NOTICE OF PROPOSED AMENDMENT TO THE LEE COUNTY COMPREHENSIVE LAND USE PLAN (ADOPTION HEARING)

The Lee County Board of County Commissioners will hold a public hearing to consider the adoption of a proposed amendment to the Lee County Comprehensive Land Use Plan (Lee Plan) on Wednesday, January 18, 2023. The hearing will commence at 9:30 a.m., or as soon thereafter as can be heard, in the Board Chambers, 2120 Main Street in Downtown Fort Myers.

The Board proposes to adopt an ordinance amending the Lee Plan as follows:

CPA2021-00012 and CPA2022-00008 Alico Crossroads Map and Text Amendments: Amend the Future Land Use Map designation on ±46.7 acres from Industrial Commercial Interchange to General Interchange and amend Table 1(b) 2045 population Allocation to accommodate residential development on the subject property, located on the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road, and is immediately west of I-75.

Copies of this Notice and the proposed ordinance are available for inspection or copying during regular business hours at the Minutes Office of the Clerk of Courts of Lee County, located in the Courthouse Administration Building, 2115 Second Street, Fort Myers, Florida. This meeting is open to the public. Interested parties may appear at the meeting and be heard with respect to the proposed plan amendment. A verbatim record of the proceeding will be necessary to appeal a decision made at this hearing.

It is the intent of the Board of County Commissioners that the provisions of this Ordinance may be modified as a result of consideration that may arise during Public Hearing(s). Such modifications shall be incorporated into the final version.

Lee County will not discriminate against individuals on the basis of race, color, national origin, sex, age, disability, religion, income or family status. To request language interpretation, document translation or an ADA-qualified reasonable modification at no charge to the requestor, contact Joan LaGuardia, (239) 839-6038, Florida Relay Service 711, at least five business days in advance. El Condado de Lee brindará servicios de traducción sin cargo a personas con el idioma limitado del inglés.

Alico Crossroads

SUMMARY SHEET CPA2021-00012/CPA2022-00008 - ALICO CROSSROADS ADOPTION HEARING

REQUEST:

- Amend the Future Land Use Map designation on ±46.7 acres from Industrial Commercial Interchange to General Interchange.
- Amend Table 1(b) 2045 population allocation to accommodate residential development on the subject property.
- The requested map amendment qualifies as a small scale comprehensive plan amendment per Florida Statute 163.3187(1).

The requested amendments will allow a mix of residential, commercial (both retail and office) and hotel uses on the subject property. The existing and proposed future land use categories are similar except that the current designation does not allow residential.

LPA PUBLIC HEARING:

The LPA discussed the proposed amendments and various merits of the case, including bonus density, traffic, access, and surrounding uses.

LPA PUBLIC INPUT:

There was no public comment concerning the proposed amendment at the LPA Hearing.

LPA MOTION:

A motion was made to recommend that the Board of County Commissioners <u>adopt</u> CPA2021-00012 and CPA2022-00008. The motion passed 4 to 0.

STAFF RECOMMENDATION:

Staff recommends that the BoCC adopt the proposed amendment as provided in Attachment 1.

LEE COUNTY ORDINANCE NO. ____

AN ORDINANCE AMENDING THE LEE COUNTY COMPREHENSIVE PLAN TO ADOPT A SMALL SCALE AMENDMENT (CPA2021-00012 AND CPA2022-00008) PERTAINING TO ALICO CROSSROADS; PROVIDING FOR PURPOSE, INTENT AND SHORT TITLE; ADOPTION OF SMALL SCALE AMENDMENT TO LEE PLAN TEXT AND FUTURE LAND USE MAP; LEGAL EFFECT OF THE "LEE PLAN"; PERTAINING TO MODIFICATIONS THAT MAY ARISE FROM CONSIDERATION AT PUBLIC HEARING; GEOGRAPHICAL APPLICABILITY; SEVERABILITY; INCLUSION IN CODE, CODIFICATION AND SCRIVENER'S ERRORS, AND AN EFFECTIVE DATE.

WHEREAS, the Lee County Comprehensive Plan ("Lee Plan") and Chapter XIII, provides for adoption of amendments to the Plan in compliance with State statutes and in accordance with administrative procedures adopted by the Board of County Commissioners ("Board"); and

WHEREAS, the Board, in accordance with Section 163.3181, Florida Statutes, and Lee County Administrative Code AC-13-6, provide an opportunity for private individuals to request amendment to the Future Land Use Map through a small scale amendment public hearing process; and

WHEREAS, the Local Planning Agency ("LPA") held a public hearing on the adoption of the proposed amendment on December 12, 2022. At that hearing the LPA found the proposed amendment to be consistent with the Lee Plan and recommended that the Board adopt the amendment; and

WHEREAS, the Board held a public hearing for the adoption of the proposed amendment on January 18, 2023. At that hearing, the Board approved a motion to adopt proposed amendments CPA2021-00012 and CPA2022-00008 pertaining to Alico Crossroads, amending the Future Land Use Map and Table 1(b) of the Lee Plan. The subject parcel is located at the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road, and is immediately west of I-75.

NOW, THEREFORE, BE IT ORDAINED BY THE BOARD OF COUNTY COMMISSIONERS OF LEE COUNTY, FLORIDA, THAT:

SECTION ONE: PURPOSE, INTENT AND SHORT TITLE

The Board of County Commissioners of Lee County, Florida, in compliance with Chapter 163, Part II, Florida Statutes, and with Lee County Administrative Code AC-13-6,

conducted a public hearing to review a proposed small scale amendment to the Future Land Use Map Series of the Lee Plan. The purpose of this ordinance is to adopt the amendment to the Lee Plan discussed at that meeting and later approved by a majority of the Board of County Commissioners. The short title and proper reference for the Lee County Comprehensive Land Use Plan, as hereby amended, will continue to be the "Lee Plan." This amending ordinance may be referred to as the "Alico Crossroads (CPA2021-00012 and CPA2022-00008)".

SECTION TWO: ADOPTION OF SMALL SCALE AMENDMENT TO LEE PLAN FUTURE LAND USE MAP AND TABLE 1(b)

The Lee County Board of County Commissioners hereby amends the existing Lee Plan, adopted by Ordinance Number 89-02, as amended, by adopting an amendment to the Future Land Use Map designation on ±46.7 acres from Industrial Commercial Interchange to General Interchange and amend Table 1(b) 2045 Population Allocation to accommodate residential development on the subject property, The subject parcel is located at the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road, and is immediately west of I-75. The corresponding staff report and analysis, along with all attachments for this amendment, are adopted as "support documentation" for the Lee Plan.

SECTION THREE: LEGAL EFFECT OF THE "LEE PLAN"

No public or private development will be permitted except in conformity with the Lee Plan. All land development regulations and land development orders must be consistent with the Lee Plan as amended.

SECTION FOUR: MODIFICATION

It is the intent of the Board of County Commissioners that the provisions of this Ordinance may be modified as a result of consideration that may arise during Public Hearing(s). Such modifications shall be incorporated into the final version.

SECTION FIVE: GEOGRAPHIC APPLICABILITY

The Lee Plan is applicable throughout the unincorporated area of Lee County, Florida, except in those unincorporated areas included in joint or interlocal agreements with other local governments that specifically provide otherwise.

SECTION SIX: SEVERABILITY

The provisions of this ordinance are severable and it is the intention of the Board of County Commissioners of Lee County, Florida, to confer the whole or any part of the powers herein provided. If any of the provisions of this ordinance are held unconstitutional by a court of competent jurisdiction, the decision of that court will not affect or impair the remaining provisions of this ordinance. It is hereby declared to be the

legislative intent of the Board of County Commissioners that this ordinance would have been adopted had the unconstitutional provisions not been included therein.

SECTION SEVEN: INCLUSION IN CODE, CODIFICATION AND SCRIVENERS' ERROR

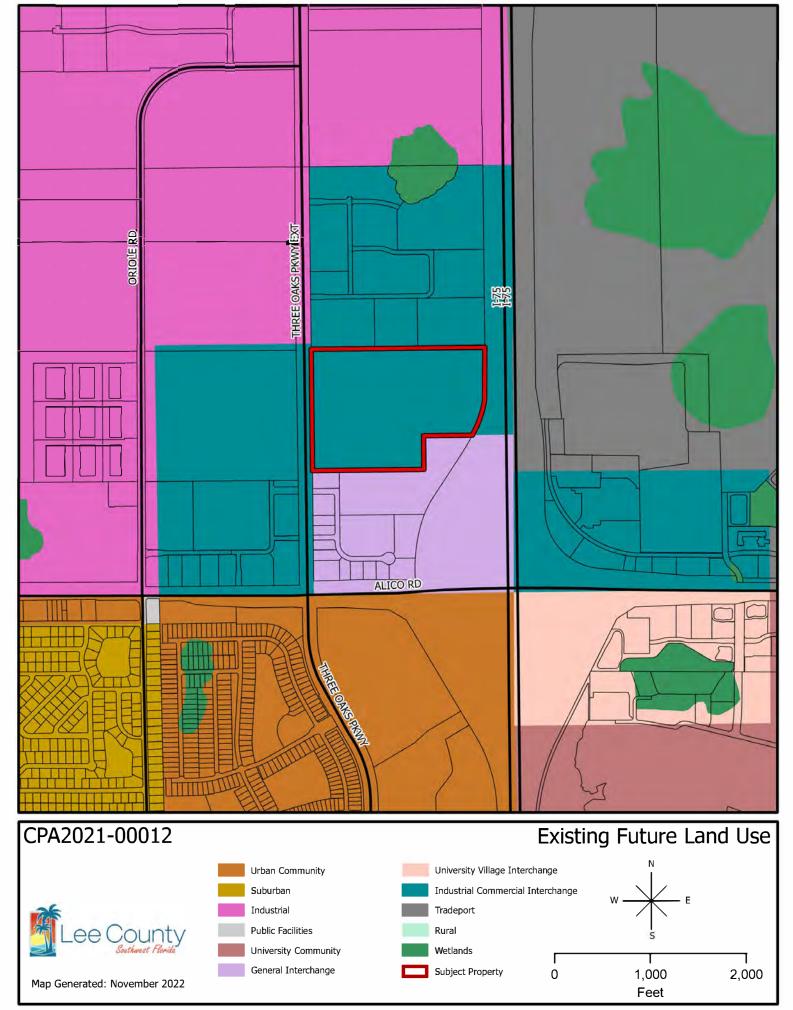

It is the intention of the Board of County Commissioners that the provisions of this ordinance will become and be made a part of the Lee County Code. Sections of this ordinance may be re-numbered or re-lettered and the word "ordinance" may be changed to "section," "article" or other appropriate word or phrase in order to accomplish this intention; and regardless of whether inclusion in the code is accomplished, sections of this ordinance may be renumbered or relettered. The correction of typographical errors that do not affect the intent may be authorized by the County Manager, or his designee, without need of a public hearing, by filing a corrected or re-codified copy with the Clerk of the Circuit Court.

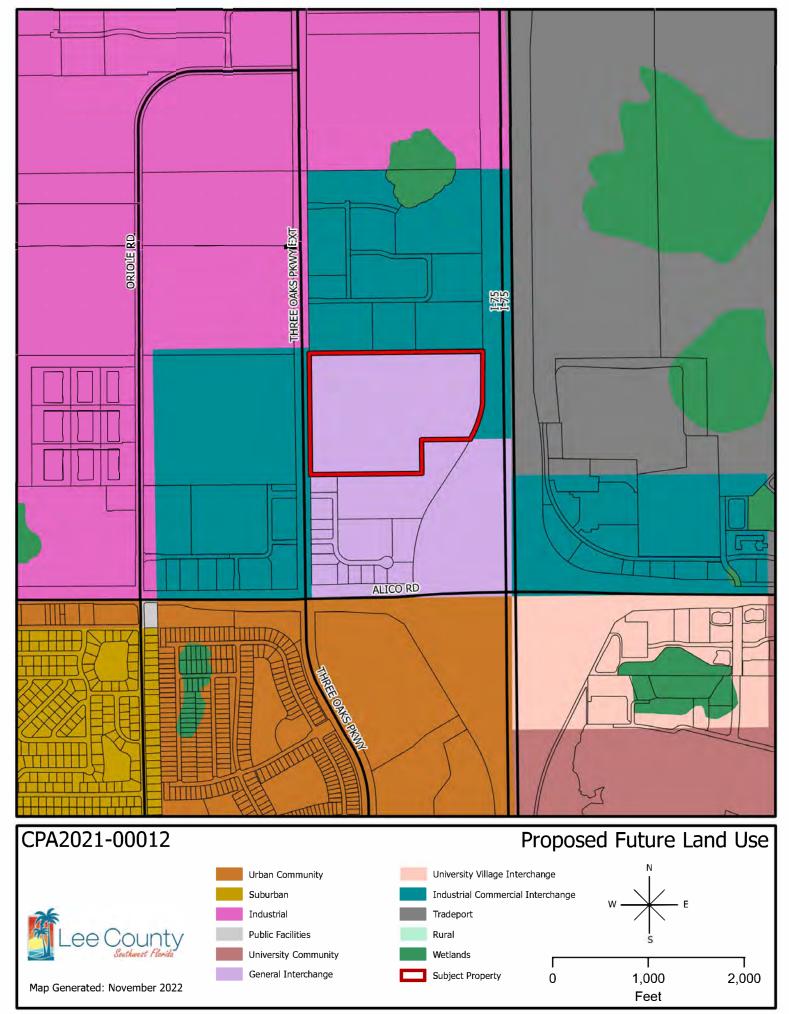

SECTION EIGHT: EFFECTIVE DATE

The small scale Lee Plan amendment adopted by this ordinance will be effective 31 days after adoption unless challenged within 30 days after adoption. If challenged within 30 days after adoption, the small scale amendment to the Lee Plan will not be effective until the Florida Department of Economic Opportunity or the Administrative Commission issues a final order determining the small scale amendment is in compliance with Florida Statutes, Section 163.3184. No development orders, development permits or land uses dependent on this amendment may be issued or commence before the amendment has become effective.

STAFF REPORT FOR ALICO CROSSROADS: CPA2021-00012 and CPA2022-00008

Text and Map Amendments to the Lee Plan

Recommendation: Adopt

<u>Applicant:</u> Stock Development

Representative: Daniel DeLisi, AICP

Property Location:

Three Oaks Parkway, 0.25 miles north of Alico Rd.

Size:

± 46.7 acres (Small Scale: F.S.163.3187)

<u>Planning District:</u> Gateway/Airport

<u>Commissioner District:</u>
District #2

<u>Hearing Dates:</u> LPA: 12/12/2022 BoCC: 01/18/2023

Attachments:

- 1: Existing and Proposed FLUM Amendments
- 2: Proposed Text Amendments

REQUEST

- Amend the Future Land Use Map designation on ±46.7 acres from Industrial Commercial Interchange to General Interchange.
- Amend Table 1(b) 2045 population allocation to accommodate residential development on the subject property.
- The requested map amendment qualifies as a small scale comprehensive plan amendment per Florida Statute 163.3187(1).

SUMMARY

The requested amendments will allow a mix of residential, commercial (both retail and office) and hotel uses on the subject property. The existing and proposed future land use categories are similar except that the current designation does not allow residential.

PROJECT LOCATION

The subject property is located on the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road, and is immediately west of I-75.

Figure 1: Project Location Map

RECOMMENDATION

Staff recommends that the Board of County Commissioners **adopt** the requested amendments based on the analysis and findings provided in this staff report.

PART 1 STAFF DISCUSSION AND ANALYSIS

Concurrent Rezoning

The applicant has filed a companion rezoning application (DCI2022-00005) that is being reviewed concurrently with this plan amendment request. The applicant is seeking to rezone the property to a Mixed Use Planned Development (MPD) to allow for the development of a mixed retail, office and residential development, including a hotel.

Even with the recommended adoption of the proposed amendments, the applicant must demonstrate consistency with the Lee Plan, including the proposed amendments, in order for the companion rezoning to receive a favorable recommendation.

Subject Property

The subject property is located on the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road and immediately west of Interstate I-75. It is currently zoned CPD for 300,000 square feet of commercial retail, 51,000 square feet of commercial office, and 125 hotel units.¹

The ±46.7 acre subject property is located in the Gateway/Airport Planning District as shown on Lee Plan Map 1B, and is currently designated as Industrial Commercial Interchange on the Future Land Use map.

Industrial Commercial Interchange Future Land Use Category: The subject property is designated as Industrial Commercial Interchange on the Future Land Use Map and has been prior to 2007. The Industrial Commercial Interchange future land use category, as provided in Policy 1.3.4 below, is limited to commercial and light industrial uses. No residential uses are allowed. As the subject property was within the Industrial Commercial Interchange future land use category prior to 2007, there is no limitation on the amount of commercial development.

POLICY 1.3.4: The Industrial Commercial Interchange areas are designated to permit a mixture of light industrial and/or commercial uses. This category does not permit heavy industrial uses. Within areas expanded beyond the existing Industrial Commercial Interchange boundaries (on January 1, 2007), retail commercial uses will be limited to 20% of the total floor area and light industrial uses will be a minimum of 50% of the total floor area. (Ordinance No. 07-10)

Surrounding Properties

The properties to the north and west are within the Industrial Commercial Interchange future land use category and are zoned Mixed Use Planned Development (MPD). To the south of the subject site are lands within the General Interchange future land use category, zoned Commercial Planned Development (CPD). Further south is Alico Road, a six lane arterial roadway. Immediately to the east of the subject property is I-75. Further to the east are lands within the Tradeport future land use category, zoned MPD. More detailed information on the surrounding properties is provided below.

¹ See zoning resolutions Z-08-035, Z-08-029, and Z-03-017.

TABLE 1: SURROUNDING PROPERTIES INFORMATION

| | Future Land Use | Zoning | Existing Use | | | |
|-------|---|---|--|--|--|--|
| North | Industrial Commercial Interchange | | | | | |
| East | Tradeport | Airport Interstate Commerce Park MPD - Approved for 306,000 SF commercial, 1,400,000 SF industrial & 130 hotel rooms | I-75 then Vacant Land; Industrial & Commercial | | | |
| South | General Interchange (8 to 14 dwelling units/acre) | Vintage Commerce Center CPD – 350,000 SF commercial /industrial, 308 multi-family dwelling units, & 300 hotel rooms | Under Construction | | | |
| West | Industrial Commercial Interchange | Three Oaks Distribution Center CPD - 600,000 SF commercial & 600,000 SF industrial | Warehousing & Distribution; Under Construction | | | |

Lee Plan Consistency

The applicant is requesting to amend the future land use category of the subject property to General Interchange to allow residential uses on the subject property. As previously mentioned, the current future land use designation does not allow residential uses.

The General Interchange future land use category allows for commercial development serving the traveling public, light industrial uses, and multi-family development with a standard density range between 8 to 14 dwelling units per acre. Bonus density may be approved up to 22 units per acre.

POLICY 1.3.2: The General Interchange areas are intended primarily for land uses that serve the traveling public: service stations, hotel, motel, restaurants, and gift shops. But because of their location, market attractions, and desire for flexibility, these interchange uses permit a broad range of land uses that include tourist commercial, general commercial, light industrial/commercial, and multifamily dwelling units. The standard density range is from eight dwelling units per acre (8 du/acre) to fourteen dwelling units per acre (14 du/acre). Maximum density is twenty-two units per acre (22 du/acre).

Amending the future land use map would expand the types of uses allowed on the subject property to included multi-family residential land uses. Commercial and light industrial uses would continue to be permitted since both are allowed in the Industrial Commercial Interchange and General Interchange future land use categories. As previously stated, there is no restriction on the amount of commercial or industrial square feet allowed on the subject property since the designation has been on the subject property prior to 2007. This means the subject property could currently be developed all commercial, industrial, or provide a mix of both.

Policy 158.3.5 provides that Lee County will "ensure that adequate land is allocated in this Plan to meet future commercial, industrial, agricultural, residential, and recreational needs." When land is proposed to be redesignated from a future land use category that allows for industrial uses to one that does not or to one that allows for a mixture of uses that may not include industrial uses it is important to analyze the

impacts the proposed change will have on Lee County's future employment opportunities. However, as previously stated, since this property has been within the Industrial Commercial Interchange future land use category prior to 2007 there is currently no requirement that the subject property be developed to include any industrial uses. This is reflected in the currently approved planned development, which includes 300,000 square feet of retail, 51,000 square feet of office, and 125 hotel units. Therefore, the proposed amendment to Map 1A will not impact the amount of land that is available for industrial uses and is consistent with Policy 158.3.5.

The subject property is located in close proximity to more than 2,500,000 square feet of industrial uses that are either completed, under construction or have zoning approval. Due to compatibility constraints of industrial uses and the conflicts that can arise when locating industrial uses in close proximity to residential uses, the concurrent rezoning must be designed so that the future residential uses do not interfere with future development of industrial uses.

Recent activity along the Three Oaks Parkway corridor indicates a transition to Research and Development (R & D) and corporate office type uses. As a result, some of the housing needs stemming from this transition could be served on the subject property which would support the anticipated hi-tech/clean industry businesses.

Lands to the south of Alico Road supply much of the needed housing for the employers in the immediate area, as lands north of Alico Road are primarily in the Industrial Development future land use category. In the area of San Carlos Park that is between US 41 to the west, I-75 to the east, Alico Road to the north and the Village of Estero to the south there are currently 10,227 dwelling units. Of these approximately 70 percent are single family, 11 percent are duplex units and 18 percent are multi-family units. Policy 1.3.2 specifically requires that residential uses in the General Interchange future land use category be in the form of multi-family dwelling units. Adding multi-family units to the subject property will help to diversify housing options for workers of nearby employers. Allowing for multi-family dwelling units on the subject property would further **Objective 135.1, Policy 135.1.9, and Policy 158.1.9** by diversifying the mix of residential unit types within Lee County.

The proposed General Interchange Future Land Use designation would allow residential development on the subject property. Approximately 5.94 acres located on the northwest portion of the subject property is in the Airport Noise Zone C (see Figure 2). Airport Noise Zone C (Policy 1.7.1) requires formal notification to property owners, but does not restrict or prohibit residential land uses.

Lee County Port Authority issued a letter on October 13, 2021, which in part provides:

- The subject property is located near a highly active arrival/departure corridor for Runway 06/24
 at Southwest Florida International Airport (SWFIA) and will be subject to numerous daily
 overflights at low altitudes.
- A portion of the subject property is located in a noise sensitive area as described in Section 34-1104 of the Lee County Land Development Code (LDC); specifically, Airport Noise Zones C. As such, the project is subject to the noise notification policy in the LDC 34-1104.

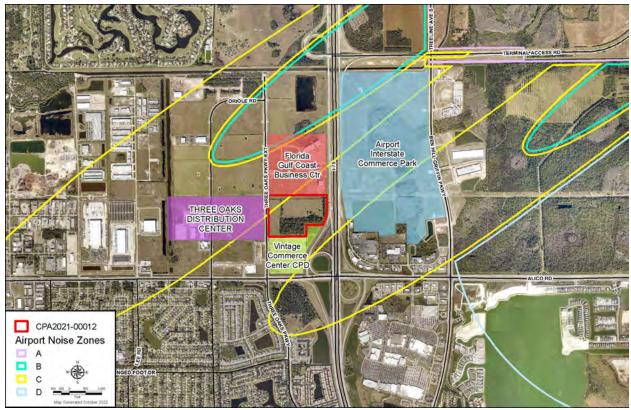

Figure 2: Surrounding Properties/Airport Noise Zones

Airport Noise Zone C is only located on a small portion of the subject property. However, the subject property could be affected by air traffic from the expanding SWFIA. For consistency with Policy 1.7.1, the concurrent rezoning should be conditioned to notify future residences on the subject property of the potential exposure to airport noise and industrial developments. The subject property is not in Airport Noise Zone B, which prohibits residential development.

The proposed change to the Future Land Use Map will allow residential development on the subject property where the use is not currently allowable. As such the proposed amendment must be reviewed for consistency with **Policy 5.1.2** which prohibits residential development "where physical constraints exists, or require the density and design to be adjusted accordingly." The Policy provides that such constraints or hazards may include flood, storm, or hurricane hazards; unstable soil or geological conditions; environmental limitations; aircraft noise; or other characteristics that may endanger the residential community. There are no characteristics of the property that would prohibit residential development. Airport Noise Zone C on the 5.94 acres in the northwest corner of the subject property requires notification but does not prohibit residential development. However, to address the presence of Airport Noise Zone C, the applicant has designed the concurrent Planned Development, DCI202022-00005, to locate residential development outside of the Airport Noise Zone. The proposed amendment is consistent with Policy 5.1.2.

The request is consistent with **Policy 5.1.3** which directs high-density residential developments to locations near employment and shopping centers. The subject property is located in close proximity to the industrial and corporate businesses along Alico Road and Three Oaks Parkway, University Plaza CPD, Gulf Coast Towne Center, SWFIA, and FGCU. In addition to employment and shopping opportunities Policy

5.1.3 also discusses appropriateness of high-density residential uses in proximity to parks, schools, and transportation facilities such as mass transit and bicycle facilities. The subject property is in close proximity to the uses and facilities discussed and is consistent with Policy 5.1.3.

Table 1(b): The request to amend Table 1(b) is to accommodate residential development on the subject property. The map amendment, if approved, will require that Table 1(b) be updated to provide additional residential allocation for the General Interchange Future Land Use Category (see Attachment 1, Page 3).

Service Availability

The proposed amendment to the Future Land Use Map would expand the types of uses allowed on the subject property to included residential uses. There are adequate potable water, sanitary sewers, solid waste, police, fire/EMS, schools and mass transit services to accommodate anticipated development on the subject property with or without the proposed amendments.

Transportation: The subject property is located on the east side of Three Oaks Parkway, approximately 0.25 miles north of Alico Road. Interstate I-75 is located along the east boundary of the land. As previously stated, the primary difference in the existing and proposed future land use categories is allowance of multi-family residential uses in the proposed future land use category. Analysis of transportation impacts shows development that could be accommodated by the proposed amendments at the maximum density allowed in the General Interchange future land use category would result in a reduction to transportation impacts over other uses allowed in both categories. If no residential units are constructed there will be no change to transportation impacts.

Mass Transit: The subject property is within ¼ mile of a fixed route corridor, but not adjacent to the closest bus route, Route 60, along Alico Road. Any necessary improvements will be determined at time of Local Development Order.

Utilities: The subject property is within the Lee County Utilities future potable water and sanitary sewer service areas. Potable water and wastewater lines are in operation adjacent to the property on Three Oaks Extension. Potable water is available from the Green Meadows Water Treatment Plant. Wastewater service would be provided by the Three Oaks Wastewater Treatment Plant.

Solid Waste: The subject property has access to solid waste services. Solid waste collection services will be provided by Lee County using the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill.

Fire: The San Carlos Park Fire District indicated they are capable of providing fire protection. In a letter dated September 8, 2021, the Fire District states the subject property is within 1.3 miles from Station #54, located at 16900 Oriole Road.

EMS: The subject property has access to EMS services. In a letter dated August 27, 2021, Lee County Emergency Medical Services indicates they will be able to serve the property from Medic 9 located 3 miles southwest of the property, and a second EMS facility is located within 4 miles from the property.

Police: The Lee County Sheriff will provide law enforcement services primarily from the South District office in Bonita Springs. The Sheriff indicated in a letter dated August 27, 2021 that development of the subject property will not affect the ability of the Lee County Sheriff's Office to provide core services at this time.

Schools: The School District of Lee County provided a letter on April 18, 2022 providing that capacity is an issue within the Concurrency Service Area (CSA) at the elementary school level, however, capacity is available in the adjacent CSA. Therefore, there is adequate school seat capacity to serve the subject property.

CONCLUSIONS

Commercial and industrial uses are permitted in both the Industrial Commercial Interchange and General Interchange future land use categories. The difference is that General Interchange will allow for multifamily residential uses at a minimum of 8 units and a maximum of 14 units per acre. Up to 22 units per acre would be allowed using bonus density. Staff has reviewed the proposed amendment to the Future Land Use Map and provides the following conclusions.

- The proposed amendment will not impact the amount of land that is available for industrial uses and is consistent with Policy 158.3.5.
- Based on Policy 1.3.4, there is no loss of industrial development required by the Lee Plan.
- The subject property is in a growing industrial and commercial area. Providing multi-family residential units on the subject property will diversify the types of housing types available to employees in the area.
- The residential/industrial/commercial interface will be limited as proposed by the concurrent planned development.
- While residential development will be located outside of the Airport Noise Zone, residents will be given notice of the property's proximity to the airport and the potential for airport noise.
- Public Services are available to support the proposed uses on the subject property.

For the reasons discussed in this staff report, staff recommends that the Board of County Commissioners *adopt* the proposed amendments.

PART 2

LOCAL PLANNING AGENCY REVIEW AND RECOMMENDATION

DATE OF PUBLIC HEARING: <u>December 12, 2022</u>

A. LOCAL PLANNING AGENCY REVIEW

The applicant's representatives provided a presentation addressing the requested amendments, subject property, existing and proposed future land use categories, impacts to adjacent industrial lands and the Southwest Florida International Airport, surrounding uses, consistency with the Lee Plan, and concurrent rezoning.

Members of the LPA had questions about: whether future residents would be notified if they are located in Airport Noise Zone C; whether this level of density was compatible with surrounding uses; and, how this approval would align with the county's goal of protecting industrial development lands.

Following this, staff made a presentation addressing the requested amendments, subject property, and consistency with the Lee Plan and staff recommendation.

There was no public comment on the proposed amendment.

B. LOCAL PLANNING AGENCY RECOMMENDATION

A motion was made to recommend that the Board of County Commissioners *adopt* CPA2021-00012 and CPA2022-00008. The motion passed 4 to 0.

Public Facilities Impacts

NOTE: The applicant must calculate public facilities impacts based on the maximum development.

- Traffic Circulation Analysis: The analysis is intended to determine the affect of the land use change on the Financially
 Feasible Highway Plan Map 3A (20-year plus horizon) and on the Capital Improvements Element (5-year horizon).
 Toward that end, an applicant must submit a Traffic Impact Statement (TIS) consistent with Lee County Administrative
 Code (AC)13-17.
 - a. Proposals affecting less than 10 acres, where development parameters are contained within the Traffic Analysis Zone (TAZ) or zones planned population and employment, or where there is no change in allowable density/intensity, may be eligible for a TIS requirement waiver as outlined in the Lee County TIS Guidelines and AC-13-17. Identification of allowable density/intensity in order to determine socio-economic data for affected TAZ(s) must be coordinated with Lee County Planning staff. Otherwise a calculation of trip generation is required consistent with AC-13-17 and the Lee County TIS Guidelines to determine required components of analysis for:
 - i. Total peak hour trip generation less than 50 total trip ends tripgeneration.
 - ii. Total peak hour trip generation from 50 to 300 total trip ends trip generation, trip distribution and trip assignment (manual or Florida Standard Urban Transportation Modeling Structure (FSUTMS) analysis consistent with AC-13-17 and TIS Guidelines), short-term (5 year) and long-range (to current Lee Plan horizon year) segment LOS analysis of the nearest or abutting arterial and major collector segment(s) identified in the Transportation Inventory based on the trip generation and roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is recommended prior to submittal of the application to discuss use of FSUTMS, any changes to analysis requirements, or a combined CPA and Zoning TIS short term analysis.
 - iii. Total peak hour trip generation is over 300 total trip ends trip generation, mode split, trip distribution and trip assignment (manual or FSUTMS analysis consistent with AC-13-17 and TIS Guidelines), short-term (five-year) and long-range (to current Lee Plan horizon year) segment LOS analysis of arterial and collector segments listed in the Transportation Inventory. LOS analysis will include any portion of roadway segments within an area three miles offset from the boundary of the application legal description metes and bounds survey. LOS analysis will also include any additional segments in the study area based on the roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is required prior to submittal of the application.
 - b. Map amendment greater than 10 acres -Allowable density/intensity will be determined by Lee County Planning staff.
- 2. Provide an existing and future conditions analysis for the following (see Policy 95.1.3):
 - a. Sanitary Sewer
 - b. Potable Water
 - c. Surface Water/Drainage Basins
 - d. Parks, Recreation, and Open Space
 - e. Public Schools

Analysis for each of the above should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- a Franchise Area, Basin, or District in which the property is located
- b. Current LOS, and LOS standard of facilities serving the site
- c. Projected 2030 LOS under existing designation
- d Projected 2030 LOS under proposed designation
- e Existing infrastructure, if any, in the immediate area with the potential to serve the subject property
- f Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements
- g Provide a letter of service availability from the appropriate utility for sanitary sewer and potablewater

In addition to the above analysis, provide the following for potable water:

- a. Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- c. Include the availability of treatment facilities and transmission lines for reclaimed water forirrigation.
- d. Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:

- a. Fire protection with adequate response times
- b. Emergency medical service (EMS) provisions
- c. Law enforcement
- d. Solid Waste
- e. Mass Transit
- f. Schools

In reference to above, the applicant must supply the responding agency with the information from application items 5, 6, and 7 for their evaluation. This application must include the applicant's correspondence/request to the responding agency.

Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed change based upon the following:

- A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
- 2. A map and description of the soils found on the property (identify the source of the information).
- 3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
- 4. A map delineating the property boundaries on the most recent Flood Insurance Rate Map.
- 5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
- 6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, stateor local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archaeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

- A map of any historic districts and/or sites listed on the Florida Master Site File which are located on the subject property or adjacent properties.
- 2 A map showing the subject property location on the archaeological sensitivity map for Lee County.

Internal Consistency with the Lee Plan

- 1. Discuss how the proposal affects established Lee County population projections, Lee Plan Table 1(b) and the total population capacity of the Lee Plan Future Land Use Map.
- 2 List all goals and objectives of the Lee Plan that are affected by the proposed amendment or that affect the subject property. This analysis should include an evaluation of all relevant policies under each goal and objective.
- 3. Describe how the proposal affects adjacent local governments and their comprehensive plans.

State Policy Plan and Regional Policy Plan

List State Policy Plan and Regional Policy Plan goals, strategies and actions, and policies which are relevant to this plan amendment.

Justify the proposed amendment based upon sound planning principles

Support all conclusions made in this justification with adequate data and analysis.

Planning Communities/Community Plan Area Requirements

If located within a planning community/community plan area, provide a meeting summary document of the required public informational session [Lee Plan Goal 17].

Sketch and Legal Description

The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

SUBMITTAL REQUIREMENTS

Clearly label all submittal documents with the exhibit name indicated below.

For each map submitted, the applicant will be required to submit a 24"x36" version and 8.5"x11" reduced map for inclusion in public hearing packets.

MINIMUM SUBMITTAL ITEMS (3 Copies)

| Completed Application (Exhibit – M1) |
|--|
| Filing Fee (Exhibit – M2) |
| Disclosure of Interest (Exhibit – M3) |
| Surrounding Property Owners List, Mailing Labels, and Map For All Parcels Within 500 Feet of the Subject Property (Exhibit – M3) |
| Future Land Use Map - Existing and Proposed (Exhibit - M4) |
| Map and Description of Existing Land Uses (Not Designations) of the Subject Property and Surrounding Properties (Exhibit – M5) |
| Map and Description of Existing Zoning of the Subject Property and Surrounding Properties (Exhibit - M6) |
| Signed/Sealed Legal Description and Sketch of the Description for Each FLUC Proposed (Exhibit - M7) |
| Copy of the Deed(s) of the Subject Property (Exhibit – M8) |
| Aerial Map Showing the Subject Property and Surrounding Properties (Exhibit - M9) |
| Authorization Letter From the Property Owner(s) Authorizing the Applicant to Represent the Owner (Exhibit - M10) |
| Lee Plan Analysis (Exhibit – M11) |
| Environmental Impacts Analysis (Exhibit – M12) |
| Historic Resources Impact Analysis (Exhibit – M13) |
| Public Facilities Impacts Analysis (Exhibit – M14) |
| Traffic Circulation Analysis (Exhibit – M15) |
| Existing and Future Conditions Analysis - Sanitary Sewer, Potable Water, Surface Water/Drainage Basins, Parks and Rec, Open Space, Public Schools (Exhibit – M16) |
| Letter of Determination For the Adequacy/Provision of Existing/Proposed Support Facilities - Fire Protection, Emergency Medical Service, Law Enforcement, Solid Waste, Mass Transit, Schools (Exhibit – M17) |
| State Policy Plan and Regional Policy Plan (Exhibit - M18) |
| Justification of Proposed Amendment (Exhibit – M19) |
| Planning Communities/Community Plan Area Requirements (Exhibit - M20) |

APPLICANT - PLEASE NOTE:

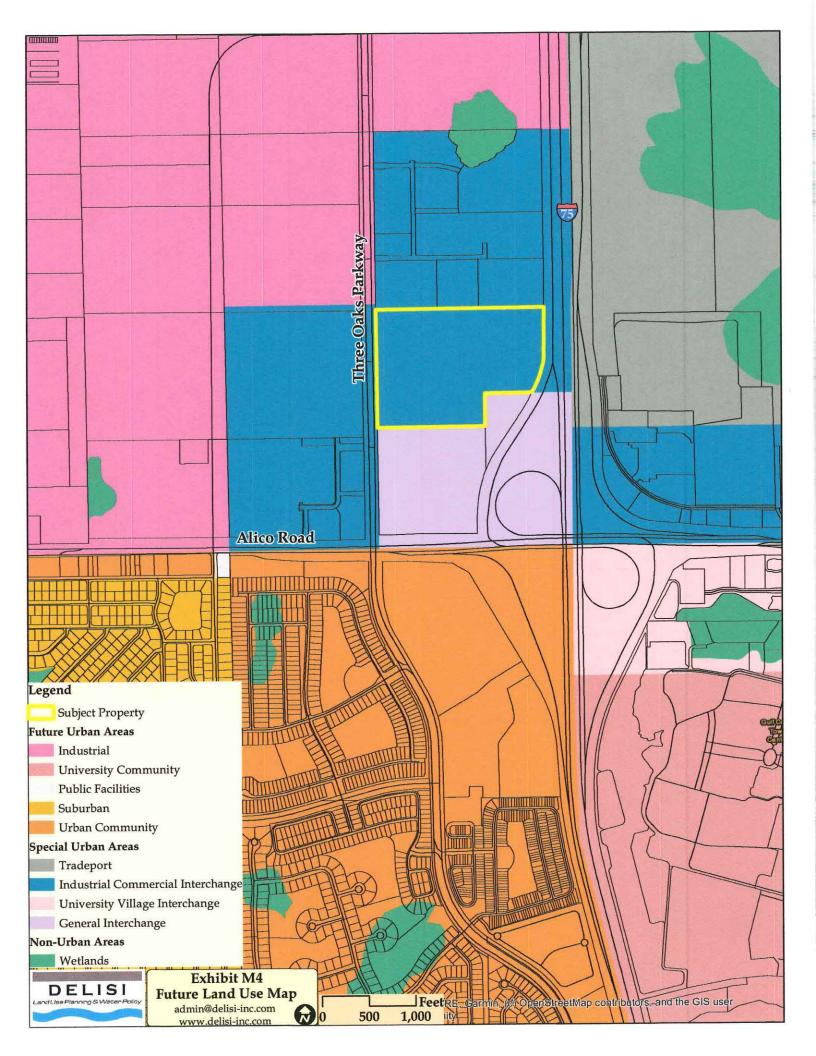

Once staff has determined the application is sufficient for review, 15 complete copies will be required to be submitted to staff. These copies will be used for Local Planning Agency hearings, Board of County Commissioners hearings, and State Reviewing Agencies. Staff will notify the applicant prior to each hearing or mail out to obtain the required copies.

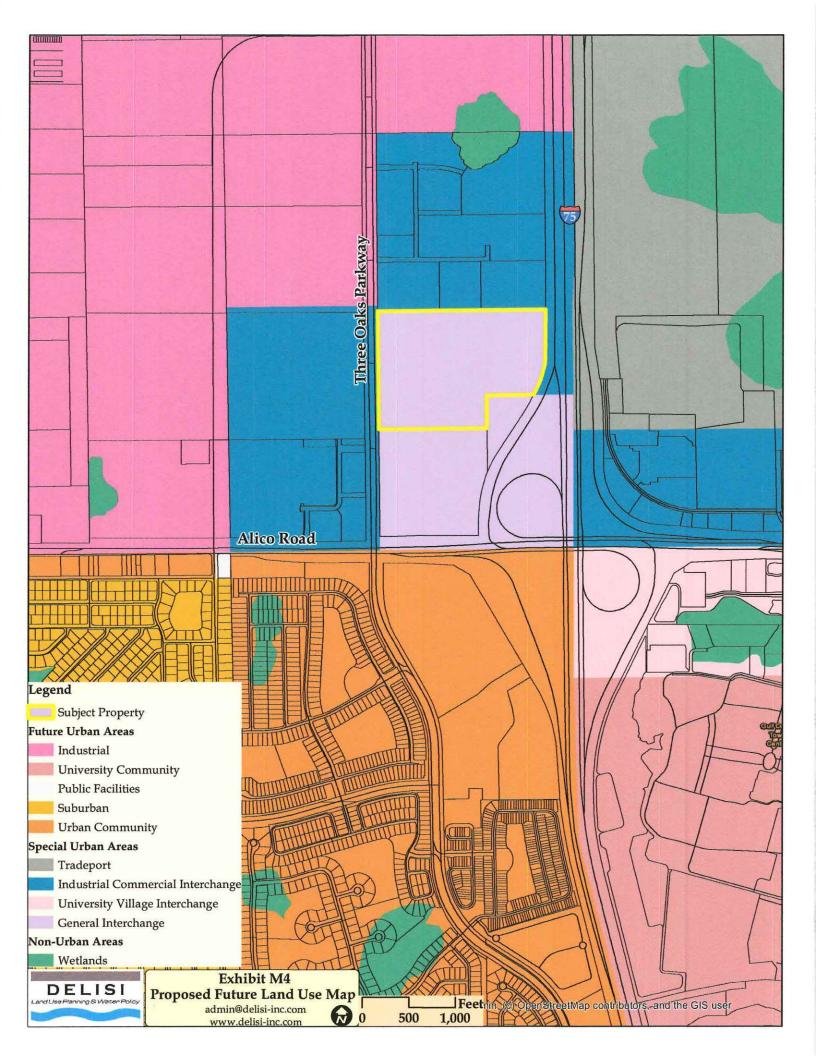

If you have any questions regarding this application, please contact the Planning Section at (239)533-8585.

STAMP/SPAND NOTARY PUBLIC for the State of Montana Residing at Bozeman, MT My Commission Expires July 27, 2025.

Signature of Notary Public

LEE PLAN ANALYSIS - M11

The subject property is located at the northwest quadrant of I-75 and Alico Road, approximately ¼ mile north of Alico Road. The proposed amendment would extend the General Interchange land use category over the subject property, consistent with the property to the south. The proposed amendment is consistent with the Lee County Comprehensive Plan as outlined below.

OBJECTIVE 1.3: INTERSTATE HIGHWAY INTERCHANGE AREAS. Special areas adjacent to the interchanges of Interstate 75 that maximize critical access points will be designated on the Future Land Use Map. Development in these areas must minimize adverse traffic impacts and provide appropriate buffers, visual amenities, and safety measures. Each interchange area is designated for a specific primary role: General, General Commercial, Industrial Commercial, Industrial, and University Village. Residential uses are only permitted in these categories in accordance with Policy 1.3.2.

The proposed amendment will maximize the use of this critical interchange by providing a greater diversity of uses on the subject property and the ability to develop a mixed use plan. The added residential uses wil be in proximity to major employment centers at or near the Alico Interchange as well as at interchanges throughout Lee County.

POLICY 1.3.2: The General Interchange areas are intended primarily for land uses that serve the traveling public: service stations, hotel, motel, restaurants, and gift shops. But because of their location, market attractions, and desire for flexibility, these interchange uses permit a broad range of land uses that include tourist commercial, general commercial, light industrial/commercial, and multi-family dwelling units. The standard density range is from eight dwelling units per acre (8 du/acre) to fourteen dwelling units per acre (14 du/acre). Maximum density is twenty-two dwelling units per acre (22 du/acre).

The General Interchange land use category has a broad range of uses allowed, including multi-family residential. The subject property is seeking a concurrent zoning which will allow for approximately 14 dwelling units per acre. The flexibility of uses and the residential allowed is the most appropriate designation for the subject property based on its location adjacent to General Interchange on the south and the employment centers to the north. The proposed mixed-use plan will be well positioned to provide a needed diversity of housing types to the surrounding employment uses.

It is important to note that similar to the Commercial Industrial Interchange land use category, the General Interchange land use category allows for light industrial uses. While neither the existing zoning or the proposed zoning seeks industrial uses, the proposed

change to the future land use category will have no effect on the amount of industrial acreage within Lee County.

POLICY 1.6.5: The Planning Districts Map and Acreage Allocation Table (Map 1-B and Table 1(b)) depict the proposed distribution, extent, and location of generalized land uses through the Plan's horizon. Acreage totals are provided for land in each Planning District in unincorporated Lee County. No development orders or extensions to development orders will be issued or approved by Lee County that would allow the acreage totals for residential, commercial or industrial uses contained in Table 1(b) to be exceeded.

Table 1b includes 15 acres in the Gateway/Airport Planning community available for residential development. Based on how the County calculates the total available acreage for residential development, there is sufficient acreage available to meet the needs of the proposed residential area for this project.

OBJECTIVE 2.1: DEVELOPMENT LOCATION. Contiguous and compact growth patterns will be promoted through the rezoning process to contain urban sprawl, minimize energy costs, conserve land, water, and natural resources, minimize the cost of services, prevent development patterns where large tracts of land are by-passed in favor of development more distant from services and existing communities.

This policy will be analyzed more during the concurrent re-zoning. However, the proposed future land use change represents an opportunity for compact development patterns. The subject property is within an urban area near the Alico Interchange. Public services are available to the subject property as evidenced by the existing zoning approval, the development contiguous to the north, development on nearby properties in all directions, and through the letters of service availability obtained from each public service department. Locating residential on the subject property will minimize urban sprawl by allowing for multi-family residential development adjacent, in close proximity and with easy access to employment centers throughout Lee County.

POLICY 2.1.1: Most residential, commercial, industrial, and public development is expected to occur within the designated future urban areas on the Future Land Use Map through the assignment of very low densities to the non-urban categories.

The subject property is currently within a future urban area on the future land use map and is surrounded by urban designated properties. The proposed land use category allows for urban levels of residential development.

OBJECTIVE 2.2: DEVELOPMENT TIMING. Direct new growth to those portions of the future urban areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created. Development orders and permits (as defined in Section 163.3164(7), F.S.) will be granted only when consistent with the provisions of Sections 163.3202(2)(g) and 163.3180, F.S. and the concurrency requirements in the Land Development Code,

As part of the submitted applications, letters of service availability have been obtained from each of the service providers. The subject property is in an urban area where public facilities exist, and capacity is available to serve the proposed development.

POLICY 2.2.1: Rezonings and Development of Regional Impact proposals will be evaluated as to the availability and proximity of the road network; central sewer and water lines; community facilities and services such as schools, EMS, fire and police protection, and other public facilities; compatibility with surrounding land uses; and any other relevant facts affecting the public health, safety, and welfare.

The subject property is located along the Three Oaks Extension, a future arterial road, just to the north of the Alico Interchange with I-75. Water and sewer service is available to the subject property. As evidenced by the attached letters of service availability, public facilities exist to serve the proposed development.

STANDARD 4.1.1: WATER.

1. Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development in excess of 30,000 square feet of gross leasable (floor) area per parcel, must connect to a public water system (or a "community" water system as that is defined by Chapter 62-550, F.A.C.).

Potable water service is available to the subject property. Future development will be required to connect to Lee County's central water system.

STANDARD 4.1.2: SEWER.

1. Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development that generates more than 5,000 gallons of sewage per day, must connect to a sanitary sewer system.

Sanitary sewer service is available to the subject property. Future development will be required to connect to Lee County's central wastewater system.

STANDARD 4.1.4: ENVIRONMENTAL FACTORS.

1. In any case where there exists or there is the probability of environmentally sensitive areas (as identified by Lee County, the Corps of Engineers, Department of Environmental Protection, South Florida Water Management District, or other applicable regulatory agency), the developer/applicant must prepare an environmental assessment that examines the existing conditions, addresses existing or anticipated environmental problems, and proposes means and mechanisms to protect, conserve, or preserve the environmental and natural resources.

Dex Bender has conducted an environmental assessment for the property. According to the report, "The majority of the site is improved pasture with the remaining forested areas containing high levels of exotics." There are no environmentally sensitive areas on site.

However, the developer will meet the County's indigenous preservation requirements, which will preserve and restore a portion of the pine flatwoods area of the property.

GOAL 5: RESIDENTIAL LAND USES. To provide sufficient land in appropriate locations on the Future Land Use Map to accommodate the projected population of Lee County in the year 2030 in attractive and safe neighborhoods with a variety of price ranges and housing types.

The proposed comprehensive plan amendment will implement Goal 5 by located additional opportunity for residential multi-family development, providing a diversity of housing opportunities just north of San Carlos.

POLICY 5.1.2: Prohibit residential development where physical constraints or hazards exist, or require the density and design to be adjusted accordingly. Such constraints or hazards include but are not limited to flood, storm, or hurricane hazards; unstable soil or geologic conditions; environmental limitations; aircraft noise; or other characteristics that may endanger the residential community.

There are no physical constraints or hazards that exist on the subject property that would limit residential development.

POLICY 5.1.3: During the rezoning process, direct high-density residential developments to locations that are near employment and shopping centers; are close to parks and schools; and are accessible to mass transit and bicycle facilities.

The proposed comprehensive plan amendment directly implements the intent of Policy 5.1.3 in that it will locate a high density residential near major employment centers. Directly to the north of the subject property is the new Neogenomics headquarters as well as several other corporate office buildings. Southwest Florida International Airport is within a 3-mile drive of the subject property, and several employment centers that have developed under the industrial/commerce designations in the comprehensive plan are located within a few miles of the subject property. The proposed development is strategically located to provide multi-family housing in close proximity to major employment areas as well as the Interstate, giving the property easy access to employment centers throughout Lee County.

POLICY 5.1.4: Prohibit residential development in all Industrial Development areas and Airport Noise Zone B as indicated on the Future Land Use Map, except for residences in the Industrial Development area for a caretaker or security guard.

The subject property is not in Noise Zone B. Noise Zone C covers only the northwest corner of the subject property. Very little, if any, of the residential area will even be in Noise Zone C. Most of the property is not located in any Noise Zone.

POLICY 5.1.5: Protect existing and future residential areas from any encroachment of uses that are potentially destructive to the character and integrity of the residential

environment. Requests for conventional rezonings will be denied in the event that the buffers provided in Chapter 10 of the Land Development Code are not adequate to address potentially incompatible uses in a satisfactory manner. If such uses are proposed in the form of a planned development or special exception and generally applicable development regulations are deemed to be inadequate, conditions will be attached to minimize or eliminate the potential impacts or, where no adequate conditions can be devised, the application will be denied altogether. The Land Development Code will continue to require appropriate buffers for new developments.

The residential portion of the subject property is well located to be protected from the encroachment of industrial or commercial uses. To the south of the subject property is land zoned for residential use, in the General Interchange land use category. To the north of the subject property are existing built office development. To the east is I-7 and to the west will be the commercial development that is part of the proposed Mixed Use Planned Development that is be submitted concurrent with this application.

POLICY 6.1.4: Commercial development will be approved only when compatible with adjacent existing and proposed land uses and with existing and programmed public services and facilities.

The proposed plan amendment currently allows for commercial development and will continue to provide for commercial development. The proposed land use change will simply allow residential uses, compatible with the surrounding existing and planned commercial and residential development.

POLICY 6.1.5: The land development regulations will require that commercial development be designed to protect the traffic-carrying capacity of roads and streets. Methods to achieve this include, but are not limited to...

The proposed plan amendment is in an area where capacity exists on the adjacent roadway network. As shown in the attached Transportation Impact Statement, this proposed amendment will not cause any negative impacts to the County Long Range Transportation Plan. The proposed development will be a decrease in trips as compared to the existing zoning and land use use approvals.

GOAL 11: MIXED USE. Encourage mixed use developments that integrate multiple land uses, public amenities and utilities at various scales and intensities in order to provide: diversified land development; a variety of housing types; greater connectivity between housing, workplaces, retail businesses, and other destinations; reduced trip lengths; more transportation options; and pedestrian and bicycle-friendly environments.

The proposed plan amendment and concurrent rezoning represents a change to a mixed-use development with multi-family residential, retail, office and hotel uses. The addition of the multi-family residential development within the context of the surrounding land uses will provide a housing opportunity in close proximity to major employment centers and create a

mixed-use environment that decreases trip lengths and diversifies that housing options in close proximity to the workplace.

OBJECTIVE 47.2: DEVELOPMENT COMPATIBILITY IN VICINITY OF AIRPORTS. Evaluate development proposals for property located within the vicinity of existing or planned aviation facilities to ensure land use compatibility, to preclude hazards to aircraft operations, and to protect airport capacities and facilities.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development is separated from airport operations by I-75 and will not have any impact on the growth of RSW. Landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 47.2.1: Land use compatibility will be considered when reviewing development proposals within the vicinity of existing or planned aviation facilities.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development is separated from airport operations by I-75 and will not have any impact on the growth of RSW. Landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 47.2.2: Maintain regulations in the LDC which restrict land uses in areas covered by the Airport Noise Zones to uses that are compatible with the operation of the airport.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development wil comply with all other land use regulations ensuring compatibility with airport operations.

POLICY 47.2.3: Utilize the currently adopted Airport Master Plans, rules of Ch. 333, Fla. Stat., and the Southwest Florida International Airport FAR Part 150 Study, including updates, as a basis to amend the Lee Plan and the LDC to prohibit development that is incompatible with the Southwest Florida International Airport or Page Field Airport; and, to ensure future economic enhancement consistent with Objective 47.1.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development wil comply with all other land use regulations ensuring compatibility with airport operations.

POLICY 47.2.4: In the interest of the safety of air commerce, the County will not approve a temporary or permanent structure which is an obstruction to air navigation and affects the safe and efficient use of navigable airspace or the operation of planned or existing air navigation and communication facilities; or, does not comply with placement, lighting and marking standards established by the Port Authority, Florida Statutes, or FAA rules and regulations.

The proposed development is not requesting building heights that would interfere with airport operations.

POLICY 47.2.5: The safety of aircraft operators, aircraft passengers, and persons on the ground will guide the Port Authority's airports operations. Hazardous wildlife attractants within 10,000 feet of a Port Authority airport's Air Operations Area (AOA) will be avoided by minimizing and correcting any wildlife hazards arising from wetlands or water bodies in accordance with FAA AC 150/5200-33B, or as otherwise amended. Site improvements on or near the Port Authority's airports must be designed to minimize attractiveness to wildlife of natural areas and manmade features such as detention/retention ponds, landscaping, and wetlands, which can provide wildlife with ideal locations for feeding, loafing, reproduction and escape.

Through the planned development process, the applicant will seek deviations to ensure that landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 60.1.1: Require design of surface water management systems to protect or enhance the groundwater.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which promotes infiltration to maintain groundwater levels.

POLICY 125.1.2: New development and additions to existing development must not degrade surface and ground water quality.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which reduce nutrients and suspended solids prior to discharge offsite. Commercial area provide a minimum of $\frac{1}{2}$ dry pre-treatment prior to discharge into the master stormwater system.

POLICY 125.1.3: The design, construction, and maintenance of artificial drainage systems must provide for retention or detention areas and vegetated swale systems that minimize nutrient loading and pollution of freshwater and estuarine systems.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which reduce nutrients and suspended solids prior to discharge offsite. Commercial area provide a minimum of $\frac{1}{2}$ " dry pre-treatment prior to discharge into the master stormwater system which then provides the remaining water quality treatment.

OBJECTIVE 135.1: HOUSING AVAILABILITY. To ensure the types, costs, and locations of housing are provided to meet the needs of the County's population by working with private and public housing providers.

The proposed land use change will allow for the development of 475 new multi-family residential units.

POLICY 135.1.9: The county will ensure a mix of residential types and designs on a countywide basis by providing for a wide variety of allowable housing densities and types through the planned development process and a sufficiently flexible Future Land Use Map.

The proposed land use change will diversify the housing types in the local area by providing for higher density multi-family units in an area with predominantly single-family development to the south in the San Carlos neighborhood.

Stock Development, LLC 2639 Professional Circle, Suite 101 Naples, FL 34119

Prepared by:

DexBender 4470 Camino Real Way, Suite 101 Fort Myers, FL 33966 (239) 334-3680

INTRODUCTION

The 46.71± acre project is located within a portion of Section 3, Township 46 South, Range 25 East, Lee County, Florida. The parcel is bordered to the east by US 75, to the south by commercial development under construction, to the west by Three Oaks Parkway, and to the north by commercial development under construction and improved pasture.

SITE CONDITIONS

The site has been disturbed by agricultural activities that have been ongoing for decades. The majority of the site is improved pasture with the remaining forested areas containing high levels of exotics. Cattle are present throughout the property.

VEGETATIVE CLASSIFICATIONS

The predominant vegetation associations were mapped in the field on 2021 digital 1" = 200' scale aerial photography. The property boundary was obtained from Kris A. Slosser, PSM and inserted into the digital aerial. The property boundary was not staked in the field at the time of our site inspection and was, therefore, estimated based on the overlay of the boundary on the aerial photography. Five vegetation associations were identified using the Florida Land Use, Cover and Forms Classification System (FLUCCS). Figure 1 depicts the approximate location and configuration of these vegetation associations and Table 1 summarizes the acreages by FLUCCS Code. A brief description of each FLUCCS Code is also provided below.

Table 1. Acreage Summary by FLUCCS Code

| FLUCCS CODE | negroid in the second in the s | |
|----------------|--|-------|
| 211 | Improved Pastures | 32.99 |
| 411E3 | Pine Flatwoods Invaded by Exotics (51 – 75%) | 4.60 |
| 411E4 | Pine Flatwoods Invaded by Exotics (76 – 90%) | 5.40 |
| 422 | Brazilian Pepper | 1.41 |
| 510D | Ditches | 2.31 |
| | Total | 46.71 |

FLUCCS Code 211, Improved Pastures

The majority of the property is well maintained cattle pasture. The pasture is dominated by Bahia grass (*Paspalum notatum*). Additional species present include smutgrass (*Sporobolus indicus*), whitehead broom (*Spermacoce verticillata*), chocolate weed (*Melochia* sp.), flatsedges (*Cyperus* spp.), rustweed (*Polypremum procumbens*), goatweed (*Scoparia dulcis*), and cogongrass (*Imperata cylindrica*).

SECTION: 3 TOWNSHIP: 46 S RANGE: 25 E

Alico Crossroads

FLUCCS Code 411E3, Pine Flatwoods Invaded by Exotics (51 – 75%)

The open canopy in this habitat type is dominated by slash pine (*Pinus elliottii*) with scattered melaleuca (*Melaleuca quinquenervia*). The midstory contains melaleuca, Brazilian pepper (*Schinus terebinthifolius*), laurel oak (*Quercus laurifolia*), myrsine (*Rapanea punctata*), and cocoplum (*Chrysobalanus icaco*). Saw palmetto (*Serenoa repens*) dominates the ground cover.

FLUCCS Code 411E4, Pine Flatwoods Invaded by Exotics (76 – 90%)

The canopy in these areas consists of melaleuca and scattered slash pine. Dense Brazilian pepper dominates the midstory. Ground cover consists of scattered patches of saw palmetto, bare ground, grape vine (*Vitis* sp.), and greenbrier (*Smilax* sp.).

FLUCCS Code 422, Brazilian Pepper

Areas of dense Brazilian pepper are present along the edges of the improved pasture.

FLUCCS Code 510D, Ditches

Several remnant agricultural ditches are present on the property. These areas are vegetated by species such as torpedo grass (*Panicum repens*), red ludwigia (*Ludwigia repens*), pickerel weed (*Pontederia cordata*), duckweed (*Lemna* sp.), and marsh pennywort (*Hydrocotyle umbellata*).

SURVEY METHOD

Lee County Protected Species Ordinance No. 89-34 lists several protected species of animals that could potentially occur on-site based on the general vegetative associations found on the subject parcel. Each habitat type was surveyed for the occurrence of these and any other listed species likely to occur in the specific habitat types. The survey was conducted using meandering linear pedestrian belt transects. This survey methodology is based on the Lee County administratively approved Meandering Transect Methodology. As part of this survey all live trees and snags were inspected for the evidence of cavities that could potentially be used as roosts by the Florida bonneted bat (Eumops floridanus). In order to provide at least 80 percent visual coverage of habitat types listed in Ordinance No. 89-34, the transects were spaced approximately 60 to 100 feet apart. The approximate locations of all direct sighting or signs (such as tracks, nests, and droppings) of a listed species were denoted on the aerial photography. The 1" = 200' scale aerial Protected Species Assessment map (Figure 1) depicts the approximate location of the survey transects and the results of the survey. The listed species survey was conducted during the mid-day hours of August 16, 2021. During the survey the weather was hot and humid.

Species listed as endangered, threatened, or species of special concern by the Florida Fish and Wildlife Conservation Commission (FWC) or the United States Fish and Wildlife Service (FWS) that could potentially occur on the subject parcel according to the Lee County Protected Species Ordinance are shown in Table 2. This list from the Lee County Protected Species Ordinance is general in nature, contains species that were

subsequently delisted by the state, does not necessarily reflect existing conditions within or adjacent to the 46.71± acre property, and is provided for general informational purposes only. The bald eagle (*Haliaeetus leucocephalus*) (which has been delisted by the FWC and FWS but is still protected by other regulations), the Florida black bear (*Ursus americanus floridanus*) (delisted in 2012 and still protected by the Florida Black Bear Management Plan), and the Florida bonneted bat (*Eumops floridanus*) (which was listed by the FWS after Ordinance No. 89-34 was adopted by Lee County) were also included in the survey.

Prior to conducting the protected species survey, a search of the FWC listed species database was conducted to determine the known occurrence of listed species in the project area. This search revealed no known protected species occurring on or immediately adjacent to the site. The database indicated that Florida black bear have been recorded in the vicinity of the property. The FWC's online Gopher Tortoise Permit Map was also reviewed. According to the website, no gopher tortoise permits have been issued for the subject property or immediately adjacent lands.

Table 2. Listed Species That Could Potentially Occur On-site

| FLUCCS Survey Coverage 211 80 | | Species Name | Present | Absent | |
|-------------------------------|----|---|---------|---------|--|
| | | Florida Sandhill Crane (Grus canadensis pratensis) | | 1 | |
| | | Florida Panther (Felis concolor coryi) | | V | |
| 411E3 411E4 | 80 | Gopher Frog (Rana areolata)* Eastern Indigo Snake (Drymarchon corais couperi) | | 1 | |

| | | Florida Black Bear (Ursus americanus floridanus)* | | √ | |
| | | Florida Panther (Felis concolor coryi) Beautiful Pawpaw (Deeringothamnus pulchellus) | | 1 | |
| | | Fakahatchee Burmannia (Burmannia flava) Florida Coontie (Zamia floridana) Satinleaf (Chrysophyllum olivaeforme) | | √ √ √ √ | |
| 422 | 80 | None | | | |

| FLUCCS CODE | Percent Survey Coverage | Species Name | Present | Absent | |
|----------------|-------------------------------|--|---------|--|--|
| CODE Surve | | American Alligator (Alligator mississippiensis) Limpkin (Aramus guarauna)* Little Blue Heron (Egretta caerulea) Reddish Egret (Egretta rufescens) Roseate Spoonbill (Ajaia ajaja) Snowy Egret (Egretta thula)* Tricolored Heron (Egretta tricolor) Everglades Mink (Mustela vison evergladensis) | | \\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\ | |

^{*} Species delisted subsequent to adoption of Lee County Protected Species Ordinance No. 89-34.

SURVEY RESULTS

No species listed by either the FWS or the FWC were observed on the site during the protected species survey. No potential Florida bonneted bat roost cavities were observed. In addition to the site inspection, a search of the FWC species database revealed no known protected species within or immediately adjacent to the project limits.

Greetings,

The attached is a request to search for previously recorded cultural resources on the subject property. I have attached the appropriate form, and a property boundary overlaid on an aerial. If you should require any additional information, please do not hesitate to contact me.

Best regards.

Daniel DeLisi, AICP DeLisi, Inc. dan@delisi-inc.com www.delisi-inc.com

EXISTING AND FUTURE CONDITIONS ANALYSIS EXHIBIT M16

In accordance with Policy 95.1.3 the following is a description of the impact that the proposed change will have on public services. This analysis is based on a comparison of the existing approved zoning on the property with the proposed zoning that is being submitted concurrent with the proposed plan amendment.

| Approved Zoning | Proposed Zoning | |
|-------------------------|-------------------------|--|
| Retail: 300,000 sq. ft. | Retail: 50,000 sq. ft. | |
| Office: 51,000 sq. ft. | Office: 150,000 sq. ft. | |
| Hotel: 125 Rooms | Hotel: 250 Rooms | |
| Residential: N/A | Residential: 475 Units | |

- a. Sanitary Sewer
- b. Potable Water

See attached analysis from DeLisi Fitzgerald, Inc. The proposed land use change will result in an increase of approximately 84,850 additional gallons per day in demand and a total of approximately 150,000 GPD of total demand for water and wastewater. As demonstrated in the analysis, capacity exists in the Lee County Utilities system to meet the projected demand.

c. Surface Water/Drainage Basins

See attached analysis from DeLisi Fitzgerald, Inc. The proposed Future Land Use Map Amendment will have no impact on surface water. The current land use category allows for development consistent with state permitting. The proposed land use change does not alter the likelihood of development of the stormwater rules for permitting.

d. Parks, Recreation, and Open Space

The level of service for Parks is established in Policy 95.1.3.6 as follows:

NON-REGULATORY STANDARDS

6. Parks and Recreation Facilities: Minimum Level of Service:

- (a) Regional Parks 6 acres of developed regional park land open for public use per 1000 total seasonal county population.
- (b) Community Parks 0.8 acres of developed standard community parks open for public use per 1000 permanent population, unincorporated county only.

According to the Lee County Concurrency Report for 2020, based on the County's population, there is a need for 5,202 acres of Regional Park area and 289 acres of community Park Area. The County is currently served by 7,051 acres of Regional Park area and 832 acres of Community Park area. Even without the additional planned park facilities, there is more than sufficient capacity to serve the proposed increase of 475 residential units.

e. Public Schools.

According to the Lee County School Board the student generation rate for multi-family units is .115 students per unit. With the proposed 475 units in the zoning that was submitted concurrent with this plan amendment, the total student generation would be 54. This is further broken down by school as follows:

| School Type | Generation Rate | Total Projected Students |
|-------------|------------------------|---------------------------------|
| Elementary | 0.058 | 27 |
| Middle | 0.028 | 13 |
| High | 0.030 | 14 |
| Total | | 54 |

The subject property is located in South Choice Zone S2. According to the latest Capital Improvement Plan for the School District, capacity exists within the South Zone for the proposed increase in residential units.

Infrastructure Analysis

WATER AND SEWER DEMANDS

The current CPD approved within this General Interchange property would allow 300,000 SF commercial retail, 51,000 SF office, and a 125-room hotel or the optional development scenarios identified with the CPD development program. The proposed entitlements would allow a maximum of 50,000 SF commercial retail, 150,000 SF office, 250 hotel rooms and 475 multi-family residential units. To assess any water and sewer infrastructure impacts, the maximum demand under the existing entitlement will be compared to the maximum demand under the proposed entitlements. The maximum demands are summarized below:

| | | Existing Water | / Sewer Demand | ls | |
|---|-----------------------------|--|-----------------------------|------------------------------|-------------------------------------|
| Units | Summary | Average Daily Flow per Unit (GPD) | Average Daily Flow (GPD) | Peak Factor (Water/Sewer) | Peak Flow (GPM) (Water/Sewer) |
| 300,000 SF | Commercial Retail | 0.15 | 45,000 | 2.5 / 3.0 | 78 / 94 |
| 51,000 SF | Office | 0.15 | 7,650 | 2.5 / 3.0 | 13 / 16 |
| 125 Rooms | Hotel | 100 | 12,500 | 2.5 / 3.0 | 22 / 26 |
| N | /laximum Demand (Exi | sting) | 65,150 | | 113 / 136 |
| | | Proposed Water | er / Sewer Deman | ıds | |
| Units Summary Average Daily Flow per Unit | | Daily Flow | Average Daily Flow (GPD) | Peak Factor (Water/Sewer) | Peak Flow (GPM) (Water/Sewer) |
| 50,000 Commercial Retail | | 0.15 | 7,500 | 2.5 / 3.0 | 13 / 16 |
| 150,000 Office | | 0.15 | 22,500 | 2.5 / 3.0 | 39 / 47 |
| 250 Rooms | Hotel | 100 | 25,000 | 2.5 / 3.0 | 43 / 52 |
| 475 Units | Multi-Family Residential | 200 | 95,000 | 2.5 / 3.0 | 165 / 198 |
| M | aximum Demand (Pro | oosed) | 150,000 | | 260 / 313 |

POTABLE WATER

Existing Conditions:

Currently Lee County Utilities owns a 16-inch water main along the west side of Three Oaks Parkway and an 8-inch force main along the east side of Three Oaks Parkway.

Plant Capacity:

The project is served by the Green Meadows Water Treatment Plant. Presently this plant is design to 14.0 Million Gallons per Day (MGD) of production per the 2020 Lee County Public Facilities Level of Service and Concurrency Report. Per the Potable Water and Wastewater Availability Letter dated September 17, 2021, Lee County Utilities presently has sufficient capacity to provide potable water service to this project.

The existing South Florida Water Management District (SFWMD) consumptive water use permit #36-00003-W states that the permitted annual allocation is 12,508 million gallons which is the equivalent of 34.3 MGD of raw water.

Future Conditions:

For this project, the ideal connection point is along Three Oaks Parkway. It is recommended to loop the water main system internally to allow for redundancy in the system. Although the proposed change results in increased water demand, the additional plant capacity to serve the project is available. The calculated Average Daily Flow of 150,000 GPD (0.15 MGD) is available in the existing system.

SANITARY SEWER

Existing Conditions:

Currently Lee County Utilities owns the existing 8-inch force main along the east side of Three Oaks Parkway which ultimately discharges into the Three Oaks Wastewater Treatment Plant.

Plant Capacity:

The project is served by the Three Oaks Wastewater Treatment Plant. Presently this plant is designed with an average daily capacity of 6.0 MGD per the 2020 Lee County Public Facilities Level of Service and Concurrency Report. Per the Potable Water and Wastewater Availability Letter dated September 17, 2021, Lee County Utilities presently has sufficient capacity to provide sanitary sewer service to this project.

Future Conditions:

For this project, the ideal connection point is the existing force main along Three Oaks Parkway. Although the proposed change results in an increase in sewer flows, the existing Three Oaks Wastewater Treatment Plant has the additional capacity to serve the project. The calculated Average Daily Flow is 150,000 GPD (0.15 MGD) and the existing system has the capacity for the proposed project.

SURFACE WATER

Existing Conditions:

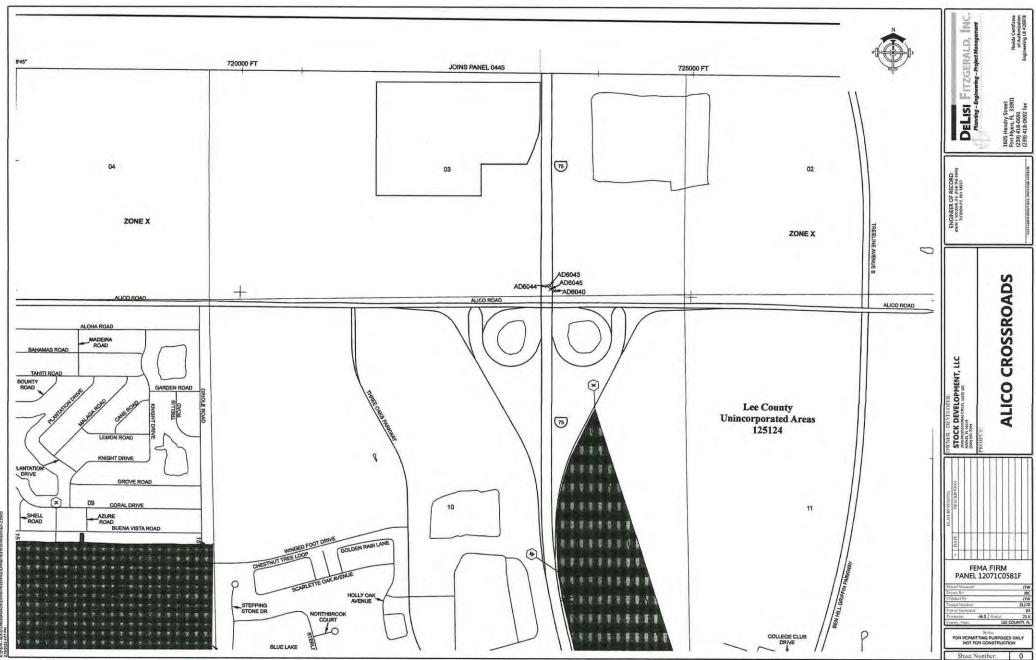

The Alico Crossroads Site is located within the Ten Mile Canal (South) Watershed and the TM3 Subwatershed. The site is relatively flat with a general surface flow direction from the east to the west. Elevations on the site average at 18' NAVD±. Runoff from the site is currently uncontrolled.

As part of the Three Oaks Parkway and Oriole Road Extension, a SFWMD permit was issued (Permit 36-05268-P). The permitted surface water management system requires dry detention areas to provide pre-treatment for runoff from the proposed development prior to discharge into the master surface water management system which discharges into waters of the Ten Mile Canal via the Alico Road / Briarcliff Ditch.

Proposed Conditions:

With this Comprehensive Plan Amendment, a mixed use project is envisioned with commercial outparcels along Three Oaks Parkway and multi-family residential on the remainder of the site. Dry detention will be provided prior to discharge into the lake / wetland system. The surface water management system provides the required water quality and attenuation for the 25 year – 3 day storm including an additional 50% above the required water quality volume. The surface water management system will maintain historic flow patterns and discharge to the master surface water management system as currently permitted. The system will be designed in accordance with the rules of the South Florida Water Management District as well as the Development Standards of the Lee County Land Development Code.

TRAFFIC IMPACT STATEMENT

FOR

ALICO CROSSROADS CPD COMPREHENSIVE PLAN AMENDMENT & REZONING

(PROJECT NO. F2108.35)

PREPARED BY:

TR Transportation Consultants, Inc. Certificate of Authorization Number: 27003 2726 Oak Ridge Court, Suite 503 Fort Myers, Florida 33901-9356 (239) 278-3090

September 17, 2021

CONTENTS

- I. INTRODUCTION
- II. EXISTING CONDITIONS
- III. COMPREHENSIVE PLAN AMENDMENT ANALYSIS
- IV. ZONING ANALYSIS
- V. CONCLUSION

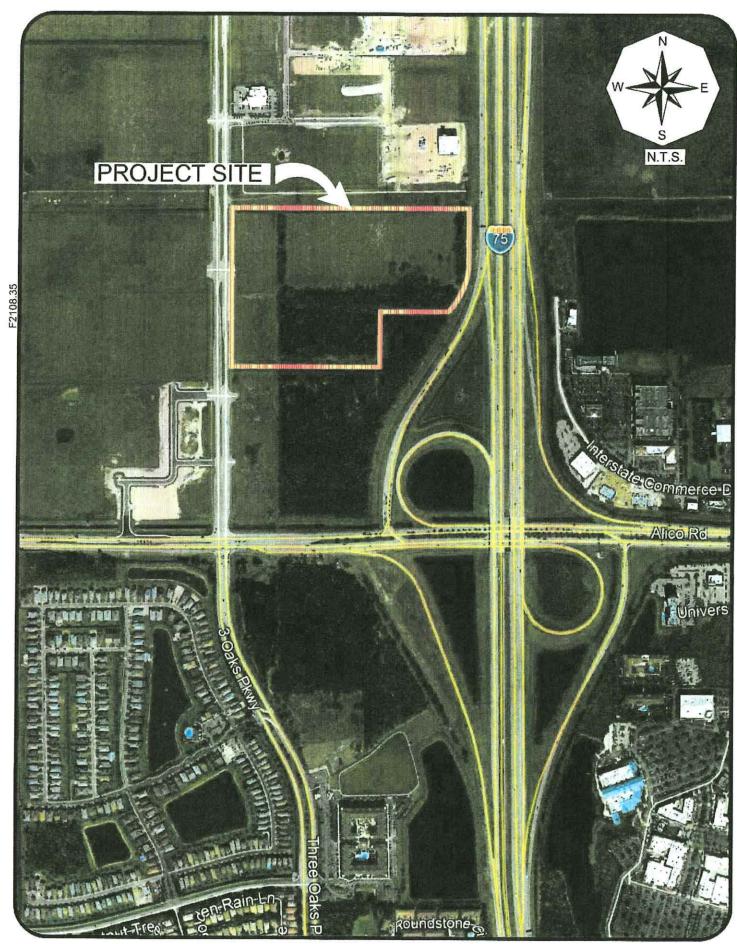

I. INTRODUCTION

TR Transportation Consultants, Inc. has conducted a traffic impact statement to fulfill requirements set forth by the Lee County Department of Community Development for projects seeking an amendment to the Comprehensive Land Use Plan and re-zoning approval. The subject site is located on the east side of Three Oaks Parkway just north of Alico Road in Lee County, Florida. Figure 1 illustrates the approximate location of the subject site.

The analysis in this report will determine the impacts of change in land use designation on the approximately 25 acre subject site from Industrial Commercial Interchange to General Interchange to permit the site to include multi-family residential units on the site. The analysis will also determine the impacts of the proposed rezoning from the permitted 351,000 square feet of commercial uses and 125 hotel rooms, to the requested 200,000 square feet of commercial uses, 250 hotel rooms and 475 multi-family residential dwelling units. The transportation related impacts of the proposed Comprehensive Plan amendment will be assessed based on the comparison between the currently allowed uses and the requested use on the subject site. The transportation related impacts of the proposed rezoning will be evaluated based on the estimated build-out year of the project and the impacts the proposed rezoning will have on the surrounding roadway infrastructure. Access to the subject site is proposed to be provided to Three Oaks Parkway via one right-in/right-out only access and one full access drive.

This report examines the impact of the development on the surrounding roadways. Trip generation and assignments to the various roadways within the study area will be completed and analysis conducted to determine the impacts of the development on the surrounding roadways.

PROJECT LOCATION MAP ALICO CROSSROADS CPD

II. EXISTING CONDITIONS

The subject site is currently vacant. This subject site is bordered by the Florida Gulf Coast Business Center to the north, Three Oaks Parkway to the west, Vintage Commerce Center CPD to the south and by I-75 to the east.

Three Oaks Parkway is a four-lane divided arterial roadway adjacent to the subject site. Three Oaks Parkway, north of Alico Road currently extends for approximately 1.2 miles where it terminates. Lee County is extending Three Oaks Parkway to the north to intersect Daniels Parkway. This improvement is funded in Lee County's Five Year Adopted Capital Improvement Plan. Three Oaks Parkway has a posted speed limit of 45 mph and is under the jurisdiction of Lee County.

Alico Road is an east/west six-lane divided arterial roadway that is located to the south of the subject site. Alico Road has a posted speed limit of 45 mph. Alico Road is under the jurisdiction of the Lee County Department of Transportation to the west of Three Oaks Parkway and under the jurisdiction of Florida Department of Transportation (FDOT) to the east of Three Oaks Parkway.

III. COMPREHENSIVE PLAN AMENDMENT ANALYSIS

The proposed Map Amendment would change the future land use designation on the approximate 25 acre subject site from Industrial Commercial Interchange to General Interchange to permit multi-family residential dwelling units on the subject site. In terms of roadway impacts, the existing future land use category of Industrial Commercial Interchange permits the development of intense land uses such as commercial, industrial and office uses. These permitted uses on site are more intense in terms of trip generation potential than a multi-family residential use on the subject site. Should a portion or all of the site be developed with multi-family dwelling units, the floor area associated with the currently permitted industrial and commercial uses would be reduced. Therefore, the existing 2045 Long Range Transportation Plan as adopted by the Lee County

Metropolitan Planning Organization (MPO), will not be impacted as a result of the requested change to the General Interchange land use designation to permit multi-family dwelling units on the subject site. Therefore, no changes to the adopted long range transportation plan nor the Lee County's Five Year Capital Improvement Program (CIP) are required as result of the proposed land use change.

IV. ZONING ANALYSIS

The subject site is currently governed by Zoning Resolution No. Z-03-017A which permits the development of the overall Alico Crossroads CPD with up to 351,000 square feet of commercial uses and 125 hotel rooms. The proposed rezoning request would allow the approximately 25 acre subject site to be developed with up to 200,000 square feet of commercial uses, 250 hotel rooms and 475 multi-family residential swelling units.

Table 1 summarizes the land uses that could be constructed under the existing zoning designation and the intensity of uses under the proposed zoning request.

Table 1 Land Uses Alico Crossroads CPD

| Land Use | Approved Under Z-03-017A | Proposed | Change |
|----------------|-----------------------------|--------------------|----------------------|
| Retail | 300,000 Sq. Ft. | 50,000 Sq. Ft. | -250,000 Sq. Ft. |
| General Office | 51,000 Sq. Ft. | 150,000 Sq. Ft. | + 99,000 Sq. Ft. |
| Hotel | 125 Hotel Rooms | 250 Hotel Rooms | + 125 Rooms |
| Multi-Family | * | 475 Dwelling Units | + 475 Dwelling Units |

Access to the subject site is proposed to be provided to Three Oaks Parkway via one right-in/right-out only access and one full access drive, which is consistent with the current Master Concept Plan approved under Z-03-017A.

Trip Generation

The trip generation for the proposed rezoning request was determined by referencing the Institute of Transportation Engineer's (ITE) report, titled *Trip Generation*, 10th Edition. Land Use Code 820 (Shopping Center) was utilized for the trip generation purposes of the proposed retail uses, Land Use Code 710 (General Office Building) was utilized for

the trip generation purposes of office uses, Land Use Code 310 (Hotel) was utilized for the trip generation purposes of hotel rooms and Land Use Code 221 (Multi-Family Housing Mid-Rise) was utilized for the trip generation purposes of multi-family residential dwelling units. **Table 2** outlines the anticipated weekday A.M. and P.M. peak hour and daily trip generation of the CPD as currently approved. **Table 3** outlines the anticipated weekday A.M. and P.M. peak hour and daily trip generation of the CPD as proposed with this zoning amendment.

Table 2
Trip Generation – Approved
Alico Crossroads CPD

| Land Use | Weekd | ay A.M. Pe | ak Hour | Weekd | ay P.M. Pe | ak Hour | Daily | |
|--------------------------------------|-------|------------|---------|-------|------------|---------|---------|--|
| Land Ose | In | Out | Total | In | Out | Total | (2-way) | |
| Shopping Center (300,000 Sq. Ft.) | 187 | 115 | 302 | 588 | 637 | 1,225 | 12,690 | |
| General Office (51,000 Sq. Ft.) | 64 | 10 | 74 | 10 | 50 | 60 | 552 | |
| Hotel (125 Hotel Rooms) | 34 | 23 | 57 | 35 | 33 | 68 | 984 | |
| Total Trips | 285 | 148 | 433 | 633 | 720 | 1,353 | 14,226 | |

Table 3
Trip Generation – Proposed
Alico Crossroads CPD

| | | 10.000.000 | | | | | |
|--------------------------------------|-------|------------|---------|-------|-------------|---------|---------|
| Land Use | Weekd | ay A.M. Pe | ak Hour | Weekd | lay P.M. Pe | ak Hour | Daily |
| Land Ose | In | Out | Total | In | Out | Total | (2-way) |
| Shopping Center (50,000 Sq. Ft.) | 110 | 67 | 177 | 156 | 169 | 325 | 3,752 |
| General Office (150,000 Sq. Ft.) | 144 | 23 | 167 | 27 | 140 | 167 | 1,572 |
| Hotel (250 Hotel Rooms) | 71 | 49 | 120 | 81 | 80 | 161 | 2,396 |
| Multi-Family (475 Dwelling Units) | 41 | 117 | 158 | 121 | 77 | 198 | 2,587 |
| Total Trips | 366 | 256 | 622 | 385 | 466 | 851 | 10,307 |

The total trips generated by the project will not all be new trips added to the adjacent roadway system. With mixed use projects, ITE estimates that there will be a certain amount of interaction between uses that will reduce the overall trip generation of the approved CPD and the proposed CPD Amendment. This interaction is called "internal

capture". In other words, trips that would normally come from external sources would come from uses that are within the project, thus reducing the overall impact the development has on the surrounding roadways. ITE, in conjunction with a study conducted by the NCHRP (National Cooperative Highway Research Program), has summarized the internal trip capture reductions between various land uses. For uses shown in Table 2 and Table 3, there is data in the ITE report for interaction between the retail, office, hotel and residential uses.

An internal capture calculation was completed consistent with the methodologies in the NCHRP Report and published in the *ITE Trip Generation Handbook*, 3rd Edition. The resultant analysis indicates that with the approved CPD scenario there will be an internal trip capture reduction of five percent (5%) in the A.M. peak hour and four percent (4%) in the PM peak hour between the retail, office and hotel uses. The analysis also indicates that with the proposed CPD Amendment scenario there will be an internal trip capture reduction of eight percent (8%) in the AM peak hour and twenty-two percent (22%) in the P.M. peak hour between the retail, office, hotel and residential uses. The summary sheets utilized to calculate these internal capture rates for the weekday AM peak hour and PM peak hour are included in the Appendix of this report for reference.

Pass-by traffic was also taken into account based on the retail uses presented in each scenario. The current version of the *ITE Trip Generation Handbook*, 3rd Edition, indicates that the weekday PM peak hour pass-by rate for Land Use Code 820 is thirty-four percent (34%). However, consistent with previous analysis approved by Lee County, thirty percent (30%) of the total project traffic was assumed to be pass-by traffic. **Table 4** indicates the total external trips of the subject site based on the approved CPD. **Table 5** indicates the total external trips of the subject site based on the proposed CPD Amendment.

Table 4
Trip Generation – Net New Trips of Approved Uses
Alico Crossroads CPD

| Less LUC 820 Pass- By Trips | -43 | -43 | -86 | -176 | -176 | -352 | -3,617 |
| Net New Trips | 231 | 94 | 325 | 433 | 520 | 953 | 9,898 |

Table 5
Trip Generation – Net New Trips of Proposed Uses
Alico Crossroads CPD

| Tand Has | Weekda | y A.M. Pe | ak Hour | Weekda | y P.M. Pe | ak Hour | Daily |
|---|--------|-----------|---------|--------|-----------|---------|---------|
| Land Use | In | Out | Total | In | Out | Total | (2-way) |
| Total Trips | 366 | 256 | 622 | 385 | 466 | 851 | 10,307 |
| Less Internal Capture 8% AM / 22% PM | -24 | -24 | -48 | -94 | -94 | -188 | -2,268 |
| Total Trips (Less Internal Capture) | 342 | 232 | 574 | 291 | 372 | 663 | 8,039 |
| Less LUC 820 Pass- By Trips | -24 | -24 | -48 | -38 | -38 | -76 | -878 |
| Net New Trips | 318 | 208 | 526 | 253 | 334 | 587 | 7,161 |

Table 6 indicates the trip generation difference between the uses approved in the CPD and the proposed uses in the CPD Amendment (Table 4 vs Table 5).

Table 6
Trip Generation Comparison – Approved Zoning vs Proposed Zoning
Table 4 vs Table 5

| I and Has | Weekday A.M. Peak Hour | | | Weekd | Daily | | |
|-----------------------|------------------------|------|-------|-------|-------|-------|---------|
| Land Use | In | Out | Total | In | Out | Total | (2-way) |
| Proposed Zoning | 317 | 207 | 524 | 253 | 334 | 587 | 7,161 |
| Approved Zoning | -231 | -94 | -325 | -433 | -520 | -953 | -9,898 |
| Resultant Trip Change | +87 | +114 | +201 | -180 | -186 | -366 | -2,737 |

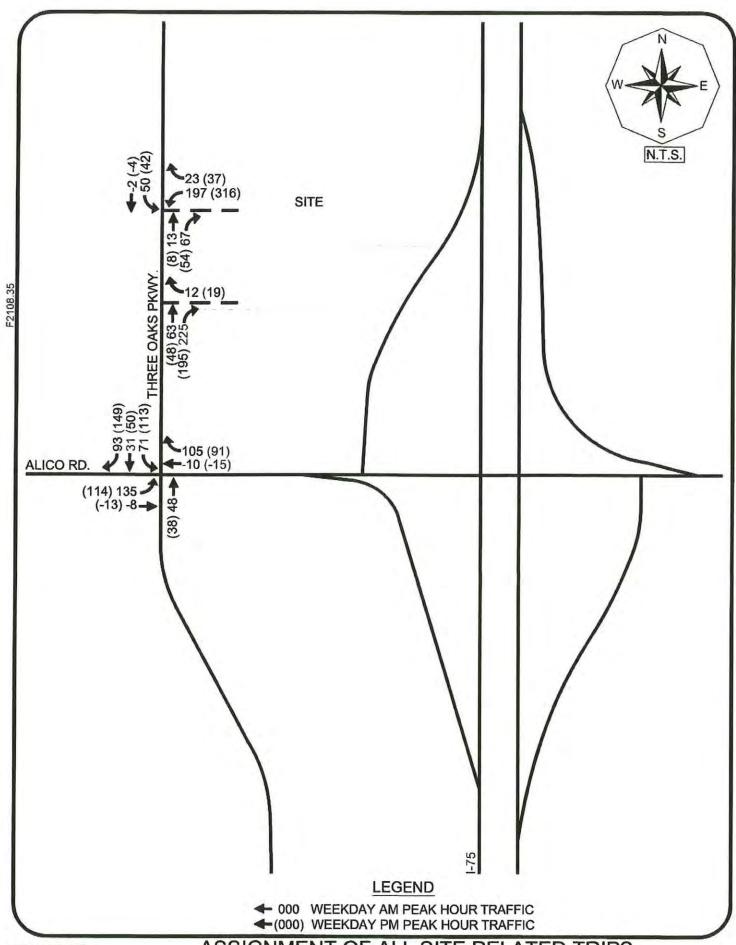

As can be seen from Table 6, the requested zoning will increase the traffic impacts of the development by approximately 62% in the AM peak hour and decrease the traffic impacts of the development by approximately 38% in the PM peak hour and approximately 28% over the entire weekday from what is currently approved. The weekday P.M. peak hour trip generation is typically the period utilized for the Level of Service impacts to the surrounding roadway network as this is the hour that generates the greatest number of vehicle trip, which remains the case in the amendment. The weekday P.M. peak hour trips shown in Table 5 are approximately 12% higher than the trips in the A.M. peak hour. Therefore, the trips analyzed in the previous zoning approval (953 weekday P.M. peak hour trips) are still substantially higher than the trips analyzed as part of this zoning amendment (587 weekday P.M. peak hour trips).

Trip Distribution

The trips the proposed development is anticipated to generate, as shown in the Table 5, were then assigned to the surrounding roadway network. The net new trips anticipated to be added to the surrounding roadway network were assigned based upon the routes drivers are anticipated to utilize to approach the subject site. Figure A-1, included in the Appendix of this report, illustrates the percent project traffic distribution and assignment of the net new project trips. Figure A-2, included in the Appendix of this report, illustrates the percent project traffic distribution and assignment of pass-by trips. Figure 2 illustrates the resulting assignment of all project related trips (net new + pass-by).

In order to determine which roadway segments surrounding the site may be significantly impacted as outlined in the Lee County Traffic Impact Statement Guidelines, Table 1A, in the Appendix, was created. This table indicates which roadway links will accommodate greater than 10% of the Peak Hour Level of Service "C" volumes. The Level of Service threshold volumes were obtained from the *Lee County Generalized Peak Hour Directional Service Volume Tables* (June, 2016). Based on Table 1A, only Three Oaks Parkway between Alico Road and the site is projected to be significantly impacted as a result of the proposed CPD Amendment. A copy of the Generalized Service Volume Table is located in the Appendix of this report for reference.

Level of Service Analysis

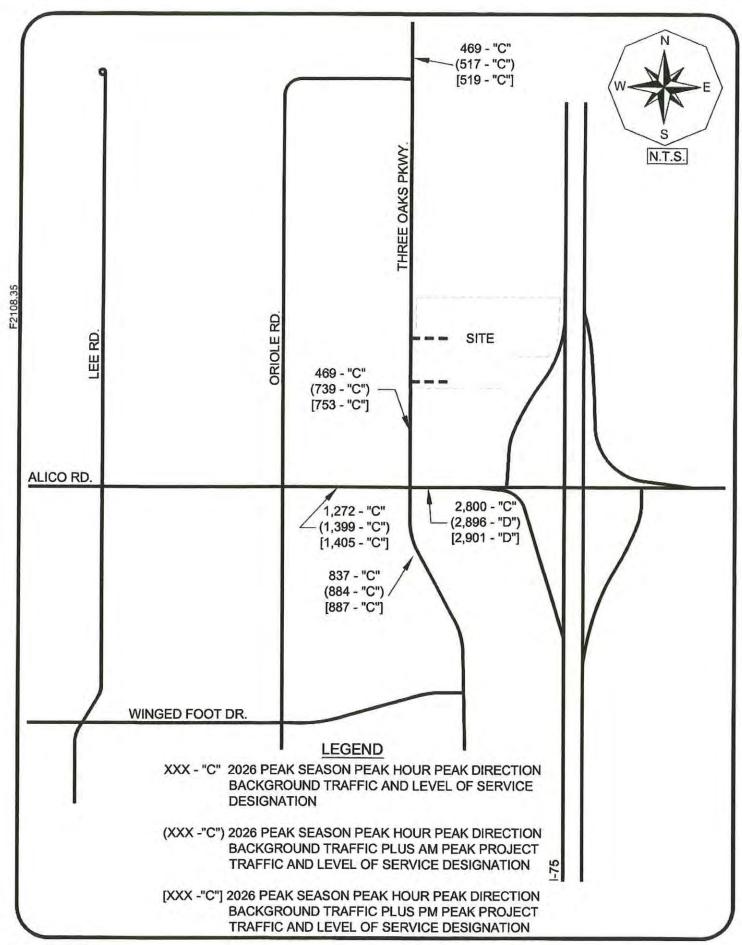

The future Level of Service analysis was based on a 5-year horizon, or year 2026. Based on this horizon year analysis, the surrounding roadway network was analyzed under 2026 traffic conditions. A growth rate was applied to the existing traffic conditions for all roadway links and intersections that could be significantly impacted by this development. For the Alico Road and Three Oaks Parkway, the existing and historical traffic data was obtained from the 2020 *Lee County Traffic Count Report*.

Table 2A in the Appendix of the report indicates the methodology utilized to obtain the year 2026 build-out traffic volumes as well as the growth rate utilized for each roadway segment analyzed. The existing 2019 peak hour peak season peak direction volumes for all roadways were obtained from the 2020 Lee County Public Facilities Level of Service and Concurrency Report.

Figure 3 indicates the year 2026 peak hour – peak direction traffic volumes and Level of Service for the various roadway links within the study area. Noted on Figure 3 is the peak hour – peak direction volume and Level of Service of each link should no development occur on the subject site and the peak hour – peak direction volume and Level of Service for the weekday A.M and P.M. peak hours with the development traffic added to the roadways. Figure 3 is derived from Table 2A contained in the Appendix.

As can be seen from Figure 3, all analyzed roadway links are anticipated to maintain their minimum recommended Level of Service standards as contained in the Lee County Comprehensive Plan. Therefore, no roadway capacity improvements will be warranted as a result of the additional traffic to be generated by the proposed development.

Turn lane improvements at the site access drive intersections will be evaluated at the time the project seeks a Local Development Order approval.

VII. CONCLUSION

The proposed project is located on the east side of Three Oaks Parkway just north of Alico Road in Lee County, Florida. As discussed in the report, uses permitted within the existing future land use category of Industrial Commercial Interchange generates more external vehicle trips than multi-family residential dwelling units, which would be permitted in a zoning amendment should the Future Lane Use Category be changed to General Interchange. Therefore, the 2045 Financially Feasible Roadway network and the County's 5-year Capital Improvement Program currently in place will not require modification in order to accommodate the proposed Land Use change.

Based upon the roadway link Level of Service analysis conducted as a part of the proposed rezoning request, all roadway links are anticipated to maintain their minimum recommended Level of Service standards as contained in the Lee County Comprehensive Plan. Therefore, no roadway capacity improvements are necessary to accommodate the proposed development.

¹ The 2019 100th highest hour traffic volumes were obtained from the 2020 Lee County Public Facilities Level of Service and Concurrency Report.

Note: For Three Oaks Pkwy north of Alico Road, the future peak hour peak season peak direction volume was obtained from the 2027 FSUTMS provided by the County

^{*} AGR for Alico Road and Three Oaks Parkway was calculated based the historical traffic data obtained from 2020 Lee County Traffic Count Report

Land Use Codes (LUCs) from Trip Generation Manual, published by the Institute of Transportation Engineers.

²Total estimate for all other land uses at mixed-use development site is not subject to internal trip capture computations in this estimator

Enter trips assuming no transit or non-motorized trips (as assumed in ITE Trip Generation Manual).

Enter vehicle occupancy assumed in Table 1-A vehicle trips. If vehicle occupancy changes for proposed mixed-use project, manual adjustments must be made to Tables 5-A, 9-A (O and D). Enter transit, non-motorized percentages that will result with proposed mixed-use project complete.

⁵Vehicle-trips computed using the mode split and vehicle occupancy values provided in Table 2-A.

Person-Trips

DeLisi, Inc. Mr. Daniel DeLisi, AICP 520 27th Street West Palm Beach, Florida 33407

Re: Three Oaks Extension

Dear Mr. DeLisi.

Thank you for this opportunity to inform you about our fire district. The San Carlos Park Fire Protection and Rescue Service District is one of 17 Special Fire Districts in Lee County. The Insurance Service Office (ISO) currently rates our department with a Property Protection Class (PPC) of 2/2X. The district consists of a 52 square mile area with 4 stations staffed 24/7 with 58 full time firefighters, which also provide non-transport Advanced Life Support (ALS) services and supported by an administrative staff.

The property in question, the Three Oaks Extension, just north of Alico Road, on the west side of I-75, is within the jurisdiction of the San Carlos Park Fire District and is located approximately 1.3 miles from our station 54 located at 16900 Oriole Road, Fort Myers, FL 33912. With a response time of less than 3 minutes.

We are able to provide fire suppression and emergency medical services to the proposed development, as well as fire prevention, and public education service. If you require additional information, please do not hesitate to contact my office at (239) 267.7525. Trusting this meets with your approval, I remain,

Yours in Service,

David Cambareri,

Fire Chief

West Palm Beach, Florida 33407

Re: Letter of Service Availability - Three Oaks Commercial

Mr. DeLisi,

I am in receipt of your letter requesting a Letter of Service Availability for the commercial development along Three Oaks Extension. This property is identified as STRAP 03-46-25-00-00001.1080. The proposed entitlements are 50,000 square feet of retail, 150,000 square feet of office, 250 hotel rooms and 475 multi-family residential units.

Lee County Emergency Medical Services is the primary EMS transport agency responsible for coverage at the address you have provided. Because we currently serve this area and have a sufficient response data sample, we evaluated response times in this vicinity to simulate the anticipated demand and response.

The primary ambulance for this location is Medic 9, located 3.0 miles southwest; there is an additional EMS station within 4 miles of the proposed location. These locations are projected to be able to meet existing service standards, as required in County Ordinance 08-16, and no additional impacts are anticipated at this time.

It is our opinion that the service availability for the proposed development of this property is adequate at this time. Should the plans change, especially the density, a new analysis of this impact would be required.

Sincerely,

Benjamin Abes

Director, Public Safety

Carmine Marceno Sheriff

State of Florida County of Lee

August 27, 2021

Daniel DeLisi DeLisi, Inc. 520 27th St. West Palm Beach, FL, 33407

Mr. DeLisi,

The Lee County Sheriff's Office has reviewed your Letter of Service Availability request to change the land use category for 16541 Three Oaks Parkway, STRAP number 03-46-25-00-00001.1080 from Industrial Commercial Interchange to General Interchange.

The proposal for 50,000 square feet of retail, 150,000 square feet of office, 250 hotel rooms and 475 multi-family residential units would not affect the ability of the Lee County Sheriff's Office to provide core levels of service at this time.

Law enforcement services will be provided from our South District offices in Bonita Springs. As this development builds out, we will factor its impact into our annual manpower review and make adjustments accordingly. At the time of application for a Development Order or building permit, we request that the applicant provide a Crime Prevention Through Environmental Design (CPTED) report done by the applicant and given to the Lee County Sheriff's Office for review and comment.

Please contact Community Response Unit Manager Beth Schell at (239) 477-1676 with any questions regarding the CPTED study.

Respectfully,

Mark Shelly

Commander, Patrol Bureau

RE: Letter of Service Availability - Lee County Solid Waste

Roger Desjarlais County Manager Dear Mr. Delisi:

Richard Wm. Wesch County Attorney The Lee County Solid Waste Department is capable of providing solid waste collection service for the referenced general interchanged land use category. Disposal of the solid waste generated from the offices, hotel, a multifamily units will be performed at the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill. Plans have been made, allowing for growth, to maintain long-term disposal capacity at these facilities.

Donna Marie Collins County Hearing Examiner

Please ensure compliance with Solid Waste Ordinance No. 11-27 and LCLDC 10-261 for space requirements of garbage and recycling containers and accessibility of the collection vehicles. While there is no requirement in Ordinance No. 11-27 for bulk waste storage, please consider some additional space for the storage of bulk waste items that may not fit into a dumpster (mattress, appliance, furniture disposal etc.).

Garbage and recycling collections require the hotel owner/or the Management Company to secure a service agreement for the collection and an agreement for the lease of waste containers from the County's MSW and Recycling Collection Franchise Hauler, currently Waste Pro phone (239) 337-0800.

Solid Waste Ordinance (11-27) establishes that the Property Owner(s) will be responsible for all future applicable solid waste assessments and fees.

If you have any questions, please call me at (239) 533-8007.

Sincerely,

Justin Lighthall

RE: Request for Letter of Availability Three Oaks Extension

Mr. DeLisi,

LeeTran has reviewed your request for service availability in regards to a proposed Comprehensive Plan Amendment to the Future Land Use Map and its Schedule of Uses. After reviewing the site and comparing the location with our existing and planned route locations according to the 2016 Transit Development Plan (TDP), the following has been determined:

- Subject area is within one-quarter mile of a fixed-route corridor, but not adjacent, to bus route
 60, going eastbound on Alico Road
- Closest bus stop is not within one-quarter mile of a bus stop
- The 2016 TDP does not identify the need for enhanced or additional transit services in the area

Proposed future development does not currently meet applicability outlined in Sec. 10-442 and Sec. 10-443. Developer will not be required to connect to and improve transit facilities because project area is not adjacent to the bus route.

If transit services have been modified within one-quarter mile of the subject parcels at time of a DO or LDO type D submittal, necessary improvements will be determined at that time.

If you have any questions or require further information, please do not hesitate to contact me at (239) 533-0340 or jpuente@leegov.com.

Sincerely,

Jorge & Puente

April 18, 2022

RE: Multi family Concurrency Review in Estero

Dear Daniel DeLisi:

This letter is in response to your request for concurrency review dated March 28, 2022 for the subject property in Three Oaks Extension, just north of Alico Road of in regard to educational impact.

This development is a request for 475 Multi-family housing units. With regard to the inter-local agreement for school concurrency the generation rates are created from the type of dwelling unit and further broken down by grade level.

For multi-family homes, the generation rate is .116 and further broken down by grade level into the following, .149 for elementary, .0071 for middle and .077 for high. A total of 9.86 school-aged children would be generated and utilized for the purpose of determining sufficient capacity to serve the development.

The Concurrency Analysis attached, displays the impact of this development. Capacity is an issue within the Concurrency Service Area (CSA) at the elementary school level, however, capacity is available in the adjacent CSA.

Thank you and if I may be of further assistance, please contact me at 239-335-1494

Sincerely,

Jacqueline Heredia, District Planning Specialist

STATE POLICY PLAN AND REGIONAL POLICY PLAN EXHIBIT M18

There are no State or Regional Policy Plan goals or policies that are relevant to the proposed amendment.

PLANNING JUSTIFICATION EXHIBIT M19

Location and Property Description

The subject property is located in the northwest Interchange of I-75 and Alico Road. The property is in the Commercial Industrial Interchange land use category approximately a quarter mile north of Alico Road with direct access to the Three Oaks Parkway extension.

Proposed Request

The prosed amendment to the Lee Plan is to extend the General Interchange future land use category north to encompass the subject property. The current land use category on the property is Commercial Industrial Interchange, which generally allows for the same uses with the exception of higher density residential development.

Surrounding Uses/Compatibility

The subject property is located in an area with a mix of commercial and industrial uses. I-75 isolates the subject property from the uses that are located to the east. Across I-75 are a mix of commercial and industrial uses and zoned properties. To the north of the subject property are a mix of office/corporate headquarters and research and development uses. To the west of the subject property are vacant lands zoned for commercial and industrial uses.

To the south, of the subject property is the Vintage CPD. In 2020, The Board of County Commissioners adopted an amendment to the Lee Plan to change the Vintage property from the Commercial Industrial Interchange to General Interchange. This change allowed for an amendment to the zoning to be processed simultaneously to allow for the inclusion of residential units through a conversion of commercial floor area. The approved residential uses are located contiguous to the subject property at the northern most parcel in the Vintage CPD. Similar to the subject property's requested Comprehensive Plan Amendment, the Vintage CPD is now in the General Interchange future land use category, which allows for the development of the residential uses.

Changing Conditions

In 2003, the subject property was zoned for a variety of commercial office, retail and hotel uses, but has remained vacant for the last 18 years. Since 2003 there have been minor amendments to the zoning approval but has remained a commercial site. To the north of the subject property, development activity has started to occur with the location of the Geonomics headquarters and ... These uses are developing in a more efficient manner by

building vertically with greater square footage than the type of corporate office development that this area of Lee County has experienced in the past. As a result, the workforce that is being accommodated per acre is greater than past assumptions of development. We expect that trend to continue as the surrounding properties continue to develop and increase entitlements. As the area to the north of the subject property continues to develop for office and research and development uses, and the properties to the east, across I-75, near the airport, continues to develop, there will be an increasing need for a variety of housing opportunities to serve the growing workforce in the area.

In 2016, Lee County amended the General Interchange future land use category to allow for high density multi-family residential uses. Higher densities of residential development are strategic at these specific transportation nodes as they allow the workforce convenient access to employment locations both at and proximate to the interchanges and throughout Lee County. Since this amendment, zoning for residential projects at both the Daniels and Alico Interchanges have been approved.

Changing the future land use category of the subject property from Industrial Commercial Interchange will simply allow for a greater diversity of uses, including multi-family residential development. The subject property is already zoned for retail and office development. The zoning that is being processed concurrent with this amendment will maintain the current commercial uses but will reduce the total amount of retail, increase the office development and add multi-family residential development contiguous with the approved multi-family to the south. Overall, this is a more diverse mixed-use plan that will continue to allow for the office development that is desirable at this location but add residential uses that will house the workforce of the office and industrial development of the subject property and surrounding properties.

The proposed amendment will have no impact on environmentally sensitive resources in Lee County. The subject property is mostly cleared and in improved pasture. The vegetated Pine Flattwood area on the property is heavily infested with exotic vegetation. Shifting from one urban use (Commercial) to another urban use (residential and commercial) has little impact on the site's development or environment, however, adding residential development to the site will increase the development's indigenous preservation requirement.

The subject property contains no historic resources. The proposed amendment will have no impact to historic resources. According to the attached Archeological Sensitivity Map, the subject property is not located in any sensitivity zone. The Division of Historic Resources has also issued a response stating that there are no known historic resources on the subject property.

Conclusion

In conclusion, the subject property is already entitled for commercial development. Development of the property will not have negative environmental or transportation impacts and will not negatively impact historic resources in Lee County. The proposed land

use change simply adds multi-family residential to the mix of uses on the subject property. The addition of multi-family residential development at this location both diversifies the areas housing opportunities and provides for needed housing in very close proximity to major employment centers at the Alico Interchange, with easy access to the entire County via I-75. The proposed amendment is consistent with and implements several policies in the Lee Plan. For these reasons, the proposed amendment should be approved.

ANALYSIS OF IMPACTS FROM THE PROPOSED CHANGE EXHIBIT T5

Location and Property Description

The subject property is located in the northwest Interchange of I-75 and Alico Road. The property is in the Commercial Industrial Interchange land use category approximately a quarter mile north of Alico Road with direct access to the Three Oaks Parkway extension (See attached Aerial T5a).

Proposed Request

The prosed text amendment is in conjunction with Lee Plan Map Amendment CPA2021-00012, and a concurrent rezoning application. The Map Amendment will extend the General Interchange future land use category north to encompass the subject property to provide for a location for residential multi-family development. Table 1b of the Lee Plan will need to be amended to add 30 acres (in addition to the 15 acres existing) of residential allocation in the General Interchange future land use category within the Gateway/Airport Planning Community.

Effect on Other Properties

The proposed text amendment to increase the residential allocation in the General Interchange future land use category only within the Gateway/Airport Planning Community will only affect the subject property. There is only one other property in this Planning Community that also is designated in the General Interchange, the Vintage CPD to the south of the subject property (See attached Proposed FLUM T5b).

In 2020, The Board of County Commissioners adopted an amendment to the Lee Plan to change the Vintage property from the Commercial Industrial Interchange to General Interchange. In doing so, Vintage processed an amendment to Table 1b, concurrent with the map amendment to add 15 acres of residential area within the Gateway/Airport Planning Community. Therefore, there will be no effect on the Vintage property. Since there are no other properties designated as General Interchange in this Planning Community, the proposed text amendment only applies to the subject property.

Changing Conditions

In 2003, the subject property was zoned for a variety of commercial office, retail and hotel uses, but has remained vacant for the last 18 years. Since 2003 there have been minor amendments to the zoning approval but has remained a commercial site. To the north of the subject property, development activity has started to occur with the location of the

Geonomics headquarters. These uses are developing in a more efficient manner by building vertically with greater square footage than the type of corporate office development that this area of Lee County has experienced in the past. As a result, the workforce that is being accommodated per acre is greater than past assumptions of development. We expect that trend to continue as the surrounding properties continue to develop and increase entitlements. As the area to the north of the subject property continues to develop for office and research and development uses, and the properties to the east, across I-75, near the airport, continue to develop, there will be an increasing need for a variety of housing opportunities to serve the growing workforce in the area.

In 2016, Lee County amended the General Interchange future land use category to allow for high density multi-family residential uses. Higher densities of residential development are strategic at these specific transportation nodes as they allow the workforce convenient access to employment locations both at and proximate to the interchanges and throughout Lee County. Since this amendment, zoning for residential projects at both the Daniels and Alico Interchanges have been approved.

Changing the future land use category of the subject property from Industrial Commercial Interchange and adding the additional acres in Table 1b will simply allow for a greater diversity of uses, including multi-family residential development. The subject property is already zoned for retail and office development. The zoning that is being processed concurrent with this amendment will maintain the current commercial uses but will reduce the total amount of retail, increase the office development and add multi-family residential development contiguous with the approved multi-family to the south. Overall, this is a more diverse mixed-use plan that will continue to allow for the office development that is desirable at this location but add residential uses that will house the workforce of the office and industrial development of the subject property and surrounding properties.

The proposed amendment will have no impact on environmentally sensitive resources in Lee County. The subject property is mostly cleared and in improved pasture. The vegetated Pine Flattwoods area on the property is heavily infested with exotic vegetation. Shifting from one urban use (commercial) to another urban use (residential and commercial) has little impact on the site's development or environment, however, adding residential development to the site increases the development's indigenous preservation requirement.

The subject property contains no historic resources. The proposed amendment will have no impact to historic resources. According to the attached Archeological Sensitivity Map, the subject property is not located in any sensitivity zone. The Division of Historic Resources has also issued a response stating that there are no known historic resources on the subject property.

Although a small area in the northwest corner of the subject property is located in Airport Noise Zone C, this is outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development wil comply with all other land use regulations ensuring compatibility with airport operations.

2 | Page

In accordance with **Policy 95.1.3** the following is a description of the impact that the proposed change will have on public services. This analysis is based on a comparison of the existing approved zoning on the property with the proposed zoning that is being submitted concurrent with the proposed plan amendment.

| Approved Zoning | Proposed Zoning | | | | | |
|-------------------------|-------------------------|--|--|--|--|--|
| Retail: 300,000 sq. ft. | Retail: 50,000 sq. ft. | | | | | |
| Office: 51,000 sq. ft. | Office: 150,000 sq. ft. | | | | | |
| Hotel: 125 Rooms | Hotel: 250 Rooms | | | | | |
| Residential: N/A | Residential: 475 Units | | | | | |

- a. Sanitary Sewer
- b. Potable Water

See attached analysis from DeLisi Fitzgerald, Inc. The proposed land use change will result in an increase of approximately 84,850 additional gallons per day in demand and a total of approximately 150,000 GPD of total demand for water and wastewater. As demonstrated in the analysis, capacity exists in the Lee County Utilities system to meet the projected demand.

c. Surface Water/Drainage Basins

See attached analysis from DeLisi Fitzgerald, Inc. The proposed Future Land Use Map Amendment will have no impact on surface water. The current land use category allows for development consistent with state permitting. The proposed land use change does not alter the likelihood of development of the stormwater rules for permitting.

d. Parks, Recreation, and Open Space

The level of service for Parks is established in Policy 95.1.3.6 as follows:

NON-REGULATORY STANDARDS

6. Parks and Recreation Facilities: Minimum Level of Service:

- (a) Regional Parks 6 acres of developed regional park land open for public use per 1000 total seasonal county population.
- (b) Community Parks 0.8 acres of developed standard community parks open for public use per 1000 permanent population, unincorporated county only.

According to the Lee County Concurrency Report for 2020, based on the County's population, there is a need for 5,202 acres of Regional Park area and 289 acres of community Park Area. The County is currently served by 7,051 acres of Regional Park area

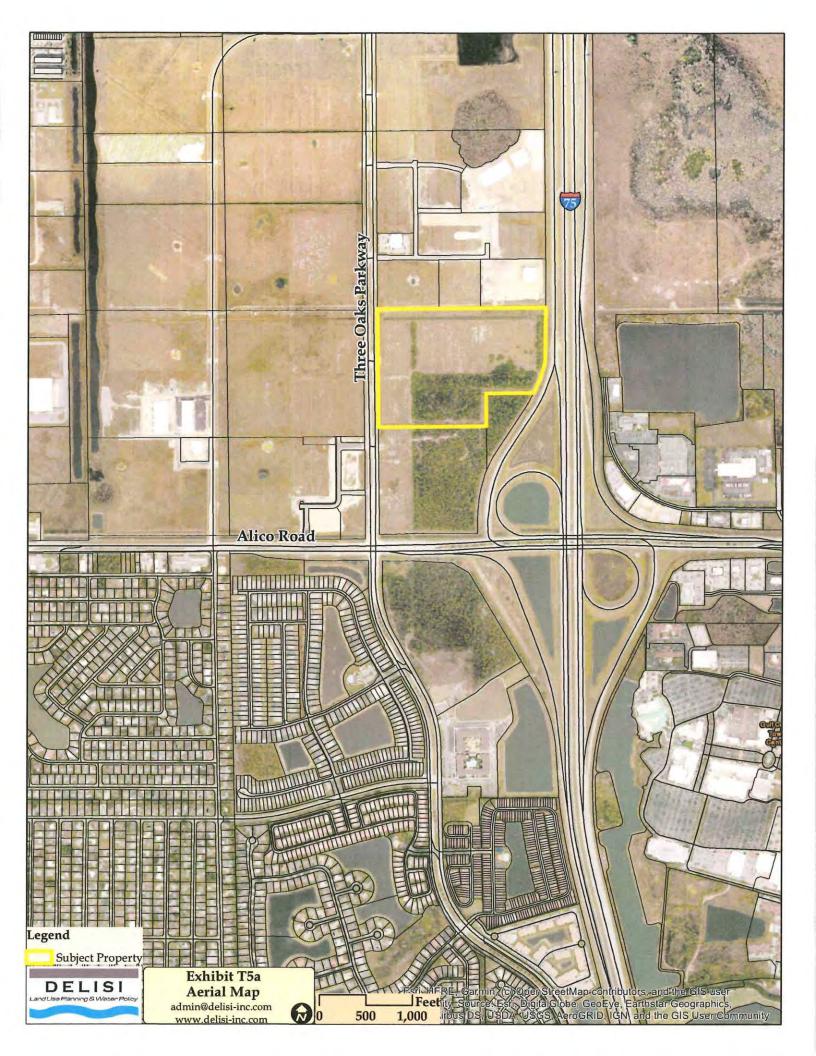

and 832 acres of Community Park area. Even without the additional planned park facilities, there is more than sufficient capacity to serve the proposed increase of 475 residential units.

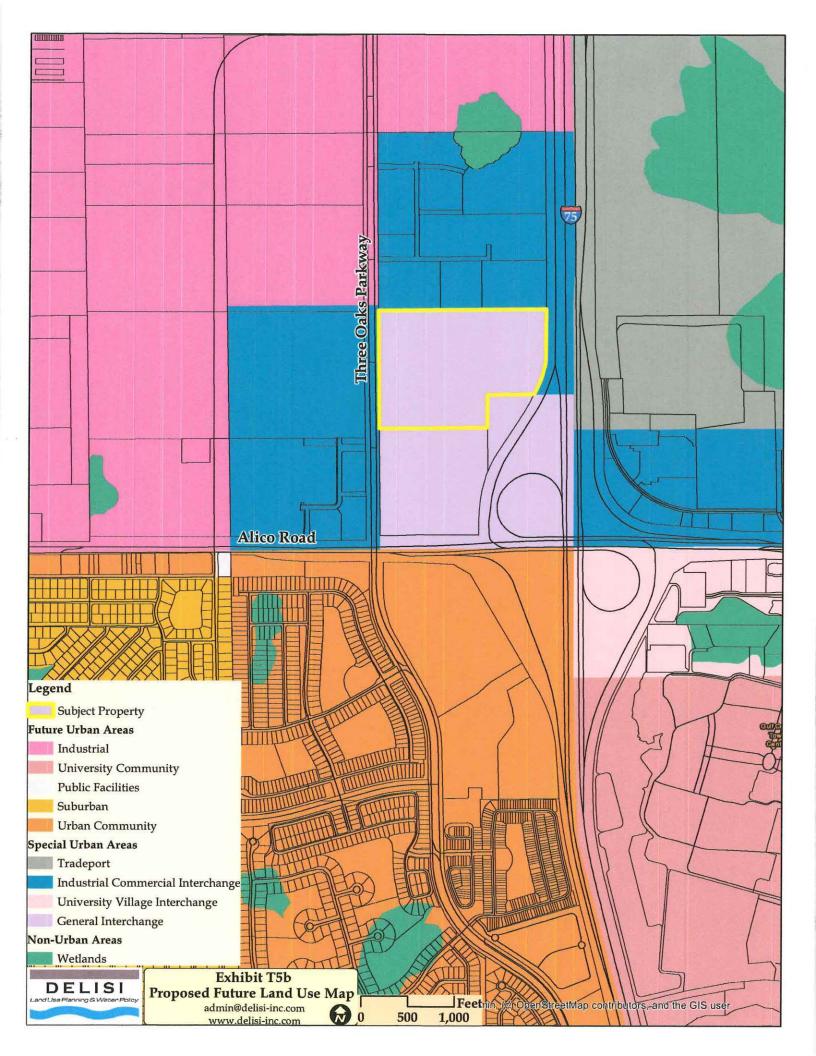

e. Public Schools.

See attached Letter and analysis from the Lee County School District.

Conclusion

In conclusion, the subject property is already entitled for commercial development. Development of the property will not have negative environmental or transportation impacts and will not negatively impact historic resources in Lee County. The proposed text amendment simply adds 30 acres of residential area to the General Interchange land use category in the Gateway/Airport Planning Community, effecting only the subject property and allowing for the addition of multi-family residential to the mix of uses. The addition of multi-family residential development at this location both diversifies the areas housing opportunities and provides for needed housing in very close proximity to major employment centers at the Alico Interchange, with easy access to the entire County via I-75. The proposed amendment is consistent with and implements several policies in the Lee Plan. For these reasons, the proposed amendment should be approved.

Infrastructure Analysis

WATER AND SEWER DEMANDS

The current CPD approved within this General Interchange property would allow 300,000 SF commercial retail, 51,000 SF office, and a 125-room hotel or the optional development scenarios identified with the CPD development program. The proposed entitlements would allow a maximum of 50,000 SF commercial retail, 150,000 SF office, 250 hotel rooms and 475 multi-family residential units. To assess any water and sewer infrastructure impacts, the maximum demand under the existing entitlement will be compared to the maximum demand under the proposed entitlements. The maximum demands are summarized below:

| | | Existing Water | / Sewer Demand | ds | | |
|--|----------------------|--|-----------------------------|------------------------------|-------------------------------------|--|
| SF Commercial Retail | | Average Daily Flow per Unit (GPD) | Average Daily Flow (GPD) | Peak Factor (Water/Sewer) | Peak Flow (GPM) (Water/Sewer) | |
| 300,000 SF | Commercial Retail | 0.15 | 45,000 | 2.5 / 3.0 | 78 / 94 | |
| 51,000 SF | Office | 0.15 | 7,650 | 2.5 / 3.0 | 13 / 16 | |
| 125 Rooms | Hotel | 100 | 12,500 | 2.5 / 3.0 | 22 / 26 | |
| N | /laximum Demand (Exi | sting) | 65,150 | | 113 / 136 | |
| | | Proposed Wate | er / Sewer Deman | nds | | |
| Units | Average | | Average Daily Flow (GPD) | Peak Factor (Water/Sewer) | Peak Flow (GPM) (Water/Sewer) | |
| 50,000 SF | Commercial Retail | 0.15 | 7,500 | 2.5 / 3.0 | 13 / 16 | |
| 150,000 SF Office | | 0.15 | 22,500 2.5 / 3.0 | | 39 / 47 | |
| 250 Rooms | Hotel | 100 | 25,000 | 2.5 / 3.0 | 43 / 52 | |
| 475 Multi-Family 200 Units Residential | | | 05.000 | 2.5 / 3.0 | 165 / 198 | |
| | | 200 | 95,000 | 2.5 / 5.0 | 103 / 130 | |

POTABLE WATER

Existing Conditions:

Currently Lee County Utilities owns a 16-inch water main along the west side of Three Oaks Parkway and an 8-inch force main along the east side of Three Oaks Parkway.

Plant Capacity:

The project is served by the Green Meadows Water Treatment Plant. Presently this plant is design to 14.0 Million Gallons per Day (MGD) of production per the 2020 Lee County Public Facilities Level of Service and Concurrency Report. Per the Potable Water and Wastewater Availability Letter dated September 17, 2021, Lee County Utilities presently has sufficient capacity to provide potable water service to this project.

The existing South Florida Water Management District (SFWMD) consumptive water use permit #36-00003-W states that the permitted annual allocation is 12,508 million gallons which is the equivalent of 34.3 MGD of raw water.

Future Conditions:

For this project, the ideal connection point is along Three Oaks Parkway. It is recommended to loop the water main system internally to allow for redundancy in the system. Although the proposed change results in increased water demand, the additional plant capacity to serve the project is available. The calculated Average Daily Flow of 150,000 GPD (0.15 MGD) is available in the existing system.

SANITARY SEWER

Existing Conditions:

Currently Lee County Utilities owns the existing 8-inch force main along the east side of Three Oaks Parkway which ultimately discharges into the Three Oaks Wastewater Treatment Plant.

Plant Capacity:

The project is served by the Three Oaks Wastewater Treatment Plant. Presently this plant is designed with an average daily capacity of 6.0 MGD per the 2020 Lee County Public Facilities Level of Service and Concurrency Report. Per the Potable Water and Wastewater Availability Letter dated September 17, 2021, Lee County Utilities presently has sufficient capacity to provide sanitary sewer service to this project.

Future Conditions:

For this project, the ideal connection point is the existing force main along Three Oaks Parkway. Although the proposed change results in an increase in sewer flows, the existing Three Oaks Wastewater Treatment Plant has the additional capacity to serve the project. The calculated Average Daily Flow is 150,000 GPD (0.15 MGD) and the existing system has the capacity for the proposed project.

SURFACE WATER

Existing Conditions:

The Alico Crossroads Site is located within the Ten Mile Canal (South) Watershed and the TM3 Subwatershed. The site is relatively flat with a general surface flow direction from the east to the west. Elevations on the site average at 18' NAVD±. Runoff from the site is currently uncontrolled.

As part of the Three Oaks Parkway and Oriole Road Extension, a SFWMD permit was issued (Permit 36-05268-P). The permitted surface water management system requires dry detention areas to provide pre-treatment for runoff from the proposed development prior to discharge into the master surface water management system which discharges into waters of the Ten Mile Canal via the Alico Road / Briarcliff Ditch.

Proposed Conditions:

With this Comprehensive Plan Amendment, a mixed use project is envisioned with commercial outparcels along Three Oaks Parkway and multi-family residential on the remainder of the site. Dry detention will be provided prior to discharge into the lake / wetland system. The surface water management system provides the required water quality and attenuation for the 25 year – 3 day storm including an additional 50% above the required water quality volume. The surface water management system will maintain historic flow patterns and discharge to the master surface water management system as currently permitted. The system will be designed in accordance with the rules of the South Florida Water Management District as well as the Development Standards of the Lee County Land Development Code.

April 18, 2022

RE: Multi family Concurrency Review in Estero

Dear Daniel DeLisi:

This letter is in response to your request for concurrency review dated March 28, 2022 for the subject property in Three Oaks Extension, just north of Alico Road of in regard to educational impact.

This development is a request for 475 Multi-family housing units. With regard to the inter-local agreement for school concurrency the generation rates are created from the type of dwelling unit and further broken down by grade level.

For multi-family homes, the generation rate is .116 and further broken down by grade level into the following, .149 for elementary, .0071 for middle and .077 for high. A total of 9.86 school-aged children would be generated and utilized for the purpose of determining sufficient capacity to serve the development.

The Concurrency Analysis attached, displays the impact of this development. Capacity is an issue within the Concurrency Service Area (CSA) at the elementary school level, however, capacity is available in the adjacent CSA.

Thank you and if I may be of further assistance, please contact me at 239-335-1494

Sincerely,

Jacqueline Heredia, District Planning Specialist

CONTENTS

- I. INTRODUCTION
- II. EXISTING CONDITIONS
- III. COMPREHENSIVE PLAN AMENDMENT ANALYSIS
- IV. ZONING ANALYSIS
- V. CONCLUSION

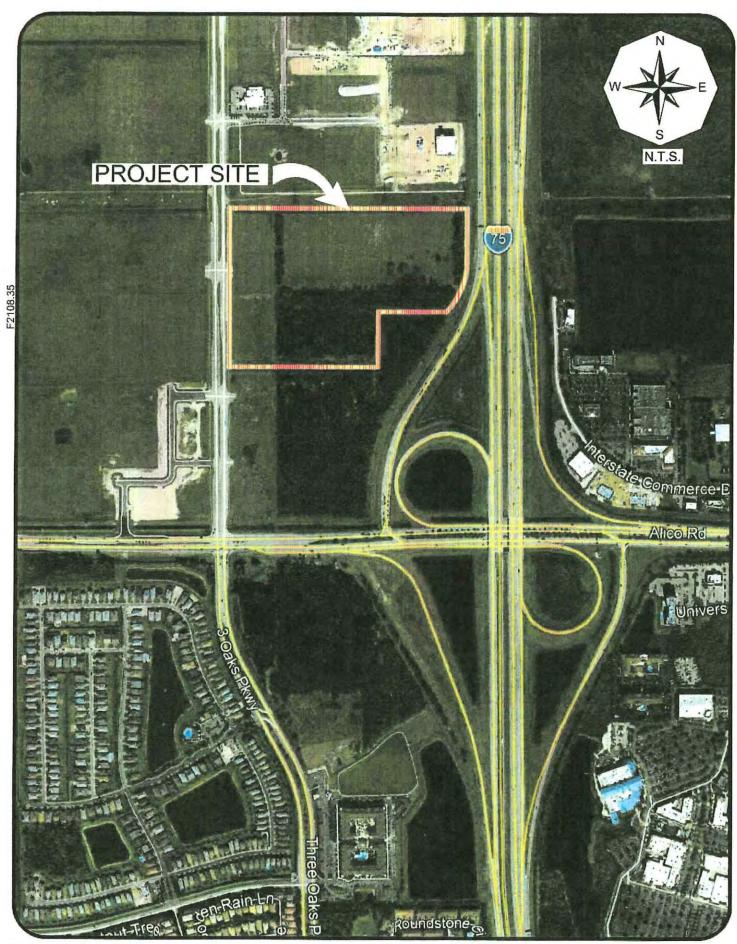

I. INTRODUCTION

TR Transportation Consultants, Inc. has conducted a traffic impact statement to fulfill requirements set forth by the Lee County Department of Community Development for projects seeking an amendment to the Comprehensive Land Use Plan and re-zoning approval. The subject site is located on the east side of Three Oaks Parkway just north of Alico Road in Lee County, Florida. **Figure 1** illustrates the approximate location of the subject site.

The analysis in this report will determine the impacts of change in land use designation on the approximately 25 acre subject site from Industrial Commercial Interchange to General Interchange to permit the site to include multi-family residential units on the site. The analysis will also determine the impacts of the proposed rezoning from the permitted 351,000 square feet of commercial uses and 125 hotel rooms, to the requested 200,000 square feet of commercial uses, 250 hotel rooms and 475 multi-family residential dwelling units. The transportation related impacts of the proposed Comprehensive Plan amendment will be assessed based on the comparison between the currently allowed uses and the requested use on the subject site. The transportation related impacts of the proposed rezoning will be evaluated based on the estimated build-out year of the project and the impacts the proposed rezoning will have on the surrounding roadway infrastructure. Access to the subject site is proposed to be provided to Three Oaks Parkway via one right-in/right-out only access and one full access drive.

This report examines the impact of the development on the surrounding roadways. Trip generation and assignments to the various roadways within the study area will be completed and analysis conducted to determine the impacts of the development on the surrounding roadways.

PROJECT LOCATION MAP ALICO CROSSROADS CPD

II. EXISTING CONDITIONS

The subject site is currently vacant. This subject site is bordered by the Florida Gulf Coast Business Center to the north, Three Oaks Parkway to the west, Vintage Commerce Center CPD to the south and by I-75 to the east.

Three Oaks Parkway is a four-lane divided arterial roadway adjacent to the subject site. Three Oaks Parkway, north of Alico Road currently extends for approximately 1.2 miles where it terminates. Lee County is extending Three Oaks Parkway to the north to intersect Daniels Parkway. This improvement is funded in Lee County's Five Year Adopted Capital Improvement Plan. Three Oaks Parkway has a posted speed limit of 45 mph and is under the jurisdiction of Lee County.

Alico Road is an east/west six-lane divided arterial roadway that is located to the south of the subject site. Alico Road has a posted speed limit of 45 mph. Alico Road is under the jurisdiction of the Lee County Department of Transportation to the west of Three Oaks Parkway and under the jurisdiction of Florida Department of Transportation (FDOT) to the east of Three Oaks Parkway.

III. COMPREHENSIVE PLAN AMENDMENT ANALYSIS

The proposed Map Amendment would change the future land use designation on the approximate 25 acre subject site from Industrial Commercial Interchange to General Interchange to permit multi-family residential dwelling units on the subject site. In terms of roadway impacts, the existing future land use category of Industrial Commercial Interchange permits the development of intense land uses such as commercial, industrial and office uses. These permitted uses on site are more intense in terms of trip generation potential than a multi-family residential use on the subject site. Should a portion or all of the site be developed with multi-family dwelling units, the floor area associated with the currently permitted industrial and commercial uses would be reduced. Therefore, the existing 2045 Long Range Transportation Plan as adopted by the Lee County

Metropolitan Planning Organization (MPO), will not be impacted as a result of the requested change to the General Interchange land use designation to permit multi-family dwelling units on the subject site. Therefore, no changes to the adopted long range transportation plan nor the Lee County's Five Year Capital Improvement Program (CIP) are required as result of the proposed land use change.

IV. ZONING ANALYSIS

The subject site is currently governed by Zoning Resolution No. Z-03-017A which permits the development of the overall Alico Crossroads CPD with up to 351,000 square feet of commercial uses and 125 hotel rooms. The proposed rezoning request would allow the approximately 25 acre subject site to be developed with up to 200,000 square feet of commercial uses, 250 hotel rooms and 475 multi-family residential swelling units.

Table 1 summarizes the land uses that could be constructed under the existing zoning designation and the intensity of uses under the proposed zoning request.

Table 1
Land Uses
Alico Crossroads CPD

| Land Use | Approved Under Z-03-017A | Proposed | Change |
|----------------|-----------------------------|--------------------|----------------------|
| Retail | 300,000 Sq. Ft. | 50,000 Sq. Ft. | -250,000 Sq. Ft. |
| General Office | 51,000 Sq. Ft. | 150,000 Sq. Ft. | + 99,000 Sq. Ft. |
| Hotel | 125 Hotel Rooms | 250 Hotel Rooms | + 125 Rooms |
| Multi-Family | * | 475 Dwelling Units | + 475 Dwelling Units |

Access to the subject site is proposed to be provided to Three Oaks Parkway via one right-in/right-out only access and one full access drive, which is consistent with the current Master Concept Plan approved under Z-03-017A.

Trip Generation

The trip generation for the proposed rezoning request was determined by referencing the Institute of Transportation Engineer's (ITE) report, titled *Trip Generation*, 10th Edition. Land Use Code 820 (Shopping Center) was utilized for the trip generation purposes of the proposed retail uses, Land Use Code 710 (General Office Building) was utilized for

the trip generation purposes of office uses, Land Use Code 310 (Hotel) was utilized for the trip generation purposes of hotel rooms and Land Use Code 221 (Multi-Family Housing Mid-Rise) was utilized for the trip generation purposes of multi-family residential dwelling units. **Table 2** outlines the anticipated weekday A.M. and P.M. peak hour and daily trip generation of the CPD as currently approved. **Table 3** outlines the anticipated weekday A.M. and P.M. peak hour and daily trip generation of the CPD as proposed with this zoning amendment.

Table 2
Trip Generation – Approved
Alico Crossroads CPD

| Land Use | Weekd | ay A.M. Pe | ak Hour | Weekd | Daily | | |
|--------------------------------------|-------|------------|---------|-------|-------|-------|---------|
| Land Use | In | Out | Total | In | Out | Total | (2-way) |
| Shopping Center (300,000 Sq. Ft.) | 187 | 115 | 302 | 588 | 637 | 1,225 | 12,690 |
| General Office (51,000 Sq. Ft.) | 64 | 10 | 74 | 10 | 50 | 60 | 552 |
| Hotel (125 Hotel Rooms) | 34 | 23 | 57 | 35 | 33 | 68 | 984 |
| Total Trips | 285 | 148 | 433 | 633 | 720 | 1,353 | 14,226 |

Table 3
Trip Generation – Proposed
Alico Crossroads CPD

| Land Use | Weekd | ay A.M. Pe | ak Hour | Weekd | Daily | | |
|--------------------------------------|-------|------------|---------|-------|-------|-------|---------|
| Land Use | In | Out | Total | In | Out | Total | (2-way) |
| Shopping Center (50,000 Sq. Ft.) | 110 | 67 | 177 | 156 | 169 | 325 | 3,752 |
| General Office (150,000 Sq. Ft.) | 144 | 23 | 167 | 27 | 140 | 167 | 1,572 |
| Hotel (250 Hotel Rooms) | 71 | 49 | 120 | 81 | 80 | 161 | 2,396 |
| Multi-Family (475 Dwelling Units) | 41 | 117 | 158 | 121 | 77 | 198 | 2,587 |
| Total Trips | 366 | 256 | 622 | 385 | 466 | 851 | 10,307 |

The total trips generated by the project will not all be new trips added to the adjacent roadway system. With mixed use projects, ITE estimates that there will be a certain amount of interaction between uses that will reduce the overall trip generation of the approved CPD and the proposed CPD Amendment. This interaction is called "internal

capture". In other words, trips that would normally come from external sources would come from uses that are within the project, thus reducing the overall impact the development has on the surrounding roadways. ITE, in conjunction with a study conducted by the NCHRP (National Cooperative Highway Research Program), has summarized the internal trip capture reductions between various land uses. For uses shown in Table 2 and Table 3, there is data in the ITE report for interaction between the retail, office, hotel and residential uses.

An internal capture calculation was completed consistent with the methodologies in the NCHRP Report and published in the *ITE Trip Generation Handbook*, 3rd Edition. The resultant analysis indicates that with the approved CPD scenario there will be an internal trip capture reduction of five percent (5%) in the A.M. peak hour and four percent (4%) in the PM peak hour between the retail, office and hotel uses. The analysis also indicates that with the proposed CPD Amendment scenario there will be an internal trip capture reduction of eight percent (8%) in the AM peak hour and twenty-two percent (22%) in the P.M. peak hour between the retail, office, hotel and residential uses. The summary sheets utilized to calculate these internal capture rates for the weekday AM peak hour and PM peak hour are included in the Appendix of this report for reference.

Pass-by traffic was also taken into account based on the retail uses presented in each scenario. The current version of the *ITE Trip Generation Handbook*, 3rd Edition, indicates that the weekday PM peak hour pass-by rate for Land Use Code 820 is thirty-four percent (34%). However, consistent with previous analysis approved by Lee County, thirty percent (30%) of the total project traffic was assumed to be pass-by traffic. **Table 4** indicates the total external trips of the subject site based on the approved CPD. **Table 5** indicates the total external trips of the subject site based on the proposed CPD Amendment.

Table 4
Trip Generation – Net New Trips of Approved Uses

| | Weekda | y A.M. Pe | ak Hour | | ak Hour | Daily | |
|---|--------|-----------|---------|-----|---------|-------|---------|
| Land Use | In | Out | Total | In | Out | Total | (2-way) |
| Total Trips | 366 | 256 | 622 | 385 | 466 | 851 | 10,307 |
| Less Internal Capture 8% AM / 22% PM | -24 | -24 | -48 | -94 | -94 | -188 | -2,268 |
| Total Trips (Less Internal Capture) | 342 | 232 | 574 | 291 | 372 | 663 | 8,039 |
| Less LUC 820 Pass- By Trips | -24 | -24 | -48 | -38 | -38 | -76 | -878 |
| Net New Trips | 318 | 208 | 526 | 253 | 334 | 587 | 7,161 |

Table 6 indicates the trip generation difference between the uses approved in the CPD and the proposed uses in the CPD Amendment (Table 4 vs Table 5).

Table 6
Trip Generation Comparison – Approved Zoning vs Proposed Zoning
Table 4 vs Table 5

| Land Use | Weekd | ay A.M. Pe | ak Hour | Weekd | Daily | | |
|-----------------------|-------|------------|---------|-------|-------|-------|---------|
| | In | Out | Total | In | Out | Total | (2-way) |
| Proposed Zoning | 317 | 207 | 524 | 253 | 334 | 587 | 7,161 |
| Approved Zoning | -231 | -94 | -325 | -433 | -520 | -953 | -9,898 |
| Resultant Trip Change | +87 | +114 | +201 | -180 | -186 | -366 | -2,737 |

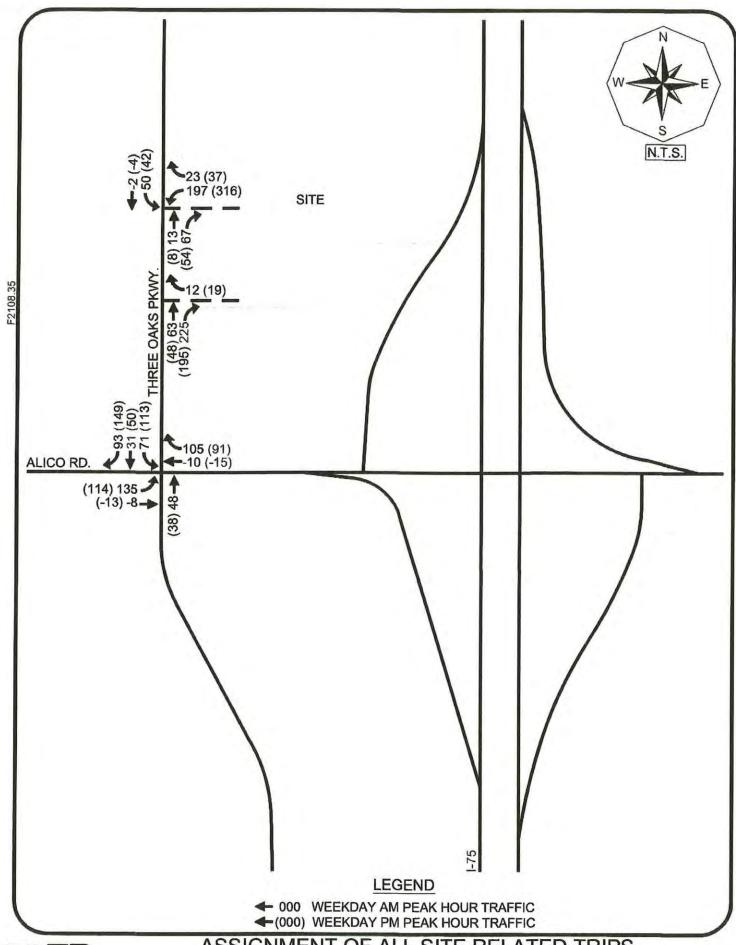

As can be seen from Table 6, the requested zoning will increase the traffic impacts of the development by approximately 62% in the AM peak hour and decrease the traffic impacts of the development by approximately 38% in the PM peak hour and approximately 28% over the entire weekday from what is currently approved. The weekday P.M. peak hour trip generation is typically the period utilized for the Level of Service impacts to the surrounding roadway network as this is the hour that generates the greatest number of vehicle trip, which remains the case in the amendment. The weekday P.M. peak hour trips shown in Table 5 are approximately 12% higher than the trips in the A.M. peak hour. Therefore, the trips analyzed in the previous zoning approval (953 weekday P.M. peak hour trips) are still substantially higher than the trips analyzed as part of this zoning amendment (587 weekday P.M. peak hour trips).

Trip Distribution

The trips the proposed development is anticipated to generate, as shown in the Table 5, were then assigned to the surrounding roadway network. The net new trips anticipated to be added to the surrounding roadway network were assigned based upon the routes drivers are anticipated to utilize to approach the subject site. Figure A-1, included in the Appendix of this report, illustrates the percent project traffic distribution and assignment of the net new project trips. Figure A-2, included in the Appendix of this report, illustrates the percent project traffic distribution and assignment of pass-by trips. Figure 2 illustrates the resulting assignment of all project related trips (net new + pass-by).

In order to determine which roadway segments surrounding the site may be significantly impacted as outlined in the Lee County Traffic Impact Statement Guidelines, Table 1A, in the Appendix, was created. This table indicates which roadway links will accommodate greater than 10% of the Peak Hour Level of Service "C" volumes. The Level of Service threshold volumes were obtained from the *Lee County Generalized Peak Hour Directional Service Volume Tables* (June, 2016). Based on Table 1A, only Three Oaks Parkway between Alico Road and the site is projected to be significantly impacted as a result of the proposed CPD Amendment. A copy of the Generalized Service Volume Table is located in the Appendix of this report for reference.

Level of Service Analysis

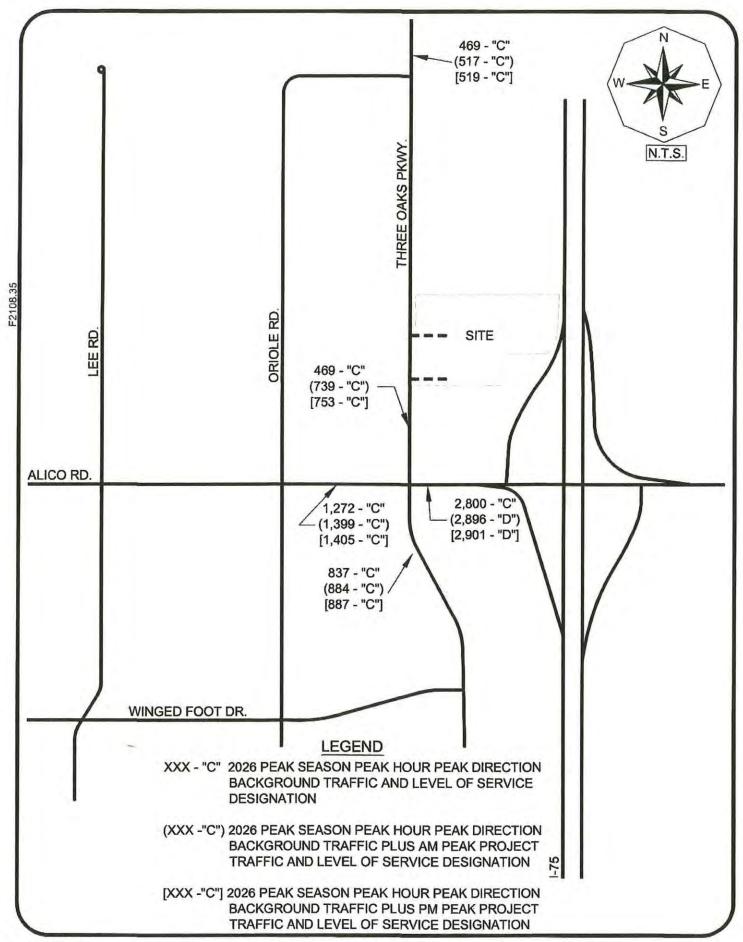

The future Level of Service analysis was based on a 5-year horizon, or year 2026. Based on this horizon year analysis, the surrounding roadway network was analyzed under 2026 traffic conditions. A growth rate was applied to the existing traffic conditions for all roadway links and intersections that could be significantly impacted by this development. For the Alico Road and Three Oaks Parkway, the existing and historical traffic data was obtained from the 2020 *Lee County Traffic Count Report*.

Table 2A in the Appendix of the report indicates the methodology utilized to obtain the year 2026 build-out traffic volumes as well as the growth rate utilized for each roadway segment analyzed. The existing 2019 peak hour peak season peak direction volumes for all roadways were obtained from the 2020 Lee County Public Facilities Level of Service and Concurrency Report.

Figure 3 indicates the year 2026 peak hour – peak direction traffic volumes and Level of Service for the various roadway links within the study area. Noted on Figure 3 is the peak hour – peak direction volume and Level of Service of each link should no development occur on the subject site and the peak hour – peak direction volume and Level of Service for the weekday A.M and P.M. peak hours with the development traffic added to the roadways. Figure 3 is derived from Table 2A contained in the Appendix.

As can be seen from Figure 3, all analyzed roadway links are anticipated to maintain their minimum recommended Level of Service standards as contained in the Lee County Comprehensive Plan. Therefore, no roadway capacity improvements will be warranted as a result of the additional traffic to be generated by the proposed development.

Turn lane improvements at the site access drive intersections will be evaluated at the time the project seeks a Local Development Order approval.

VII. CONCLUSION

The proposed project is located on the east side of Three Oaks Parkway just north of Alico Road in Lee County, Florida. As discussed in the report, uses permitted within the existing future land use category of Industrial Commercial Interchange generates more external vehicle trips than multi-family residential dwelling units, which would be permitted in a zoning amendment should the Future Lane Use Category be changed to General Interchange. Therefore, the 2045 Financially Feasible Roadway network and the County's 5-year Capital Improvement Program currently in place will not require modification in order to accommodate the proposed Land Use change.

Based upon the roadway link Level of Service analysis conducted as a part of the proposed rezoning request, all roadway links are anticipated to maintain their minimum recommended Level of Service standards as contained in the Lee County Comprehensive Plan. Therefore, no roadway capacity improvements are necessary to accommodate the proposed development.

Enter vehicle occupancy assumed in Table 1-P vehicle trips. If vehicle occupancy changes for proposed mixed-use project, manual adjustments must be made Vehicle-trips computed using the mode split and vehicle occupancy values provided in Table 2-P

Person-Trips

*Indicates computation that has been rounded to the nearest whole number.

Estimation Tool Developed by the Texas A&M Transportation Institute - Version 2013 1

LEE PLAN ANALYSIS - M11

The subject property is located at the northwest quadrant of I-75 and Alico Road, approximately ¼ mile north of Alico Road. The proposed amendment would extend the General Interchange land use category over the subject property, consistent with the property to the south. The proposed amendment is consistent with the Lee County Comprehensive Plan as outlined below.

OBJECTIVE 1.3: INTERSTATE HIGHWAY INTERCHANGE AREAS. Special areas adjacent to the interchanges of Interstate 75 that maximize critical access points will be designated on the Future Land Use Map. Development in these areas must minimize adverse traffic impacts and provide appropriate buffers, visual amenities, and safety measures. Each interchange area is designated for a specific primary role: General, General Commercial, Industrial Commercial, Industrial, and University Village. Residential uses are only permitted in these categories in accordance with Policy 1.3.2.

The proposed amendment will maximize the use of this critical interchange by providing a greater diversity of uses on the subject property and the ability to develop a mixed use plan. The added residential uses wil be in proximity to major employment centers at or near the Alico Interchange as well as at interchanges throughout Lee County.

POLICY 1.3.2: The General Interchange areas are intended primarily for land uses that serve the traveling public: service stations, hotel, motel, restaurants, and gift shops. But because of their location, market attractions, and desire for flexibility, these interchange uses permit a broad range of land uses that include tourist commercial, general commercial, light industrial/commercial, and multi-family dwelling units. The standard density range is from eight dwelling units per acre (8 du/acre) to fourteen dwelling units per acre (14 du/acre). Maximum density is twenty-two dwelling units per acre (22 du/acre).

The General Interchange land use category has a broad range of uses allowed, including multi-family residential. The subject property is seeking a concurrent zoning which will allow for approximately 14 dwelling units per acre. The flexibility of uses and the residential allowed is the most appropriate designation for the subject property based on its location adjacent to General Interchange on the south and the employment centers to the north. The proposed mixed-use plan will be well positioned to provide a needed diversity of housing types to the surrounding employment uses.

It is important to note that similar to the Commercial Industrial Interchange land use category, the General Interchange land use category allows for light industrial uses. While neither the existing zoning or the proposed zoning seeks industrial uses, the proposed

change to the future land use category will have no effect on the amount of industrial acreage within Lee County.

POLICY 1.6.5: The Planning Districts Map and Acreage Allocation Table (Map 1-B and Table 1(b)) depict the proposed distribution, extent, and location of generalized land uses through the Plan's horizon. Acreage totals are provided for land in each Planning District in unincorporated Lee County. No development orders or extensions to development orders will be issued or approved by Lee County that would allow the acreage totals for residential, commercial or industrial uses contained in Table 1(b) to be exceeded.

Table 1b includes 15 acres in the Gateway/Airport Planning community available for residential development. Based on how the County calculates the total available acreage for residential development, there is sufficient acreage available to meet the needs of the proposed residential area for this project.

OBJECTIVE 2.1: DEVELOPMENT LOCATION. Contiguous and compact growth patterns will be promoted through the rezoning process to contain urban sprawl, minimize energy costs, conserve land, water, and natural resources, minimize the cost of services, prevent development patterns where large tracts of land are by-passed in favor of development more distant from services and existing communities.

This policy will be analyzed more during the concurrent re-zoning. However, the proposed future land use change represents an opportunity for compact development patterns. The subject property is within an urban area near the Alico Interchange. Public services are available to the subject property as evidenced by the existing zoning approval, the development contiguous to the north, development on nearby properties in all directions, and through the letters of service availability obtained from each public service department. Locating residential on the subject property will minimize urban sprawl by allowing for multi-family residential development adjacent, in close proximity and with easy access to employment centers throughout Lee County.

POLICY 2.1.1: Most residential, commercial, industrial, and public development is expected to occur within the designated future urban areas on the Future Land Use Map through the assignment of very low densities to the non-urban categories.

The subject property is currently within a future urban area on the future land use map and is surrounded by urban designated properties. The proposed land use category allows for urban levels of residential development.

OBJECTIVE 2.2: DEVELOPMENT TIMING. Direct new growth to those portions of the future urban areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created. Development orders and permits (as defined in Section 163.3164(7), F.S.) will be granted only when consistent with the provisions of Sections 163.3202(2)(g) and 163.3180, F.S. and the concurrency requirements in the Land Development Code.

As part of the submitted applications, letters of service availability have been obtained from each of the service providers. The subject property is in an urban area where public facilities exist, and capacity is available to serve the proposed development.

POLICY 2.2.1: Rezonings and Development of Regional Impact proposals will be evaluated as to the availability and proximity of the road network; central sewer and water lines; community facilities and services such as schools, EMS, fire and police protection, and other public facilities; compatibility with surrounding land uses; and any other relevant facts affecting the public health, safety, and welfare.

The subject property is located along the Three Oaks Extension, a future arterial road, just to the north of the Alico Interchange with I-75. Water and sewer service is available to the subject property. As evidenced by the attached letters of service availability, public facilities exist to serve the proposed development.

STANDARD 4.1.1: WATER.

1. Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development in excess of 30,000 square feet of gross leasable (floor) area per parcel, must connect to a public water system (or a "community" water system as that is defined by Chapter 62-550, F.A.C.).

Potable water service is available to the subject property. Future development will be required to connect to Lee County's central water system.

STANDARD 4.1.2: SEWER.

1. Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development that generates more than 5,000 gallons of sewage per day, must connect to a sanitary sewer system.

Sanitary sewer service is available to the subject property. Future development will be required to connect to Lee County's central wastewater system.

STANDARD 4.1.4: ENVIRONMENTAL FACTORS.

1. In any case where there exists or there is the probability of environmentally sensitive areas (as identified by Lee County, the Corps of Engineers, Department of Environmental Protection, South Florida Water Management District, or other applicable regulatory agency), the developer/applicant must prepare an environmental assessment that examines the existing conditions, addresses existing or anticipated environmental problems, and proposes means and mechanisms to protect, conserve, or preserve the environmental and natural resources.

Dex Bender has conducted an environmental assessment for the property. According to the report, "The majority of the site is improved pasture with the remaining forested areas containing high levels of exotics." There are no environmentally sensitive areas on site.

However, the developer will meet the County's indigenous preservation requirements, which will preserve and restore a portion of the pine flatwoods area of the property.

GOAL 5: RESIDENTIAL LAND USES. To provide sufficient land in appropriate locations on the Future Land Use Map to accommodate the projected population of Lee County in the year 2030 in attractive and safe neighborhoods with a variety of price ranges and housing types.

The proposed comprehensive plan amendment will implement Goal 5 by located additional opportunity for residential multi-family development, providing a diversity of housing opportunities just north of San Carlos.

POLICY 5.1.2: Prohibit residential development where physical constraints or hazards exist, or require the density and design to be adjusted accordingly. Such constraints or hazards include but are not limited to flood, storm, or hurricane hazards; unstable soil or geologic conditions; environmental limitations; aircraft noise; or other characteristics that may endanger the residential community.

There are no physical constraints or hazards that exist on the subject property that would limit residential development.

POLICY 5.1.3: During the rezoning process, direct high-density residential developments to locations that are near employment and shopping centers; are close to parks and schools; and are accessible to mass transit and bicycle facilities.

The proposed comprehensive plan amendment directly implements the intent of Policy 5.1.3 in that it will locate a high density residential near major employment centers. Directly to the north of the subject property is the new Neogenomics headquarters as well as several other corporate office buildings. Southwest Florida International Airport is within a 3-mile drive of the subject property, and several employment centers that have developed under the industrial/commerce designations in the comprehensive plan are located within a few miles of the subject property. The proposed development is strategically located to provide multi-family housing in close proximity to major employment areas as well as the Interstate, giving the property easy access to employment centers throughout Lee County.

POLICY 5.1.4: Prohibit residential development in all Industrial Development areas and Airport Noise Zone B as indicated on the Future Land Use Map, except for residences in the Industrial Development area for a caretaker or security guard.

The subject property is not in Noise Zone B. Noise Zone C covers only the northwest corner of the subject property. Very little, if any, of the residential area will even be in Noise Zone C. Most of the property is not located in any Noise Zone.

POLICY 5.1.5: Protect existing and future residential areas from any encroachment of uses that are potentially destructive to the character and integrity of the residential

environment. Requests for conventional rezonings will be denied in the event that the buffers provided in Chapter 10 of the Land Development Code are not adequate to address potentially incompatible uses in a satisfactory manner. If such uses are proposed in the form of a planned development or special exception and generally applicable development regulations are deemed to be inadequate, conditions will be attached to minimize or eliminate the potential impacts or, where no adequate conditions can be devised, the application will be denied altogether. The Land Development Code will continue to require appropriate buffers for new developments.

The residential portion of the subject property is well located to be protected from the encroachment of industrial or commercial uses. To the south of the subject property is land zoned for residential use, in the General Interchange land use category. To the north of the subject property are existing built office development. To the east is I-7 and to the west will be the commercial development that is part of the proposed Mixed Use Planned Development that is be submitted concurrent with this application.

POLICY 6.1.4: Commercial development will be approved only when compatible with adjacent existing and proposed land uses and with existing and programmed public services and facilities.

The proposed plan amendment currently allows for commercial development and will continue to provide for commercial development. The proposed land use change will simply allow residential uses, compatible with the surrounding existing and planned commercial and residential development.

POLICY 6.1.5: The land development regulations will require that commercial development be designed to protect the traffic-carrying capacity of roads and streets. Methods to achieve this include, but are not limited to...

The proposed plan amendment is in an area where capacity exists on the adjacent roadway network. As shown in the attached Transportation Impact Statement, this proposed amendment will not cause any negative impacts to the County Long Range Transportation Plan. The proposed development will be a decrease in trips as compared to the existing zoning and land use use approvals.

GOAL 11: MIXED USE. Encourage mixed use developments that integrate multiple land uses, public amenities and utilities at various scales and intensities in order to provide: diversified land development; a variety of housing types; greater connectivity between housing, workplaces, retail businesses, and other destinations; reduced trip lengths; more transportation options; and pedestrian and bicycle-friendly environments.

The proposed plan amendment and concurrent rezoning represents a change to a mixeduse development with multi-family residential, retail, office and hotel uses. The addition of the multi-family residential development within the context of the surrounding land uses will provide a housing opportunity in close proximity to major employment centers and create a mixed-use environment that decreases trip lengths and diversifies that housing options in close proximity to the workplace.

OBJECTIVE 47.2: DEVELOPMENT COMPATIBILITY IN VICINITY OF AIRPORTS.Evaluate development proposals for property located within the vicinity of existing or planned aviation facilities to ensure land use compatibility, to preclude hazards to aircraft operations, and to protect airport capacities and facilities.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development is separated from airport operations by I-75 and will not have any impact on the growth of RSW. Landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 47.2.1: Land use compatibility will be considered when reviewing development proposals within the vicinity of existing or planned aviation facilities.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development is separated from airport operations by I-75 and will not have any impact on the growth of RSW. Landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 47.2.2: Maintain regulations in the LDC which restrict land uses in areas covered by the Airport Noise Zones to uses that are compatible with the operation of the airport.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development wil comply with all other land use regulations ensuring compatibility with airport operations.

POLICY 47.2.3: Utilize the currently adopted Airport Master Plans, rules of Ch. 333, Fla. Stat., and the Southwest Florida International Airport FAR Part 150 Study, including updates, as a basis to amend the Lee Plan and the LDC to prohibit development that is incompatible with the Southwest Florida International Airport or Page Field Airport; and, to ensure future economic enhancement consistent with Objective 47.1.

The northwest corner of the subject property is located in Airport Noise Zone C, outside of the area where noise sensitive uses are prohibited. Most of the property is located outside of any airport noise zone. The proposed development wil comply with all other land use regulations ensuring compatibility with airport operations.

POLICY 47.2.4: In the interest of the safety of air commerce, the County will not approve a temporary or permanent structure which is an obstruction to air navigation and affects the safe and efficient use of navigable airspace or the operation of planned or existing air navigation and communication facilities; or, does not comply with placement, lighting and marking standards established by the Port Authority, Florida Statutes, or FAA rules and regulations.

The proposed development is not requesting building heights that would interfere with airport operations.

POLICY 47.2.5: The safety of aircraft operators, aircraft passengers, and persons on the ground will guide the Port Authority's airports operations. Hazardous wildlife attractants within 10,000 feet of a Port Authority airport's Air Operations Area (AOA) will be avoided by minimizing and correcting any wildlife hazards arising from wetlands or water bodies in accordance with FAA AC 150/5200-33B, or as otherwise amended. Site improvements on or near the Port Authority's airports must be designed to minimize attractiveness to wildlife of natural areas and man-made features such as detention/retention ponds, landscaping, and wetlands, which can provide wildlife with ideal locations for feeding, loafing, reproduction and escape.

Through the planned development process, the applicant will seek deviations to ensure that landscaped areas and water management features will be designed consistent with the goal of minimizing wildlife attractors.

POLICY 60.1.1: Require design of surface water management systems to protect or enhance the groundwater.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which promotes infiltration to maintain groundwater levels.

POLICY 125.1.2: New development and additions to existing development must not degrade surface and ground water quality.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which reduce nutrients and suspended solids prior to discharge offsite. Commercial area provide a minimum of $\frac{1}{2}$ " dry pre-treatment prior to discharge into the master stormwater system.

POLICY 125.1.3: The design, construction, and maintenance of artificial drainage systems must provide for retention or detention areas and vegetated swale systems that minimize nutrient loading and pollution of freshwater and estuarine systems.

The subject property is part of the overall Stormwater Management System for McGarvey Research Park. The overall system is permitted by South Florida Water Management District under Permit # 36-05268-P and provides the required water quality treatment prior to discharge. The restricted water quality and quantity discharge rates detain water within the stormwater system which reduce nutrients and suspended solids prior to discharge offsite. Commercial area provide a minimum of ½" dry pre-treatment prior to discharge into the master stormwater system which then provides the remaining water quality treatment.

OBJECTIVE 135.1: HOUSING AVAILABILITY. To ensure the types, costs, and locations of housing are provided to meet the needs of the County's population by working with private and public housing providers.

The proposed land use change will allow for the development of 475 new multi-family residential units.

POLICY 135.1.9: The county will ensure a mix of residential types and designs on a countywide basis by providing for a wide variety of allowable housing densities and types through the planned development process and a sufficiently flexible Future Land Use Map.

The proposed land use change will diversify the housing types in the local area by providing for higher density multi-family units in an area with predominantly single-family development to the south in the San Carlos neighborhood.

DexBender 4470 Camino Real Way, Suite 101 Fort Myers, FL 33966 (239) 334-3680

INTRODUCTION

The 46.71± acre project is located within a portion of Section 3, Township 46 South, Range 25 East, Lee County, Florida. The parcel is bordered to the east by US 75, to the south by commercial development under construction, to the west by Three Oaks Parkway, and to the north by commercial development under construction and improved pasture.

SITE CONDITIONS

The site has been disturbed by agricultural activities that have been ongoing for decades. The majority of the site is improved pasture with the remaining forested areas containing high levels of exotics. Cattle are present throughout the property.

VEGETATIVE CLASSIFICATIONS

The predominant vegetation associations were mapped in the field on 2021 digital 1" = 200' scale aerial photography. The property boundary was obtained from Kris A. Slosser, PSM and inserted into the digital aerial. The property boundary was not staked in the field at the time of our site inspection and was, therefore, estimated based on the overlay of the boundary on the aerial photography. Five vegetation associations were identified using the Florida Land Use, Cover and Forms Classification System (FLUCCS). Figure 1 depicts the approximate location and configuration of these vegetation associations and Table 1 summarizes the acreages by FLUCCS Code. A brief description of each FLUCCS Code is also provided below.

Table 1. Acreage Summary by FLUCCS Code

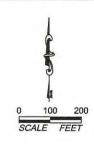

| FLUCCS | DESCRIPTION | ACREAGE |
|--------|--|---------|
| 211 | Improved Pastures | 32.99 |
| 411E3 | Pine Flatwoods Invaded by Exotics (51 – 75%) | 4.60 |
| 411E4 | Pine Flatwoods Invaded by Exotics (76 – 90%) | 5.40 |
| 422 | Brazilian Pepper | 1.41 |
| 510D | Ditches | 2.31 |
| | Total | 46.71 |

FLUCCS Code 211, Improved Pastures

The majority of the property is well maintained cattle pasture. The pasture is dominated by Bahia grass (*Paspalum notatum*). Additional species present include smutgrass (*Sporobolus indicus*), whitehead broom (*Spermacoce verticillata*), chocolate weed (*Melochia* sp.), flatsedges (*Cyperus* spp.), rustweed (*Polypremum procumbens*), goatweed (*Scoparia dulcis*), and cogongrass (*Imperata cylindrica*).

SECTION: 3 TOWNSHIP: 46 S RANGE: 25 E

| FLUCCS | Description | Acreage |

Figure 1. Protected Species Assessment Map

Alico Crossroads

FLUCCS Code 411E3, Pine Flatwoods Invaded by Exotics (51 – 75%)

The open canopy in this habitat type is dominated by slash pine (*Pinus elliottii*) with scattered melaleuca (*Melaleuca quinquenervia*). The midstory contains melaleuca, Brazilian pepper (*Schinus terebinthifolius*), laurel oak (*Quercus laurifolia*), myrsine (*Rapanea punctata*), and cocoplum (*Chrysobalanus icaco*). Saw palmetto (*Serenoa repens*) dominates the ground cover.

FLUCCS Code 411E4, Pine Flatwoods Invaded by Exotics (76 – 90%)

The canopy in these areas consists of melaleuca and scattered slash pine. Dense Brazilian pepper dominates the midstory. Ground cover consists of scattered patches of saw palmetto, bare ground, grape vine (Vitis sp.), and greenbrier (Smilax sp.).

FLUCCS Code 422, Brazilian Pepper

Areas of dense Brazilian pepper are present along the edges of the improved pasture.

FLUCCS Code 510D, Ditches

Several remnant agricultural ditches are present on the property. These areas are vegetated by species such as torpedo grass (*Panicum repens*), red ludwigia (*Ludwigia repens*), pickerel weed (*Pontederia cordata*), duckweed (*Lemna* sp.), and marsh pennywort (*Hydrocotyle umbellata*).

SURVEY METHOD

Lee County Protected Species Ordinance No. 89-34 lists several protected species of animals that could potentially occur on-site based on the general vegetative associations found on the subject parcel. Each habitat type was surveyed for the occurrence of these and any other listed species likely to occur in the specific habitat types. The survey was conducted using meandering linear pedestrian belt transects. This survey methodology is based on the Lee County administratively approved Meandering Transect Methodology. As part of this survey all live trees and snags were inspected for the evidence of cavities that could potentially be used as roosts by the Florida bonneted bat (Eumops floridanus). In order to provide at least 80 percent visual coverage of habitat types listed in Ordinance No. 89-34, the transects were spaced approximately 60 to 100 feet apart. The approximate locations of all direct sighting or signs (such as tracks, nests, and droppings) of a listed species were denoted on the aerial photography. The 1" = 200' scale aerial Protected Species Assessment map (Figure 1) depicts the approximate location of the survey transects and the results of the survey. The listed species survey was conducted during the mid-day hours of August 16, 2021. During the survey the weather was hot and humid.

Species listed as endangered, threatened, or species of special concern by the Florida Fish and Wildlife Conservation Commission (FWC) or the United States Fish and Wildlife Service (FWS) that could potentially occur on the subject parcel according to the Lee County Protected Species Ordinance are shown in Table 2. This list from the Lee County Protected Species Ordinance is general in nature, contains species that were

subsequently delisted by the state, does not necessarily reflect existing conditions within or adjacent to the 46.71± acre property, and is provided for general informational purposes only. The bald eagle (*Haliaeetus leucocephalus*) (which has been delisted by the FWC and FWS but is still protected by other regulations), the Florida black bear (*Ursus americanus floridanus*) (delisted in 2012 and still protected by the Florida Black Bear Management Plan), and the Florida bonneted bat (*Eumops floridanus*) (which was listed by the FWS after Ordinance No. 89-34 was adopted by Lee County) were also included in the survey.

Prior to conducting the protected species survey, a search of the FWC listed species database was conducted to determine the known occurrence of listed species in the project area. This search revealed no known protected species occurring on or immediately adjacent to the site. The database indicated that Florida black bear have been recorded in the vicinity of the property. The FWC's online Gopher Tortoise Permit Map was also reviewed. According to the website, no gopher tortoise permits have been issued for the subject property or immediately adjacent lands.

Table 2. Listed Species That Could Potentially Occur On-site

| FLUCCS CODE | Percent Survey Coverage | Species Name | Present | Absent |
|----------------|-------------------------------|---|---------|--------|
| 211 | 80 | Florida Sandhill Crane (<i>Grus canadensis</i> pratensis) Florida Panther (<i>Felis concolor coryi</i>) | | √ √ |
| 411E3 411E4 | 80 | Gopher Frog (Rana areolata)* Eastern Indigo Snake (Drymarchon corais couperi) Gopher Tortoise (Gopherus polyphemus) Red-cockaded Woodpecker (Picoides borealis) Southeastern American Kestrel (Falco sparverius paulus) Big Cypress Fox Squirrel (Sciurus niger avicennia) Florida Black Bear (Ursus americanus floridanus)* Florida Panther (Felis concolor coryi) Beautiful Pawpaw (Deeringothamnus pulchellus) Fakahatchee Burmannia (Burmannia flava) Florida Coontie (Zamia floridana) Satinleaf (Chrysophyllum olivaeforme) | | |
| 422 | 80 | None None | | |

| FLUCCS CODE | Percent Survey Coverage | Species Name | Present | Absent |
|----------------|-------------------------------|--|---------|--|
| 510D | 80 | American Alligator (Alligator mississippiensis) Limpkin (Aramus guarauna)* Little Blue Heron (Egretta caerulea) Reddish Egret (Egretta rufescens) Roseate Spoonbill (Ajaia ajaja) Snowy Egret (Egretta thula)* Tricolored Heron (Egretta tricolor) Everglades Mink (Mustela vison evergladensis) | | \\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\ |

^{*} Species delisted subsequent to adoption of Lee County Protected Species Ordinance No. 89-34.

SURVEY RESULTS

No species listed by either the FWS or the FWC were observed on the site during the protected species survey. No potential Florida bonneted bat roost cavities were observed. In addition to the site inspection, a search of the FWC species database revealed no known protected species within or immediately adjacent to the project limits.

Greetings,

The attached is a request to search for previously recorded cultural resources on the subject property. I have attached the appropriate form, and a property boundary overlaid on an aerial. If you should require any additional information, please do not hesitate to contact me.

Best regards.

Daniel DeLisi, AICP DeLisi, Inc. dan@delisi-inc.com www.delisi-inc.com
