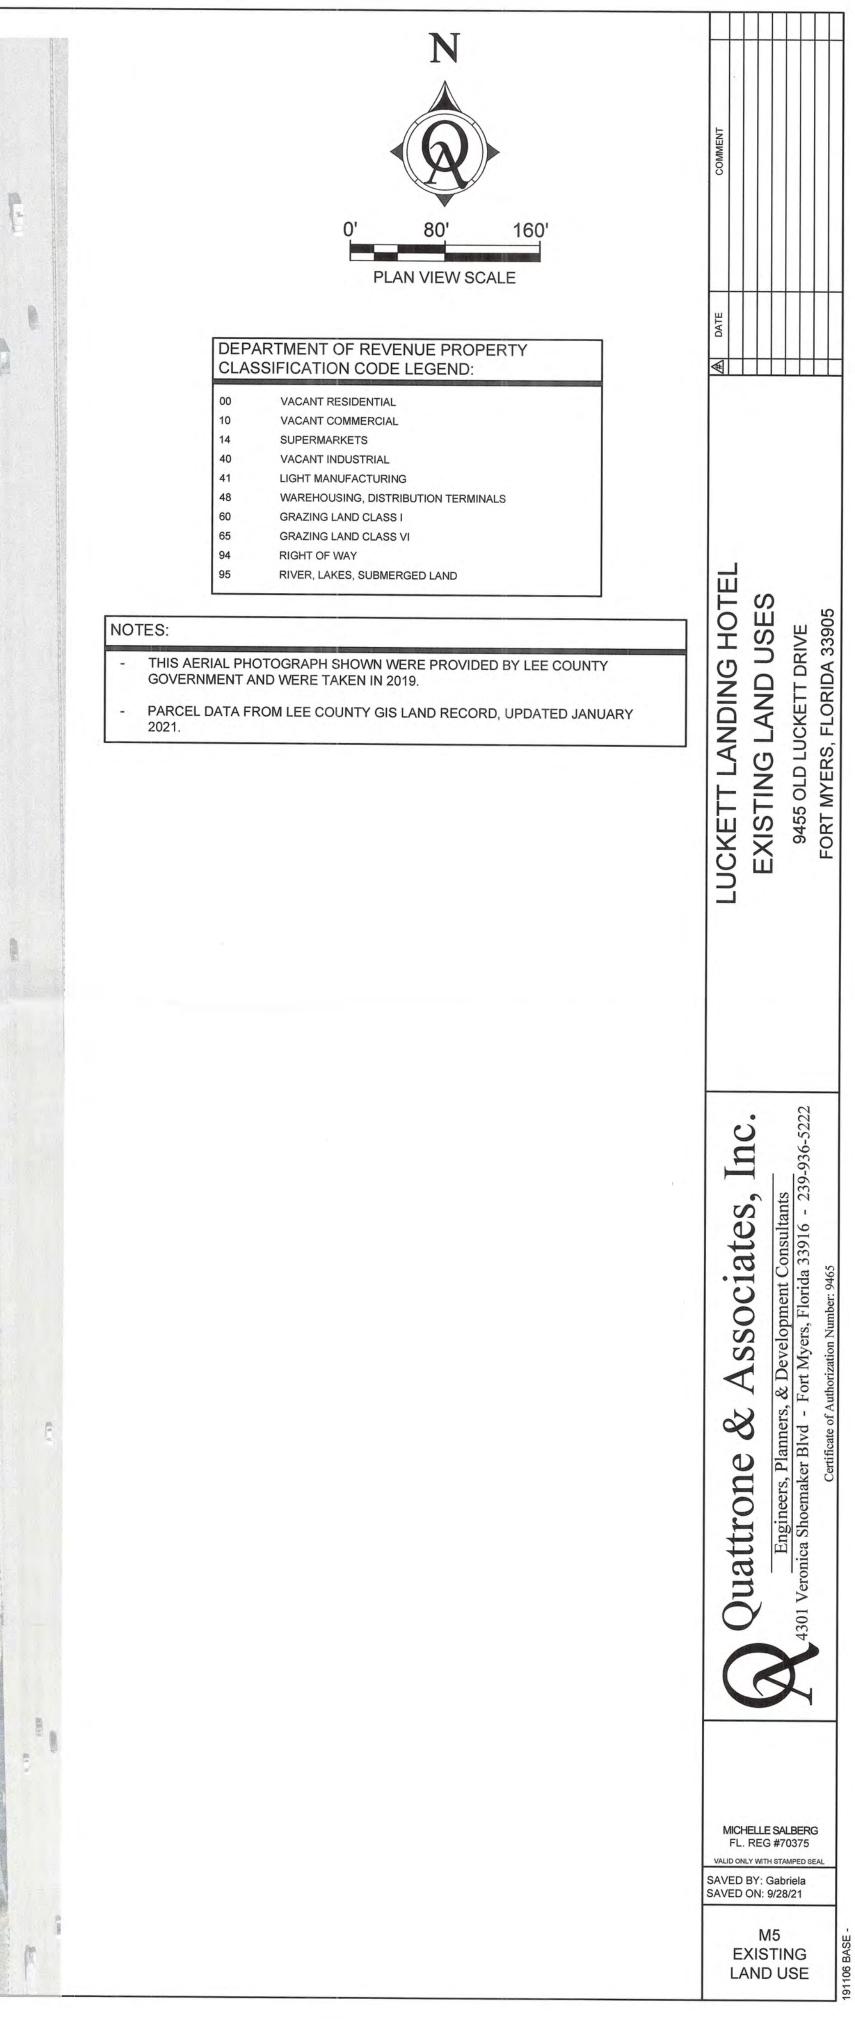

Northeast

To the northeast, across I-75, currently from north to south is a 317,509 sq ft garage and repair known as Kelly Tractor and 851,835 sq ft Auto Sales known as Camping World.

<u>South</u>

To the south, across Luckett Rd. currently from east to west are a 13,069 sq ft Convenience Store, 5,720 sq ft service garage and a 3,000 sq ft canopy known as "Pilot Center", as well as a 10,560 sq ft service garage known as Southern Marine & RV sales.

1 . ~

Luckett Landing

Narrative Description of Existing Zoning Exhibit M6

Subject Property

The subject property is 16.56-acres consisting of one vacant parcel. The current zoning is Commercial General (CG).

<u>West</u>

Property to the west is zoned Commercial General (CG), with a 4,663 sq ft Convenient Store, 4,048 sq ft Canopy with fuel pumps and an 1,866 sq ft canopy with fuel pumps.

North and Northwest

Properties to the north and northwest are zoned Light Industrial (IL)and part of Billy's Creek Industrial Park.

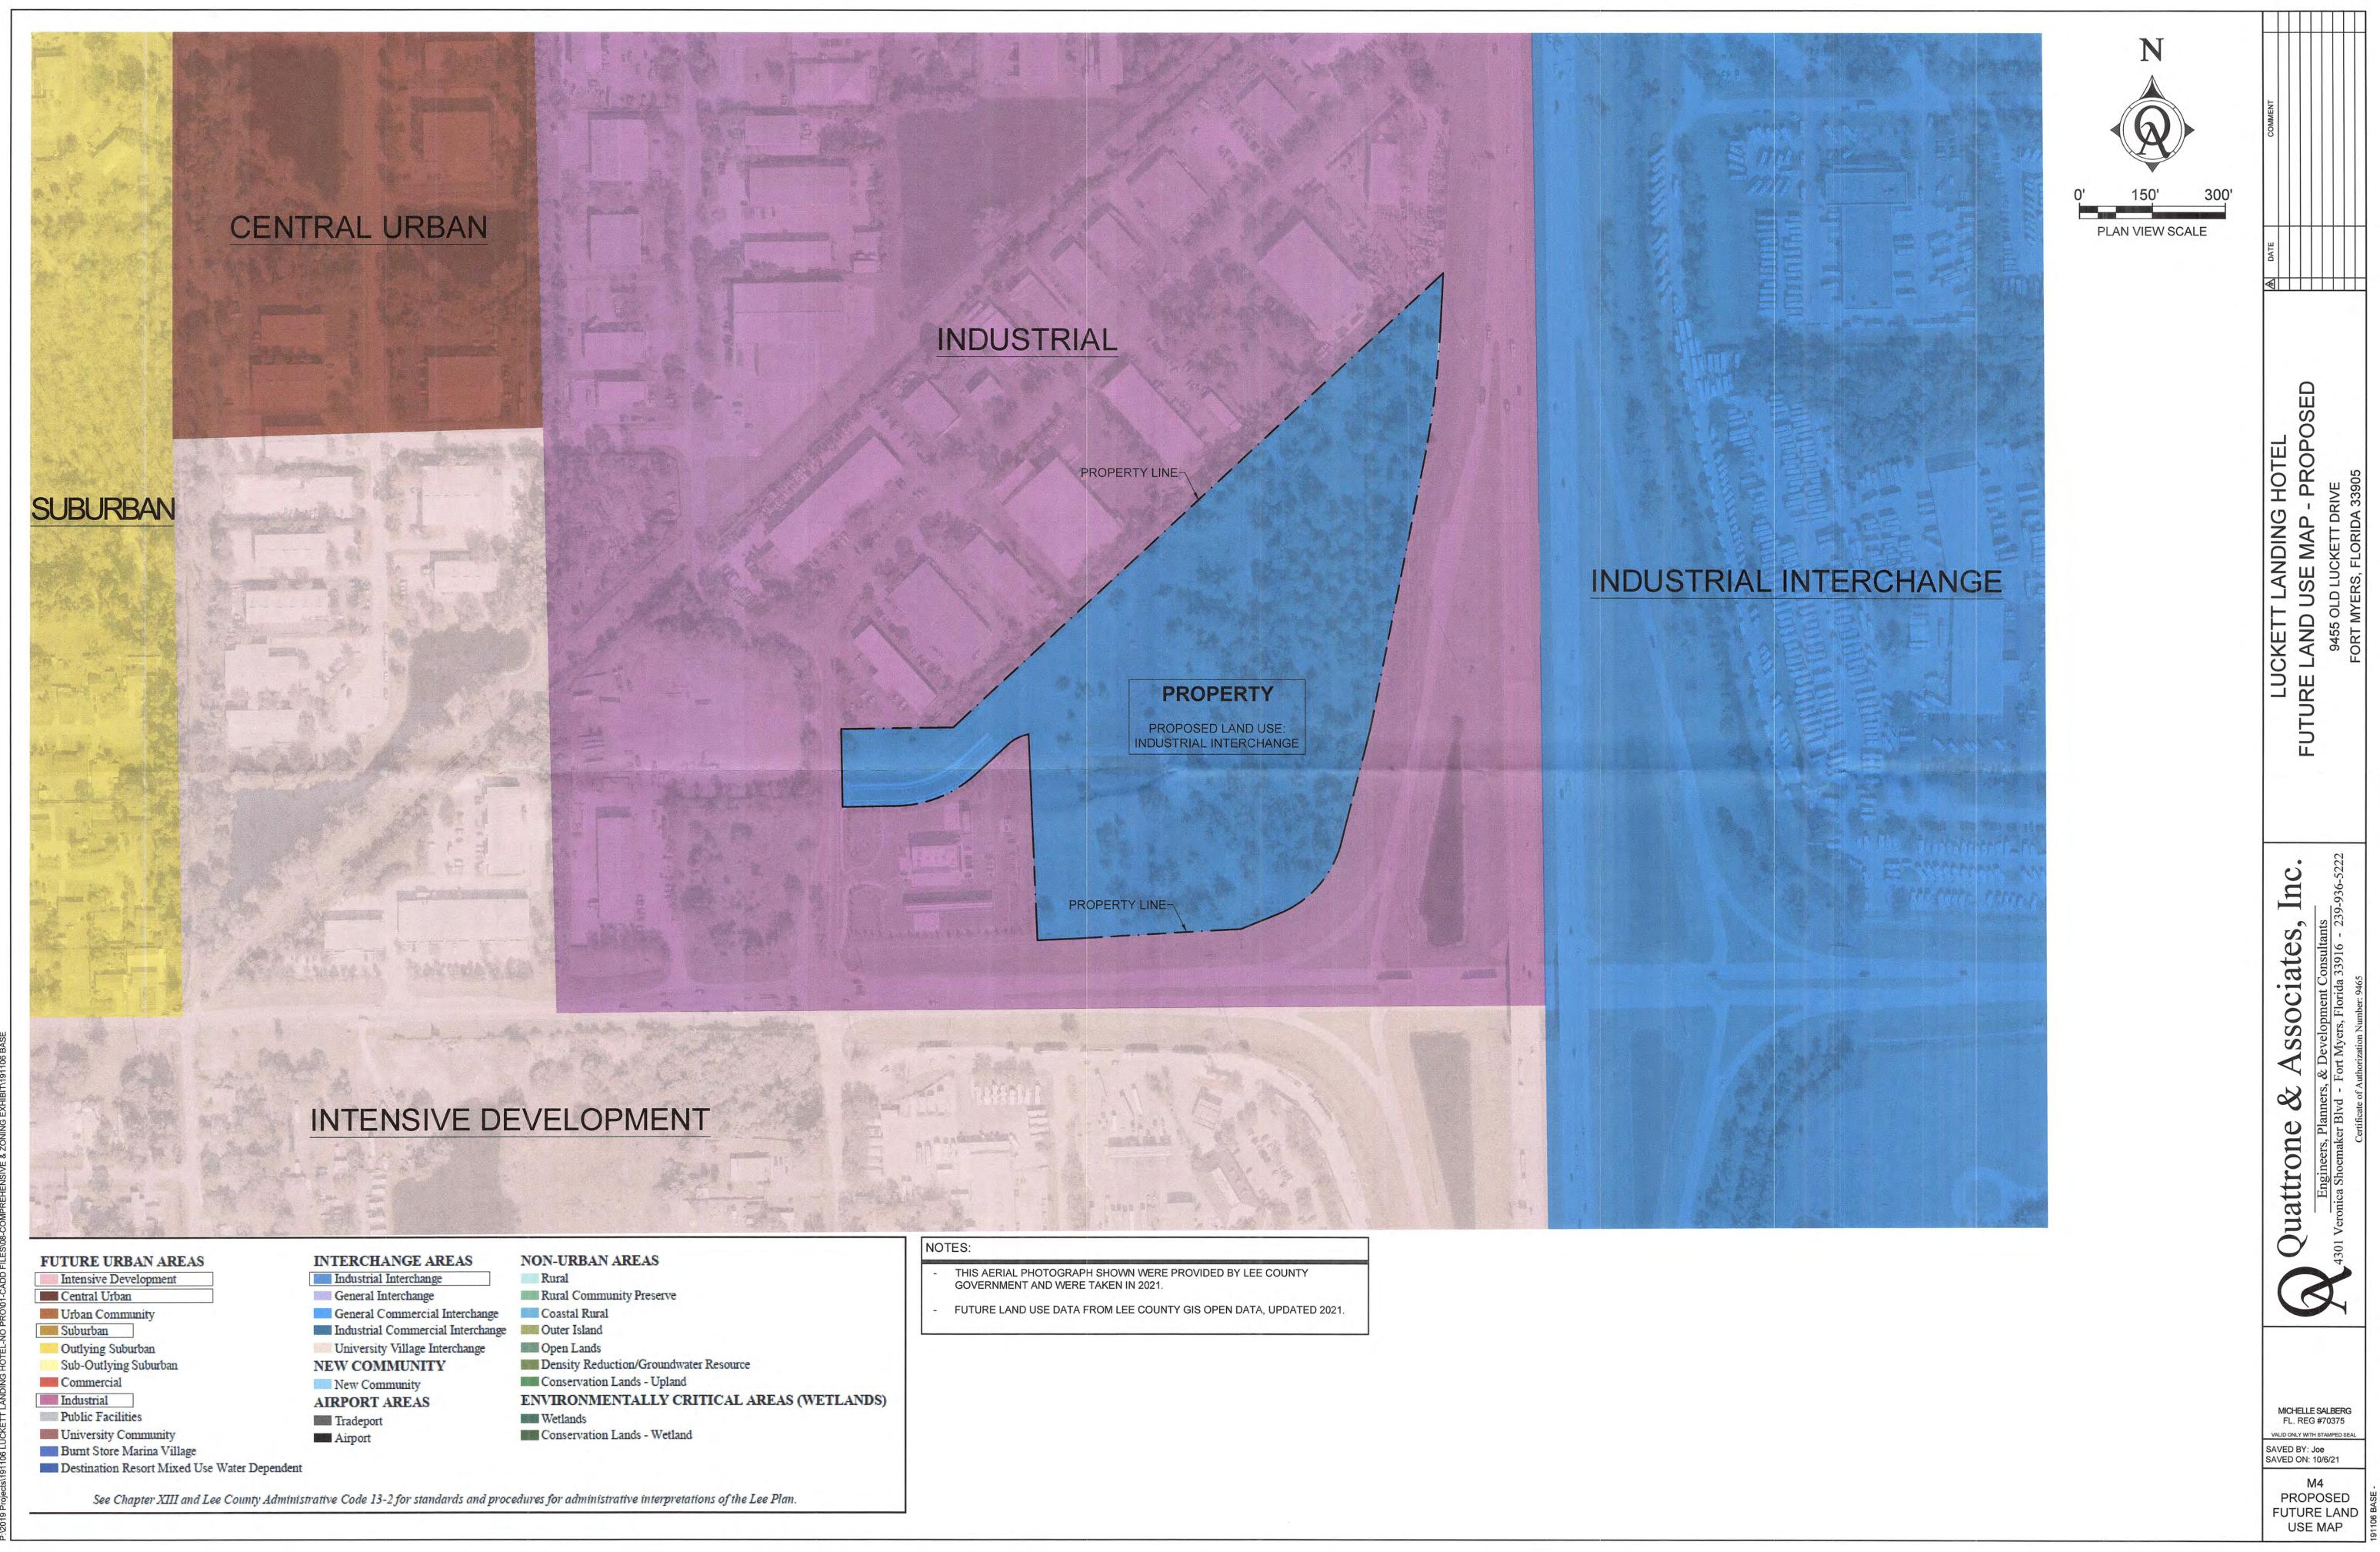

<u>East</u>

Properties to east and, across I-75 are zoned IPD and IL. To the northeast is an Industrial Planned Development known as, Kelly Tractor, IPD. The IPD is approved for 200,000 sq ft of Commercial Uses and 300,000 sq ft of Industrial Uses. South is Light Industrial (IL).

<u>South</u>

To the south, across Luckett Rd. is a 21.87-acre Industrial Planned Development known as, Luckett Rd IPD. The IPD is approved for 181,000 sq ft of Industrial Uses and 115,000 sq ft of Commercial Uses, of which 50,000 sq ft may be a hotel.

Luckett Landing

Lee Plan Analysis Exhibit MII

Request

The proposed Lee Plan Map Amendment is to re-designate approximately $16.56 \pm$ acres from the Industrial Development Future Land use to Industrial Interchange Future Land use category. The Map Amendment is being filed concurrently with a request to rezone 5.88 acres from Commercial General (CG) to Commercial Highway (CH) for the purpose of developing the site with a hotel. The companion CH rezoning will demonstrate compliance with the Lee County Land Development code. The surrounding area have been mostly developed with a mixture of Industrial and Commercial uses.

Existing and Surrounding Conditions

The subject property is located at the northeast corner of Luckett Road and Enterprise Parkway northwest of the Luckett Road and I-75 exit ramp. The property presently is vacant.

The property is located within the Fort Myers Planning Community and has a future land use classification of Industrial Development. According to the Lee Plan, although commercial and industrial development may be moving south along US 41, the Fort Myers Planning Community is expected to remain an administrative, financial, and cultural center for the rest of Lee County.

Lee Plan Consistency

As discussed in detail below, the proposed Map Amendment will be consistent with the following goals, objectives, standards and policies set forth in the Lee Plan:

Future Land Use Element

OBJECTIVE 1.3: INTERSTATE HIGHWAY INTERCHANGE AREAS. Special areas adjacent to the interchanges of Interstate 75 that maximize critical access points will be designated on the Future Land Use Map. Development in these areas must minimize adverse traffic impacts and provide appropriate buffers, visual amenities, and safety measures. Each interchange area is designated for a specific primary role: General, General Commercial, Industrial Commercial, Industrial, and University Village. Residential uses are only permitted in these categories in accordance with Policy 1.3.2. (Ordinance No. 94-30, 99-18, 00-22, 16-02, 17-13, 18-05)

POLICY 1.3.1: The Industrial Interchange areas allow combinations of light industry, research, and office uses. In addition, certain visitor-serving commercial uses such as restaurants and hotels are appropriate. (Ordinance No. 98-09)

The site is presently designated as Industrial on the FLU map. The area has been widely developed with industrial and commercial uses since the designation of Industrial Development Future Land Use. The Luckett Road corridor has seen some changes and growth and is slated to continue to do so with widening from a 2-lane to a 4-lane highway traveling west by the year 2040. The subject area is

Quattrone & ssociates, Inc.

located in the proximity of Interstate I-75 and has the necessary public services and infrastructure available to support the Industrial and Commercial Uses. Changing the property to the Industrial Interchange future land use will provide opportunities for development of visitor-serving commercial facilities. Property abutting I-75 to the east of this project is already located within the Industrial Interchange future land use category. The change will be consistent with the intent of the Industrial Interchange land use category and consistent and compatible with the existing Future Land Use Map.

From a transportation perspective, interchanges are a vital link in the system for Commercial Uses that generally require accesses to an Arterial or Major Collector or have close proximity to Major Intersections.

Convenient access to a major highway provides business park tenants with an easy way to link customers and employees to their base of operations. For industrial park tenants, interchanges are an attractive location because they minimize the distance semi-trucks must travel in order to reach the highway or Interstate System. This proximity decreases travel and delivery time predictability for goods and services. Locating industrial parks near interchanges can be attractive to local communities because it minimizes the amount of semi-truck traffic on local roads and locates high noise generating facilities away from residential areas.

POLICY 1.3.7: The following access control standards will apply to the interstate interchange areas of Luckett Road, Alico Road, Corkscrew Road, and Bonita Beach Road. The specified turning movements are not to be construed as conveying a property right or creating any expectation that they will be a permanent feature. The county reserves the right to modify or further restrict movements as it deems necessary to address operational and safety issues. Access control issues for Daniels Parkway west of I-75 are governed by the controlled access resolution adopted by the Board of County Commissioners on October 4, 1989, as may be amended from time to time. The other interchange areas are state roads where access is controlled by the Florida Department of Transportation under the provisions of Rule 14-97.003, FAC. The standard is a strict requirement during the rezoning and development order processes for cases after the effective date of this policy.

In 2013, FDOT completed the expansion of I-75 and Exit 139, Luckett Road. The proposed change of the subject parcel to the Industrial Interchange land use will have no impact on the existing access points or access control of Luckett Road.

POLICY 1.7.6: The Planning Communities Map and Acreage Allocation Table (see Map 16, Table 1(b), and Policies 1.1.1 and 2.2.2) depicts the proposed distribution, extent, and location of generalized land uses through the Plan's horizon. Acreage totals are provided for land in each Planning Community in unincorporated Lee County. No development orders or extensions to development orders will be issued or approved by Lee County that would allow the acreage totals for residential, commercial or industrial uses contained in Table 1(b) to be exceeded. This policy will be implemented as follows:

I. For each Planning Community the county will maintain a parcel-based database of existing

land use. The database will be periodically updated at least twice every year, in September and March, for each Planning Community.

2. Project reviews for development orders must include a review of the capacity, in acres, that will be consumed by buildout of the development order. No development order, or extension of a development order, will be issued or approved if the acreage for a land use, when added to the acreage contained in the updated existing land use database, exceeds the limitation established by Table I (b) regardless of other project approvals in that Planning Community.

3. At each regularly-scheduled date for submission of the Lee Plan Evaluation and Appraisal Report, the county must conduct a comprehensive evaluation of Planning Community Map and the Acreage Allocation Table system, including but not limited to, the appropriateness of land use distribution, problems with administrative implementations, if any, and areas where the Planning Community Map and the Acreage Allocation Table system might be improved. (Ordinance No. 94-29, 98-09, 00-22, 07-13, 10-20, 19-13)

The acreage allocation table will not need to be modified as the project area is already accounted for in the total Industrial acreage within the Fort Myers Planning community.

TABLE 1(b) Year 2030 Allocation

OBJECTIVE 2.1: DEVELOPMENT LOCATION. Contiguous and compact growth patterns will be

promoted through the rezoning process to contain urban sprawl, minimize energy costs, conserve land,

water, and natural resources, minimize the cost of services, and prevent development patterns where large tracts of land are by-passed in favor of development more distant from services and existing communities. (Ordinance No. 94-30, 00-22)

POLICY 2.1.1: Most residential, commercial, industrial, and public development is expected to occur within the designated future urban areas on the Future Land Use Map through the assignment of very low densities to the non-urban categories.

POLICY 2.1.2: New land uses will be permitted only if they are consistent with the Future Land Use Map and the goals, objectives, policies, and standards of this plan. (Ordinance No. 00-22)

POLICY 2.1.5: Residential and commercial development proposals within the vicinity of existing or proposed commodity movement facilities must demonstrate land use compatibility with these uses during the rezoning process and propose mitigation measures for adverse impacts. (Ordinance No. 99-15, 19-02)

Objective 2.1 and implementing policy 2.1.1, 2.1.2 and 2.1.5 encourage the use of existing urban areas where services and infrastructure exist to serve new development. The Industrial Interchange FLU category is a future urban area and has the full range of urban services available directly at the subject property, including water, sewer and roadway capacity. Development in this location provides for a compact and contiguous growth pattern.

OBJECTIVE 2.2: DEVELOPMENT TIMING. Direct new growth to those portions of the future urban areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created. Development orders and permits (as defined in Section 163.3164(7), F.S.) will be granted only when consistent with the provisions of Sections 163.3202(2)(g) and 163.3180, F.S. and the concurrency requirements in the Land Development Code. (Ordinance No.

94-30, 00-22, 17-19)

POLICY 2.2.1: Rezoning's and Development of Regional Impact proposals will be evaluated as to the availability and proximity of the road network; central sewer and water lines; community facilities and services such as schools, EMS, fire and police protection, and other public facilities; compatibility with surrounding land uses; and any other relevant facts affecting the public health, safety, and welfare. (Ordinance No. 94-30, 00-22)

The primary access to the site will be provided by Luckett Rd., a County arterial roadway. A secondary access will be provided by Enterprise Parkway, a Local County maintained road. The subject property is located within the Lee County Utilities franchise area for potable water and central sewer, and they have indicated they have adequate capacity available to provide service. Urban services are available at or near the project site. Schools, EMS, fire and sheriff's office

services are available in the vicinity of the project consistent with objective 2.2 and policy 2.2.1 of the FLU element.

POLICY 2.2.2: Map 1 of the Future Land Use Map series indicates the uses and density ranges that will ultimately be permitted on a given parcel. However, it is not a guarantee that such densities or uses are immediately appropriate, as the map provides for the county's growth beyond the Lee Plan's planning horizon of 2030. During the rezoning process the Board of County Commissioners will balance the overall standards and policies of this plan with three additional factors:

1. Whether a given proposal would further burden already overwhelmed existing and committed public facilities such that the approval should be delayed until the facilities can be constructed; and

2. Whether a given proposal is for land so far beyond existing development or adequate public facilities that approval should be delayed in an effort to encourage compact and efficient growth patterns; and

3. Whether a given proposal would result in unreasonable development expectations that may not be achievable because of acreage limitations contained in the Acreage Allocation Table (see Policy 1.7.6, Map 16 and Table 1(b)). Additional provisions related to mining are provided in Policy 33.1.4.

In all cases where rezoning is approved, such approval does not constitute a determination that the minimum acceptable levels of service (see Policy 95.1.3) will be available concurrent with the impacts of the proposed development. Such a determination must be made prior to the issuance of additional development permits, based on conditions which exist at that time, as required by Lee County's concurrency management system. (Ordinance No. 94-30, 98-09, 10-20)

The applicant has analyzed public service availability and confirmed that capacity is available at the present time to serve the uses permitted by the proposed Industrial Interchange FLU map designation. Development of the site with commercial uses will not further burden any public facilities. This amendment proposes to revise the table I (b) acreage allocation, to increase the acreage by 16.56 +/- acres to accommodate the proposed change in FLU categories, and a corresponding reduction in acreage is proposed in the Industrial Development FLU category community.

OBJECTIVE 2.11: CARRYING CAPACITY. Understand the carrying capacity of the future land use map and integrate the concept into planning strategies. (Ordinance No. 07-16)

The modification is to a FLU category which permits industrial uses in addition to commercial land uses is addressing the carrying capacity of the Lee Plan FLU map. Providing for the in-demand use of more commercial development central to urban services and employment and where capacity exists to accommodate this growth is consistent with good land use planning strategies

GOAL 4: GENERAL DEVELOPMENT STANDARDS. Pursue or maintain land development regulations which protect the public health, safety and welfare, encourage creative site designs and balance development with service availability and protection of natural resources. (Ordinance No. 94-30, 07-15, 17-13)

STANDARD 4.1.1: WATER.

2. If the proposed development lies within the boundaries of a water utility's certificated or franchised service area, or Lee County Utilities' future potable water service area (see Map 6), then the development must be connected to that utility.

3. The developer must provide proof that the prior commitments of the water utility, plus the projected need of the developer, do not exceed the supply and facility capacity of the utility

4. All waterline extensions to new development will be designed to provide minimum fire flows, as well as adequate domestic services as required by Chapter 62-555, FAC.

The subject property is within the Lee County Utilities water franchise area as depicted on Lee Plan Map 6 of the Lee Plan. Potable water will be provided from the North Lee County Water Treatment Plant. A letter stating that this plant has adequate capacity available to provide service to the proposed development is provided as part of this application.

STANDARD 4.1.2: SEWER.

2. If the proposed development exceeds the thresholds listed above and lies within the boundaries of a sewer utility's certificated or franchised service area, or Lee County Utilities' future sanitary sewer service area (see Map 7), and that utility has sufficient capacity to provide minimum service to the development, then the development must connect to that sewer utility if there is existing infrastructure adequate to accept the effluents of the development within I/4 mile from any part of the development.

The proposed development is within the Lee County Utilities sewer franchise area as depicted on Lee Plan Map 7 of the Lee Plan. Wastewater treatment will be provided from the City of Fort Myers's North Water Reclamation Facility. A letter stating that this facility has adequate capacity available to provide service to the proposed development is provided as part of this application.

STANDARD 4.1.4: ENVIRONMENTAL FACTORS.

I. In any case where there exists or there is the probability of environmentally sensitive areas (as identified by Lee County, the Corps of Engineers, Department of Environmental Protection,

South Florida Water Management District, or other applicable regulatory agency), the developer/applicant must prepare an environmental assessment that examines the existing conditions, addresses existing or anticipated environmental problems, and proposes means and mechanisms to protect, conserve, or preserve the environmental and natural resources.

The proposed land use change will have no impact on environmentally sensitive lands. Whether the site is developed with industrial and commercial uses under the Industrial development land use or with a mix of hotel, industrial and commercial uses permitted within the Industrial Interchange land use, efforts will be made to preserve and protect any wetlands or environmentally sensitive areas that may be encountered on site. A native indigenous vegetation preserve area will be provided in accordance with Lee County Land Development Code requirements and the development will comply with all State and local permitting requirements for preservation or mitigation of wetlands in either case. Refer to the Environmental Analysis for more information.

GOAL 6: COMMERCIAL LAND USES. To permit orderly and well-planned commercial development at appropriate locations within the county. (Ordinance No. 94-30)

OBJECTIVE 6.1: Development approvals for commercial land uses must be consistent with the following policies, the general standards under Goal 4 and other provisions of this plan. (Ordinance No. 94-30, 11-18)

POLICY 6.1.4: Commercial development will be approved only when compatible with adjacent existing and proposed land uses and with existing and programmed public services and facilities. (Ordinance No. 94-30, 00-22)

The parcel is adjacent to the Industrial Interchange land use category to the east. Existing zoning and developed uses in the surrounding area are primarily industrial with some commercial development. The principal land uses for Industrial Interchange are light industry, office and research which are very similar to the existing uses already permitted within the current land use category and will therefore continue to be compatible. One of the only differences in the land use category change is the added flexibility to add visitor serving hotel and restaurant uses. These uses are appropriate in this location due to the proximity to the interstate.

POLICY 6.1.5: The land development regulations will require that commercial development be designed to protect the traffic-carrying capacity of roads and streets. Methods to achieve this include but are not limited to: frontage roads; clustering of activities; limiting access; sharing access; setbacks from existing rights-of-way; acceleration, deceleration and right-turn-only lanes; and, signalization and intersection improvements. (Ordinance No. 94-30, 00-22)

The subject parcel is in an area where capacity exists on the adjacent roadway network. A signalized intersection is located at Luckett Road and Enterprise Parkway, providing access to the site.

As discussed in the attached traffic analysis, the change in land use is not expected to substantially increase, and may actually decrease the number of potential new trips generated by the development at buildout. Whether developed within the Industrial Development or the Industrial Interchange Land Use, the site is expected to generate a very similar amount of traffic and therefore will have no impact on the traffic-carrying capacity of the adjacent roadway network.

POLICY 6.1.6: The land development regulations will require that commercial development provide adequate and appropriate landscaping, open space, and buffering. Such development is encouraged to be architecturally designed so as to enhance the appearance of structures and parking areas and blend with the character of existing or planned surrounding land uses.

The change in land use will not have any impact on landscaping, open space or buffering on the subject site. In either case the proposed development will provide adequate open space and buffering as required by the Land Development Code (LDC). Commercial portions of the project will also meet the landscape design criteria established for commercial developments in the LDC.

GOAL 7: INDUSTRIAL LAND USES. To promote opportunities for well-planned industrial development at suitable locations within the county.

The proposed land use change is consistent with Goal 4 and Goal 7 and will maintain land development regulations protecting the public health, safety and welfare. The project site is an appropriate location for industrial development, compatible with surrounding uses, and in an area where adequate public services are provided. The change to Industrial Interchange will allow flexibility in site design and serve to effectively balance industrial development with service commercial uses appropriate for the area adjacent I-75.

Regardless of the uses the natural resources on the site will be protected in accordance with requirements of the Land Development Code.

OBJECTIVE 7.1: All development approvals for industrial land uses must be consistent with the following policies, the general standards under Goal 4, and other provisions of this plan. (Ordinance No. 94-30)

Approval of the change in land use will not have any significant impact on the surrounding roadway network. As discussed in the Traffic Circulation Analysis, changing to the Industrial Interchange Land Use does not represent an increase in intensity and is not expected to generate additional traffic creating new deficiencies. The project will require development order approvals prior to site development activities. Compliance with the land development code will ensure protection of the health, safety and welfare of the public. Site specific trip generation will be evaluated at the time of development order and any necessary improvements to the surrounding roadway network or required turn lanes will be addressed.

Quattrone & ssociates, Inc.

GOAL 37: LEVEL OF SERVICE (LOS) STANDARDS. Establish and maintain specified transportation LOS standards. (Ordinance No. 98-09, 99-15, 00-08, 17-13)

POLICY 37.1.3: Lee County will use the most current Highway Capacity Manual, FDOT Quality Level of Service Handbook, and other best practices to calculate LOS. (Ordinance No. 98-09, 99-15, 07-09, 17-13)

The proposed land use change will have no impact on the Level of Service of the Adjacent roads. As discussed in the attached traffic analysis, the change in land use is not expected to substantially increase, and will likely decrease the number of potential new trips generated by the development at buildout. Whether developed within the Industrial Development or the Industrial Interchange Land Use, a Level of Service Analysis will be completed at the time of local development order based on the specific development parameters and the development will comply with all transportation requirements of the LDC.

GOAL 54: CONSERVATION. To ensure that future populations have access to potable water supplies and services at a reasonable price by using and encouraging conservation and resource management measures to reduce consumption of potable water.

POLICY 54.1.2: In developing and implementing local landscape regulations including the preservation, reforestation, and wetlands restoration requirements, preference will be given to native species which are adapted to the region's climatic regime

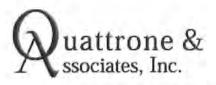

The development will be required to meet all requirements of the current code and will comply with all native vegetation preservation requirements in accordance with the Land Development Code requirements.

POLICY 54.1.6: Maintain development regulations that require new development to connect to a reuse water system if a system is near the development and has sufficient capacity. (Ordinance No. 91-19, 94-30, 00-22, 17-19)

There are no Reuse mains in the vicinity of this site.

POLICY 95.1.3: LOS standards will be the basis for planning and provision of required public facilities and services within Lee County. Regulatory LOS standards will be the basis for determining the adequacy of public facilities for the purposes of permitting new development. Compliance with non-regulatory LOS standards will not be a requirement for continued development permitting but will be used for facility planning purposes. The LOS will be the basis for facility design, for setting impact fees, and (where applicable) for the operation of the Concurrency Management System (CMS).

a. Sanitary Sewer - The site will provide Sanitary Sewer, meeting all the requirements in accordance with LDC requirements for development
b. Potable Water - The site will provide Potable Water, meeting all the requirements in accordance with LDC requirements for development

c. Surface Water/Drainage Basins – The property will include controlled discharge into the Billy's Creek system, meeting all requirements of South Florida Water Management District and Lee County at the time of development order.

d. Parks, Recreation, and Open Space – The industrial and Industrial Interchange FLUC do not allow for residential dwelling units so there is no provision needed for parks, recreation or open space.

e. Public Schools – The Industrial and Industrial Interchange FLUC do not allow for residential dwelling units so there is no provision needed for public schools.

POLICY 125.1.2: New development and additions to existing development must not degrade surface and ground water quality. (Ordinance No. 00-22, 18-28)

GOAL 141: IDENTIFICATION AND EVALUATION. To provide for the identification and evaluation of the historic resources of Lee County.

Reference exhibit M13 and site there are no resources listed on national register or any other recorded cultural or historic resources.

Although a portion of the site falls within the Archaeological Sensitivity Level 2, the proposed land use change will have no impact on the historic or archaeological resources of Lee County. The land use change to Industrial Interchange will not increase the allowable development intensity or potential development footprint. Historic or archaeological impacts will be avoided in either case and a certificate to dig has been requested from Lee County in accordance with LDC requirements for development.

Conclusion

The Future Land Use change from Industrial to Industrial Interchange is an appropriate request, compatible with the surrounding area and compliant with the Goals and Objectives of the Lee Plan. The change will allow flexibility in the uses for the subject site but will not provide for additional intensity, nor provide any new deficiencies or impact the public health, safety or welfare. The change to Industrial Interchange and will continue to protect the natural resources and environmental features of the property through compliance with the Land Development Code, and will efficiently utilize the existing public facilities and services in the area.

Luckett Landing Environmental Analysis Exhibit M12

The ± 16.56 ac site is primarily vacant disturbed land with an access roadway. The existing vegetation is upland pine flatwoods with a small area of cypress near the south east of the site bordering the right of way. The site is bordered by roadways and commercial and industrial development. There is no evidence of listed species utilizing the site for habitat. Refer to the attached Environmental Report with FLUCCS map and species survey prepared by Bear Paws Environmental Consulting for more details.

The change in land use from Industrial to Industrial Interchange will not have an effect on the environmental aspects of the site. In both cases, the development intensity will be similar, indigenous preserve areas will be provided in accordance with the Land Development code, wetland impacts will be avoided or mitigated in accordance with SFWMD and county requirements, and any listed species, if encountered will be addressed per local and state requirements.

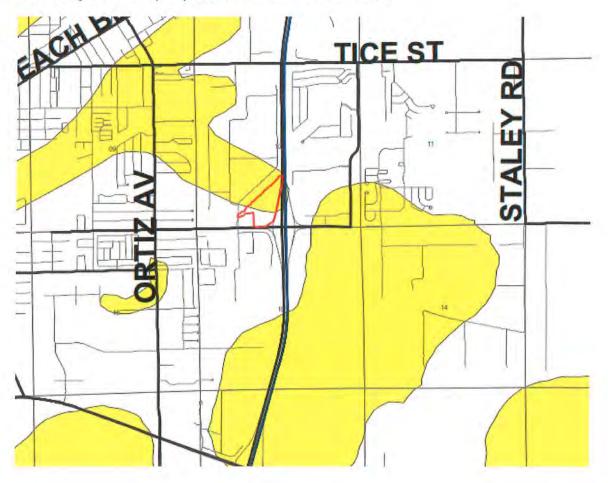

Luckett Landing Historical Resources Impact Analysis Exhibit M13

Florida Master Site File

Per the Florida Master Site File, there are not any previously recorded cultural or historic resources located within 150 feet of the subject property.

Archaeological Sensitivity Map

A portion of the subject property is identified as being archaeologically sensitive 2 on the Lee County Archaeological Sensitivity Map dated December 2014. See below.

1 %

Luckett Landing Existing and Future Public Facilities Impacts Analysis Exhibit M14 and Exhibit M16

Potable Water and Sanitary Sewer

The subject property is within Lee County Utilities (LCU)

The subject property is within the Lee County Utilities (LCU) potable water franchise area as depicted on Maps 6 and 7 of the Lee Plan. LCU owns and maintains existing potable water and wastewater lines along the adjacent streets. North Lee County Water Treatment Plant will provide potable water service to the proposed development while the City of Fort Myers' North Water Reclamation Facility will provide wastewater service.

Lee County utilities has sufficient capacity to provide water and sewer service at buildout for both the existing Industrial land use as well as the proposed Interchange land use to include hotel. As similar uses could be developed in both land use categories, the difference in the expected water and sewer demand would be only due to the addition of the hotel and is summarized below.

Per F.A.C. 64E-6, hotel: 100 gallons per day per hotel room + 750 gpd for self-service laundry per machine.

(111 hotel rooms x 100 = 11,100 gpd) and 3 machines (750 gpd x 3 machines= 2250 gpd) the proposed project can expect an average potable water and sanitary sewer demand of 13,350 GPD.

Water and sewer demand for the balance of the property would remain unchanged whether in the Industrial or Industrial Interchange land use.

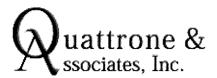

According to the 2020 Lee County Concurrency Report, LCU's interconnected water distribution system is permitted with a capacity of 50.9 million gallons per day (MGPO) and is projected to operate at 54.3 MGPO in 2024. Therefore, there is sufficient capacity within the existing water distribution system to serve the project at build-out.

According to the City of Fort Myers comprehensive plan, the City of Fort Myers's North Water Reclamation Facility is permitted with a capacity of 12.0 million gallons per day (MGPD) and is currently operating at approximately 6.9 MGPO. Therefore, there is sufficient capacity within the existing plant to serve the increase in demand to the City's system from the project at build-out.

Surface Water/Drainage Basins

The existing site is a vacant parcel without permitted stormwater management facilities. The site is generally flat and historic sheet flow is overland to the north and east through the Billy's creek Commerce master surface water management system into Billy's Creek watershed and eventually the Caloosahatchee River.

The subject site is currently in a FEMA Zone X, which does not have an established base flood elevation.

\$ 100

The change in land use from Industrial to Industrial Interchange will not allow increased intensity or change the developable area. In either case, the proposed development will include a surface water management system which will provide both stormwater attenuation and water quality treatment. The surface water management system will include controlled discharge into the Billy's Creek system, meeting all requirements of South Florida Water Management District and Lee County at the time of development order.

The change in land use will have no impacts on the design or function of the surface water management system, drainage basin, discharge rates, nutrient loadings, water quality or flood zone.

Parks, Recreation and Open Space

As the existing and requested uses on the subject parcel are commercial and industrial, the proposed Future Land Use Map Amendment will have no impact on Regional Parks, Recreation or Open Space.

Public Schools

The requested Future Lane Use Map Amendment provides for a change from Industrial & commercial uses to industrial and commercial uses with hotel. Commercial and Industrial uses do not generate impacts to the public school system.

LUCKETT LANDING

TRAFFIC CIRCULATION ANALYSIS FOR COMPREHENSIVE PLAN AMENDMENT EXHIBIT M15

October 1, 2021

Prepared By: Michelle Salberg P.E.

QAI Project # 191106

Luckett Landing STRAP#: 10-44-25-00-00011.0000 9455 Old Luckett Drive Fort Myers, FL 33905

The subject property is a 16.56 acre parcel located at the northeast corner of Luckett Road and Enterprise Parkway, north west of the Luckett Road I-75 exit ramp.

The property is currently within the **Industrial Development** Future Land Use category and zoned CG. The applicant proposes to amend the Future Land Use Map of the Lee Plan to redesignate the 16.56 acres to the **Industrial Interchange** Future Land Use Category. The property owner desires to amend the existing zoning from Commercial General (CG) to Commercial Highway (CH) for a 5.88 Ac portion of the property where a hotel and small outparcel are planned. The area to be rezoned will consist of the hotel (3.33 Ac +/-), outparcel (0.56 Ac +/-) and access road and drainage (1.99 Ac +/-).

The purpose of this analysis if to determine the potential traffic impacts of the land use change and will demonstrate that the proposed change will result in a similar or reduced number of trips.

EXISTING CONDITIONS

The Industrial Development future land use category allows retail, service and commercial uses as long as these uses do not exceed 20% of the total acreage within the Industrial Development future land use of the planning community. In this case, the entire 16.56 acre parcel could presently be developed with commercial retail uses, provided they are permitted within CG zoning. These uses include high trip generators such as restaurants, fast food, and retail.

Shopping Center, a high trip generator allowing a mixture of uses was considered as a conservative example for the existing condition analysis. The development buildout was estimated at approximately 10,000 sf per acre. The trip generation is summarized below.

ITE estimates that up to 30% of traffic to a shopping center of comparable size may be considered "pass by" in other words vehicles already traveling the adjacent roadways. The shopping center trips have been reduced by 30% in both scenarios.

| LUC 820 - | Shopping | Center | (16.56 | AC) |
|-----------|----------|--------|--------|-----|
|-----------|----------|--------|--------|-----|

165,000 sf approximate at buildout

| | Peak AM | | Peak PM | | Weekday | |
|--|---------|------|---------|------|---------|------|
| Land Use | Entry | Exit | Entry | Exit | Entry | Exit |
| 810 – Shopping Center (30% pass by reduction) | 102 | 62 | 265 | 286 | 2958 | 2958 |

PROPOSED DEVELOPMENT

The Industrial Interchange future land use allows light industrial, research and office uses, as well as visitor serving commercial uses such as hotels, retail and restaurants. With exception of the hotel, the property could be developed with a similar mix of uses in either the Industrial Development or the Industrial Interchange land use. The proposed hotel site will take up approximately 3.33 Acres. To compare the

effects of the land use change, trip generation for the hotel was considered, and the balance of the remaining land was assumed to be Shopping Center consistent with the existing condition analysis above.

LUC 310 – Hotel (3.33 Ac) LUC 820 – Shopping Center (13.23 AC)

III (Number of Rooms) I32,300 sf approximate at buildout

| | Peak | Peak AM | | Peak PM | | kday |
|--|-------|---------|-------|---------|-------|------|
| Land Use | Entry | Exit | Entry | Exit | Entry | Exit |
| 310 - Hotel | 30 | 21 | 29 | 28 | 413 | 413 |
| 810 – Shopping Center (30% pass by reduction) | 95 | 58 | 225 | 244 | 2545 | 2545 |
| Total | 125 | 79 | 254 | 272 | 2958 | 2958 |

For both scenarios, the trip generation was determined using OTISS software which references the Institute of Transportation Engineer's (ITE) report, titled *Trip Generation*, 10th Edition. Best fit equations were used for all time periods.

LONG AND SHORT RANGE IMPACTS

The Lee County Metropolitan Planning Organization's 2040 Long Range Plan and the County's Capital Improvement Plan was reviewed. The only future roadway improvement planned in the vicinity of the project is the widening from 2 to 4 lanes of Ortiz Blvd from Martin Luther King Blvd and Luckett Road from Ortiz to 1-75 which is currently in final design.

Based on the above trip generation analysis, the amendment will result in no substantial increase in expected trips and will therefore have no impacts on the MPOs long range transportation plan, the County's Short Term capital improvement program, or the projected level of service of any of the roadways within the project area.

CONCLUSION

From a traffic and intensity perspective the change in land use represents a lateral move, and will not allow for more intense development on the subject property. The expected trips at buildout when changing from the Industrial Development to the Industrial Interchange land use are not anticipated to increase substantially. With the proposed zoning change and development of a hotel on 3.33 acres of the property, the overall trips for the subject property at buildout are expected to decrease from what is currently allowable although there appears to be a minimal increase in the AM Peak hour trips with the addition of the hotel.

It is important to note that the above analysis represents just a conservative example of what could potentially be built. A variable mix of industrial and commercial uses could be developed in both land use categories. However, there are no additional uses allowable with the Industrial Interchange Land Use that would generate any substantial trip increases due to the land use change.

Additional traffic analysis will be done at the time of Development Order to determine the specific impacts to the surrounding roadway system and whether site specific turn lanes or improvements are warranted.

Re: Letter of Service Availability - Luckett Interchange

Ms. Stalnos,

I am in receipt of your letter requesting a Letter of Service Availability for the commercial development located at the northwest corner of Luckett Road and Interstate 75. This property is identified as STRAP 10-44-25-00-00011.0000.

Lee County Emergency Medical Services is the primary EMS transport agency responsible for coverage at the address you have provided. Because we currently serve this area and have a sufficient response data sample, we evaluated response times in this vicinity to simulate the anticipated demand and response.

The primary ambulance for this location is Medic 26, located 2.6 miles north; there are two additional EMS stations within 4 miles of the proposed location. These locations are projected to be able to meet existing service standards, as required in County Ordinance 08-16, and no additional impacts are anticipated at this time.

It is our opinion that the service availability for the proposed development of this property is adequate at this time. Should the plans change, especially the density, a new analysis of this impact would be required.

Singerely,

Benjamin Abes

Director, Public Safety

Carmine Marceno Sheriff

State of Florida County of Lee

"Proud to Serve"

September 17, 2021

Shelly Stalnos Quattrone & Associates 4301 Veronica Shoemaker Blvd. Fort Myers, FL 33916

Ms. Stalnos,

The Lee County Sheriff's Office has reviewed your request for a Small-Scale Comprehensive Plan Amendment for a 16.56-acre property located west of Interstate 75 and north of Luckett Road.

The proposed amendment to change the current Future Land Use of Parcel 10-44-25-00-00011.0000 from Industrial Development to Industrial Interchange would not affect the ability of the Lee County Sheriff's Office to provide core levels of service at this time.

Law enforcement services will be provided from our Central District offices in Fort Myers. At the time of application for a Development Order or building permit, we request that the applicant provide a Crime Prevention Through Environmental Design (CPTED) report done by the applicant and given to the Lee County Sheriff's Office for review and comment. Please contact Crime Prevention Specialist Beth Schell at (239) 477-1676 with any questions regarding the CPTED study.

Respectfully,

tin nelson

RE: Comprehensive Plan Amendment for Parcel 10-44-25-00-00011.0000

Request for Letter of Service Availability

Dear Ms. Stalnos:

The Lee County Solid Waste Department is capable of providing solid waste collection service for Parcel 10-44-25-00-00011.0000. Disposal of the solid waste generated from the offices, hotel, a multifamily units will be performed at the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill. Plans have been made, allowing for growth, to maintain long-term disposal capacity at these facilities.

Please ensure compliance with Solid Waste Ordinance No. 11-27 and LCLDC 10-261 for space requirements of garbage and recycling containers and accessibility of the collection vehicles. While there is no requirement in Ordinance No. 11-27 for bulk waste storage, please consider some additional space for the storage of bulk waste items that may not fit into a dumpster (mattress, appliance, furniture disposal etc.).

Garbage and recycling collections require the hotel owner/or the Management Company to secure a service agreement for the collection and an agreement for the lease of waste containers from the County's MSW and Recycling Collection Franchise Hauler.

Solid Waste Ordinance (11-27) establishes that the Property Owner(s) will be responsible for all future applicable solid waste assessments and fees. Sincerely,

Justin Lighthall

RE: Comprehensive Plan Amendment for Parcel 10-44-25-00-00011.0000 Request for Letter of Service Availability

Ms. Stalnos,

LeeTran has reviewed your request for service availability in regards to a proposed Comprehensive Plan Amendment. After reviewing the site and comparing the location with our existing and planned route locations according to the 2016 Transit Development Plan (TDP), the following has been determined:

- Subject area is not within one-quarter mile of a fixed-route corridor
- · Closest bus stop is not within one-quarter mile of a bus stop
- The 2016 TDP does not identify the need for enhanced or additional transit services in the area

Proposed future development does not currently meet applicability outlined in Sec. 10-442 and Sec. 10-443. Developer will not be required to connect to and improve transit facilities because planning action does not trigger relevant Lee County Land Development Code.

If transit services have been modified within one-quarter mile of the subject parcels at time of a DO or LDO type D submittal, necessary improvements will be determined at that time.

If you have any questions or require further information, please do not hesitate to contact me at (239) 533-0340 or jpuente@leegov.com.

Sincerely,

gorge & Fuente

Potable Water and Wastewater Availability RE: Luckett Landing Hotel, 5151 Luckett Road STRAP # 10-44-25-00-00011.0000

Dear Ms. Hoskins:

The subject property is located within Lee County Utilities Future Service Area as depicted on Maps 6 and 7 of the Lee County Comprehensive Land Use Plan. Potable water and sanitary sewer lines are in operation adjacent to the property mentioned above. However, in order to provide service to the subject parcels, developer funded system enhancements such as line extensions may be required.

Your firm has indicated that this project will consist of 1 commercial unit with an estimated flow demand of approximately 12,850 gallons per day. Lee County Utilities presently has sufficient capacity to provide potable water and sanitary sewer service as estimated above.

Availability of potable water and sanitary sewer service is contingent upon final acceptance of the infrastructure to be constructed by the developer. Upon completion and final acceptance of this project, potable water service will be provided through our North Lee County Water Treatment Plant.

Sanitary sewer service will be provided by the City of Fort Myers North Water Reclamation Facility. The Lee County Utilities' Design Manual requires the project engineer to perform hydraulic computations to determine what impact this project will have on our existing system.

There are no reuse mains in the vicinity of this parcel.

Prior to beginning design work on this project, please meet with LCU Staff to determine the best point of connection and discuss requirements for construction.

This letter should not be construed as a commitment to serve, but only as to the availability of service. Lee County Utilities will commit to serve only upon receipt of all appropriate connection fees, a signed request for service and/or an executed service agreement, and the

Luckett Landing Hotel - Letter.Docx November 17, 2020 Page 2

approval of all State and local regulatory agencies.

Further, this letter of availability of potable water and sanitary sewer service is to be utilized for Development Review and SFWMD only. Individual letters of availability will be required for the purpose of obtaining building permits.

Sincerely,

LEE COUNTY UTILITIES

Nany Millouns

RE: Comprehensive Plan Amendment for Parcel 10-44-25-00-00011.0000 Request for Letter of Service Availability

To whom it may concern,

The above referenced project is within the boundaries of the Tice Fire Protection and Rescue Service District. The District is the primary response agency for this location for all medical, fire, hazardous material and confine space emergencies. I look forward to working with you as this project proceeds. If you have any questions or need any further information, please let me know.

Respectfully,

Ted Ross

Luckett Landing State and Regional Policy Plan Exhibit M18

State Comprehensive Plan

Although the Community Planning Act of 2011 eliminated the requirement for consistency of the local comprehensive plan with the state comprehensive plan, the following analysis is included for further justification of the request. The plan amendment is consistent and furthers the adopted State Comprehensive Plan. Relevant portions are discussed below.

187.201(6) PUBLIC SAFETY. ---

(a) Goal. —Florida shall protect the public by preventing, discouraging, and punishing criminal behavior, lowering the highway death rate, and protecting lives and property from natural and manmade disasters.

(b) Policies:

9. Increase crime prevention efforts to enhance the protection of individual personal safety and property.

<u>CONSISTENCY</u>: The Lee County Sheriff's has provided a letter of service availability for this site.

22. Require local governments, in cooperation with regional and state agencies, to prepare advance plans for the safe evacuation of coastal residents.

23. Require local governments, in cooperation with regional and state agencies, to adopt plans and policies to protect public and private property and human lives from the effects of natural disasters.

<u>CONSISTENCY</u>: The map amendment from Industrial Development to Industrial Interchange will allow, in addition to industrial development, development of hotels on the site, providing evacuation options for local residents, in an area that is outside the Coastal High Hazard Zone.

187.201(7) WATER RESOURCES. ----

(a) Goal. —Florida shall assure the availability of an adequate supply of water for all competing uses deemed reasonable and beneficial and shall maintain the functions of natural systems and the overall present level of surface and ground water quality. Florida shall improve and restore the quality of waters not presently meeting water quality standards.

(b) Policies:

5. Ensure that new development is compatible with existing local and regional water supplies.

<u>CONSISTENCY</u>: The site is within Lee County Utilities service area and presently has sufficient capacity to provide potable and sanitary sewer service according to the letter of service availability. The sites potable water will be provided through North Lee County Water Treatment Plant and the Sanitary sewer service will be provided by the City of Fort Myers North Water Reclamation Facility.

10. Protect surface and groundwater quality and quantity in the state.

<u>CONSISTENCY</u>: The change from Industrial Development to Industrial Interchange will have no impact on the surface water or groundwater quality or quantity. In either case the site development will be required to adhere to all water treatment and storm water management policies in the LDC which are consistent with State policies.

187.201(9) NATURAL SYSTEMS AND RECREATIONAL LANDS. ---

(a) Goal. —Florida shall protect and acquire unique natural habitats and ecological systems, such as wetlands, tropical hardwood hammocks, palm hammocks, and virgin longleaf pine forests, and restore degraded natural systems to a functional condition.

(b) Policies:

en i

1. Conserve forests, wetlands, fish, marine life, and wildlife to maintain their environmental, economic, aesthetic, and recreational values.

3. Prohibit the destruction of endangered species and protect their habitats.

4. Establish an integrated regulatory program to assure the survival of endangered and threatened species within the state.

<u>CONSISTENCY</u>: The Project site has been disturbed and partially developed. The indigenous preserve areas will be provided in accordance with the Land Development code, wetland impacts will be avoided or mitigated in accordance with SFWMD and county requirements.

There were no endangered species found on site according to Bear Paws Environmental PSS.

187.201(12) HAZARDOUS AND NONHAZARDOUS MATERIALS AND WASTE. — (a) Goal. —All solid waste, including hazardous waste, wastewater, and all hazardous materials, shall be properly managed, and the use of landfills shall be eventually eliminated.

(b) Policies:

2. By 1994, provide in all counties a countywide solid waste collection system to discourage littering and the illegal dumping of solid waste.

<u>CONSISTENCY</u>: The site is serviced by the Lee County Solid Waste Department with adequate capacity.

(15) LAND USE. ---

(a) Goal. —In recognition of the importance of preserving the natural resources and enhancing the quality of life of the state, development shall be directed to those areas which have in place, or have agreements to provide, the land and water resources, fiscal abilities, and service capacity to accommodate growth in an environmentally acceptable manner.

(b) Policies:

Quattrone & ssociates, Inc.

1. Promote state programs, investments, and development and redevelopment activities which encourage efficient development and occur in areas which will have the capacity to service new population and commerce.

2. Develop a system of incentives and disincentives which encourages a separation of urban and rural land uses while protecting water supplies, resource development, and fish and wildlife habitats.

<u>CONSISTENCY</u>: The change from Industrial Development to Industrial Interchange will provide flexibility in the allowable uses to adapt to the development patterns in the project area and provide needed commercial uses along the I-75 corridor. In either case the project development will be required to protect the water supply and environmental resources on the site.

(17) PUBLIC FACILITIES. ---

(a) Goal. —Florida shall protect the substantial investments in public facilities that already exist and shall plan for and finance new facilities to serve residents in a timely, orderly, and efficient manner.

(b) Policies:

1. Provide incentives for developing land in a way that maximizes the uses of existing public facilities.

2. Promote rehabilitation and reuse of existing facilities, structures, and buildings as an alternative to new construction.

3. Allocate the costs of new public facilities on the basis of the benefits received by existing and future residents.

<u>CONSISTENCY</u>: As indicated throughout this application, adequate public facilities already exist in the project area. The property is partially developed. The future land use change will provide flexibility in the allowable uses to encourage completion of development of the site, where public facilities already exist.

Luckett Landing Justification of Proposed Amendment Exhibit M19

The applicant is requesting an amendment to Lee Plan Map I, Page I Future Land Use map to add a ± 16.56 -acre site into the Industrial Interchange Future Land Use. The subject property is located at the northeast corner of Luckett Road and Enterprise Parkway, northwest of the Luckett Road and I-75 exit ramp. The property presently is vacant. The property currently is within the Industrial Development Future Use Category and zoned CG.

The applicant proposes to amend the future Land Use Map of the Lee Plan to redesignate approximately ± 16.56 acres from the Industrial Development Future Land Use Category to the Industrial Interchange Future Land Use Category. The property owner desires to amend the existing zoning from Commercial General (CG) to Commercial Highway (CH) for a portion of the property to develop a hotel.

The Industrial Interchange Future Land Use category will allow for the conventional rezoning to Commercial Highway (CH). The companion conventional rezoning will demonstrate compliance with the density standards for the Industrial Interchange Future Land Use Category. The balance of the site would be utilized for a variety of industrial, commercial and hotel uses consistent with the uses permitted in the Industrial Interchange Future Land Use Category.

Development of commercial and industrial uses on the subject property represents one of the desirable and economically viable land uses in this location due to the proximity to 1-75 and Luckett Rd. This Industrial Interchange land use pattern is consistent with sites opposite I-75 that already carry the Industrial Interchange Future Land Use category. Exhibit M5 identifies the various existing and planned land uses that abut the site.

The applicant intends on developing the property with a mixture of commercial and industrial uses and the proposed Map Amendment is being filed concurrently with an application to rezone the subject property to CH to allow those uses.

The Lee Plan encourages development along Interstate Highway Interchange areas adjacent to Interstate 75 to maximize critical access points. Documentation has been provided in the Lee Plan Analysis that the proposed request is consistent with these Policies as a result of the subject property:

- Being located along an Interstate 75;
- · Having adequate infrastructure and urban services available; and
- Being consistent with Policies specifically pertaining to the Industrial Interchange including:

"The Industrial Interchange areas allow combinations of light industry, research, and office uses. In addition, certain visitor-serving commercial uses such as restaurants and hotels are appropriate."

j Č.

In conclusion, the subject property meets all the locational criteria for Industrial Interchange and commercial highway zoning and the proposed Map Amendment is consistent with all Goals, Policies, and Objectives of the Lee Plan.

LUCKETT LANDING HOTEL

ENVIRONMENTAL ASSESSMENT & SPECIES SURVEY REPORT

August 2021

Prepared For:

Quattrone & Associates c/o: Michelle Salberg 4301 Veronica Shoemaker Boulevard Fort Myers, FL 33916 Phone: 239-936-5222 Email: michelle@qainc.net

Prepared By:

BearPaws Environmental Consulting 1599 Covington Circle East Phone: (239) 340-0678 Email: BearPaws.Env.Consulting@GMail.com

Introduction

,

An environmental assessment and species survey was conducted on the Luckett Landing Hotel property August 11, 2021. The $16.45\pm$ acre site is located in Section 10, Township 44S, and Range 25E, of Lee County, Florida. More specifically, the site is located immediately west of I-75 and north of Luckett Road, in Fort Myers, Florida. Please see the attached Project Location Map (Exhibit A).

The purpose of this assessment was to identify the potential for either U.S. Army Corps of Engineers (ACOE) Department of Environmental Protection (DEP), and/or South Florida Water Management District (SFWMD) jurisdictional wetlands. The site was also assessed to determine the potential of listed (endangered, threatened, etc.) species inhabiting the site that are regulated by the U.S. Fish & Wildlife Service (FWS) and the Florida Fish & Wildlife Conservation Commission (FWC).

The species survey was also provided to inspect the property for any and all potential listed species that could inhabit the site. The most recent surveys conducted on-site have been provided specifically in the areas where the proposed soils borings are to be taking place. Updated surveys covering the entire property, including preserve areas, will be provided prior to any on-site development.

Listed (endangered, threatened, etc.) species are regulated by the US Fish & Wildlife Service (FWS) and/or the Florida Fish & Wildlife Conservation Commission (FWC). Specific attention was paid toward that of locating any gopher tortoise (*Gopherus polyphemus*), as well as locating any potential fox squirrel (*Sciurus niger*) nests, Florida bonneted bat (*Eumops floridanus*) cavity trees, and any Audubon's crested caracara (*Caracara plancus audubonii*) or bald eagle (*Haliaeetus leucocephalus*) nests.

The project's surrounding land uses are a mixture of residential homes, commercial and industrial developments, undeveloped vacant land, and forested land. The survey was conducted mid-morning; the temperatures were in the low-mid 80's, with light breezes, and partly cloudy skies.

Background

The ACOE, DEP, and the SFWMD are the agencies that regulate development activities in wetlands. To be considered wetlands by the ACOE, DEP, and/or SFWMD, the area should exhibit wetland hydrology, contain wetland vegetation, and have hydric soils. For an area to be considered wetlands, a site should have hydric soils, wetland hydrology, and wetland vegetation present. The property was reviewed for indicators of these parameters.

Hydric soils are identified by certain characteristics that are unique to wetland soils. Wetland hydrology is normally present if the soil is saturated or inundated for a period of time; typically from May through November; the rainy season in Southwest Florida. In the absence of visual signs of saturation or inundation, the regulatory agencies typically use hydrologic indicators such as adventitious rooting, lichen lines, or algal matting as method of guidance. If the majority of the shrubs/plants that are present are those that are adapted to saturated soil conditions, it's likely wetland vegetation.

The FWS and FWC are the primary agencies that review potential impacts to listed species. The FWS reviews potential impacts and provides comments to the ACOE and DEP during the permitting process, while the FWC provides comments to the SFWMD. In general, the wildlife agency concerns need to be addressed in order for the permits to be authorized by the ACOE, DEP, and/or the SFWMD.

Methodology

,

The species survey was conducted utilizing combined methodologies from Lee County's Land Development Code (LDC, Chapter 10, Article III, Division 8 - Protection of Habitat) and also encompassed the Lee County Endangered Species Ordinance No. 89-34. Surveys for Lee County protected species are based on the presence of specific vegetation associations and habitat types noted on-site, as outlined in the LDC. The frequency of transects performed in these habitats, unless otherwise discussed, were designed to meet the minimum updated coverage requirement. Following the Lee County Endangered Species Ordinance No. 89-34, the specific methodology included pedestrian surveys of parallel transects. The survey was conducted according to the previously approved Lee County methodology, submitted by Kevin L. Erwin Consulting Ecologist, Inc.

These methods are comprised of a several step process. The vegetation communities or land-uses on the study area are delineated on an aerial photograph using the Florida Land Use, Cover and Forms Classification System (FLUCFCS). Next, these FLUCFCS codes are cross-referenced with the Lee County Protected Species List. With a list of the potential listed plants and animals, each FLUCFCS community is searched in the field for these species. An intensive pedestrian survey is conducted using parallel belt transects as a means of searching for protected plants and animals; signs or sightings of these species are then recorded.

Existing Site Conditions

Boundary – The project boundary was obtained from the Lee County parcel data and is assumed to be approximately $16.45\pm$ acres.

Soils - The soils on the property have been mapped by the National Resource Conservation Service (NRCS, formerly the Soil Conservation Service). These mappings are general in nature but can provide a certain level of information about the site as to the possible extent of wetland area. The agencies commonly use these mappings as justification for certain wetland/upland determinations. According to these mappings, the parcel is underlain by Myakka Fine Sand (NRCS #11; non-hydric), Boca Fine Sand (NRCS #13; hydric), Pineda Fine Sand (NRCS #26; hydric), and Malabar Fine Sand (NRCS #34; hydric), soils. Myakka Fine Sand soil is considered non-hydric at both the local and national levels. Please see the attached NRCS Soils Map (Exhibit D).

Vegetation Descriptions – Vegetation is one parameter used in determining the presence of uplands or wetlands; these community mappings will generally reflect what a specific area could be considered by the regulatory agencies. We identified approximately $0.66\pm$ acres of wetlands and $0.13\pm$ acres of "other surface water" communities on-site during the initial site assessment.

While on-site, generalized community delineations are hand-drawn on an aerial defining the different vegetation associations on-site. These general delineations were based on the nomenclature of the Florida Land Use, Cover and Forms Classification System (FLUCFCS), Level III and IV (FDOT 1999). Please see the attached FLUCFCS Map with Aerial (Exhibit B) and FLUCFCS Map without Aerial (Exhibit C). Listed below are the vegetation communities and land-uses identified on the site.

FLUCFCS Codes & Community Descriptions

Uplands

The following community areas have been designated as upland habitats. Uplands are any area that does not qualify as a wetland because the associated hydrologic regime is not sufficiently wet enough to elicit development of vegetation, soils, and/or hydrologic characteristics associated with wetlands.

FLUCFCS 310 Herbaceous – 8.17± Acres

This easement area bisects the property and accounts for $8.17\pm$ acres of the property. This community should be considered uplands by regulatory agencies. The canopy is mostly open with widely scattered slash pine (*Pinus elliottii*) and live oak (*Quercus virginiana*). The sub-canopy is also mostly open with widely scattered Brazilian pepper (*Schinus terebinthifolius*) and cabbage palm (*Sabal palmetto*). The groundcover is dominated by bahia grass (*Paspalum notatum*), with dog fennel (*Eupatorium capillifolium*), false buttonweed (*Spermacoce floridan*), cogon grass (*Imperata cylindrica*), ragweed (*Ambrosia trifida*), caesar weed (*Urena lobata*), hairy beggar-ticks (*Bidens alba*), smutgrass (*Sporobolus sp.*), wedelia (*Sphagneticola trilobata*), sandspur (*Cenchrus echinatus*), broomsedge (*Andropogon virginicus*), flattop goldenrod (*Euthamia caroliniana*), and other various opportunistic weedy species. Commonly observed vines include greenbriar (*Smilax sp.*), poison ivy (*Toxicodendron radicans*), and grapevine (*Vitis rotundifolia*). This community should be considered uplands by regulatory agencies.

FLUCFCS 420 Mixed Upland Forest – 6.93± Acres

This upland community type occupies approximately $6.93\pm$ acres of the property. The canopy is dominated by slash pine (*Pinus elliottii*), with live oak (*Quercus virginiana*), melaleuca (*Melaleuca quinquenervia*), earleaf acacia (*Acacia auriculiformis*), and mimosa (*Albizia julibrissin*). The sub-canopy contains cabbage palm (*Sabal palmetto*), Brazilian pepper (*Schinus terebinthifolius*), wax myrtle (*Myrica cerifera*), myrsine (*Rapanea guinensis*), cocoplum (*Chrysobalanus icaco*), and beauty-berry (*Callicarpa americana*). The groundcover contained Spanish needle (*Bidens alba*), false buttonweed (*Spermacoce floridan*), cogon grass (*Imperata cylindrica*), caesar weed (*Urena lobata*), dog fennel (*Eupatorium capillifolium*), ragweed (*Ambrosia artemisiifolia*), sandspur (*Cenchrus echinatus*), broomsedge (*Andropogon virginicus*), and bahia grass (*Paspalum notatum*), with various other opportunistic weedy species. Commonly observed vines include air potato (*Dioscorea bulbifera*), greenbriar (*Smilax sp.*), grapevine (*Vitis rotundifolia*), Virginia creeper (*Parthenocissus quinquefolia*), peppervine (*Ampelopsis arborea*), and poison ivy (*Toxicodendron radicans*). This community would be considered uplands by the regulatory agencies.

FLUCFCS 743 Spoil Areas – 0.21± Acres

This upland habitat type occupies 0.21± acres of the property and surround the borrow lake on-site. The canopy and sub-canopy is open. The ground cover includes broomsedge (*Andropogon virginicus*), Spanish needle (*Bidens pilosa*), dog fennel (*Eupatorium capillifolium*), ragweed (*Ambrosia trifida*), caesar weed (*Urena lobata*), cogon grass (*Imperata cylindrica*), hairy beggar-ticks (*Bidens alba*), bahia grass (*Paspalum notatum*), St. Augustine grass (*Stenotaphrum secundatum*), and other various opportunistic weedy species. Commonly observed vines include air potato (*Dioscorea bulbifera*), greenbriar (*Smilax sp.*), grapevine (*Vitis rotundifolia*), Virginia creeper (*Parthenocissus quinquefolia*), and peppervine (*Ampelopsis arborea*). This community would be considered uplands by regulatory agencies.

FLUCFCS 814 Roadways – 0.35± Acres

This paved roadway occupies $0.35\pm$ acres of the property which includes the main access road, which was developed at part of the previously permitted adjacent site design. This community would be considered uplands by the regulatory agencies.

Wetlands

The following community areas have been designated as wetland habitats. Wetlands are any areas that under normal circumstances have hydrophytic vegetation, hydric soils, and wetland hydrology.

FLUCFCS 624 Cypress, Slash Pine, Laurel Oak Wetlands – 0.66± Acres

This wetland community type occupies approximately $0.66\pm$ acres of the property. The canopy contains bald cypress (*Taxodium distichum*), slash pine (*Pinus elliottii*), melaleuca (*Melaleuca quinquenervia*), with scattered laurel oak (*Quercus laurifolia*). The sub-canopy contains cabbage palm (*Sabal palmetto*), Brazilian pepper (*Schinus terebinthifolius*), myrsine (*Rapanea punctata*), and wax myrtle (*Myrica cerifera*). The ground cover vegetation includes swamp fern (*Blechnum serrulatum*), rosy camphorweed (*Pluchea rosea*), black needlerush (*Juncus roemerianus*), beakrush (*Cyperus sp.*), yellow-eyed grass (*Xyris floridana*), and sawgrass (*Cladium jamaicense*), flatsedge (*Cyperus ligularis*). Commonly observed vines include Japanese climbing fern (*Lygodium japonicum*), and greenbriar (*Smilax spp.*). This community does contain some transitional wetland vegetation, advantageous rooting, water line staining, and algal matting, as well as other signs in this community that would be classified as wetlands. This community would be considered wetlands by the regulatory agencies.

Other Surface Waters (OSW)

The following community area has been designated as other surface waters. Surface waters are waters on the surface of the earth, contained in bounds created naturally or artificially.

FLUCFCS 742 Borrow Lake – 0.13± ac.

This excavated OSW habitat type occupies approximately $0.13\pm$ acres of the property. The canopy is open. The sub-canopy is mostly open with widely Carolina willow (*Salix caroliniana*), wax myrtle (*Myrica cerifera*), and saltbush (*Baccharis halimifolia*) along the edges. The ground cover contains cat-tail (*Typha latifolia*), maidencane (*Panicum hemitomon*), water hyacinth (*Eichhornia crassipes*), torpedo grass (*Panicum repens*), and spikerush (*Eleocharis spp.*). This community was artificially created and would be considered other surface waters by the regulatory agencies.

| FLUCFCS Code | Community Description | Habitat Type | Acres |
|-----------------|------------------------|--------------|---------------|
| 310 | Herbaceous | Upland | 8.17± Ac. |
| 420 | Mixed Upland Hardwoods | Upland | 6.93± Ac. |
| 624 | Cypress – Pine – Oak | Wetland | 0.66± Ac. |
| 742 | Borrow Lake | OSW | 0.13± Ac. |
| 743 | Spoil Areas | Upland | $0.21\pm$ Ac. |
| 814 | Roadway | Upland | 0.35± Ac. |
| | Total | | 16.45± Ac. |

Table 1. FLUCFCS Community Table

Protected Species Results

A protected species survey was conducted on the property to identify any potential listed species that could inhabit the site. During this field survey for protected species, there were no nest-like structures or tree cavities were noted. There were no burrowing owl (*Athene cunicularia floridana*), and/or gopher tortoise (*Gopherus polyphemus*) burrows identified on-site. There several other burrows, believed to belong to that of the eastern nine-banded armadillo (*Dasypus novemcinctus*), that were identified, but not flagged in the field; there was no evidence that these burrows were being used by gopher tortoises.

There were several non-listed species identified while conducting the protected species survey, among those were mourning doves (*Zenaida macroura*) and an eastern cottontail rabbit (*Sylvilagus floridanus*). The various listed

species that may occur in the FLUCFCS communities on-site have been tabulated on the attached table. Please see the Protected Species Survey Map, attached as Exhibit E.

Mitigation Discussion

Generally, the ACOE and/or DEP does not regulate isolated wetlands or excavation in wetlands where there is only incidental fall back of fill material; the ACOE or DEP do not have jurisdiction over isolated wetlands. In making the determination on whether the wetlands are isolated, the ACOE and DEP considers if water leaves the site, (i.e. ditches) or whether the wetlands are completely contained on-site or extend off-site. If the wetlands extend off-site, they will more than likely assert jurisdiction. Currently, the ACOE and DEP position on most all wetlands is that one of them has jurisdiction; the ACOE regulates navigable waters whereas the DEP regulates both navigable waters and adjacent wetlands. However, the agencies would not make this determination until a Joint Environmental Resource Permit (ERP) and Dredge & Fill Permit (D&F) application is received.

The SFWMD does not require mitigation for impacts to isolated wetlands not used by listed (protected) species that are less than $0.50\pm$ acres in size. Impacts to wetlands greater than $0.50\pm$ acres or those utilized by protected species would require mitigation. With the ACOE and DEP, impacts to wetlands that are less than $0.50\pm$ acres, the activity can usually be processed as a Nationwide Permit application. For projects with greater than $0.50\pm$ acres of impacts, the application will be processed as an Individual Permit application. This involves a public notice process and coordination with other federal agencies such as the EPA and the FWS.

There are three steps that are required to be addressed when requesting an ERP permit with the SFWMD and/or the DEP for impacts to regulated wetlands:

- 1) Avoidance (i.e. can these wetland impacts be completely avoided)
- 2) Minimization (i.e. can the amount of wetland impact be reduced while maintaining a feasible project)
- 3) Mitigation (i.e. the loss of wetland function must be replaced)

It should be noted that avoidance and minimization must first be substantiated, before mitigation will be considered by the agencies. When wetlands are proposed to be impacted, the impacts cannot result in any loss of wetland function. In order to prevent net loss in wetland function, wetland mitigation must be provided. Mitigation is a way to off-set impacts to natural resources such as wetlands and may consist of wetland enhancement, wetland creation, wetland preservation, upland compensation, or off-site mitigation. Mitigation costs usually increase with the quantity of proposed impacts. The actual amount of mitigation required would be finalized during the Environmental Resource Permit review process with the SFWMD, ACOE, and DEP.

There are two main categories of wetland mitigation, onsite or off-site. On-site mitigation would include preserving a portion of the on-site wetlands, treating and removing the exotics, potentially providing supplemental plantings, and placing the preserve areas under a Conservation Easement. Preserve areas are required to be maintained in perpetuity. Off-site mitigation requires the purchase of wetland credits at an approved mitigation bank within the service area of the site. This parcel lies within the service area of several mitigation banks; currently, credits at these banks are going for \$130,000 to \$150,000 depending on whether they are herbaceous or forested credits.

Summary

8

,

In general, this site does not contain much native, undisturbed community types in which protected species would typically inhabit. Due to the disturbed nature of the site, the surrounding land uses, and busy roadways, it is unlikely that this site supports or would provide habitat for protected species.

Wetland locations were drawn using non-rectified aerial images with approximate property boundaries; hence their location, aerial extent, and acreage is approximate. Before any detailed site planning, it is recommended that the wetland lines are flagged, surveyed by professional land surveyor, and approved by the regulatory agencies.

The information contained and the work performed as part of this initial assessment, conforms to the standards and generally accepted practices in the environmental field, and was prepared substantially in accordance with thencurrent technical guidelines and criteria. The determination of ecological system classifications, functions, values, and boundaries, is an inexact science, and different individuals and agencies may reach different conclusions; therefore, the conclusions of this report are preliminary in nature and would require a full review by the appropriate regulatory agencies.
