Cary+Duke+Povia Map Amendment

**NOTICE OF PROPOSED AMENDMENT TO THE
LEE COUNTY COMPREHENSIVE LAND USE PLAN
(TRANSMITTAL HEARING)**

The Lee County Board of County Commissioners will hold a public hearing to consider proposed amendments to the Lee County Comprehensive Land Use Plan (Lee Plan) on Wednesday, December 6, 2023. The hearing will commence at 9:30 a.m., or as soon thereafter as can be heard, in the Board Chambers, 2120 Main Street in Downtown Fort Myers. At the hearing, the Board will consider the proposed amendments for transmittal to the Florida Department of Economic Opportunity:

CPA2022-00019: Cary+Duke+Povia CPA - Amend the Lee County Utilities Future Water Service Areas Map (Map 4A) and the Lee County Utilities Future Sewer Service Areas Map (Map 4B), to include a 788+/- acre property located on North River Road, approximately 1 mile east of SR 31.

This transmittal hearing is the first step in a two-step public hearing process to amend the Lee Plan. A second hearing will follow the Department of Economic Opportunity's review of the application.

Documentation for the Proposed Comprehensive Plan Amendment is available at <https://www.leegov.com/dcd/planning/cpa> or at the Department of Community Development located at 1500 Monroe Street, Fort Myers, Florida. This meeting is open to the public. Interested parties may appear at the meeting and be heard with respect to the proposed plan amendment. A verbatim record of the proceeding will be necessary to appeal a decision made at this hearing.

It is the intent of the Board of County Commissioners that the provisions of this Comprehensive Plan Amendment may be modified as a result of consideration that may arise during Public Hearing(s). Such modifications shall be incorporated into the final version.

Lee County will not discriminate against individuals on the basis of race, color, national origin, sex, age, disability, religion, income or family status. To request language interpretation, document translation or an ADA-qualified reasonable modification at no charge to the requestor, contact Joan LaGuardia, (239) 839-6038, Florida Relay Service 711, at least five business days in advance. El Condado de Lee brindará servicios de traducción sin cargo a personas con el idioma limitado del inglés.

SUMMARY SHEET
CPA2022-00019 – CARY+DUKE+POVIA
TRANSMITTAL HEARING

REQUEST:

Amend Lee Plan Maps 4-A and 4-B to include ±788.97 acres on the Lee County Utilities Future Water and Sewer Service Areas. The property is located on the south side of North River Road, approximately one mile east of the intersection of North River Road and SR 31.

The amendment is associated with a concurrent Residential Planned Development application to allow up to 1,099 residential units on the subject property.

LPA PUBLIC HEARING:

The applicant's representatives provided a presentation addressing the requested amendments, subject property, impact analysis, surrounding uses, consistency with the Lee Plan, and concurrent rezoning. Staff also made a presentation addressing the requested amendments, subject property, and consistency with the Lee Plan and staff recommendation.

During the applicant's presentation members of the LPA asked about the process from this point to the beginning of construction, the cost of utility expansion, and who would be responsible for extending water and sewer lines. During and after staff's presentation members of the LPA asked staff whether input from required community meetings was considered, the scope of the decision before the LPA, transportation concurrency, availability of emergency medical service, archaeological sites on the property, availability of fire services, availability of public transit, which water and sewer treatment plant locations will provide those respective services, whether service was contiguous to the site, whether the proposal met the goals of the community plan area, protected species, and stormwater management.

LPA PUBLIC INPUT:

53 members of the public provided input before the Local Planning Agency. 50 members of the public spoke in opposition to the amendment and three members of the public spoke in favor of the amendment.

LPA MOTION:

A motion was made to recommend that the Board of County Commissioners (BoCC) transmit CPA2022-00019. The motion failed 3 to 2.

RAYMOND BLACKSMITH	ABSENT

BoCC #2: TBD

Attachment(s):

1: Proposed Amendments
2: Applicant Materials

SUMMARY OF AMENDMENTS

- Amend the Lee County Utilities Future Water Service Areas (Lee Plan Map 4-A) to add property to the Lee County Utilities Future Water Service Area.
- Amend the Lee County Utilities Future Sewer Service Areas (Lee Plan Map 4-B) to add property to the Lee County Utilities Future Sewer Service Area.

PROJECT LOCATION

The property is located on the south side of North River Road, approximately one mile east of the intersection of North River Road and SR 31. See Figure 1, below.

Figure 1: Subject Property

RECOMMENDATION

Staff recommends that the Board of County Commissioners (BoCC) **transmit** the requested amendments based on the analysis and findings provided in this staff report.

PART 1: STAFF REVIEW

CONCURRENT APPLICATION REVIEW

While this request is to add the subject property to Lee County Utilities Future Water and Sewer Service Areas, the applicant has filed a companion rezoning application (DCI2022-00067) that is being reviewed concurrently with this plan amendment application. Chapter 163.3184(12), F.S. provides: “At the request of an applicant, a local government shall consider an application for zoning changes that would be required to properly enact any proposed plan amendment transmitted pursuant to this subsection.”

The concurrent rezoning request is to rezone ±788.97 acres from Agricultural (AG-2) to Residential Planned Development (RPD) to allow development of a clustered residential community containing up to 1,099 dwelling units. The proposed amendment would allow the applicant to take advantage of the density increase allowed by **Policy 123.2.17**, which grants an additional unit for each acre of Rare and Unique upland habitat preserved and/or restored. To receive this incentive the developer would need to preserve and restore Rare and Unique upland habitat by clustering development to maximize open space and minimize groundwater impacts by connecting to potable water and sewer services. This incentive is available only to properties within the Rural future land use category. Analysis of DCI2022-00067 shows that the incentive the applicant would receive is approximately 0.4 dwelling units per acre.

Even with the recommended transmittal of the proposed amendments, the applicant must demonstrate consistency with the Lee Plan, including the proposed amendments, in order for the companion rezoning to receive a favorable recommendation.

SUBJECT SITE AND SURROUNDING PROPERTIES

The subject property is on the south side of North River Road, approximately one mile east of the intersection of North River Road and State Road 31. The property is currently zoned Agricultural (AG-2) and consists of passive agriculture uses.

Surrounding properties are primarily passive agriculture and large-lot subdivisions. Immediately west of the property are the Owl Creek Residential Planned Development and the Babcock Ranch Mixed-use Planned Development on the south and north sides of North River Road, respectively. Additional information can be found in Table 1 below.

TABLE 1: SURROUNDING PROPERTIES INFORMATION

	Future Land Use	Zoning	Existing Use
North	DR/GR, New Community, Conservation Lands Upland	MH-1, EC, & MPD approved for 1,630 units and 1.17 million square feet of retail, office, hotel, and recreation	Single-Family Residential, Agriculture, & Vacant
East	Rural	AG-2	Single-Family Residential & Vacant
South	Rural & Wetlands	AG-2	Single-Family Residential & Vacant
West	Rural & Wetlands	RPD approved for 380 units	Vacant

DISCUSSION AND ANALYSIS: MAP AMENDMENT

Future Land Use Element

The applicant proposes expanding Lee Plan Maps 4-A and 4-B to include the subject property within Lee County Utility's future water and sewer service areas.

The Rural future land use category, is described in **Policy 1.4.1**:

POLICY 1.4.1: The Rural areas are to remain predominantly rural – that is, low density residential, agricultural uses, and minimal non-residential land uses that are needed to serve the rural community. Natural resource extraction may be permitted in accordance with Policy 10.1.4. These areas are not to be programmed to receive urban-type capital improvements, and they can anticipate a continued level of public services below that of the urban areas. Maximum density in the Rural area is one dwelling unit per acre (1 du/acre).

The subject property is currently within the Rural future land use category and will remain in that future land use category. The proposed amendment will not change the allowable use of the subject property. Policy 1.4.1 provides that “these areas are not to be programmed to receive urban-type capital improvements,” meaning that a developer may expand, but that residents should not expect improvements to be programmed through County capital improvement projects. The proposed amendment is consistent with the existing future land use category.

Development of residential uses under 2.5 dwelling units per acre does not require connection to public water and sewer service to be consistent with **Policy 4.1.1** and **Policy 4.1.2**, however Lee County Utilities has indicated that capacity is available to serve the subject property for water and sewer per the applicant's request. Based on the current Lee Plan¹, the developer would be allowed to develop up to approximately 788 dwelling units using self-service wells and septic tanks.

The Subject property is within the Agricultural Overlay, as identified on Map 1-G. **Policy 1.6.7** describes the Agricultural Overlay special treatment area. Policy 1.6.7 provides that agricultural uses “should be protected from the impacts of new developments, and the county should not attempt to alter or curtail agricultural operations on them merely to satisfy the life-style expectations of non-urban residents.” This policy is meant to protect existing agricultural uses in non-urban areas from compatibility concerns of nearby residents. Policy 1.6.7 does not prohibit the conversion of agricultural uses to other uses. Although Florida Statute 163.3177(6)(a) requires the Lee Plan's future land use element include the general distribution and location of land for agriculture, Florida Statute 187.201(22)(b)(1) ensures the goals and policies in state and regional plans are not interpreted to restrict the conversion of agriculture lands to other uses. Similar language was deleted from the Lee Plan in Ordinance 21-09 to “remove redundancy with Florida Statute.”

Objective 2.1 of the Lee Plan states that “Contiguous and compact growth patterns will be promoted to... contain urban sprawl... [and] conserve land, water, and natural resources...” Implementation of the proposed amendments will not detract from the distinction between future non-urban areas and future suburban or future urban areas as envisioned by the Lee Plan. Amendments to the Lee Plan that encourage both the continued use of the Rural future land use categories in appropriate areas and the conservation of land, water and natural resources and systems are consistent with Objective 2.1.

¹ Lee Plan Policies 1.4.1 and 124.1.1, and Standards 4.1.1 and 4.1.2

Community Planning Area

The **Northeast Lee County Community Plan, Lee Plan Goal 27**, provides objectives and policies applicable to both the Alva and North Olga Community Plan areas in order to “maintain, enhance, and support the heritage and rural character, natural resources, and agricultural lands” in Northeast Lee County. Objective 27.1 and Policy 27.1.1 of the Lee Plan discuss the need to maintain and enhance the rural character of Northeast Lee County, including through the use of clustered development in order to conserve “large areas of open lands.” Additionally **Objective 27.2** and **Policy 27.2.1** direct applicants to develop and refine rural planning tools in order to “enhance and maintain Northeast Lee County’s sense of place and provide for the long-term preservation of large tracts of contiguous natural resource and open space areas.”

The **North Olga Community Plan, Lee Plan Goal 29**, is to: “Promote and support the unique rural character, heritage, economy, quality of life, and natural resources in the North Olga Community Plan area.” Policy 29.2.1 “encourages the design of planned developments to include a mix of unit types and flexible lot sizes to **allow for clustering**, affordability, **preservation of open space, natural assets** and diversity of choice within the community” [emphasis added]. The proposed areas for preservation of Rare and Unique Upland Habitats contain two known archeological sites, which were documented as part of a cultural resource study conducted on the property. The preservation of the Rare and Unique Upland Habitat would protect these archeological sites. The incentive provided in Policy 123.2.17 would allow for a form of development that is consistent with the Goals, Objectives, and Policies within the Northeast Lee County and North Olga Community Plans².

As previously stated, any proposed rezoning must demonstrate consistency with all Lee Plan requirements. The applicant held public meetings within the boundaries of both the Alva and North Olga Community Planning Areas, consistent with **Policy 17.3.3**. A meeting in the Alva Community Plan area was held on March 14, 2023, and a meeting in the North Olga Community Plan area was held on June 20, 2023.

Environmental Analysis

The applicant’s Environmental Analysis identified 700.57± acres of uplands consisting of Pine Flatwoods (FLUCCS 4119), Live Oak (FLUCCS 4279), Cabbage Palm (FLUCCS 4289), 70.29± acres of wetlands consisting of Cabbage Palm, Hydric (4281), and 18.10± acres of Other Surface Waters (OSW) consisting of Streams and Waterways (FLUCCS 510). A formal wetland jurisdictional determination was not provided therefore the upland and wetland acreages provided are subject to review and approval by the applicable State agency.

The Protected Species Survey provided by the applicant noted observations of adult and juvenile Crested Caracara, adult and juvenile Sandhill Crane, Snail Kite, Snowy Egret, Tri-colored Heron, Wood Stork, Little Blue Heron, Juvenile Bald Eagle, American Alligator, and Gopher Tortoise. These species are identified as protected species per the Lee County Land Development Code and a species management plan will be required prior to future development per the Land Development Code.

Application materials submitted with the concurrent zoning indicate that the western and eastern portions of the subject property receive offsite flows that cross the property generally from the north to the south, towards the Caloosahatchee River. These flows are conveyed through the property by Trout Creek and a series of man-made drainage ditches that connect to Otter Creek. Otter Creek has been altered throughout the years as evidenced by historical aerials. Future development should preserve Trout

² Lee Plan Goal 29, Objective 29.2, 29.2.1

Creek flowway and ensure that surface water flows are maintained or improved consistent with Lee Plan Policies 60.4.3, 126.1.1, 126.1.4.

The subject property is within the State adopted Caloosahatchee River Basin Management Action Plan (BMAP) for Total Nitrogen and Total Phosphorus. The western portion of the property, within the Trout Creek Waterbody ID (WBID), is within a State adopted Total Maximum Daily Load for Fecal Coliform and is impaired for *Escherichia coli*. The eastern portion of the property is within the Otter Creek WBID. The property outfalls into a portion of the Caloosahatchee River that is within a State adopted Total Maximum Daily Load for Nitrogen and is impaired for Dissolved Oxygen, Enterococci, Iron, Chlorophyll-a, Total Nitrogen, and Total Phosphorus. In addition, northern portions of the subject property, abutting North River Road, are within the 1-year, 5-year, and 10-year Wellfield Protection Zone travel times. Given the unique surface water and groundwater resources in the immediate area, future development should be encouraged to use public sanitary sewer in lieu of the 788 septic tanks that could be allowed on the subject property.

Lee County should recognize expansion of sewer and water to the subject property is appropriate given the environmental concerns regarding water quality of the Caloosahatchee River³. Recent changes to Florida Statutes indicate the State's desire to move toward sanitary sewer in areas within a BMAP. House Bill 1379, passed in the 2023 legislative session, states that "local governments subject to a basin management action plan...must provide the department [FDEP] an update on the status of construction of sanitary sewers to serve such areas."⁴

Policy 126.1.4 of the Lee Plan requires development designs must maintain groundwater levels at or above existing levels. Connecting to the LCUs potable water system, will reduce stress on the shallow aquifer and help to maintain or improve groundwater levels near the subject property., Therefore, amending the Lee Plan to allow for connection to LCU's potable water is consistent with Policy 126.1.4. This is particularly important for the subject property, as the surrounding properties primarily rely on Sandstone Aquifer for their potable water needs. Conditions may also be required to the concurrent rezoning request in order to further demonstrate consistency with Policy 126.1.4. This will ensure water leaving the site is maintained or improved for the protection of the environment.

Transportation Analysis

Analysis of the surrounding roadway network indicates that the increase in density allowed through Policy 123.2.17 causes a segment of State Road 31 to fall below the recommended Level of Service threshold. This segment of State Road 31 is in the design stage of a widening project according to Florida Department of Transportation⁵.

Transportation concurrency is non-regulatory per Florida Statutes Section 163.3180 and Lee Plan Policy 95.1.3, which provides "Compliance with non-regulatory LOS standards will not be a requirement for continued development permitting, but will be used for facility planning purposes."

³ Florida Department of Environmental Protection, *2022 5-Year Review of the Caloosahatchee River and Estuary Basin Management Action Plan*, December 2022; Lapointe et al., *Microbial Source Tracking in Lee County Waterways*, Florida Atlantic University, March 2022.

⁴ Florida House of Representatives, *CS/CS/HB 1379: Environmental Protection*, March 2022.

⁵ Florida Department of Transportation, *428917-1*, July 2023. <https://www.swflroads.com/project/428917-1>

Public Facilities Impact

- Fire: The subject property is served by Bayshore Fire Rescue, who has indicated that the property currently lies outside of five road miles of the subject site.
- Emergency Medical Services: Lee County Emergency Medical Services (EMS) will provide service to the subject property. Lee County EMS has indicated that they cannot yet sufficiently serve the entirety of the subject property within the established response time threshold. Development of an EMS station nearby on State Road 31 is planned to begin in the near future. This is an issue that would exist with and without the proposed amendments to Maps 4-A and 4-B. Staff recommends that future zoning action consist of mitigation techniques such as development phasing in order to ensure that EMS service is adequate for the entire project site at build-out.
- Utilities: The subject property is not currently located within the Lee County Utilities Future Service Area. Potable water and sanitary sewer lines are not in operation at the vicinity, and thus, developer-funded system enhancements are required. Potable water service will be provided by the North Lee County Water Treatment Plant and sanitary sewer service will be provided by the City of Fort Myers North Water Reclamation Facility. There are no reuse mains within the vicinity. Lee County Utilities has indicated that there is sufficient capacity to provide service to the subject property.
- Public Transit: The subject property does not meet applicability standards for LeeTran. The property is not within one quarter mile of a fixed route corridor, and there is no identified need for enhanced or additional transit services in the area.
- Schools: The School District of Lee County has determined that capacity is an issue within the Concurrency Service Area (CSA) at the elementary school level; however, capacity is available within the adjacent CSA.
- Police: The Lee County Sheriff's Office will serve the subject property and has indicated that service can be provided to the subject property. Law enforcement will be provided from the North District offices in North Fort Myers. The Sheriff's Office requests a Crime Prevention Through Environmental Design report at time of Development Order.
- Solid Waste: Lee County Solid Waste is capable of providing solid waste collection service to the subject property. Service will be provided through franchised hauling contractors, with disposal of waste accomplished at the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill.

CONCLUSIONS

The proposed amendment will extend Lee County Utilities Future Water and Sewer Service Areas to the approximately 788 acre subject site. Inclusion of the subject property on Maps 4-A and 4-B allows developer funded expansion of sewer and water service. While the Lee Plan states that areas within the Rural future land use category are not to be programmed to receive urban-type capital improvements, it does not say that utilities may not be extended to Rural areas through developer funded improvements. It is acknowledged that the availability of water and sewer could result in an increase of density of approximately 0.4 units per acre in exchange for preserving and restoring Rare and Unique upland habitat by clustering development to maximizing open space and minimizing groundwater impacts.

This request is consistent with the Lee Plan by protecting aquifer water levels by reducing reliance on private well and septic systems. The request is also consistent with new direction from the State to expand

sewer service to areas under a Basin Management Action Plan. It would be inconsistent with direction from the State to deny the applicant's request to provide services to the subject property. In summary,

- The proposed amendments are consistent with the future land use category and surrounding property uses.
- The proposed amendments promote the use of sanitary sewer in BMAP areas, consistent with state statutes.
- The proposed amendments will allow for a form of development consistent with the Objectives and Policies of Goal 27 and Goal 29 of the Lee Plan.
- The proposed amendment helps to ensure area groundwater levels will be maintained at or above existing levels, consistent with the Lee Plan.

Staff recommends that the Board of County Commissioners **transmit** the proposed amendment as shown in Amendment 1.

PART 2
LOCAL PLANNING AGENCY
REVIEW AND RECOMMENDATION

DATE OF PUBLIC HEARING: September 25, 2023

A. LOCAL PLANNING AGENCY REVIEW

The applicant's representatives provided a presentation addressing the requested amendments, subject property, impact analysis, surrounding uses, consistency with the Lee Plan, and concurrent rezoning.

During the applicant's presentation members of the LPA asked about the process from this point to the beginning of construction, the cost of utility expansion, and who would be responsible for extending water and sewer lines.

Following this, staff made a presentation addressing the requested amendments, subject property, and consistency with the Lee Plan and staff recommendation.

Members of the LPA asked staff whether input from required community meetings was considered, the scope of the decision before the LPA, transportation concurrency, availability of emergency medical service, archaeological sites on the property, availability of fire services, availability of public transit, which water and sewer treatment plant locations will provide those respective services, whether service was contiguous to the site, whether the proposal met the goals of the community plan area, protected species, and stormwater management.

There were 53 members of the public who made comments on the proposed amendment. Public comments primarily expressed concerns over traffic, lack of infrastructure, increased density, inconsistency with existing character of the surrounding area, and forced connections to sewer and water services.

B. LOCAL PLANNING AGENCY RECOMMENDATION

A motion was made to recommend that the Board of County Commissioners **transmit** CPA2022-00019. The motion failed 3 to 2.

**RE: Cary Duke CPA
Lee County Comprehensive Plan Amendment (Map) Application**

Dear Ms. Rozdolski:

Neal Communities of Southwest Florida, LLC ("Applicant") is proposing a large-scale Comprehensive Plan Amendment (Map) on the 788+/- acres located at 13230 N. River Road in unincorporated Lee County, Florida, generally one mile east of the SR 31 Pine Island and N River Road intersection in the Northeast Lee County/North Olga Planning Communities.

Specifically, the Applicant seeks a map change to at the property to the Future Water Service Areas Map (Map 4A) and Future Sewer Service Area Map (Map 4B).

This application is a companion application to the Cary+Duke+Povia RPD rezoning.

Enclosed please find a completed CPA application. We look forward to working with you.

Sincerely,

RVI Planning + Landscape Architecture

A handwritten signature in black ink, appearing to read 'Jeremy Frantz'.

Jeremy Frantz, AICP
Project Director

APPLICATION FOR A COMPREHENSIVE PLAN AMENDMENT - MAP

ProjectName: Cary+Duke+Povia RPD

ProjectDescription: A request to amend the Lee County Utilities Future Water Service Areas Map (Map 4A) the Lee County Utilities Future Sewer Service Areas Map (Map 4B) and to include a 788+/- acre property within the Future Water Service Area and Sewer Service Area. The request is associated with a proposed RPD Rezone to allow for a maximum of 1,099 single-family dwelling units.

Map(s) to Be Amended: Lee County Utilities Future Water Service Areas Map (Map-4A) and Future Water Service Areas Map (Map-4B).

State Review Process: ☐ Small-Scale Review ☐ State Coordinated Review ☒ Expedited State Review

E-mail: jfrantz@rviplanning.com

3. Owner(s) of Record: See Attached.

Address: _____

City, State, Zip: _____

Phone Number: _____

E-mail: _____

4. Property Location:

1. SiteAddress: 13230 N River Road, Alva, FL 33920; 14406 Duke Hwy, Alva, FL 33920 & Access Undetermined

2. STRAP(s): 17-43-26-00-00001.0000; 17-43-26-01-00003.0000; 17-43-26-01-00008.0000; 17-43-26-01-00009.0000; 16-43-26-00-00001.0040; 16-43-26-00-00001.0070; 16-43-26-00-00001.0000; 17-43-26-01-00004.0000

5. Property Information:

Total Acreage of Property: 788+/- acres

Total Acreage Included in Request: 788+/- acres

Total Uplands: 718+/- acres

Total Wetlands: 70+/- acres

Current Zoning: AG-2

Current Future Land Use Category(ies): Rural & Wetlands

Area in Each Future Land Use Category: Rural = 718+/- ac

Wetlands = 70+/- ac

Existing Land Use: Agriculture / Pasture

6. Calculation of maximum allowable development under current Lee Plan:

Residential Units/Density: 771

Commercial Intensity: 0

Industrial Intensity: 0

7. Calculation of maximum allowable development with proposed amendments:

Residential Units/Density: 1,099

Commercial Intensity: 0

Industrial Intensity: 0

Public Facilities Impacts

NOTE: The applicant must calculate public facilities impacts based on the maximum development.

- 1. Traffic Circulation Analysis:** The analysis is intended to determine the affect of the land use change on the Financially Feasible Highway Plan Map 3A (20-year plus horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit a Traffic Impact Statement (TIS) consistent with Lee County Administrative Code (AC)13-17.
 - a. Proposals affecting less than 10 acres, where development parameters are contained within the Traffic Analysis Zone (TAZ) or zones planned population and employment, or where there is no change in allowable density/intensity, may be eligible for a TIS requirement waiver as outlined in the Lee County TIS Guidelines and AC-13-17. Identification of allowable density/intensity in order to determine socio-economic data for affected TAZ(s) must be coordinated with Lee County Planning staff. Otherwise a calculation of trip generation is required consistent with AC-13-17 and the Lee County TIS Guidelines to determine required components of analysis for:
 - i. Total peak hour trip generation less than 50 total trip ends – trip generation.
 - ii. Total peak hour trip generation from 50 to 300 total trip ends – trip generation, trip distribution and trip assignment (manual or Florida Standard Urban Transportation Modeling Structure (FSUTMS) analysis consistent with AC-13-17 and TIS Guidelines), short-term (5 year) and long-range (to current Lee Plan horizon year) segment LOS analysis of the nearest or abutting arterial and major collector segment(s) identified in the Transportation Inventory based on the trip generation and roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is recommended prior to submittal of the application to discuss use of FSUTMS, any changes to analysis requirements, or a combined CPA and Zoning TIS short term analysis.
 - iii. Total peak hour trip generation is over 300 total trip ends - trip generation, mode split, trip distribution and trip assignment (manual or FSUTMS analysis consistent with AC-13-17 and TIS Guidelines), short-term (five-year) and long-range (to current Lee Plan horizon year) segment LOS analysis of arterial and collector segments listed in the Transportation Inventory. LOS analysis will include any portion of roadway segments within an area three miles offset from the boundary of the application legal description metes and bounds survey. LOS analysis will also include any additional segments in the study area based on the roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is required prior to submittal of the application.
 - b. Map amendment - greater than 10 acres -Allowable density/intensity will be determined by Lee County Planning staff.
- 2. Provide an existing and future conditions analysis for the following (see Policy 95.1.3):**
 - a. Sanitary Sewer
 - b. Potable Water
 - c. Surface Water/Drainage Basins
 - d. Parks, Recreation, and Open Space
 - e. Public Schools

Analysis for each of the above should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- a. Franchise Area, Basin, or District in which the property is located
- b. Current LOS, and LOS standard of facilities serving the site
- c. Projected 2030 LOS under existing designation
- d. Projected 2030 LOS under proposed designation
- e. Existing infrastructure, if any, in the immediate area with the potential to serve the subject property
- f. Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements
- g. Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water

In addition to the above analysis, provide the following for potable water:

- a. Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- b. Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- c. Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
- d. Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:

- a. Fire protection with adequate response times
- b. Emergency medical service (EMS) provisions
- c. Law enforcement
- d. Solid Waste
- e. Mass Transit
- f. Schools

In reference to above, the applicant must supply the responding agency with the information from application items 5, 6, and 7 for their evaluation. This application must include the applicant's correspondence/request to the responding agency.

Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed change based upon the following:

1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
2. A map and description of the soils found on the property (identify the source of the information).
3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
4. A map delineating the property boundaries on the most recent Flood Insurance Rate Map.
5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archaeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

1. A map of any historic districts and/or sites listed on the Florida Master Site File which are located on the subject property or adjacent properties.
2. A map showing the subject property location on the archaeological sensitivity map for Lee County.

Internal Consistency with the Lee Plan

1. Discuss how the proposal affects established Lee County population projections, Lee Plan Table 1(b) and the total population capacity of the Lee Plan Future Land Use Map.
2. List all goals and objectives of the Lee Plan that are affected by the proposed amendment or that affect the subject property. This analysis should include an evaluation of all relevant policies under each goal and objective.
3. Describe how the proposal affects adjacent local governments and their comprehensive plans.

State Policy Plan and Regional Policy Plan

List State Policy Plan and Regional Policy Plan goals, strategies and actions, and policies which are relevant to this plan amendment.

Justify the proposed amendment based upon sound planning principles

Support all conclusions made in this justification with adequate data and analysis.

Planning Communities/Community Plan Area Requirements

If located within a planning community/community plan area, provide a meeting summary document of the required public informational session [Lee Plan Goal 17].

Sketch and Legal Description

The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

SUBMITTAL REQUIREMENTS

Clearly label all submittal documents with the exhibit name indicated below.

For each map submitted, the applicant will be required to submit a 24"x36" version and 8.5"x11" reduced map for inclusion in public hearing packets.

MINIMUM SUBMITTAL ITEMS (3 Copies)

<input checked="" type="checkbox"/>	Completed Application (Exhibit – M1)
<input checked="" type="checkbox"/>	Filing Fee (Exhibit – M2)
<input checked="" type="checkbox"/>	Disclosure of Interest (Exhibit – M3)

<input checked="" type="checkbox"/>	Future Land Use Map - Existing and Proposed (Exhibit – M4)
<input checked="" type="checkbox"/>	Map and Description of Existing Land Uses (Not Designations) of the Subject Property and Surrounding Properties (Exhibit – M5)
<input checked="" type="checkbox"/>	Map and Description of Existing Zoning of the Subject Property and Surrounding Properties (Exhibit – M6)
<input checked="" type="checkbox"/>	Signed/Sealed Legal Description and Sketch of the Description for Each FLUC Proposed (Exhibit – M7)
<input checked="" type="checkbox"/>	Copy of the Deed(s) of the Subject Property (Exhibit – M8)
<input checked="" type="checkbox"/>	Aerial Map Showing the Subject Property and Surrounding Properties (Exhibit – M9)
<input checked="" type="checkbox"/>	Authorization Letter From the Property Owner(s) Authorizing the Applicant to Represent the Owner (Exhibit – M10)
<input checked="" type="checkbox"/>	Lee Plan Analysis (Exhibit – M11)
<input checked="" type="checkbox"/>	Environmental Impacts Analysis (Exhibit – M12)
<input checked="" type="checkbox"/>	Historic Resources Impact Analysis (Exhibit – M13)
<input checked="" type="checkbox"/>	Public Facilities Impacts Analysis (Exhibit – M14)
<input checked="" type="checkbox"/>	Traffic Circulation Analysis (Exhibit – M15)
<input checked="" type="checkbox"/>	Existing and Future Conditions Analysis - Sanitary Sewer, Potable Water, Surface Water/Drainage Basins, Parks and Rec, Open Space, Public Schools (Exhibit – M16)
<input checked="" type="checkbox"/>	Letter of Determination For the Adequacy/Provision of Existing/Proposed Support Facilities - Fire Protection, Emergency Medical Service, Law Enforcement, Solid Waste, Mass Transit, Schools (Exhibit – M17)
<input checked="" type="checkbox"/>	State Policy Plan and Regional Policy Plan (Exhibit – M18)
<input checked="" type="checkbox"/>	Justification of Proposed Amendment (Exhibit – M19)
<input checked="" type="checkbox"/>	Planning Communities/Community Plan Area Requirements (Exhibit – M20)

APPLICANT – PLEASE NOTE:

Once staff has determined the application is sufficient for review, 15 complete copies will be required to be submitted to staff. These copies will be used for Local Planning Agency hearings, Board of County Commissioners hearings, and State Reviewing Agencies. Staff will notify the applicant prior to each hearing or mail out to obtain the required copies.

If you have any questions regarding this application, please contact the Planning Section at (239)533-8585.

Disclosure of Interest (EXHIBIT M3)

DISCLOSURE OF INTEREST AFFIDAVIT

BEFORE ME this day appeared G. Keith Cary, who, being first duly sworn and deposed says:

1. That I am the record owner, or a legal representative of the record owner, of the property that is located at 17-43-26-00-00001.0000; 17-43-26-01-00003.0000; 17-43-26-01-00009.0000; 16-43-26-00-00001.0040; 17-43-26-01-00004.0000; 16-43-26-00-00001.0070 and is the subject of an Application for zoning action (hereinafter the "Property").

2. That I am familiar with the legal ownership of the Property and have full knowledge of the names of all individuals that have an ownership interest in the Property or a legal entity owning an interest in the Property.

[OPTIONAL PROVISION IF APPLICANT IS CONTRACT PURCHASER: In addition, I am familiar with the individuals that have an ownership interest in the legal entity that is under contract to purchase the Property.]

3. That, unless otherwise specified in paragraph 6 below, no Lee County Employee, County Commissioner, or Hearing Examiner has an Ownership Interest in the Property or any legal entity (Corporation, Company, Partnership, Limited Partnership, Trust, etc.) that has an Ownership Interest in the Property or that has contracted to purchase the Property.

4. That the disclosure identified herein does not include any beneficial Ownership Interest that a Lee County Employee, County Commissioner, or Hearing Examiner may have in any entity registered with the Federal Securities Exchange Commission or registered pursuant to Chapter 517, whose interest is for sale to the general public.

5. That, if the Ownership Interest in the Property changes and results in this affidavit no longer being accurate, the undersigned will file a supplemental Affidavit that identifies the name of any Lee County Employee, County Commissioner, or Hearing Examiner that subsequently acquires an interest in the Property.

6. Disclosure of Interest held by a Lee County Employee, County Commissioner, or Hearing Examiner.

Name and Address	Percentage of Ownership
N/A	N/A

Under penalty of perjury, I declare that I have read the foregoing and the facts alleged are true to the best of my knowledge and belief.

CERTIFICATE OF TITLE
(AS to Count I)

The undersigned clerk of the court certifies that he or she executed and filed a
certificate of sale in this action on April 20, 2010 for the property described herein and that
no objections to the sale have been filed within the time allowed for filing objections.

The following property in Lee County, Florida:

See Exhibit "A" attached hereto

Was sold to:

RAYMOND E. HARNEY and KATHY R. HARNEY, as
Trustees of the HARNEY REVOCABLE TRUST dated
December 9, 2005,

Address: 18451 N Olga Road, N Fort Myers, FL 33920

WITNESS my hand and the seal of the court on May 03, 2010

AFFIDAVIT OF AUTHORIZATION

APPLICATION IS SIGNED BY INDIVIDUAL OWNER, APPLICANT, CORPORATION, LIMITED LIABILITY COMPANY (L.L.C.), LIMITED COMPANY (L.C.), PARTNERSHIP, LIMITED PARTNERSHIP, OR TRUSTEE

I, Timothy Oak (name), as SWFL Regional President
(owner/title) of Neal Communities of Southwest Florida (company/property), swear or affirm under oath, that
I am the owner or the authorized representative of the owner(s) of the property and that:

1. I have full authority to secure the approval(s) requested and to impose covenants and restrictions on the referenced property as a result of any action approved by the County in accordance with this application and the Land Development Code;
2. All answers to the questions in this application and any sketches, data or other supplementary matter attached hereto and made a part of this application are honest and true;
3. I have authorized the staff of Lee County Community Development to enter upon the property during normal working hours for the purpose of investigating and evaluating the request made thru this application; and that
4. The property will not be transferred, conveyed, sold or subdivided unencumbered by the conditions and restrictions imposed by the approved action.

***Notes:**

- If the applicant is a corporation, then it is usually executed by the corp. pres. or v. pres.
- If the applicant is a Limited Liability Company (L.L.C.) or Limited Company (L.C.), then the documents should typically be signed by the Company's "Managing Member."
- If the applicant is a partnership, then typically a partner can sign on behalf of the partnership.
- If the applicant is a limited partnership, then the general partner must sign and be identified as the "general partner" of the named partnership.
- If the applicant is a trustee, then they must include their title of "trustee."
- In each instance, first determine the applicant's status, e.g., individual, corporate, trust, partnership, estate, etc., and then use the appropriate format for that ownership.

Under penalties of perjury, I declare that I have read the foregoing Affidavit of Authorization and that the facts stated in it are true.

Signature

Lee Plan Analysis & State and Regional Policy Plan (EXHIBITS M11 & M18)

Cary+Duke+Povia Map Amendment

Lee Plan Analysis & State and Regional Policy Plan

Exhibits M11 & M18

I. Lee Plan Analysis

The following is an analysis of how the proposed amendment is consistent with the goals, policies, and objectives of the Lee Plan.

POLICY 1.4.1: The Rural future land use category are areas that are to remain predominantly rural – that is, low density residential, agricultural uses, and minimal non-residential land uses that are needed to serve the rural community. Natural resource extraction may be permitted in accordance with Policy 10.1.4. These areas are not to be programmed to receive urban-type capital improvements, and they can anticipate a continued level of public services below that of the urban areas. Maximum density in the Rural future land use category is one dwelling unit per acre (1 du/acre). See Policy 123.2.17 for a potential density incentive resulting from preservation and/or restoration of Rare and Unique Upland Habitat.

The Property is located in the Rural and Wetlands Future Land Use Category (FLUC). Unique to the Rural FLUC, the addition of the Property into the Future Water and Sewer Service Areas creates the opportunity to generate additional dwelling units through the Planned Development process as anticipated in this Policy and Policy 123.2.17.

The companion zoning request (DCI2022-00067) is limited to residential dwellings at 1.39 du/acre which is consistent with a base density of 1 du/acre and additional dwelling units generated through the preservation, restoration, and creation of rare and unique uplands, as allowed in Policy 123.2.17. Therefore, the proposed uses and density are entirely consistent with the above policy and other related Rural FLUC policies governing use of these lands.

POLICY 1.5.1: Permitted land uses in Wetlands consist of very low density residential uses and recreational uses that will not adversely affect the ecological functions of wetlands. All development in Wetlands must be consistent with Goal 124. The maximum density is one dwelling unit per twenty acres (1 du/20 acre) except as otherwise provided in Table 1(a) and Chapter XIII.

The attached proposed density calculations for the Cary+Duke+Povia RPD utilize a density calculation for impacted wetlands of 1 du/20 acres. Preserved wetlands utilize a density calculation of 1 unit per acre consistent with Table 1(a) Note 8. Therefore, the proposed CPA and RPD are consistent with this policy.

POLICY 1.6.5: The Planning Districts Map and Acreage Allocation Table (Map 1-B and Table 1(b)) depict the proposed distribution, extent, and location of generalized land uses through the Plan's horizon. Acreage totals are provided for land in each Planning District in unincorporated Lee County. No development orders or extensions to development orders will be issued or approved by Lee County that would allow the acreage totals for residential, commercial or industrial uses contained in Table 1(b) to be exceeded. This policy will be implemented as follows:

- 1. For each Planning District the County will maintain a parcel based database of existing land use.**
- 2. Project reviews for development orders must include a review of the capacity, in acres, that will be consumed by buildout of the development order. No development order, or extension of a development order, will be issued or approved if the acreage for a land use, when added to the acreage contained in the updated existing land use database, exceeds the limitation established by Table 1(b) regardless of other project approvals in that Planning District.**
- 3. When updating the Lee Plan's planning horizon, a comprehensive evaluation of the Planning Districts Map and Acreage Allocation Table will be conducted.**

This proposed amendment does not change the Future Land Use Designation of the Property. Table 1(b) currently allocates a maximum of 1,948 acres for residential development in the Rural Future Land Use Category within District 1 Northeast Lee County. According to the Planning Department, 636 acres remain for residential acreage. The companion zoning request (DCI2022-00067) includes 368 acres of residential development. Therefore, sufficient acreage is allocated for the proposed development.

OBJECTIVE 2.1: DEVELOPMENT LOCATION. Contiguous and compact growth patterns will be promoted through the rezoning process to contain urban sprawl, minimize energy costs, conserve land, water, and natural resources, minimize the cost of services, and prevent development patterns where large tracts of land are bypassed in favor of development more distant from services and existing communities.

The companion zoning request (DCI2022-00067) will allow for a compact development pattern in an area intended for low-density development and will maintain a rural community character, in direct compliance with this and other policies in the Lee Plan. As outlined in detail within the application, the project provides for compatibility with the surrounding low-density residential development and agricultural uses. Development within the project is clustered primarily within existing uplands and provides for 60 percent open space, representing a compact development footprint, while also maintaining a rural residential density. The recently approved Owl Creek RPD extended the utility service areas to the western boundary of the subject property. As a result, this RPD makes efficient use of this planned extension of infrastructure and eliminates development patterns dependent on well and septic.

OBJECTIVE 2.2: DEVELOPMENT TIMING. Direct new growth to those portions of the future urban areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created. Development orders and permits (as defined in §163.3164, Fla. Stat.) will be granted only when consistent with the provisions of §163.3202(2)(g) and § 163.3180, Fla. Stat. and the concurrency requirements in the LDC.

The Property is contiguous to developed or developing properties in the Northeast Lee County community, representing logical and efficient growth within the Rural FLUC. The attached letters of availability demonstrate there is sufficient capacity in all regulatory LOS facilities to provide public services to support the proposed density. Additionally, the attached Public Infrastructure Map demonstrates the Property is in the vicinity of adequate public facilities and public investment. Therefore, the proposed amendment and rezoning fully comply with the above policy's intent to direct new growth to areas of the County where adequate public facilities exist or are assured and where compact development patterns can be created.

OBJECTIVE 4.1: WATER, SEWER, AND ENVIRONMENTAL STANDARDS. Consider water, sewer, and environmental standards during the rezoning process. Ensure the standards are met prior to issuing a local development order.

STANDARD 4.1.1: WATER.

3. The developer must provide proof that the prior commitments of the water utility, plus the projected need of the developer, do not exceed the supply and facility capacity of the utility.

A letter of availability dated 11/28/2022 was provided by Lee County Utilities identifying the facility's capacity for the development of projected water and sewer demand.

4. All waterline extensions to new development will be designed to provide minimum fire flows, as well as adequate domestic services as required by Fla. Admin. Code R. 62-555.

The proposed waterline extensions shall be designed to meet minimum fire flows and provide adequate domestic service water flows as required by the Florida Administrative Code.

6. If a development lies outside any service area as described above, the developer may:

- ***request that the service area of Lee County Utilities or an adjacent water utility be extended to incorporate the property;***
- ***establish a community water system for the development; or***

- ***develop at an intensity that does not require a community water system.***

The Property is immediately adjacent to the Lee County Utilities Service Area and while the companion rezoning application proposes a density below 2.5 dwelling units per acre, the incorporation of the Property into Map 4A facilitates benefits to the natural resources in the area. The proposed community design provides for a compact form of development which provides significant preservation, creation and restoration of rare and unique uplands, and wetland and floodplain preservation while also removing the potential for up to 788 private wells.

STANDARD 4.1.2: SEWER.

4. If a new development is located in a certificated or franchised service area, or Lee County Utilities' future sanitary sewer service area (see Map 4-B), and the utility cannot provide the service, or cannot provide the service except at a clearly unreasonable cost to the developer, the developer may establish on a temporary basis a self-provided sanitary sewer facility for the development, to be abated when the utility extends service to the site. The developer may also petition the appropriate regulatory agency to contract the service area of the utility in order that another utility may be invited to provide the service.

5. If a development lies outside any service area as described above, the developer may:

- ***request that the service area of Lee County Utilities or an adjacent sewer utility be expanded to incorporate the property;***
- ***establish a self-provided sanitary sewer system for the development;***
- ***develop at an intensity that does not require sanitary sewer service; or***
- ***if no more than 5000 gallons of effluent per day per parcel is produced, an individual sewage disposal system per Fla. Admin. Code R. 64E-6 may be utilized, contingent on approval by all relevant authorities.***

The Property is outside the current service area and while the companion rezoning application proposes a density below 2.5 dwelling units per acre, the incorporation of the Property into Map 4B facilitates benefits to the natural resources in the area. The proposed community design provides for a compact form of development which provides significant preservation, creation and restoration of rare and unique uplands, and wetland and floodplain preservation while also removing the potential for up to 788 septic systems.

The Applicant has also explored the potential to connect to alternative providers. The Property is also in the vicinity of the FGUA franchise area, however, the utility cannot provide service except at a clearly unreasonable cost to the applicant. Therefore, connection to the LCU system for sanitary sewer is the most cost-effective option for the applicant.

POLICY 5.1.2: Prohibit residential development where physical constraints or hazards exist, or require the density and design to be adjusted accordingly. Such constraints or hazards include but are not limited to flood, storm, or hurricane hazards; unstable soil or geologic conditions; environmental limitations; aircraft noise; or other characteristics that may endanger the residential community.

While portions of the Property are located in the Coastal High Hazard Area (CHHA), the proposed RPD preserves the floodway and floodplain surrounding Trout Creek. The proposed RPD protects against impacts from coastal flooding by providing storage within the surface water management system and the protection of 420 acres of wetland and upland preservation. The RPD does not propose to exceed allowable maximum density permitted by the underlying FLUCs. Additionally, impacts to hurricane shelters will be addressed through the impact mitigation requirements in LDC Section 2-485 at the time of local development order.

POLICY 17.3.2: One public information meeting is required for privately-initiated applications that propose a text change within a community plan or revises a map designation within a community plan area boundary. The meeting must be conducted before the application can be found complete.

POLICY 17.3.3: Public information meetings required pursuant to the provisions of this subelement must be held within the established community plan area boundary that is affected by the amendment.

Pursuant to Policies 17.3.2, 17.3.3, and 27.1.8, two public information meetings were held related to this request and the companion zoning request (DCI2022-00067). The first meeting was held in North Olga on January 26, 2023, and the meeting summary has been added to the revised Exhibit M20. The second meeting was held in Alva on March 14, 2023. A summary of these meetings is attached with Exhibit M20.

POLICY 53.1.8: The costs of new or augmented potable water infrastructure that is developed by Lee County will be borne by those who benefit from the improved supply.

POLICY 53.1.9: New development will pay through appropriate financial mechanisms its fair share of the costs of providing standard potable water for that development.

The proposed expansion of potable water service will be through developer funded improvements. The cost extend infrastructure to the Property will not be borne by Lee County.

OBJECTIVE 60.1: SURFACE WATER. Develop a surface water management program that is multi-objective in scope, geographically based on basin boundaries, and incorporates the requirements of applicable adopted Basin Management Action Plans.

POLICY 60.1.1: Require design of surface water management systems to protect or enhance the groundwater.

A surface water management system is proposed which will provide water quality treatment before discharging into Trout Creek.

POLICY 60.1.2: Incorporate, utilize, and where practicable restore natural surface water flowways and associated habitats.

The companion zoning request (DCI2022-00067) includes significant preservation areas which will maintain existing flowways and associated habitats to the maximum extent practicable.

POLICY 61.1.6: When and where available, reuse water should be the first option for meeting irrigation needs of a development. Where reuse water is not available, surface water or low-quality groundwater should be utilized for irrigation. All other potential water sources must be eliminated prior to selecting potable water as the sole source for meeting the irrigation needs of a development. New developments will coordinate with County staff regarding the source of irrigation water.

Surface water will be used for all irrigation of landscaping within the community. The proposed community will not use potable water provided as a result of this amendment for irrigation purposes.

POLICY 95.1.3: LOS standards will be the basis for planning and provision of required public facilities and services within Lee County. Regulatory LOS standards will be the basis for determining the adequacy of public facilities for the purposes of permitting new development. Compliance with non-regulatory LOS standards will not be a requirement for continued development permitting, but will be used for facility planning purposes. The LOS will be the basis for facility design, for setting impact fees, and (where applicable) for the operation of the Concurrency Management System (CMS)

The attached letters of availability demonstrate adequate public facilities for all regulatory LOS standards. As noted in this policy, only regulatory LOS standards are used for determining adequacy of public facilities for the purposes of permitting new development. The Applicant along with the County will continue to monitor fire and EMS LOS as the project proceeds through the permitting process and utilize this information for facility planning purposes.

POLICY 95.3.3: Financing of public facilities and services will utilize appropriate revenue sources. The cost for the provision and expansion of services and facilities will be borne primarily by those who benefit, using funding mechanisms such as

impact fees, special taxing or benefit districts, community development districts, dedication of land and facilities, in-lieu-of fees, and capital construction, operation, and maintenance funds.

The proposed extension of water and sanitary sewer services to the Property will be privately funded by the development.

POLICY 101.1.4: *Require that comprehensive plan amendments which increase density within the Coastal High Hazard Area or on islands meet one of the following criteria in accordance with § 163.3178(8), Fla. Stat.:*

- 1. Will not result in an out of County hurricane evacuation time that exceeds 16 hours for a Category 5 storm event (Level E storm surge threat); or*
- 2. Will maintain a 12 hour evacuation time to shelter for a Category 5 storm event (Level E storm surge threat) and ensure shelter space is available to accommodate the additional population; or*
- 3. Will provide appropriate mitigation as determined by Lee County Department of Public Safety, to satisfy both criteria above, which may include the payment of money or construction of hurricane shelters and transportation facilities.*

Impacts to hurricane evacuation times will be addressed through the impact mitigation requirements in LDC Section 2-485(c) at the time of local development order.

OBJECTIVE 124.1: **Protect and conserve the natural functions of wetlands and wetland systems by maintaining wetland protection regulations.**

POLICY 124.1.1: **Ensure that development in wetlands is limited to very low density residential uses and uses of a recreational, open space, or conservation nature that are compatible with wetland functions. The maximum density in the Wetlands category is one unit per 20 acres, except that one single family residence will be permitted on lots meeting the standards in Chapter XIII, and except that owners of wetlands adjacent to Intensive Development, General Interchange, Central Urban, Urban Community, Suburban, New Community, Outlying Suburban, and Sub-Outlying Suburban areas may transfer densities to developable contiguous uplands under common ownership (see Table 1(a)).**

The proposed development is limited to very low density residential uses. Density is calculated at 1 du/20 acres in all wetlands proposed to be impacted in accordance with table 1(a). Densities from preserved wetlands are transferred to developable contiguous uplands under common ownership at 1 dwelling unit per acre, consistent with the maximum allowable density for the adjacent Rural Future Land Use Category as identified in this policy and Table 1(a) Note 8.

POLICY 124.1.2: **The County's wetlands protection regulations will be consistent with the following:**

2. No development in wetlands regulated by the State of Florida may be commenced without the appropriate state agency permit or authorization. Development orders and development permits authorizing development within wetlands or lands located within the Wetlands future land use category may be issued subject to a condition that construction may not commence until issuance of the required state permits.

Wetland limits were reviewed and approved on a portion of the Property by SFWMD as part of Application No. 080519-3 on September 3 and 5, 2008, however, the ERP was eventually withdrawn. A condition is proposed in the companion rezoning request which requires that construction may not commence until an ERP is obtained to authorize any impacts to wetlands proposed by the MCP.

6. The density on wetlands that have been impacted, or will be impacted, in accordance with a state agency permit will be calculated at a density of one dwelling unit per 20 acres. Nonresidential uses on wetlands that have been impacted, or will be impacted, in accordance with a state agency permit must be consistent with the non-residential uses permitted in the immediately adjacent, least intense, upland future land use category.

Density is calculated at 1 du/20 acres in all wetlands proposed to be impacted in accordance with table 1(a). Densities from preserved wetlands are transferred to developable contiguous uplands under common ownership at 1 dwelling unit per acre, consistent with the maximum allowable density for the adjacent Rural Future Land Use Category as identified in this policy and Table 1(a) Note 8.

POLICY 125.1.2: New development and additions to existing development must not degrade surface and ground water quality.

Incorporation of the Property into Map 4A and Map 4B removes the potential for groundwater withdrawals and potential impacts from up to 788 private wells and septic systems.

II. State Comprehensive Plan Consistency

The Community Planning Act of 2011 (HB7207) removed the requirement to address consistency with the local comprehensive plan and state comprehensive plan, however, the proposed amendment is consistent with the State Comprehensive Land Use Plan's intent to ensure the protection of natural resources. Specifically, the amendment is consistent with the following guiding policies:

187.201 (15) Land Use.

(a) Goal.—In recognition of the importance of preserving the natural resources and enhancing the quality of life of the state, development shall be directed to those areas

which have in place, or have agreements to provide, the land and water resources, fiscal abilities, and service capacity to accommodate growth in an environmentally acceptable manner.

(b) Policies.—

- 1. *Promote state programs, investments, and development and redevelopment activities which encourage efficient development and occur in areas which will have the capacity to service new population and commerce.***
- 2. *Develop a system of incentives and disincentives which encourages a separation of urban and rural land uses while protecting water supplies, resource development, and fish and wildlife habitats.***

As identified in the attached letter of availability there is service capacity in place to serve the project in terms of potable water and sanitary sewer service. The proposed amendment does not affect the capacity to serve solid waste, law enforcement, fire, parks, and school services for the development.

No changes to the current, Rural Future Land Use Category of the subject property are proposed and the proposed density is consistent with the allowable density in the Lee Plan. Therefore, the proposed extension of water and sewer services supports rural land uses while also reducing the need for individual well and septic systems for the Cary+Duke+Povia RPD.

187.201 (17) PUBLIC FACILITIES.—

(a) Goal.—Florida shall protect the substantial investments in public facilities that already exist and shall plan for and finance new facilities to serve residents in a timely, orderly, and efficient manner.

(b) Policies.—

- 1. Provide incentives for developing land in a way that maximizes the uses of existing public facilities.**
- 3. Allocate the costs of new public facilities on the basis of the benefits received by existing and future residents.**

The proposed extension of services will provide service to residents concurrently with new development. Additional planned extensions of service are planned for the adjacent Owl Creek Reserve RPD to the west of the subject property. The extension also supports the companion rezoning request which will allow for the creation of additional dwelling units through a clustered community design with significant preservation areas on site.

The proposed extension of water and sewer services to the Cary+Duke+Povia RPD will be privately funded by the developer.

III. Regional Policy Plan Consistency

The proposed amendment is consistent with the Southwest Florida Regional Policy Plan (SWFRPP) as follows:

Water Resources

Goal 3: Water Management Districts and local governments must have programs based on scientific modeling to protect surface water, potable water wells, wellfields and contributing areas from contamination.

The proposed map amendment will result in a reduction in the number of private wells servicing the potable water needs in this area allowing for more frequent maintenance and monitoring of water quality and quantity to protect against surface water contamination.

INTRODUCTION

An environmental assessment was conducted on Cary + Duke + Povia RPD (Project) to document existing land uses and vegetative cover; document the presence of state jurisdictional wetlands; research any potential utilization by wildlife and plant species listed by the Florida Fish and Wildlife Conservation Commission (FWCC), the Florida Department of Agriculture and Consumer Services (FDACS), and the U.S. Fish and Wildlife Services (USFWS) as Threatened, Endangered, or Species of Special Concern; and document listed species utilization within the Project site. The assessment included field surveys to map vegetation communities, an official review of agency records for documented occurrences of listed species on the property, and field surveys to document listed species utilization within the Project. This report summarizes the results of the environmental assessment.

The Project totals 788.96± acres and is located in Sections 16 and 17, Township 43 South, Range 26 East, Lee County (Figure 1). The Project site is surrounded by agricultural lands, undeveloped forested lands, and low-density single-family residential housing (Exhibit 1).

The property consists of improved pasture and forested areas. Two tributaries of the Caloosahatchee River are located on the Project site. Trout Creek bisects the property on the western portion of the Project site. Otter Creek, which has historically been channelized, is located on the eastern portion of the Project site.

LAND USES AND VEGETATION ASSOCIATIONS

Vegetation and land cover mapping for the Project was conducted using Lee County 2021 rectified aerials. Groundtruthing of the vegetative communities was conducted on April 27, 28, and 29; May 3; and October 11 and 12, 2022 utilizing the Florida Land Use, Cover and Forms Classification System (FLUCFCS) Level III (Florida Department of Transportation 1999). Level IV FLUCFCS was utilized to denote disturbance and hydrologic conditions. Exotic or “E” codes were used to identify levels of exotic and invasive vegetation (e.g., Brazilian pepper (*Schinus terebinthifolia*), melaleuca (*Melaleuca quinquenervia*), and bamboo (*Bambusa vulgaris*)). AutoCAD 3D 2021 software was used to determine the acreage of each mapping area, produce summaries, and generate the FLUCFCS and Wetlands Map for the Project (Exhibit 2). An aerial photograph of the property with an overlay of the FLUCFCS and Wetlands Map is provided as Exhibit 3.

A total of 41 vegetative and land cover types (i.e., FLUCFCS codes) were identified within the Project site. The site contains disturbed native wetland systems including mixed wetland hardwoods, wetland shrub, and freshwater marsh. The on-site wetland habitats have been disturbed by ditching and exotic infestation. Additionally, two rare and unique upland habitat types exist in the northeast portion of the Project site: Live Oak, Disturbed (FLUCFCS Code 4279 E1, E2, and E3) and Cabbage Palm, Disturbed (FLUCFCS Code 4289 E2). A summary of the FLUCFCS codes with acreage breakdown and description of each FLUCFCS is presented in Exhibit 4.

SOILS

The soils for the property, per the Natural Resources Conservation Service (formerly the Soil Conservation Service), are shown on Exhibit 5. A brief description for each soil type per the Soil Survey of Lee County, Florida (U.S. Department of Agriculture 1984 & 2020) is presented in Exhibit 6.

JURISDICTIONAL WETLANDS

The jurisdictional wetlands and “other surface waters” (OSWs) by FLUCFCS code are summarized in Table 1. South Florida Water Management District (SFWMD) jurisdictional wetlands constitute 70.29± acres or approximately 8.9 percent of the Project site. SFWMD jurisdictional OSWs constitute 18.10± acres or approximately 2.3 percent of the Project site.

Table 1. SFWMD Wetland and OSW Acreages by FLUCFCS Code

FLUCFCS Code	Description	Acreage
Wetlands		
262	Low Pasture	44.83
4221	Brazilian Pepper, Hydric	1.03
4281 E1	Cabbage Palm, Disturbed, Hydric (0-24% Exotics)	0.69
4281 E2	Cabbage Palm, Disturbed, Hydric (25-49% Exotics)	0.60
4281 E3	Cabbage Palm, Disturbed, Hydric (50-75% Exotics)	0.39
4291 E1	Wax Myrtle, Disturbed, Hydric (0-24% Exotics)	0.33
6189 E2	Willow, Disturbed (25-49% Exotics)	<0.01
6219 E1	Cypress, Disturbed (0-24% Exotics)	1.69
6219 E2	Cypress, Disturbed (25-49% Exotics)	1.85
6309 E1	Wetland Forested Mixed, Disturbed (0-24% Exotics)	1.67
6309 E2	Wetland Forested Mixed, Disturbed (25-49% Exotics)	3.59
6309 E3	Wetland Forested Mixed, Disturbed (50-75% Exotics)	3.42
6309 E4	Wetland Forested Mixed, Disturbed (76-100% Exotics)	1.70
6319 E4	Wetland Shrub, Disturbed (76-100% Exotics)	1.08
6419 E3	Freshwater Marsh, Disturbed (50-75% Exotics)	3.65
6419 E4	Freshwater Marsh, Disturbed (76-100% Exotics)	3.75
Wetlands Total		70.29
OSWs		
510	Streams and Waterways	8.82
514	Ditch	5.34
525	Cattle Pond	3.94
OSWs Total		18.10

The prominent wetland features consist of low pasture, wetland forested mixed, freshwater marsh, cypress, and wetland shrub scattered throughout the Project site. In addition, the OSWs mapped on the property include ditching, cattle ponds, and two tributaries of the Caloosahatchee River. A U.S. Geological Survey quadrangle map is provided as Exhibit 7.

LISTED SPECIES

Listed wildlife species as listed by the FWCC and the USFWS that have the potential to occur on the Project site are listed in Table 2 (FWCC 2022 and USFWS 1999). Listed plant species as listed by the FDACS and the USFWS (FDACS Chapter 5B-40) that have the potential to occur on the Project site are listed in Table 3. Information used in assessing the potential occurrence of these species included the Lee County Land Development Code, Field Guide to the Rare Plants of Florida (Chafin 2000), Atlas of Florida Vascular Plants (Wunderlin 2004), and professional experience and knowledge of the geographic region. In addition, FWCC and USFWS records for documented listed species were reviewed for listed species records on or adjacent to the property (Exhibit 8).

Hand adder's tongue fern	<i>Ophioglossum palmatum</i>	E	-	4279

FDACS – Florida Department of Agriculture and Consumer Services

USFWS – U.S. Fish and Wildlife Service

CE – Commercially Exploited

E – Endangered

T – Threatened

Gopher Frog (*Lithobates capito*)

The gopher frog could potentially occur within the native uplands on the Project site. The gopher frog is typically found in association with populations of gopher tortoise (*Gopherus polyphemus*).

American Alligator (*Alligator mississippiensis*)

The American alligator could potentially occur within the ditches, stream, cattle pond, and native herbaceous wetlands within the site.

Eastern Indigo Snake (*Drymarchon corais couperi*)

The Eastern indigo snake could potentially occur within the native uplands on the Project site. The Eastern indigo snake is typically found in association with populations of gopher tortoise.

Gopher Tortoise (*Gopherus polyphemus*)

Potential habitat for gopher tortoise on the Project site includes pasture areas, upland pine (*Pinus* sp.) flatwoods, palmetto prairies, disturbed land, and spoil piles.

Crested Caracara (*Caracara cheriway*)

Potential foraging habitat for the crested caracara on the Project site includes pasture areas, cabbage palm, and palmetto prairies. Its primary habitat in Florida is native prairie with associated marshes, cabbage palm (*Sabal palmetto*), and cabbage palm/live oak (*Quercus virginiana*) hammocks (Rodgers et al. 1996).

Everglade Snail Kite (*Rostrhamus sociabilis plumbeus*)

Potential foraging habitat for the Everglade snail kite includes ditches, cattle ponds, low pasture, and freshwater marsh.

Florida Burrowing Owl (*Athene cunicularia floridana*)

Potential Florida burrowing owl habitat exists within the upland pastures and disturbed areas within the Project site.

Florida Sandhill Crane (*Grus canadensis pratensis*)

Potential foraging habitat for the Florida sandhill crane may exist within the Project's upland pastures, palmetto prairies, freshwater marsh, and low pasture. Preferred sandhill crane habitat

includes prairies and shallow marshes dominated by pickerelweed (*Pontederia cordata*) and maidencane (*Panicum hemitomon*).

Little Blue Heron (*Egretta caerulea*), Tri-Colored Heron (*Egretta tricolor*), and other wading birds
Potential foraging habitat for state-listed and other wading birds within the Project site includes the forested and herbaceous wetlands, as well as the ditches, stream, and cattle pond.

Red-Cockaded Woodpecker (*Picoides borealis*)
Potential habitat for the red-cockaded woodpecker on the Project site includes the pine flatwoods habitat.

Roseate Spoonbill (*Ajaia ajaja*)
Potential habitat for the roseate spoonbill on the Project site includes freshwater marsh habitat, as well as the ditches, stream, and cattle pond.

Southeastern American Kestrel (*Falco sparverius paulus*)
Potential foraging habitat for the Southeastern American kestrel on the Project site may exist within the pine flatwoods and palmetto prairie. Since 1980, observations of Southeastern American kestrel in Florida have occurred primarily in sandhill or sand pine (*Pinus clausa*) scrub areas of North and Central Florida (Rodgers *et al.* 1996).

Wood Stork (*Mycteria americana*)
Potential wood stork foraging habitat within the Project site includes forested and herbaceous wetlands, as well as the ditches, stream, and cattle pond. Almost any wetland depression where fish tend to become concentrated, either through local reproduction by fish or as a consequence of area drying, may be good for feeding habitat (Rodgers *et al.* 1996).

Big Cypress Fox Squirrel (*Sciurus niger avicennia*)
Potential nesting and foraging habitat on the Project site for the Big Cypress fox squirrel includes the pine flatwoods, hardwood/conifer, and mixed wetland forest. Dense interiors of mixed cypress-hardwood strands seem to be avoided by fox squirrels (Moler 1992).

Florida Black Bear (*Ursus americanus floridanus*)
Potential habitat for the Florida black bear includes the native upland and wetland forested habitats on the Project site.

Florida Bonneted Bat (*Eumops floridanus*)
Florida bonneted bats could potentially roost within the forested upland and wetland habitats on the Project site, and/or forage over the herbaceous wetlands and open water areas. The Florida bonneted bat is known to occur in cities and forested areas on both the east and west coasts of South Florida from Charlotte County to Palm Beach County (Marks and Marks 2006; Humphrey 1992).

Florida Panther (*Puma concolor coryi*)
The Project is not located within the Florida panther primary or secondary zones (Kautz *et al.* 2006); however, telemetry points from radio-collared panthers have been recorded by the FWCC

near the property (Exhibit 8). Potential habitat for the Florida panther includes the native upland and forested wetland habitats on the Project site.

A Lee County protected species survey was conducted on the Project site on April 27, 28, 29, May 3, and October 11, 12, 2022. A total of 137 gopher tortoise burrows, 2 American alligators and 2 alligator nests, 1 Everglade snail kite, 5 wood storks, 2 adult crested caracaras, 1 juvenile crested caracara, 4 adult Florida sandhill cranes, 1 juvenile Florida sandhill crane, 6 little blue herons, 6 tri-colored herons, 1 juvenile bald eagle (*Haliaeetus leucocephalus*), and 3 snowy egrets were observed on the Project site during the protected species survey.

The two adult and one juvenile crested caracara were recorded utilizing multiple parts of the Project site. A dilapidated crested caracara nest located in a cabbage palm was documented on the northwest portion of the Project site. No crested caracaras were observed utilizing the nest during the protected species survey or other fieldwork. The nest is in disrepair and has become further degraded since Hurricane Ian in late September 2022.

Two adult and one juvenile Florida sandhill crane were documented within the northwestern portion of the Project during the April 2022 survey dates. Two adult Florida sandhill crane were recorded utilizing multiple parts of the Project site during the October 2022 survey dates. No Florida sandhill nesting activity was observed during the protected species survey or other fieldwork.

The snail kite is listed as endangered by the USFWS. The wood stork and crested caracara are listed as threatened by the USFWS. The gopher tortoise, Florida sandhill crane, little blue heron, and tri-colored heron are listed as threatened by the FWCC. The American alligator is listed as threatened by FWCC due to similarity of appearance to the American crocodile (*Crocodylus acutus*) (FWCC 2022). The snowy egret is not listed by the USFWS or the FWCC but is a designated Lee County protected species.

No Lee County protected plant species were observed on the property during the protected species survey. However, scattered occurrences of state-listed plant species were documented, including royal palm (*Roystonea regia*), golden leather fern (*Acrostichum aureum*), giant wild pine (*Tillandsia utriculata*), and Florida butterfly orchid (*Encyclia tampensis*). The royal palm and the giant wild pine are listed as endangered by the FDACS. The golden leather fern is listed as threatened by the FDACS. The Florida butterfly orchid is listed as commercially exploited by the FDACS. There were no federally listed plant species documented during the protected species survey.

A summary of the listed wildlife species, their sign (i.e., burrows), and listed plant species observed and documented within the Project are provided in Tables 4 and 5. The locations of the observed listed wildlife species are depicted in Exhibit 9.

SUMMARY

A total of 41 vegetative and land cover types (i.e., FLUCFCS codes) were identified within the Project site. SFWMD jurisdictional wetlands constitute 70.29± acres or approximately 8.9 percent

of the Project site. SFWMD jurisdictional OSWs constitute 18.10± acre or approximately 2.3 percent of the Project site. The OSW acreage includes two tributaries of the Caloosahatchee River. One tributary is located in the central portion of the site and consists a natural stream. The second tributary is located in the eastern portion of the site and has been significantly augmented (i.e., relocated and channelized) as part of past agricultural activities.

A Lee County protected species survey was conducted on the Project site on April 27, 28, 29, May 3, and October 11, 12, 2022. A total of 137 gopher tortoise burrows, 2 American alligators and 2 alligator nests, 1 Everglade snail kite, 5 wood storks, 2 adult crested caracaras, 1 juvenile crested caracara, 4 adult Florida sandhill cranes, 1 juvenile Florida sandhill crane, 6 little blue herons, 6 tri-colored herons, 1 juvenile bald eagle, and 3 snowy egrets were observed on the Project site during the protected species survey. The snail kite is listed as endangered by the USFWS. The wood stork and crested caracara are listed as threatened by the USFWS. The gopher tortoise, Florida sandhill crane, little blue heron, and tri-colored heron are listed as threatened by the FWCC. The American alligator is listed as threatened by FWCC due to similarity of appearance to the American crocodile. The snowy egret is not listed by the USFWS or the FWCC but is a designated Lee County protected species.

No Lee County protected plant species were observed on the property during the protected species survey. However, scattered occurrences of state-listed plant species were documented, including royal palm (*Roystonea regia*), golden leather fern (*Acrostichum aureum*), giant wild pine (*Tillandsia utriculata*), and Florida butterfly orchid (*Encyclia tampensis*). The FDACS lists the royal palm and the giant wild pine as endangered, the golden leather fern as threatened, and the Florida butterfly orchid as commercially exploited. There were no federally listed plant species documented during the protected species survey.

Total		788.96	100.0

Residential, Low Density (FLUCFCS Code 110)

This upland area occupies 0.10± acre or less than 0.1 percent of the Project. It consists of single-family homes alongside the North River Road (CR 78).

Improved Pasture (FLUCFCS Code 211)

This upland area occupies 585.25± acres or 74.2 percent of the Project. The canopy is open and includes widely scattered slash pine (*Pinus elliottii*), cabbage palm (*Sabal palmetto*), and live oak (*Quercus virginiana*). The sub-canopy is open and includes widely scattered cabbage palm, wax myrtle (*Morella cerifera*), and Brazilian pepper. The ground cover includes bahiagrass (*Paspalum notatum*), tropical soda apple (*Solanum viarum*), smutgrass (*Sporobolus indicus*), broomsedge bluestem (*Andropogon virginicus*), blackberry (*Rubus* sp.), flatsedge (*Cyperus* sp.), torpedograss (*Panicum repens*), frogfruit (*Phyla nodiflora*), caesarweed (*Urena lobata*), and Asiatic pennywort (*Centella asiatica*).

Woodland Pasture (FLUCFCS Code 213)

This upland area occupies 37.79± acres or 4.8 percent of the Project. The canopy has scattered slash pine, live oak, laurel oak (*Quercus laurifolia*), and cabbage palm. The sub-canopy includes widely scattered slash pine, Brazilian pepper, persimmon (*Diospyros virginiana*), wax myrtle, live oak, laurel oak, and cabbage palm. The ground cover contains bahiagrass, smutgrass, broomsedge

bluestem, muscadine grapevine (*Vitis rotundifolia*), saw palmetto (*Serenoa repens*), cabbage palm, caesarweed, earleaf greenbrier (*Smilax auriculata*), and blackberry.

Low Pasture (FLUCFCS Code 262)

This wetland area occupies 44.83± acres or 5.7 percent of the Project. The canopy is open. The sub-canopy contains widely scattered cabbage palm, Brazilian pepper, wax myrtle, and Carolina willow (*Salix caroliniana*). The ground cover includes inundated beaksedge (*Rhynchospora inundata*), Southern beaksedge (*Rhynchospora microcarpa*), Asiatic pennywort, creeping primrose willow (*Ludwigia repens*), dayflower (*Commelina diffusa*), pickerelweed (*Pontederia cordata*), bushy bluestem (*Andropogon glomeratus*), sawgrass (*Cladium jamaicense*), white-top sedge (*Rhynchospora colorata*), torpedograss, marsh pennywort (*Hydrocotyle umbellata*), savanna iris (*Iris savannarum*), frogfruit, Southern umbrellasedge (*Fuirena scirpoidea*), smartweed (*Persicaria* sp.), arrowhead (*Sagittaria lancifolia*), bighead rush (*Juncus megacephalus*), aster (*Aster* sp.), sesbania (*Sesbania* sp.), spikerush (*Eleocharis cellulosa*), saltmarsh mallow (*Kosteletzkya* sp.), and rosy camphorweed (*Pluchea baccharis*).

Palmetto Prairie, Disturbed (50-75% Exotics) (FLUCFCS Code 3219 E3)

This upland community type occupies 0.09± acre or less than 0.1 percent of the Project. The canopy contains scattered live oak and cabbage palm. The sub-canopy contains Brazilian pepper. The ground cover contains saw palmetto, caesarweed, beautyberry (*Callicarpa americana*), Brazilian pepper, and greenbrier (*Smilax* sp.).

Pine Flatwoods, Disturbed (0-24% Exotics) (FLUCFCS Code 4119 E1)

This upland community type occupies 13.04± acres or 1.7 percent of the Project. The canopy contains slash pine with scattered cabbage palm and live oak. The sub-canopy contains slash pine with scattered cabbage palm, live oak, and Brazilian pepper. The ground cover contains broomsedge bluestem, Brazilian pepper, bahiagrass, wax myrtle, saw palmetto, caesarweed, and blackberry.

Pine Flatwoods, Disturbed (76-100% Exotics) (FLUCFCS Code 4119 E4)

This upland community type occupies 0.41± acre or 0.1 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4119 E1, except with 76 to 100 percent Brazilian pepper in the sub-canopy.

Brazilian Pepper (FLUCFCS Code 422)

This upland area occupies 5.99± acres or 0.8 percent of the Project. The canopy is open. The sub-canopy is dominated by Brazilian pepper with scattered wax myrtle and cabbage palm. The ground cover includes Brazilian pepper.

Brazilian Pepper, Hydric (FLUCFCS Code 4221)

This wetland area occupies 1.03± acres or 0.1 percent of the Project. The canopy is dominated by Brazilian pepper with occasional scattered live oak, cabbage palm, swamp bay (*Persea palustris*), and Carolina willow. The sub-canopy is dominated by Brazilian pepper with scattered cabbage palm, live oak, swamp bay, myrsine (*Myrsine cubana*), wax myrtle, saltbush (*Baccharis halimifolia*), Carolina willow, pond apple (*Annona glabra*), red mangrove (*Rhizophora mangle*), and swamp dogwood (*Cornus foemina*). The ground cover contains Brazilian pepper, cabbage

palm, giant leather fern (*Acrostichum danaeifolium*), swamp fern (*Telmatoblechnum serrulatum*), creeping primrose willow, smartweed, cattail (*Typha* sp.), shield fern (*Thelypteris* sp.), muscadine grapevine, greenbrier, Southern beaksedge, flatsedge, and marsh pennywort.

Live Oak, Disturbed (0-24% Exotics) (FLUCFCS Code 4279 E1)

This upland community type occupies 7.10± acres or 0.9 percent of the Project. The canopy contains live oak with scattered laurel oak, pop ash (*Fraxinus caroliniana*), Brazilian pepper, and cabbage palm. The sub-canopy contains live oak, cabbage palm, laurel oak, wax myrtle, myrsine, wild coffee (*Psychotria nervosa*), swamp bay, caesarweed, saltbush, and Brazilian pepper. The ground cover includes saw palmetto, poison ivy, beautyberry, wild coffee, Virginia creeper (*Parthenocissus quinquefolia*), Brazilian pepper, tropical soda apple, beggar-ticks (*Bidens alba*), St. Augustine grass (*Stenotaphrum secundatum*), caesarweed, Boston fern (*Nephrolepis* sp.), cabbage palm, broomsedge bluestem, white stopper (*Eugenia axillaris*), and carpetgrass (*Axonopus fissifolius*).

Live Oak, Disturbed (25-49% Exotics) (FLUCFCS Code 4279 E2)

This upland community type occupies 7.59± acres or 1.0 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4279 E1, except with 25 to 49 percent Brazilian pepper in the sub-canopy.

Live Oak, Disturbed (50-75% Exotics) (FLUCFCS Code 4279 E3)

This upland community type occupies 11.84± acres or 1.5 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4279 E2, except with 50 to 75 percent Brazilian pepper in the sub-canopy.

Live Oak, Disturbed (76-100% Exotics) (FLUCFCS Code 4279 E4)

This upland community type occupies 2.68± acres or 0.3 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4279 E3, except with 76 to 100 percent Brazilian pepper in the sub-canopy.

Cabbage Palm, Hydric, Disturbed (0-24% Exotics) (FLUCFCS Code 4281 E1)

This wetland community type occupies 0.69± acre or 0.1 percent of the Project. The canopy contains cabbage palm with scattered laurel oak and swamp bay. The sub-canopy contains cabbage palm, Brazilian pepper, myrsine, laurel oak, wax myrtle, Carolina willow, swamp dogwood, and buckthorn (*Sideroxylon* sp.). The ground cover contains giant leather fern, swamp fern, cabbage palm, Brazilian pepper, Asiatic pennywort, marsh pennywort, smartweed, sand cordgrass (*Spartina bakeri*), laurel oak, dayflower, Peruvian primrose willow (*Ludwigia peruviana*), pickerelweed, and buttonbush (*Cephalanthus occidentalis*).

Cabbage Palm, Hydric, Disturbed (25-49% Exotics) (FLUCFCS Code 4281 E2)

This wetland community type occupies 0.60± acre or 0.1 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4281 E1, except with 25 to 49 percent Brazilian pepper in the sub-canopy.

Cabbage Palm, Hydric, Disturbed (50-75% Exotics) (FLUCFCS Code 4281 E3)

This wetland community type occupies 0.39± acre or less than 0.1 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4281 E2, except with 50 to 75 percent Brazilian pepper in the sub-canopy.

Cabbage Palm, Disturbed (25-49% Exotics) (FLUCFCS Code 4289 E2)

This upland community type occupies 0.28± acre or less than 0.1 percent of the Project. The canopy contains cabbage palm with scattered live oak. The sub-canopy contains Brazilian pepper, wax myrtle, and cabbage palm. The ground cover includes smutgrass, bahiagrass, wild coffee, dog fennel (*Eupatorium capillifolium*), beggar-ticks, knotroot foxtail (*Setaria parviflora*), scattered broomsedge, and Guinea grass (*Urochloa maxima*).

Cabbage Palm, Disturbed (76-100% Exotics) (FLUCFCS Code 4289 E4)

This upland community type occupies 0.14± acre or less than 0.1 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4289 E2, except with 76 to 100 percent Brazilian pepper in the sub-canopy.

Wax Myrtle, Hydric, Disturbed (0-24% Exotics) (FLUCFCS Code 4291 E1)

This wetland community type occupies 0.33± acre or less than 0.1 percent of the Project. The canopy is open. The sub-canopy contains wax myrtle, Brazilian pepper, saltbush, and cabbage palm. The ground cover contains shield fern, Brazilian pepper, laurel oak, marsh pennywort, swamp fern, and Asiatic pennywort.

Hardwood/Conifer Mixed, Disturbed (0-24% Exotics) (FLUCFCS Code 4349 E1)

This upland community type occupies 0.80± acre or 0.1 percent of the Project. The canopy contains live oak, slash pine, and cabbage palm. The sub-canopy contains live oak, Brazilian pepper, cabbage palm, wax myrtle, saltbush, beautyberry, and scattered saw palmetto. The ground cover contains bahiagrass, broomsedge bluestem, smutgrass, beautyberry, Brazilian pepper, marsh pennywort, caesarweed, live oak, cabbage palm, greenbrier, dayflower, and saw palmetto.

Hardwood/Conifer Mixed, Disturbed (25-49% Exotics) (FLUCFCS Code 4349 E2)

This upland community type occupies 5.30± acres or 0.7 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4349 E1, except with 25 to 49 percent Brazilian pepper in the sub-canopy.

Hardwood/Conifer Mixed, Disturbed (50-75% Exotics) (FLUCFCS Code 4349 E3)

This upland community type occupies 3.55± acres or 0.4 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4349 E2, except with 50 to 75 percent Brazilian pepper in the sub-canopy.

Hardwood/Conifer Mixed, Disturbed (76-100% Exotics) (FLUCFCS Code 4349 E4)

This upland community type occupies 7.50± acres or 1.0 percent of the Project. The vegetation associations are similar to FLUCFCS Code 4349 E3, except with 76 to 100 percent Brazilian pepper in the sub-canopy.

Streams and Waterways (FLUCFCS Code 510)

This open water area occupies 8.82± acres or 1.1 percent of the Project.

Ditch (FLUCFCS Code 514)

This open water area occupies 5.34± acres or 0.7 percent of the Project. Ground cover vegetation includes cattail.

Cattle Pond (FLUCFCS Code 525)

This open water area occupies 3.94± acres or 0.5 percent of the Project.

Willow, Disturbed (25-49% Exotics) (FLUCFCS Code 6189 E2)

This wetland community type occupies less than 0.01± acre of the Project. The canopy contains Carolina willow with scattered cabbage palm and Brazilian pepper. The sub-canopy contains Carolina willow, cabbage palm, Brazilian pepper, wax myrtle, swamp dogwood, and buckthorn. The ground cover includes smartweed, swamp fern, shield fern, sawgrass, cattail, Carolina willow, cabbage palm, dayflower, white-top sedge, and Brazilian pepper.

Cypress, Drained, Disturbed (50-75% Exotics) (FLUCFCS Code 6215 E3)

This wetland community type occupies 0.96± acre or 0.1 percent of the Project. The canopy contains bald cypress (*Taxodium distichum*) and the sub-canopy contains Brazilian pepper, pop ash, and cabbage palm. The ground cover contains caesarweed and scattered swamp fern.

Cypress, Disturbed (0-24% Exotics) (FLUCFCS Code 6219 E1)

This wetland community type occupies 1.69± acres or 0.2 percent of the Project. The canopy includes bald cypress, cabbage palm, and scattered laurel oak. The sub-canopy contains cabbage palm, Brazilian pepper, bishopwood (*Bischofia javanica*), red maple (*Acer rubrum*), and swamp bay. The ground cover includes spikerush (*Eleocharis interstincta*), pickerelweed, giant leather fern, and swamp fern.

Cypress, Disturbed (25-49% Exotics) (FLUCFCS Code 6219 E2)

This wetland community type occupies 1.85± acres or 0.2 percent of the Project. The vegetation associations are similar to FLUCFCS Code 6219 E1, except with 25 to 49 percent melaleuca and/or Brazilian pepper in the sub-canopy.

Wetland Forested Mixed, Disturbed (0-24% Exotics) (FLUCFCS Code 6309 E1)

This wetland community type occupies 1.67± acres or 0.2 percent of the Project. The canopy contains live oak, laurel oak, slash pine, cabbage palm, swamp bay, and Carolina willow. The sub-canopy contains Brazilian pepper, cabbage palm, myrsine, wild coffee, Peruvian primrose willow, Carolina willow, swamp dogwood, laurel oak, swamp bay, wax myrtle, persimmon, saltbush, live oak, white stopper, and buckthorn. The ground cover includes swamp fern, giant leather fern, cabbage palm, marsh pennywort, Brazilian pepper, wild coffee, Peruvian primrose willow, royal fern (*Osmunda regalis* var. *spectabilis*), arrowhead, water hyssop (*Bacopa* sp.), Asiatic pennywort, Southern beaksedge, smartweed, torpedograss, rosy camphorweed, shield fern, swamp lily (*Crinum americanum*), dog fennel, bulrush (*Scirpus* sp.), peppervine (*Ampelopsis arborea*), white-top sedge, and cattail.

Wetland Forested Mixed, Disturbed (25-49% Exotics) (FLUCFCS Code 6309 E2)

This wetland community type occupies 3.59± acres or 0.5 percent of the Project. The vegetation associations are similar to FLUCFCS Code 6309 E1, except with 25 to 49 percent melaleuca and/or Brazilian pepper in the canopy and sub-canopy.

Wetland Forested Mixed, Disturbed (50-75% Exotics) (FLUCFCS Code 6309 E3)

This wetland community type occupies 3.42± acres or 0.4 percent of the Project. The vegetation associations are similar to FLUCFCS Code 6309 E2, except with 50 to 75 percent melaleuca and/or Brazilian pepper in the canopy and sub-canopy.

Wetland Forested Mixed, Disturbed (76-100% Exotics) (FLUCFCS Code 6309 E4)

This wetland community type occupies 1.70± acres or 0.2 percent of the Project. The vegetation associations are similar to FLUCFCS Code 6309 E3, except with 76 to 100 percent melaleuca and/or Brazilian pepper in the canopy and sub-canopy.

Wetland Shrub, Disturbed (76-100% Exotics) (FLUCFCS Code 6319 E4)

This wetland community type occupies 1.08± acres or 0.1 percent of the Project. The canopy is open. The sub-canopy contains saltbush, giant leather fern, wax myrtle, Brazilian pepper, scattered Carolina willow, and swamp bay. The ground cover contains giant leather fern, marsh pennywort, Brazilian pepper, saltbush, sawgrass, shield fern, and creeping primrose willow.

Freshwater Marsh, Disturbed (50-75% Exotics) (FLUCFCS Code 6419 E3)

This wetland community type occupies 3.65± acres or 0.5 percent of the Project. The canopy is open. The sub-canopy contains wax myrtle, Brazilian pepper, and scattered cabbage palm. The ground cover contains sawgrass, giant leather fern, marsh pennywort, cattail, pickerelweed, torpedograss, sesbania, creeping primrose willow, and swamp fern.

Freshwater Marsh, Disturbed (76-100% Exotics) (FLUCFCS Code 6419 E4)

This wetland habitat type occupies 3.75± acres or 0.5 percent of the Project. The vegetation associations are similar to FLUCFCS Code 6419 E3, except with 76 to 100 percent West Indian marsh grass (*Hymenachne amplexicaulis*), alligatorweed (*Alternanthera philoxeroides*), and water lettuce (*Pistia stratiotes*) in the ground cover.

Disturbed Land (FLUCFCS Code 740)

This upland area occupies 1.35± acres or 0.2 percent of the Project. The canopy is open with cabbage palm, live oak, slash pine, red cedar (*Juniperus virginiana*), Florida strangler fig (*Ficus aurea*), Washington fan palm (*Washingtonia robusta*), laurel oak, and other unknown landscape trees. The sub-canopy contains scattered cabbage palm, citrus (*Citrus* sp.), wax myrtle, and Brazilian pepper. The ground cover contains bahiagrass, smutgrass, broomsedge, wax myrtle, frogrfruit, caesarweed, Brazilian pepper, and Asiatic pennywort.

Spoil Areas (FLUCFCS Code 743)

This upland area occupies 0.99± acre or 0.1 percent of the Project and consists of spoil material.

Berm (FLUCFCS Code 747)

This upland land use type occupies 6.10± acre or 0.8 percent of the Project and includes spoil material left over from the excavation of ditches. The canopy may include scattered slash pine and live oak. The sub-canopy may include beautyberry, wax myrtle, and Brazilian pepper. The ground cover consists of a mixture of bahiagrass, tropical soda apple, smutgrass, broomsedge bluestem, blackberry, and flatsedge.

Road (FLUCFCS Code 814)

This upland land use type occupies 1.73± acre or 0.2 percent of the Project and includes an unmaintained, partially paved roadway. The canopy and sub-canopy are open. The ground cover is consistent with improved pasture (FLUCFCS Code 211).

SOILS SUMMARY TABLE AND DESCRIPTIONS

**CARY + DUKE + POVIA RPD
SOILS SUMMARY TABLE AND DESCRIPTIONS**

March 2023

Table 1. Soils Listed by the Natural Resource Conservation Service on the Project

Mapping Unit	Description
6	Brynwood fine sand, wet, 0 to 2 percent slopes
11	Myakka fine sand, 0 to 2 percent slopes
13	Cypress Lake fine sand, 0 to 2 percent slopes
26	Pineda-Pineda, wet, fine sand, 0 to 2 percent slopes
27	Pompano Fine Sand, frequently ponded, 0 to 1 percent slopes
28	Immokalee Sand, 0 to 2 percent slopes
33	Oldsmar Sand, 0 to 2 percent slopes
34	Malabar Fine Sand, 0 to 2 percent slopes
39	Isles fine sand, frequently ponded, 0 to 1 percent slopes
40	Anclote Sand, frequently ponded, 0 to 1 percent slopes
42	Wabasso sand, limestone substratum, 0 to 2 percent slopes
45	Copeland fine sandy loam, frequently ponded, 0 to 1 percent slopes
49	Felda fine sand, frequently ponded, 0 to 1 percent slopes
55	Cocoa fine sand, 0 to 2 percent slopes
144	Caloosa fine sand, 0 to 2 percent slopes

6 – Brynwood fine sand, wet, 0 to 2 percent slope

This is a nearly level, very poorly drained soil in depressions. Slopes are concave and less than 2 percent. Typically, the surface layer is black fine sand about 4 inches thick. The substratum is fine sand to a depth of 16 inches with hard fractures limestone below. Between 4 and 16 inches in depth the fine sands are light brownish gray to brown. In most years, under natural conditions, the water table is within 12 inches of the surface for 4 to 5 months and between 12 and 20 inches most of the rest of the year.

11 – Myakka fine sand, 0 to 2 percent slopes

This is a nearly level, poorly drained soil on broad flatwoods areas. Slopes are smooth to slightly concave and range from 0 to 2 percent. Typically, the surface layer is very dark gray fine sand about 3 inches thick. The subsurface layer is fine sand about 23 inches thick. In the upper 3 inches it is gray, and in the lower 20 inches it is light gray. The subsoil is fine sand to a depth of 80 inches or more. The upper 4 inches is black and firm, the next 5 inches is dark reddish brown and friable, the next 17 inches is black and firm, the next 11 inches is dark reddish brown and friable, and the lower 17 inches is mixed black and dark reddish brown and friable. In most years, under natural conditions, the water table is within 10 inches of the surface for 1 to 3 months and 10 to 40 inches below the surface for 2 to 6 months. It is more than 40 inches below the surface during extended dry periods.

13 – Cypress Lake fine sand, 0 to 2 percent slopes

This is a nearly level, poorly drained soil on flatwoods. Slopes are smooth and range from 0 to 2 percent. Typically, the surface layer is gray fine sand about 3 inches thick. The subsurface layer is fine sand about 22 inches thick. The upper 11 inches is light gray and the lower 11 inches is very pale brown. The subsoil, about 5 inches thick, is gray fine sandy loam with brownish yellow mottles and calcareous nodules. At a depth of 30 inches is a layer of fractured limestone. In most years, under natural conditions, the water table is within 10 inches of the surface for 2 to 4 months. It recedes below the limestone for about 6 months.

26 – Pineda-Pineda, wet, fine sand, 0 to 2 percent slopes

This is a nearly level, poorly drained soil on sloughs. Slopes are smooth to slightly concave and range from 0 to 1 percent. Typically, the surface layer is black fine sand about 1 inch thick. The subsurface layer is very pale brown fine sand about 4 inches thick. The upper part of the subsoil is brownish yellow fine sand about 8 inches thick. The next 10 inches is strong brown fine sand. The next 6 inches is yellowish brown fine sand. The next 7 inches is light gray fine sand with brownish yellow mottles. The lower part of the subsoil is light brownish gray fine sandy loam with light gray sandy intrusions about 18 inches thick. The substratum is light gray fine sand to a depth of 80 inches or more. In most years, under natural conditions, the water table is within 10 inches of the surface for 2 to 4 months. It is 10 to 40 inches below the surface for more than 6 months, and it recedes to more than 40 inches below the surface during extended dry periods. During periods of high rainfall, the soil is covered by a shallow layer of slowly moving water for periods of about 7 to 30 days or more.

27 – Pompano Fine Sand, frequently ponded, 0 to 1 percent slope

This is a nearly level, poorly drained soil in depressions. Slopes are concave and less than 1 percent. Typically, the surface layer is gray fine sand about 3 inches thick. The substratum is fine sand to a depth of 80 inches or more. The upper 32 inches is light brownish gray with few, fine, faint yellowish-brown mottles. The lower 45 inches is light gray. In most years, under natural conditions, the water table is within 10 inches of the surface for 2 to 4 months and stands above the surface for about 3 months. It is 10 to 40 inches below the surface for more than 5 months.

28 – Immokalee Sand, 0 to 2 percent slope

This is a nearly level, poorly drained soil in flatwoods areas. Slopes are smooth to convex and range from 0 to 2 percent. Typically, the surface layer is black sand about 4 inches thick. The subsurface layer is dark gray sand in the upper 5 inches and light gray sand in the lower 27 inches. The subsoil is sand to a depth of 69 inches. The upper 14 inches is black and firm, the next 5 inches is dark reddish brown, and the lower 14 inches is dark yellowish brown. The substratum is very pale brown sand to a depth of 80 inches or more. In most years, under natural conditions, the water table is within 10 inches of the surface for 1 to 3 months and 10 to 40 inches below the surface for 2 to 6 months. It recedes to a depth of more than 40 inches during extended dry periods.

33 – Oldsmar Sand, 0 to 2 percent slope

This is a nearly level, poorly drained soil on low, broad flatwoods areas. Slopes are smooth to slightly convex and range from 0 to 2 percent. Typically, the surface layer is black sand about 3 inches thick. The subsurface layer is gray and light gray sand about 39 inches thick. The upper

part of the subsoil is very dark gray sand about 5 inches thick. The lower part of the subsoil is yellowish brown and mixed light brownish gray and brown fine sandy loam about 11 inches thick. Pale brown sand extends to a depth of 80 inches or more. In most years, under natural conditions, the water table is at a depth of less than 10 inches for 1 to 3 months. It is at a depth of 10 to 40 inches for more than 6 months, and it recedes to a depth of more than 40 inches during extended dry periods.

34 – Malabar Fine Sand, 0 to 2 percent slopes

This is a nearly level, poorly drained soil on sloughs. Slopes are smooth to concave and range from 0 to 2 percent. Typically, the surface layer is dark gray fine sand about 5 inches thick. The next 12 inches is light gray and very pale brown fine sand. Below this is a 16-inch layer of light yellowish brown fine sand with yellow mottles and a 9-inch layer of brownish yellow fine sand. The subsoil layer is gray loamy fine sand about 9 inches thick with large yellowish-brown mottles. The next 8 inches is gray fine sandy loam with large brownish yellow mottles. Below is light gray loamy fine sand with yellowish brown mottles to a depth of 80 inches or more. In most years, under natural conditions, the water table is at a depth of less than 10 inches for 2 to 4 months. It is at a depth of 10 to 40 inches for more than 6 months, and it recedes to a depth of more than 40 inches during extended dry periods. During periods of high rainfall, the soil is covered by a shallow layer of slowly moving water for periods of about 7 to 30 days or more.

39 – Isles fine sand, frequently ponded, 0 to 1 percent slopes

This is a nearly level, very poorly drained soil in depressions. Slopes are smooth to concave and less than 1 percent. Typically, the surface layer is very dark gray fine sand about 5 inches thick. The subsurface layer is about 5 inches of light gray fine sand. Next is 11 inches of very pale brown fine sand with yellowish brown mottles. The subsoil is 26 inches of gray fine sandy loam with brownish yellow mottles and pockets of light brownish gray loamy sand. Limestone bedrock is at a depth of 47 inches. In most years, under natural conditions, the water table is above the surface for 3 to 6 months. It is within a depth of 10 to 40 inches for 2 to 4 months. The water table recedes to depth of more than 40 inches during extended dry periods.

40 – Anclote Sand, frequently ponded, 0 to 1 percent slopes

This is a nearly level, very poorly drained soil in isolated depressions. Slopes are smooth to concave and less than 1 percent. Typically, the surface layer is about 22 inches thick. The upper 8 inches is black sand, and the lower 14 inches is black sand with common light gray pockets and streaks throughout. The substratum is sand to a depth of 80 inches or more. The upper 18 inches is light brownish gray, and the lower 40 inches is light gray. Included with this soil in mapping are small areas of Pompano and Floridana soils. Included soils make up about 10 to 15 percent of any mapped area. In most years, under natural conditions, the soil is ponded for more than 6 months.

42 – Wabasso sand, limestone substratum, 0 to 2 percent slopes

This is a nearly level, poorly drained soil on broad flatwoods. Slopes range from 0 to 2 percent. Typically, the surface layer is black sand about 3 inches thick. The subsurface layer is sand about 16 inches thick. The upper 10 inches is gray, and the lower 6 inches is light gray. The subsoil is about 32 inches thick. The upper 2 inches is dark brown sand that is well coated with organic matter. The next 2 inches is dark reddish brown friable sand. The next 14 inches is brown loose

sand with dark brown streaks along root channels. The lower 14 inches is light brownish gray, firm fine sandy loam with light olive brown mottles. A hard, fractured limestone ledge and boulders are at a depth of 51 inches. In most years, under natural conditions, the water table is within 10 inches of the surface for 1 to 3 months. It is 10 to 40 inches below the surface for 2 to 4 months. It is below the limestone during extended dry periods.

45 – Copeland fine sandy loam, frequently ponded, 0 to 1 percent slopes

This is a low, nearly level, very poorly drained soil in depressions. Slopes are concave and less than 1 percent. Typically, the surface layer is about 8 inches of very dark gray sandy loam. The subsoil is very dark gray sandy loam about 12 inches thick. It is underlain by 8 inches of light brownish gray sandy clay loam with soft calcium carbonate throughout. Fractured limestone bedrock is at a depth of 28 inches. Under natural conditions, the water table is above the surface for 3 to 6 months. It is 10 to 40 inches below the surface for about 3 to 6 months.

49 – Felda fine sand, frequently ponded, 0 to 1 percent slopes

This is a nearly level, poorly drained soil in depressions. Slopes are concave and less than 1 percent. Typically, the surface layer is gray fine sand about 4 inches thick. The subsurface layers extend to a depth of 35 inches. The upper 13 inches is grayish brown fine sand and the lower 18 inches is light gray fine sand with yellowish brown mottles. The subsoil is about 17 inches thick. The upper 6 inches is gray sandy loam and the lower 11 inches is sandy clay loam with many yellowish brown and strong brown mottles. Below this is light gray fine sand to a depth of 80 inches or more. In most years, under natural conditions, the soil is ponded for about 3 to 6 months or more. The water table is within a depth of 10 to 40 inches for 4 to 6 months.

55 – Cocoa fine sand, 0 to 2 percent slopes

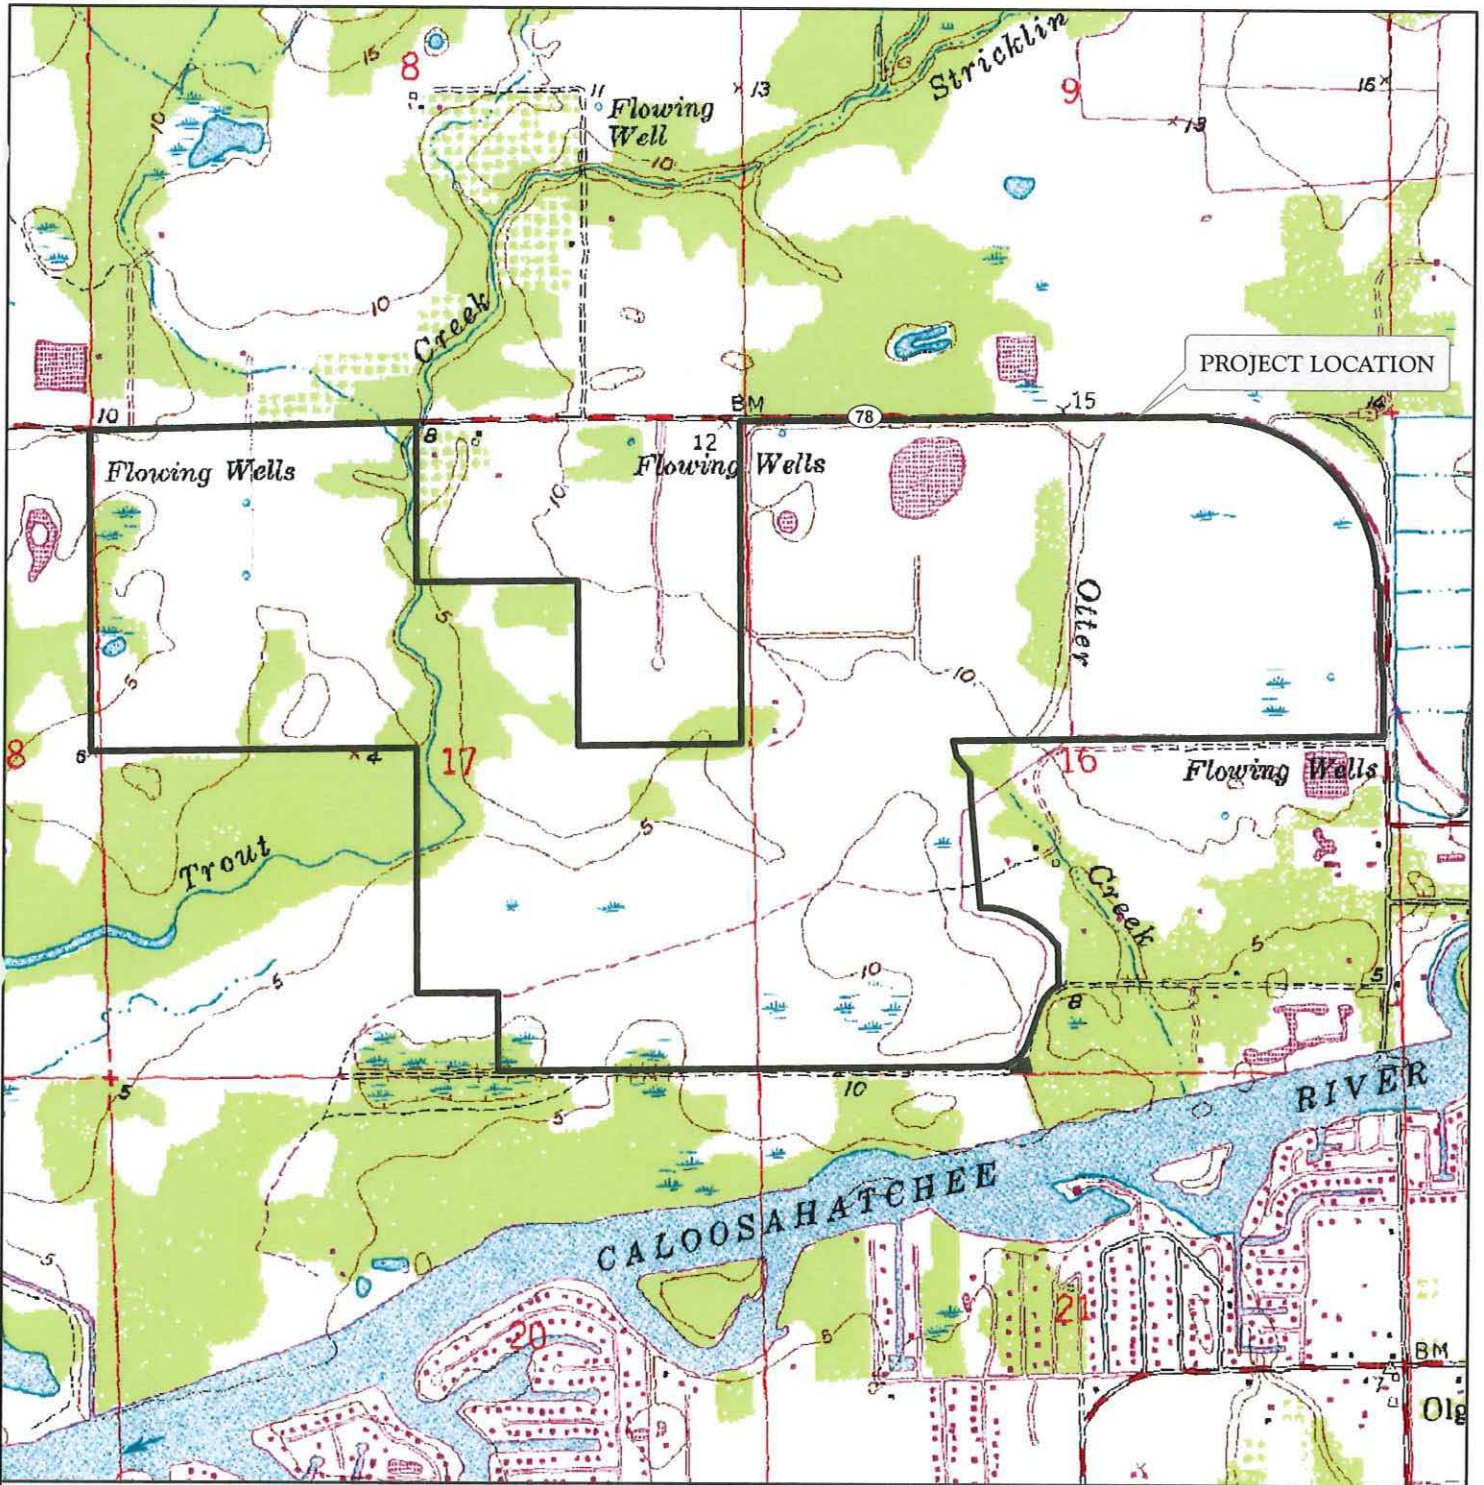

This is a nearly level to gently sloping, moderately well drained soil on ridges. Slopes are smooth to slightly convex and range from 0 to 2 percent. Typically, the surface layer is brown fine sand about 3 inches thick. The subsurface layer is reddish yellow fine sand about 10 inches thick. The next layer is yellowish red fine sand about 4 inches thick. The next 10 inches is reddish yellow fine sand, and below this is 4 inches of strong brown fine sand. Fractured limestone bedrock is at a depth of 31 inches. In most years, under natural conditions, the water table is within 24 inches of the surface for 1 to 2 months and 24 to 40 inches below the surface for 1 to 2 months. It recedes to more than 40 inches below the surface during extended dry periods.

144 – Caloosa fine sand, 0 to 2 percent slopes

This is a very deep, moderately well drained, slowly permeable soil on broad to narrow flats bordering major rivers that have been dredged. They formed in sandy over clayey sediments deposited and spread from dredge and fill operations. Slopes are smooth to slightly convex and range from 0 to 2 percent. Typically, the surface layer is light brownish gray fine sand about 10 inches thick. The next layer is stratified pale brown fine sand to a depth of approximately 27 inches. The next 11 inches is stratified light gray silty clay and clay, and below that stratified gray and dark gray silty clay and clay to a depth up to 80 inches. Thickness of the fill material ranges from 40 to more than 80 inches. Fragments of shell range from sand-size up to 6 cm in size. Shell content ranges from less than 5 percent to 30 percent, by volume, throughout, but the weighted average of shell content (2 mm or larger) in the control section is less than 10 percent, by volume.

Included with this soil in mapping are small areas of Matlacha and St. Augustine soils. The water table is within a depth of 18 to 42 inches for 2 to 4 months during rainy season.

August 1, 2008

Re: DHR Project File No.: 2008-04076
Received by DHR: July 2, 2008
*A Phase I Cultural Resource Assessment Survey of the North River Assemblage Parcels,
Lee County, Florida*

Dear Ms. Perry:

We note that in February 2006 through October 2007, Archaeological and Historical Conservancy, Inc. conducted the above referenced survey for Bonita Bay Properties, Inc. in anticipation of a request by the Florida Division of Historical Resources for a cultural resource assessment survey. Our office proceeded to review this report with the expectation that Bonita Bay Properties, Inc. will be engaging in permitting processes that will require this office to comment on possible adverse impacts to cultural resources listed or eligible for listing in the National Register of Historic Places (NRHP), or otherwise of historical, architectural, or archaeological significance. We recommend at the time such actions are taken, a copy of this letter be forwarded to the permitting agency(ies) with the application. This may eliminate the permitting agency(ies) from having to submit an application to the Division of Historical Resources for review, or, if applications are forwarded to the Division with this letter, it would facilitate our review.

AHC identified five previously unrecorded archaeological sites (8LL2395 – 8LL2399) within the project area during the investigation. AHC determined that Site 8LL2396 does not appear to be eligible for listing on the NRHP based on low artifact density and limited research potential. AHC determined that Sites 8LL2395 and 8LL2397 – 8LL2399 appear to be eligible for listing on the NRHP based on research potential. Additionally, 8LL2398 and 8LL2399 are unique for their location within a cypress head.

AHC recommends preservation of all sites. If preservation is not possible, AHC recommends that sites be subjected to Phase II site assessments.

Ms. Perry
August 1, 2008
Page 2

Based on the information provided, our office finds the submitted report complete and sufficient in accordance with Chapter 1A-46, *Florida Administrative Code*. We concur that Site 8LL2396 does not appear eligible for listing on the NRHP. Because it is ineligible, our office is not requesting additional investigation or preservation of 8LL2396. However, treatment of this or any other site should be determined in consultation with the appropriate local government.

While there is insufficient information for our office to make an eligibility determination for the remaining sites, we concur that Phase II site assessments should be conducted if Sites 8LL2395, 8LL2397, 8LL2398, or 8LL2399 cannot be preserved.

For any questions concerning our comments, please contact April Westerman, Historic Preservationist, by electronic mail at awesterman@dos.state.fl.us, or by phone at (850) 245-6333. We appreciate your continued interest in protecting Florida's historic properties.

Sincerely,

Frederick P. Gaske, Director, and
State Historic Preservation Officer

Analysis of Impacts from Proposed Changes (EXHIBITS M14 & M16)

Cary+Duke+Povia Map Amendment Analysis of Impacts from Proposed Changes Exhibits M14, M16

1) Traffic Circulation Analysis

The attached Traffic Circulation Analysis, by TR Transportation Consultants, demonstrates that the proposed amendment will not cause any roadway links to fall below the recommended minimum acceptable Level of Service thresholds as recommended in Policy 37.1.1 and that no changes to the adopted Long-Range Transportation Plan.

2) Sanitary Sewer

Franchise Area, Basin, or District

The property is located in the vicinity of both the Florida Governmental Utilities Authority (FGUA) North Fort Myers Service Area and the Lee County Utilities (LCU) CFM-Central Wastewater Treatment Plant (WWTP) Service Area. The LCU service area is proposed to be amended to include this property.

Levels of Service

According to the 2022 Concurrency Report, LCU Water Reclamation Facilities (WRFs) are reported as one central system for concurrency purposes and both the FGUA and LCU systems are operating within capacity and meet the LOS standard for unincorporated Lee County.

The 2022 Concurrency Report indicates that LCU WRFs have a capacity of 43.4 MGD. In 2021, the actual average daily flow was 33.0 MGD. The 2026 projected demand is 47.3 MGD. As detailed below, capacity expansion projects will increase future capacity to 49.4 MGD. The projected excess capacity after completion of currently planned expansions is 2.1 MGD.

Lee Plan Policies 56.1.2 and 95.1.3 establishes an LOS standard for Sanitary Sewer of 200 GPD per Equivalent Residential Connection (ERC).

The proposed sanitary sewer use of the development is calculated as follows:

$$1,099 \text{ ERC} \times 200 \text{ GPD} = 219,800 \text{ GPD}$$

The attached letter of availability from LCU indicates there is sufficient capacity within the existing plant to serve the 219,800 GPD increase in demand.

Existing infrastructure

The nearest wastewater forcemain is located on the south side of the Caloosahatchee River. Service to the property by LCU will be provided by developer funded improvements to extend the existing forcemain into the Property for service.

Programmed Improvements/Expansions

The 2022 Concurrency Report indicates there are two projects to increase LCU central system capacity in the Lee County CIP. A 2.0-MGD expansion of the Three Oaks Water Reclamation Facility is scheduled for completion in fiscal year 2023/2024 and a 4.0-MGD capacity expansion to the Southeast Water Reclamation Facility is scheduled for completion in fiscal year 2027/2028.

Letter of Availability

Please see the enclosed letter from LCU confirming the availability of centralized sewer service (Exhibit M17).

3) Potable Water Service

Franchise Area, Basin, or District

The Property is located adjacent to the Lee County Utilities (LCU) Franchise Area and the North Lee County Water Treatment Plant (WTP) Service Area. The water service area is proposed to be amended to include this property.

Levels of Service

According to the 2022 Concurrency Report, LCU WTPs operate as one central system and capacity is adequate to meet the LOS standard for the five-year CIP planning period

The 2022 Concurrency Report indicates that LCU WTPs have a capacity of 52.9 MGD. In 2021, the actual average daily flow was 34.8 MGD. The 2026 projected demand is 37.6 MGD. The projected excess capacity in 2026 is 15.3 MGD.

Lee Plan Policies 53.1.3 and 95.1.3 establish an LOS standard for Potable Water of 250 GPD per Equivalent Residential Connection (ERC).

The proposed water use of the development is calculated as follows:

$$1,099 \text{ ERC} \times 250 \text{ GPD} = 274,750 \text{ GPD}$$

Therefore, there is sufficient capacity within the existing plant to serve the 274,750 GPD increase in demand.

Existing infrastructure

The nearest LCU water distribution main is located within the Bayshore Rd. right-of-way approximately 4.5 miles west of the subject property. Service to the property will be provided by developer funded improvements to connect to the existing water main and extending mains into the Property for service.

Programmed Improvements/Expansions

The Capital Improvement Program Update (2021) allocates funding to an expansion project for the North Lee County WTP to expand the facility's treatment capacity from the currently permitted 11.6 MGD to 15 MGD. The 2022 Concurrency Report estimates the completion date of the project in fiscal year 2023/24.

Letter of Availability

Please see the enclosed letter from LCU confirming the availability of centralized potable water (Exhibit M17).

4) Surface Water/Drainage Basins – South Florida Water Management District

The Property is located in the Trout Creek and Otter Creek Watersheds according to the Lee County Watershed Map (Lee Plan Map 5B). The site currently allows runoff to sheet flow into the Caloosahatchee River tributaries. Two separate stormwater management systems are anticipated due to the nature of the property topography and hydrology, one on each side of Trout Creek. The stormwater will discharge runoff into the waters of Trout Creek and flow downstream into the Caloosahatchee River. The design intent is to allow existing flows to pass through the property.

Levels of Service

Lee Plan Policies 60.1.7 and 95.1.3 establish an LOS standard for Stormwater Management Facilities as follows:

- (a) The existing surface water management system in the unincorporated areas of the County will be sufficient to prevent the flooding of designated evacuation routes (see Map 3-F) from the 25-year, 3-day storm event (rainfall) for more than 24 hours.*
- (b) Maintain adequate public infrastructure so that all new private and public structures which are constructed a minimum of one foot above the 100-year, 3-day storm event flood plain level will be safe from flooding from a 100-year, 3-day storm event (rainfall).*
- (c) Regulation of Private and Public Development - Surface water management systems in new private and public developments (excluding widening of existing roads) will be designed to SFWMD standards (to detain or retain excess stormwater to match the predevelopment discharge rate for the 25-year, 3-day storm event [rainfall]). Stormwater discharges from development must meet relevant water quality and surface water management standards as set forth in state rules including but not limited to requirements listed in the Numeric Nutrient Criteria, Total Maximum Daily Load Program and Basin Management Action Plan. New developments will be designed to avoid increased flooding of surrounding areas. These standards are designed to minimize increases of discharge to public water management infrastructure (or to evapotranspiration) that exceed historic rates, to minimize change to the historic hydroperiod of receiving waters, to maintain the quality of receiving waters, and to eliminate the disruption of wetlands and flow-ways, whose preservation is deemed in the public interest.*
- (d) Design trunk conveyance crossings of arterial roads to be free of flooding from 25-year, 3-day storm event.*
- (e) Design major collectors and arterial roadways to have no more than 6 inches of water for a 25-year, 3-day storm event."*

The 2022 Concurrency Report indicates that no evacuation routes are expected to be flooded for more than 24 hours. Additionally, the Project will be required to obtain an ERP permit from SFWMD. Therefore, the Project will comply with the LOS standard for Stormwater Management Facilities.

5) Parks, Recreation, Open Space

Objectives 83.1 and 84.1 and Policy 95.1.3 establish a non-regulatory LOS standard for Community Parks and Regional Parks as follows:

- “(a) Regional Parks - 6 acres of developed regional park land open for public use per 1000 total seasonal County population for all of Lee County.*
(b) Community Parks - 0.8 acres of developed community park land open for public use per 1,000 unincorporated Lee County permanent population.”

The 2022 Concurrency Report indicates the following required and available capacities needed to meet these LOS standards:

Type	Required Capacity	Available Capacity
Regional Parks	5,538 acres	7,066 acres
Community Parks	295 acres	832 acres

As a result, there is adequate acreage to accommodate the proposed development of 1,099 dwelling units.

6) Public Schools

The Property is located in the East Zone. According to the 2022 Concurrency Report, projected capacity for elementary, middle and high schools in the East zone for the 2022-23 school year as follows:

School Type	Capacity
Elementary Schools	-371
Middle Schools	351
High Schools	552
Total	532

Lee Plan Policies 68.1.1 and 95.1.3 establish an LOS standard for schools of “100% of Permanent FISH Capacity” for Elementary Schools, Middle Schools, High Schools, and Special Purpose Facilities.

The proposed demand for seats is calculated 0.297 students per single family dwelling unit, which results in the following demand for each school type as follows:

School Type	Students per Single-Family Dwelling	Total Demand (Seats)
Elementary	0.149	164

Middle School	0.071	78
High School	0.077	85
Total		327

Several construction projects in the next five years will ensure available seat capacity is met. Additionally, the 2022 Concurrency Report notes that contiguous districts may provide capacity when capacity in the project's District is not available.

Programmed Improvements/Expansions

Two facilities are programmed to be opened in the East Zone. The 2022 Concurrency Report estimates that the completion of Elementary School "J," and the expansion of Lehigh Acres Middle School will provide additional seats for the 2023-24 school year.

Letter of Availability

The capacity analysis above demonstrates that adequate capacity exists to accommodate the proposed development. Additionally, the School District has provided the enclosed letter confirming the availability of seats (Exhibit M17).

Traffic Circulation Analysis (EXHIBIT M15)

MEMORANDUM

TO: Mr. Jack Weber
Neal Communities

FROM: Yury Bykau, P.E.
Senior Project Manager

DATE: Revised: June 15, 2023

RE: Cary+Duke+Povia
Comprehensive Plan Amendment
Lee County, Florida

TR Transportation Consultants, Inc. has completed a traffic circulation analysis for the proposed Comprehensive Plan for the property located along the south side of North River Road approximately 1 mile east of SR 31 in Lee County, Florida. Based on the discussion with RVi Planning, the subject site will be subject to a Comprehensive Plan Amendment that will allow the site to be added to the Future Water and Sewer Services Maps 4A and 4B.

The transportation related impacts of the proposed Amendment to the Lee Plan were evaluated pursuant to the criteria in the application document. This included an evaluation of the long-range impact (20-year horizon) and short-range impact (5-year horizon) the proposed amendment would have on the existing and future roadway infrastructure.

Under the existing Rural Land Use Category (FLU), approximately 788 acres of property can be developed with up to 788 residential dwelling units at a density of 1 dwelling unit per acre, plus additional incentive density of up to 1 dwelling unit per acre under Policy 123.2.17. The applicant proposes 1,099 dwelling units in the concurrently filed Residential Planned Development application. The Applicant is proposing a Comprehensive Plan Amendment on the subject property to add the 788 acres to Future Water and Sewer Services Maps 4A and 4B.

Table 1 summarizes the residential intensities that could be developed under the existing land use designation and residential intensities as a result of the incentive density per Policy 123.2.17.

Table 1
Land Uses
Cary+Duke+Povia

Existing/ Proposed	Land Use Category	Intensity
Existing	Rural	788 Dwelling Units
Proposed W/ Incentive Density	Rural	1,099 Dwelling Units

The trip generation for the with and without incentive density scenarios was determined by referencing the Institute of Transportation Engineer's (ITE) report, titled ***Trip Generation Manual***, 11th Edition. Land Use Code 210 (Single-Family Detached Housing) was utilized for the trip generation purposes of the residential uses. Using this land use ensures that the analysis is completed based on the worst-case trip generation scenario. **Table 2** and **Table 3** outline the anticipated weekday AM and PM peak hour and daily trip generation based on the existing and proposed future land use categories, respectively. The trip generation equations utilized are attached to this Memorandum for reference.

Table 2
Trip Generation – Permitted
Cary+Duke+Povia

Land Use	Weekday A.M. Peak Hour			Weekday P.M. Peak Hour			Daily (2-way)
	In	Out	Total	In	Out	Total	
Single-Family Residential (788 Units)	122	365	487	436	256	692	6,741

Table 3
Trip Generation – Proposed
Cary+Duke+Povia

Land Use	Weekday A.M. Peak Hour			Weekday P.M. Peak Hour			Daily (2-way)
	In	Out	Total	In	Out	Total	
Single-Family Residential (1,099 Units)	165	495	660	596	350	946	9,154

Table 4 indicates the trip generation difference between the proposed Map Amendment and existing land use category (Table 2 vs Table 3). The resultant trip change in Table 4 indicates that the trip generation will be increased in the AM and PM peak hour conditions as a result of the proposed amendment.

Table 4
Trip Generation – Resultant Trip Change (Table 2 vs Table 3)
Cary+Duke+Povia

Land Use	Weekday A.M. Peak Hour			Weekday P.M. Peak Hour			Daily (2-way)
	In	Out	Total	In	Out	Total	
Proposed Incentive Density	165	495	660	596	350	946	9,154
Existing Land Use Designation	-122	-365	-487	-436	-256	-692	-6,741
Resultant Trip Change	+43	+130	+173	+160	+94	+254	+2,413

Long Range Impacts (20-year horizon)

The Lee County Metropolitan Planning Organization's (MPO) 2045 Long Range Transportation Plan was reviewed to determine if any future roadway improvements were planned in the vicinity of the subject site. Based on the review, roadway improvements within the vicinity of the subject site shown on the 2045 Financially Feasible Plan were the widening of SR 31 to a six-lane facility from SR 80 to Charlotte County and widening of SR 78 to a four-lane facility from SR 31 to I-75. Note, the Lee County 2045 Needs Plans also indicates widening of SR 80 to a six-lane facility from SR 31 to Buckingham Road. Improvements that are shown on the Needs Plan are not included in this analysis. The Lee County 2045 Highway Cost Feasible Plan and 2045 Needs Plan maps are attached to this Memorandum for reference.

The Lee County Metropolitan Planning Organization's (MPO) long range transportation travel model was also reviewed in order to determine the impacts the amendment would have on the surrounding area. The base 2045 loaded network volumes were determined for the roadways within the study area and then the PM peak hour trips to be generated by additional trips in Table 3 were added to the projected 2045 volumes. The Level of Service for the surrounding roadways was then evaluated. The Level of Service threshold volumes were derived based on the attached *Lee County Generalized Peak Hour Directional Service Volumes* table as well as *FDOT's Generalized Peak Hour Directional Volumes*, Table 7 and Table 9.

The results of the analysis indicate that the addition of the trips as a result of the proposed incentive density to the projected 2045 volumes will not cause any roadway links, except for SR 31 between SR 78 and North River Road, to fall below the recommended minimum acceptable Level of Service thresholds as recommended in Policy 37.1.1 of the Lee County Comprehensive Plan. The adopted Level of Service for SR 31 between SR

78 and North River Road is LOS" C". With the project traffic scenario, this roadway is anticipated to operate at a LOS "D". However, Transportation concurrency is non-regulatory per Florida Statutes Section 163.3180 and Lee Plan Policy 95.1.3, which provides "*Compliance with non-regulatory LOS standards will not be a requirement for continued development permitting, but will be used for facility planning purposes.*" Note, SR 80 east of SR 31 was shown to operate at a poor Level of Service in the 2045 background (without project traffic) conditions. As previously mentioned, SR 80 is shown to be widened to a six-lane facility on the Lee County's 2045 Needs Plan, which would alleviate this projected background deficiency. Therefore, no changes to the adopted long range transportation plan are required as result of the proposed Map Amendments. Attached **Table 1A** and **Table 2A** reflect the Level of Service analysis based on the 2045 conditions.

Short Term Impacts Analysis (2026)

The 2021/2022-2025/2026 Lee County Transportation Capital Improvement Plan and the 2022-2026 Florida Department of Transportation Adopted Work Program were reviewed to determine the short term impacts the proposed Map Amendment would have on the surrounding roadways. Based on the review, SR 31 is funded to be widened to a four-lane facility from SR 78 to Cook Brown Road by Babcock Ranch. The construction for this improvement is scheduled to start in late 2023. There are no other programmed improvements in the vicinity of the subject site. Note, FDOT is currently conducting PD&E studies on SR 31 from SR 80 to SR 78 as well as on SR 78 from I-75 to SR 31 to evaluate future widening of these roadways to four-lane facilities.

Table 3A and **Table 4A** attached to this report indicate the projected 5-year planning Level of Service on the surrounding roadways based on the additional trips shown in Table 5. The existing peak hour, peak season, peak direction traffic volumes on the various roadway links maintained by Lee County were obtained from the most recent *Lee County Public Facilities Level of Service and Concurrency Report*. The existing peak hour, peak season, peak direction traffic volumes for state maintained roadways were derived by factoring the latest AADT volumes by appropriate K & D factors obtained from FDOT's *Florida Traffic Online* webpage.

The existing peak hour, peak season, peak direction traffic volumes were then factored by the appropriate annual growth rates in order to obtain the 2026 background traffic conditions on the area roadway network. The growth rates for each roadway were calculated based on historical traffic data obtained from the FDOT's *Florida Traffic Online* webpage as well as the traffic data from the latest *Lee County Traffic Count Database System (TCDS)*. Based on the project traffic distribution illustrated within Table 4A, the roadway link data was analyzed for the year 2026 without the proposed amendment and year 2026 with the proposed amendment. Traffic data obtained from the aforementioned Lee County and FDOT resources is attached to this Memorandum for reference.

The results of the analysis indicate that the addition of the trips as a result of the proposed incentive density to the projected 2026 volumes will only cause SR 31 from SR 78 to SR 80 to fall below the minimum acceptable Level of Service standards. However, as previously mentioned FDOT is currently conducting PD&E Study on SR 31 to widen this roadway segment to a four-lane facility, which would alleviate this projected deficiency. The proposed Map Amendment does not cause any other roadways in the short-range analysis to fall below the minimum acceptable Level of Service standards. Therefore, based on this analysis no modifications will be necessary to the Lee County or FDOT short term capital improvement programs. Capacity analysis will be evaluated again at the time the project will seek rezoning and local Development Order approvals.

Conclusion

The proposed Comprehensive Plan Amendment is for a property located along the south side of North River Road approximately 1 mile east of SR 31 in Lee County, Florida. The proposed Map Amendment on the subject property will add the site to the Future Water and Sewer Service Maps 4A and 4B.

The results of the long-range link Level of Service analysis indicated that the addition of the trips as a result of the proposed incentive density to the projected 2045 volumes will not cause any roadway links, except for SR 31 between SR 78 and North River Road, to fall below the recommended minimum acceptable Level of Service thresholds as recommended in Policy 37.1.1 of the Lee County Comprehensive Plan. The adopted Level of Service for SR 31 between SR 78 and North River Road is LOS "C". With the project traffic scenario, this roadway is anticipated to operate at a LOS "D". However, Transportation concurrency is non-regulatory per Florida Statutes Section 163.3180 and Lee Plan Policy 95.1.3, which provides "*Compliance with non-regulatory LOS standards will not be a requirement for continued development permitting, but will be used for facility planning purposes.*"

The results of the short-range link Level of Service analysis indicated that the addition of the trips as a result of the proposed incentive density to the projected 2026 volumes will only cause SR 31 from SR 78 to SR 80 to fall below the minimum acceptable Level of Service standards. However, as previously mentioned FDOT is currently conducting PD&E Study on SR 31 to widen this roadway segment to a four-lane facility, which would alleviate this projected deficiency. The proposed Map Amendment does not cause any other roadways to fall below the minimum acceptable Level of Service standards. Capacity analysis will be evaluated again at the time the project will seek rezoning and local Development Order approvals.

No modifications are necessary to the Short Term Capital Improvement Plan or the Long Range Transportation Plan to support the proposed Amendment. In addition, the proposed amendment will not significantly alter the socio-economic data forecasts that were utilized in the development of the Long Range Transportation Plan.

¹ AGR for roadways was calculated based the historical traffic data obtained from Florida Traffic Online webpage and Lee County Traffic Count Database System (TCDS)

² Current peak hour peak season peak direction traffic volumes for all County roadways were obtained from the 2022 Lee County Public Facilities Level of Service and Concurrency Report.

² Current peak hour peak season peak direction traffic volumes for state maintained roadways were obtained by adjusting the 2021 AADT by the appropriate K and D factors

DIRECTIONAL VOLUMES
TABLE 7 & TABLE 9**

TABLE 7

Generalized Peak Hour Directional Volumes for Florida's
Urbanized Areas

January 2020

January 2, 2025

INTERRUPTED FLOW FACILITIES

STATE SIGNALIZED ARTERIALS

Class I (40 mph or higher posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	830	880	**
2	Divided	*	1,910	2,000	**
3	Divided	*	2,940	3,020	**
4	Divided	*	3,970	4,040	**

Class II (35 mph or slower posted speed limit)

Lanes	Median	B	C	D	E
1	Undivided	*	370	750	800
2	Divided	*	730	1,630	1,700
3	Divided	*	1,170	2,520	2,560
4	Divided	*	1,610	3,390	3,420

Non-State Signalized Roadway Adjustments

(Alter corresponding state volumes by the indicated percent.)

Non-State Signalized Roadways - 10%

Median & Turn Lane Adjustments

Lanes	Median	Exclusive Left Lanes	Exclusive Right Lanes	Adjustment Factors
1	Divided	Yes	No	+5%
1	Undivided	No	No	-20%
Multi	Undivided	Yes	No	-5%
Multi	Undivided	No	No	-25%
-	-	-	Yes	+5%

One-Way Facility Adjustment

Multiply the corresponding directional volumes in this table by 1.2

BICYCLE MODE²

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes)

Paved Shoulder/Bicycle Lane Coverage

	B	C	D	E
0-49%	*	150	390	1,000
50-84%	110	340	1,000	>1,000
85-100%	470	1,000	>1,000	**

PEDESTRIAN MODE²

(Multiply vehicle volumes shown below by number of directional roadway lanes to determine two-way maximum service volumes)

Sidewalk Coverage

	B	C	D	E
0-49%	*	*	140	480
50-84%	*	80	440	800
85-100%	200	540	880	>1,000

BUS MODE (Scheduled Fixed Route)³

(Buses in peak hour in peak direction)

Sidewalk Coverage

	B	C	D	E
0-84%	> 5	≥ 4	≥ 3	≥ 2
85-100%	> 4	≥ 3	≥ 2	≥ 1

UNINTERRUPTED FLOW FACILITIES

FREEWAYS

Core Urbanized

Lanes	B	C	D	E
2	2,230	3,100	3,740	4,080
3	3,280	4,570	5,620	6,130
4	4,310	6,030	7,490	8,170
5	5,390	7,430	9,370	10,220
6	6,380	8,990	11,510	12,760

Urbanized

Lanes	B	C	D	E
2	2,270	3,100	3,890	4,230
3	3,410	4,650	5,780	6,340
4	4,550	6,200	7,680	8,460
5	5,690	7,760	9,520	10,570

Freeway Adjustments

Auxiliary Lane	Ramp Metering
+ 1,000	+ 5%

UNINTERRUPTED FLOW HIGHWAYS

Lanes	Median	B	C	D	E
1	Undivided	580	890	1,200	1,610
2	Divided	1,800	2,600	3,280	3,730
3	Divided	2,700	3,900	4,920	5,600

Uninterrupted Flow Highway Adjustments

Lanes	Median	Exclusive left lanes	Adjustment factors
1	Divided	Yes	+5%
Multi	Undivided	Yes	-5%
Multi	Undivided	No	-25%

¹Values shown are presented as peak hour directional volumes for levels of service and are for the automobile/truck modes unless specifically stated. This table does not constitute a standard and should be used only for general planning applications. The computer models from which this table is derived should be used for more specific planning applications. The table and deriving computer models should not be used for corridor or intersection design, where more refined techniques exist. Calculations are based on planning applications of the HCM and the Transit Capacity and Quality of Service Manual.

² Level of service for the bicycle and pedestrian modes in this table is based on number of vehicles, not number of bicyclists or pedestrians using the facility.

³ Buses per hour shown are only for the peak hour in the single direction of the higher traffic flow.

* Cannot be achieved using table input value defaults.

** Not applicable for that level of service letter grade. For the automobile mode, volumes greater than level of service D become F because intersection capacities have been reached. For the bicycle mode, the level of service letter grade (including F) is not achievable because there is no maximum vehicle volume threshold using table input value defaults.

Dear Mr. Frantz:

The subject properties are not located within Lee County Utilities Future Service Area as depicted on Maps 4A and 4B of the Lee County Comprehensive Land Use Plan. The nearest potable water north of the Caloosahatchee River is located on Bayshore Road approximately 4.5 mile west of the subject parcels. The nearest wastewater is on the south side of the Caloosahatchee River. In order to provide service to the subject parcels completion of a comprehensive plan amendment and developer funded system enhancements such as, but not limited to, line extensions will be required.

Your firm has indicated that this project will consist of 1,099 single family residential units with an estimated flow demand of approximately 274,750 gallons per day. Lee County Utilities presently has sufficient capacity to provide potable water and sanitary sewer service as estimated above.

Availability of potable water and sanitary sewer service is contingent upon final acceptance of the infrastructure to be constructed by the developer. Upon completion and final acceptance of this project, potable water service will be provided through our North Lee County Water Treatment Plant.

Sanitary sewer service will be provided by the City of Fort Myers North Water Reclamation Facility. The Lee County Utilities' Design Manual requires the project engineer to perform hydraulic computations to determine what impact this project will have on our existing system.

There are no reuse mains in the vicinity of these parcels.

Prior to beginning design work on this project, please meet with LCU Staff to determine the best point of connection and discuss requirements for construction.

P.O. Box 398, Fort Myers, Florida 33902-0398 (239) 533-2111

AN EQUAL OPPORTUNITY AFFIRMATIVE ACTION EMPLOYER

This letter should not be construed as a commitment to serve, but only as to the availability of service. Lee County Utilities will commit to serve only upon receipt of all appropriate connection fees, a signed request for service and/or an executed service agreement, and the approval of all State and local regulatory agencies.

Further, this letter of availability of potable water and sanitary sewer service is to be utilized for Comprehensive Plan Amendment and Zoning only. Individual letters of availability will be required for the purpose of obtaining building permits.

Sincerely,

**RE: Cary Duke RPD – Comprehensive Plan Amendment
Letter of Service Availability**

Dear Ms. Clarissa Marino Diaz,

RVI Planning + Landscape Architecture is preparing a Comprehensive Plan Amendment & Planned Development Rezone application for the above referenced project. The property consists of 788 +/- acres and is located at 13230 N. River Road in unincorporated Lee County, Florida, generally one mile east of the SR 31 Pine Island and N River Road intersection. An aerial location map depicting the subject property has been attached for your reference.

The Applicant is proposing a Large-Scale Comprehensive Plan Map Amendment to change the Future Water Service Areas Map (Map 4A) and Future Sewer Service Area Map (Map 4B) and a PD Rezone request to rezone the entire 788 +/- acres from AG-2 to Residential Planned Development (RPD) which will allow for the development of up to 1,099 single-family and two-family units on the subject property.

To complete the application process, we are required to secure a service availability letter from your agency stating whether existing facilities are capable of serving this future project. I greatly appreciate your time and consideration of this matter. If you have and further questions, please feel free to contact me directly at (239) 319-0026 or jfrantz@rviplanning.com.

Sincerely,

RVI Planning + Landscape Architecture

Letter of Service Availability**

Dear Mr. Frantz:

The Lee County Solid Waste Department is capable of providing solid waste collection service for the comprehensive plan amendment & planned development rezone at 13230 N. River Road in unincorporated Lee County, which will allow for the development of up to 1,099 single-family and two-family units on the subject property through the franchised hauling contractors. Disposal of the solid waste from this development will be accomplished at the Lee County Resource Recovery Facility and the Lee-Hendry Regional Landfill. Plans have been made, allowing for growth, to maintain long-term disposal capacity at these facilities.

Please review Lee County Land Development Code, Chapter 10, Section 261, with requirements for on-site space for placement and servicing of solid waste containers. Please note that the property owner will be responsible for all future applicable solid waste assessments and fees.

If you have any questions, please call me at (239) 533-8007.

March 10, 2023

RE: Single Family Concurrency Review in N River RD

Dear Jeremy Frantz:

This letter is in response to your request for concurrency review dated February 15, 2022 for the subject property in 13230 N River Road regard to educational impact East Zone.

This development is a request for 1099 Single family housing units. With regard to the inter-local agreement for school concurrency the generation rates are created from the type of dwelling unit and further broken down by grade level.

For multi-family homes, the generation rate is .116 and further broken down by grade level into the following, .149 for elementary, .0071 for middle and .077 for high. A total of 326.4 school-aged children would be generated and utilized for the purpose of determining sufficient capacity to serve the development.

The Concurrency Analysis attached, displays the impact of this development. Capacity is an issue within the Concurrency Service Area (CSA) at the elementary school level, however, capacity is available in the adjacent CSA.

Thank you and if I may be of further assistance, please contact me at 239-335-1494

Sincerely,

Jacqueline Heredia, District Planning Specialist

Re: Letter of Service Availability – Cary Duke RPD

Mr. Frantz,

I am in receipt of your letter requesting a Letter of Service Availability for the proposed Cary Duke RPD. The property consists of approximately 788 acres and is located at 13230 N. River Road. The request is to develop the property up to 1,099 single and two-family dwellings.

Lee County Emergency Medical Services is the primary EMS transport agency responsible for coverage at the location you have provided. Because we currently serve this area and have a sufficient response data sample, we evaluated response times in this vicinity to simulate the anticipated demand and response.

The primary ambulance for this location is Medic 11, located 5.0 miles southwest. Medic 19 is 5.2 miles west. Neither of these locations can arrive at the entrance to the development within the requirements of Lee County Ordinance 08-16, let alone into the development.

It is our opinion that the EMS service availability for the proposed development of this property is not adequate at this time. Should the plans change, a new analysis of this impact would be required.

Sincerely,

Benjamin Abes
Director, Public Safety

Mr. Frantz,

The Lee County Sheriff's Office has reviewed your Comprehensive Plan Amendment & Planned Development Rezone Letter of Service Availability request for a 788 +/-acre development located south of North River Road and generally one mile east of SR 31 in unincorporated Lee County.

The Applicant is proposing a Large-Scale Comprehensive Plan Map Amendment to change the Future Water Service Areas Map (Map 4A) and Future Sewer Service Area Map (Map 4B) and a PD Rezone request to rezone the entire 788 +/- acres from AG-2 to Residential Planned Development, which will allow for the development of up to 1,099 single-family and two-family units on the subject property. This Agency evaluated your request solely on its ability to provide law enforcement service to the development, and we have determined that we are able to provide services to the proposed project.

Law enforcement services will be provided from our North District offices in North Fort Myers. As this development builds out, we will factor its impact into our annual manpower review and make adjustments accordingly. At the time of application for a Development Order or building permit, we request that the applicant provide a Crime Prevention Through Environmental Design (CPTED) report done by the applicant and given to the Lee County Sheriff's Office for review and comment.

Please contact Community Response Unit Crime Prevention Practitioner Beth Schell at (239) 477-1677 with any questions regarding the CPTED study.

Respectfully,

A handwritten signature in black ink, appearing to be "Chris Reeves", followed by the number "94024".

RE: Cary Duke RPD – Comprehensive Plan Amendment
Letter of Service Availability

Josephine,

With regards to your request for a letter of availability concerning the above referenced project, Bayshore Fire Protection & Rescue District is aware that the project is proposing 1,099 single-family and two-family units along North River rd. The District does provide fire and rescue services to the subject property, and can provide services to the proposed development. Based upon the location of the subject property, it will be outside of 5 road miles from the fire station as required for ISO. However, the District and Lee County EMS are in the early phases of planning a second station along SR 31, closer to the subject property. The District may have some additional needs to provide adequate services in the future. However, we are committed to working with the developer to ensure that adequate fire and rescue services are provided to this project, and maintaining an ISO class 2 rating for the area. Please feel free to contact me if you have any further questions or concerns.

Sincerely,

William Underwood
Fire Chief
Bayshore Fire Rescue

February 16, 2023

Chief Doug Underwood
Lee County Sheriff
17350 Nalle Road
Fort Myers, FL 33917

**RE: Cary Duke RPD – Comprehensive Plan Amendment
Letter of Service Availability**

Dear Chief Underwood,

RVi Planning + Landscape Architecture is preparing a Comprehensive Plan Amendment & Planned Development Rezone application for the above referenced project. The property consists of 788 +/- acres and is located at 13230 N. River Road in unincorporated Lee County, Florida, generally one mile east of the SR 31 Pine Island and N River Road intersection. An aerial location map depicting the subject property has been attached for your reference.

The Applicant is proposing a Large-Scale Comprehensive Plan Map Amendment to change the Future Water Service Areas Map (Map 4A) and Future Sewer Service Area Map (Map 4B) and a PD Rezone request to rezone the entire 788 +/- acres from AG-2 to Residential Planned Development (RPD) which will allow for the development of up to 1,099 single-family and two-family units on the subject property.

To complete the application process, we are required to secure a service availability letter from your agency stating whether existing facilities are capable of serving this future project. I greatly appreciate your time and consideration of this matter. If you have and further questions, please feel free to contact me directly at (239) 319-0026 or jfrantz@rviplanning.com.

Sincerely,

RVi Planning + Landscape Architecture

A handwritten signature in black ink, appearing to read 'Jeremy Frantz'.

Jeremy Frantz, AICP
Project Director

II. PROPERTY OWNERS MAP

Justification of Proposed Amendment (EXHIBIT M19)

Cary+Duke+Povia Map Amendment

Justification of Proposed Amendment

Exhibit M19

I. Request

Neal Communities of Southwest Florida, Inc. ("Applicant") is requesting approval of a Large-Scale Comprehensive Plan Map Amendment to add the 788 +/- acres subject property to the Lee County Utilities, Future Water Service Areas Map (Map 4A) and Future Sewer Service Areas Map (Map 4B).

The Applicant is filing a companion Residential Planned Development (RPD) rezoning application to allow the development of a maximum of 1,099 residential dwelling units, with amenities, expansive upland and wetland preservation areas, and supportive infrastructure. The proposed Map Amendments will allow for the privately funded expansion of water services that would benefit existing and future residents of the area.

II. Background Information

Existing Conditions & Property History

The Property is located south of North River Road, west of N. Olga Drive, and approximately one mile east of SR 31 in unincorporated Lee County, FL. The Property has a Future Land Use designation of Rural and Wetlands and contains some areas that are located within the Coastal High Hazard Area. The Property is currently zoned Agricultural (AG-2) and is located within the Northeast Lee County - North Olga Lee County Community Planning Area. The Property consists of grazing lands and natural areas and is bisected by Trout Creek.

The parcels under ownership by Cary+Duke Properties, LLC and Povia Family, LLC have historically been used for agricultural purposes. The properties are currently vacant or used for cattle grazing. A portion of the Property is made up of the P. John Hart's Subdivision (Plat Book 3 Page 7) and is owned by Harney Trust. This subdivision was recorded in 1911 and while the lots have been partially cleared of vegetation in the past, there has not been further development activity.

There are no other past zoning actions, comprehensive plan land use changes, environmental mitigation, uses, subdivisions, platting, structures built, etc.

The property is adjacent to existing planned water and sewer extensions to the west of the Property which was recently approved for the Owl Creek Reserve MPD.

Surrounding Land Use Pattern

The Property is in a rapidly changing area of Lee County due to proximity to the Town of Babcock Ranch. While there are several large tracts of agricultural properties and large-lot rural subdivisions in the area, several large tracts are converting to residential and mixed use development, in a manner that upholds the rural character and protects North Olga's unique environmental resources.

Lands to the immediate north of North River Road are zoned for 1,630 dwelling units and 1.17M square feet of non-residential uses.

Similarly, Owl Creek Reserve MPD immediately to the west of the Property was approved for 380 dwelling units. As part of this approval the developer also received approval to expand water services to the area via companion Comprehensive Plan Map Amendment which added 342 +/- acres to the Lee County Utilities, Future Water Service Area Map. The developer did not propose to extend the Sewer Service Map boundary to include their property as sanitary sewer service was anticipated to be provided by FGUA at the time of their application.

Table 1 below further defines the surrounding Future Land Use designations, zoning districts and existing land uses.

Table 1: Inventory of Surrounding Lands

	FUTURE LAND USE	ZONING DISTRICT	EXISTING LAND USE
NORTH	Rural; DR/GR (Private Recreational Facilities Overlay); New Community; Conservation Lands Uplands	AG-2; MH-1; MPD	Right of Way (North River Road), single-family residential homes, row crops; Babcock MPD' Conservation 20/20 (Bob Janes Preserve)
SOUTH	Rural, Wetlands	AG-2(Agricultural)	Right of Way (Duke Highway), single-family residential homes, grazing lands
EAST	Rural	AG-2 (Agricultural)	Right of Way (North River Road), single-family residential homes, grazing lands
WEST	Rural; Wetlands	AG-2 (Agricultural)	Single-family residential homes, row crops, grazing lands

III. Justification of Proposed Amendment

The map amendment request will allow for the 788+/- acre residential development to connect to Lee County Utilities via the inclusion within the Lee County Utilities, Future Water Service Areas Map (Map 4A) and Sewer Map (Map 4B). No future land use designation change or text amendment is being requested as part of this comprehensive plan map amendment. The companion rezone request allows for a maximum of 1,099 units along with associated infrastructure and amenities. The addition of the Property to Maps 4A and 4B facilitates the design of this community in a compact form of development with significant buffering, and preservation and enhancement of rare and unique upland habitats.

Supporting this compact form of development will also eliminate the potential for over 700 wells and septic systems, providing a significant benefit to water quality and natural resource values in North Olga. Additionally, reducing wells and septic systems in areas proximate to the Caloosahatchee

River mitigate the potential impacts to water quality from development in the area. The potential for numerous wells on the property would be contrary to intent of protecting aquifers in the Lee Plan.

The proposed extension of water and sewer services will support development of the property in a manner consistent with the Lee Plan as recently amended in Lee Plan Policy 123.2.17, to ensure demand for housing is accommodated while providing significant environmental preservation in the form of 60 percent open space, 50 percent wetland preservation, and 420 acres of preserves, including over including over 300 acres of Rare and Unique Upland habitat restoration. The plan also provides for the protection of the Trout Creek flowway through the Property and provides floodplain mitigation. The compact development also serves to protect the rural character and natural viewsheds through large buffers and setbacks along an arterial roadway.

The proposed Lee Plan Map Amendment furthers the intent of the Lee Plan and represents an opportunity to continue previously approved privately funded expansion of water and sewer services within the North Olga Community. This amendment provides protection to the environment and benefits the public health safety and welfare of existing and future residents, at no cost to the County.

For these reasons, the Applicant respectfully requests approval of this Lee Plan Map Amendment as proposed.

Planning Communities/Community Plan Area Requirements (EXHIBIT M20)

Cary+Duke+Povia Map Amendment Planning Communities/Community Plan Area Requirements - Exhibit M20

GOAL 27 NORTHEAST LEE COUNTY COMMUNITY PLAN:

OBJECTIVE 27.1: AGRICULTURAL AND RURAL CHARACTER. Maintain and enhance the viability of the existing and evolving commercial agricultural operations, preserve open space, and retain the rural character of Northeast Lee County. For the purposes of this objective, rural character is defined as those characteristics that convey a sense of rural lifestyle such as large lots or clustered development, ample views of wooded areas, open spaces, and river fronts, working farms and productive agricultural uses, and the protection of environmentally sensitive lands.

POLICY 27.1.1: Support the agricultural and rural character within Northeast Lee County by encouraging continued commercial agricultural operations and encourage new development to be clustered to conserve large areas of open lands.

POLICY 27.1.5: In all discretionary actions, consider the effect on Northeast Lee County's commercial agricultural operations and rural character.

The addition of the Property to the Future Water and Sewer Service Area maps supports the development of a clustered residential development which will include 423± acres of native habitat preserve areas, including over 300 acres of rare and unique upland preservation. Significant portions of these preserves are adjacent to public rights-of-way ensuring that the rural character of the area is preserved in perpetuity. In contrast, if central water and sewer is not extended to the Property, the existing AG-2 zoning allows for over 700 large lot residential dwelling units with no requirement for open lands to be preserved.

POLICY 27.1.8: The owner or agent of a rezoning or special exception request within the Northeast Lee County Community Plan area must conduct two public information meetings, in accordance with Policies 17.3.3 and 17.3.4, prior to the application being found sufficient. One meeting must be held within the Alva Community Plan area boundary and the other in the North Olga Community Plan area boundary.

The Applicant has gone above and beyond minimum code requirements in meeting with the North Olga Community Planning Panel and individual property owners along Duke Hwy. in advance of filing this petition and throughout the application review process to gain early feedback that informed the proposed project design. The Applicant has attended the past three (3) North Olga meetings and held a voluntary community meeting with Duke Hwy residents on August 13, 2022. All of these meetings were conducted to assist in the preparation of this application.

The Applicant held legally advertised public information meetings within the Alva and the North Olga community plan area boundaries as detailed in the attached public meeting

summary. These meetings were held in Alva on March 14, 2023, and in North Olga on June 20, 2023. Additionally, the Applicant advertised and attended a meeting with the North Olga Planning Panel at their regular meeting location on January 26, 2023, and the meeting summary is attached.

OBJECTIVE 27.2: RURAL PLANNING TOOLBOX. To develop and further the use of a rural toolbox of incentives, programs, and regulations that enhance and maintain Northeast Lee County's sense of place and provide for the long-term preservation of large tracts of contiguous natural resource and open space areas, while providing the regulatory flexibility needed to support commercial agricultural operations.

POLICY 27.2.1: Work with Alva and North Olga to develop and refine rural planning tools including but not limited to: transfer of development rights and purchase of development rights programs, conservation and agricultural easements, farmland trusts, and LDC regulations.

The proposed Map Amendment allows for significant private investment in the extension of water and sewer services. Additionally, the companion rezoning request utilizes unique planning tools available in Policy 123.2.17 which includes development incentives in exchange for significant preservation areas to be placed under conservation easement.

OBJECTIVE 27.3: NATURAL RESOURCES. To enhance, preserve and protect the physical integrity, ecological standards, and rural character of Northeast Lee County by focusing on: water basins; native vegetation; wildlife habitat and resources; and areas designated for long-term conservation.

POLICY 27.3.2: Identify, maintain, and enhance appropriate public access to Northeast Lee County's public lands and surface waters, balanced with new and ongoing efforts to protect and enhance the community's water quality and natural resources.

The addition of the Property to the Future Water and Sewer Service Area Maps will eliminate the potential for over 700 wells and septic systems, providing a significant benefit to water quality and natural resource values in North Olga.

Additionally, the companion rezoning request preserves and enhances the rural character of Northeast Lee County through the enhanced buffers, setbacks preservation and the extension of utility services to the Property.

As a result, the project will provide significant ecological benefits at no cost to the County. The plan provides over 60 percent of land in designated open space, which exceeds the typical open space requirement of 40 percent when not meeting the requirements for incentive density in Policy 123.2.17. Additionally, the native preservation areas include 420 acres, including over 300 acres of preservation, restoration or creation of Rare and Unique

upland habitat. This is entirely consistent with the intent of the above policy to preserve natural resources in North Olga.

GOAL 29: NORTH OLGA COMMUNITY PLAN. Promote and support the unique rural character, heritage, economy, quality of life, and natural resources in the North Olga Community Plan area.

POLICY 29.1.1: Protect the community's rural aesthetic qualities, preserve the natural and historic resources, and support a diverse rural economy by promoting compact or clustered development areas that maintain large, contiguous tracts of open space, while supporting commercial agricultural businesses.

OBJECTIVE 29.2: RESIDENTIAL LAND USES. Protect and enhance the rural character of the North Olga Community by evaluating residential development proposals for consistency with the community's rural character and sense of community. Rural character is defined as those characteristics that convey the rural lifestyle such as: large lots or clustered development, ample view of wooded areas, open spaces, and river fronts, working farms, productive agricultural uses, and the protection of environmentally sensitive lands.

POLICY 29.2.1: Proposed planned developments will be encouraged to provide a mix of unit types and flexible lot sizes to allow for clustering, affordability, preservation of open space, natural assets, and diversity of choice within the community.

As identified above, addition of the Property to the Future Water and Sewer Service Area maps supports the development of a clustered residential development which will include 420 acres of native habitat preserve areas, including over 300 acres of rare and unique upland preservation. Significant portions of these preserves are adjacent to public rights-of-way ensuring that the rural character of the area is preserved in perpetuity. In contrast, if central water and sewer is not extended to the Property, the existing AG-2 zoning could allow for over 700 large lot residential dwelling units with no requirement for open lands to be preserved.

OBJECTIVE 29.7: CONSERVATION. Preserve, protect, and, where possible, enhance the physical integrity, rural character, ecological values, and natural beauty of the North Olga Community Plan area, focusing upon the Caloosahatchee River, native vegetation, wildlife resources, and areas designated for long-term conservation.

POLICY 29.7.3: Proposed planned developments will consider the incorporation of "Firewise" principles in site design, including building orientation, access management, landscaping type and placement. For the purposes of this policy, Firewise principles are those guidelines developed by the National Fire Protection Association to mitigate the risk of wildland fire to homes in the wildland/urban interface.

The extension of water and sewer services to the Property will help to mitigate the risk of wildland fire to homes by providing access to water lines in an area that does not currently have infrastructure in place. Other development characteristics detailed in the companion rezoning request will ensure the use of buffers to vegetated areas, compliance with current building codes, and the use of native vegetation in landscaping.

Cary+Duke+Povia Residential Planned Development Neighborhood Meeting Summary

In compliance with Lee Plan Policy 27.1.8, Neal Communities of Southwest Florida, LLC, (Applicant) and their consultant team hosted advertised public information meetings in North Olga and Alva, as well as additional public meetings with the community. A summary of the public meetings is provided below.

North Olga Meetings

Planning Panel Meeting

The North Olga meeting was held at the Bayshore Fire Department Station 131, 17350 Nalle Road, North Fort Myers, FL 33917, at 6:00 p.m., on Thursday, January 26, 2023. The meeting notice was published in the News-Press on January 9, 2023. The Affidavit of Publication is attached as Exhibit A. Please note that this meeting was originally advertised for a meeting on January 19, 2023, but was rescheduled on January 18, 2023, at the community's request. Panel leadership requested the change by phone after the panel's internal email notification to members was not released on time. The rescheduled date of January 26th was chosen by the panel.

The list of participants is attached as Exhibit B and demonstrates approximately 25 attendees were present at the meeting in addition to the consultant team.

Alexis Crespo, AICP, with RVi Planning + Landscape Architecture, Brandon Frey, P.E., with JR Evans Engineering, and Jack Weber and Katie Rhyne with Neal Communities of Southwest Florida, introduced the project, explained changes that have been made since the Applicant's previous presentation to the North Olga group, and presented three exhibits which included an Aerial, and illustrative examples of similar developments, which are attached as Exhibit C, and an MCP, which is attached as Exhibit D.

The Applicant explained the proposed development will include 1,099 single-family and two-family dwelling units, for a maximum density of 1.4 units per acre (figure was rounded from 1.39), and wetland preserves. The Master Concept Plan was also displayed and proposed uses, access points, open space and restoration plan, and project perimeter setbacks were also discussed. After the presentation the Applicant opened the floor for attendees to ask questions and make comments.

Questions and comments raised from attendees included the following topics:

- How water and sewer would be provided.
- Questions regarding traffic impacts on North Road and SR 31.
- Questions about buffer distances, whether fencing was proposed, and proposed berm heights and locations.
- Issues regarding flooding from Babcock Ranch, the Caloosahatchee River, and where drainage will be directed.
- How hurricane shelter impacts would be addressed.
- Questions about proposed development characteristics such as:

- Dwelling types,
- Pricing,
- Density,
- Sizes,
- Architectural style,
- Whether the project would be gated,
- If there would be a CDD, and
- Whether sidewalks are proposed.
- How streetlights would protect rural character.
- The anticipated buildout timeframe.
- The size and location of the largest contiguous preserve area.
- Whether the development would be combined with the Owl Creek development to the west.
- Whether fill dirt is needed.
- How utilities would be routed to the development.
- Questions about how additional density is generated and whether density would be increased in the future.

The Applicant offered to provide tours of Neal Communities other developments and attendees were provided contact information and if there were any other questions. It was also noted that the Applicant would continue to attend meetings in North Olga throughout the application process.

Following the discussion and public comment, the Applicant thanked the attendees and provided contact information. The Applicant's presentation was concluded at approximately 7:00 p.m.

2nd Advertised Meeting

Since the N. Olga Planning Panel holds meetings outside of the North Olga boundary, a second advertised meeting was held at the Cracker Shack Cafe, 18672 SR 31, North Fort Myers, FL 33920, at 11:00 a.m., on Tuesday, June 20, 2023. The meeting notice was published in the News-Press on June 10, 2023. The Affidavit of Publication is attached as Exhibit A.

The list of participants is attached as Exhibit B and demonstrates approximately 59 attendees were present at the meeting in addition to the consultant team.

Jeremy Frantz, AICP, with RVi Planning + Landscape Architecture, Brandon Frey, P.E., with JR Evans Engineering, Yury Bykau, P.E., with TR Transportation, Shane Johnson, with Passarella and Associates, and Jack Weber, Ivory Matthews, Katie Rhyne and Dan Ciesielski, with Neal Communities of Southwest Florida, introduced the project, and presented three exhibits which included an Aerial, and illustrative examples of similar developments, which are attached as Exhibit C, and an MCP, which is attached as Exhibit E.

The Applicant explained the proposed development will include 1,099 single-family and two-family dwelling units, for a maximum density of 1.39 units per acre, and 423 acres of preserves. The Master Concept Plan was also displayed and proposed uses, access points, open space and restoration plan, and project perimeter setbacks were also discussed. After the presentation the Applicant opened the floor for attendees to ask questions and make comments.

Questions and comments raised from attendees included the following topics:

- How access would be provided to the property.

- How water and sewer will be provided, and whether there is wastewater capacity.
- Questions regarding traffic impacts and the planned widening of North Road and SR 31.
- Questions about other projects in the area.
- The potential for nutrient impacts to the Caloosahatchee.
- How public meetings are advertised.
- Issues regarding the potential for flooding and where drainage will be directed.
- How hurricane evacuation would be addressed.
- Questions about proposed development characteristics such as:
 - Dwelling types,
 - Density and the number of lots,
 - Lot Sizes,
 - Whether the project would be gated, and
 - If there would be a CDD or homeowners association and whether they could control the number of vehicles or activities in the development.
- The anticipated construction timeframe.
- Concerns about the values of new residents that will move in.
- Whether the project size has changed.
- Whether the development would be combined with the Owl Creek development to the west.
- Whether fill dirt is needed.
- Concerns regarding wildlife habitat.
- Suggestions were made to:
 - Reduce the density being requested.
 - Donate the property to Conservation 20/20.
- How the development will impact property values and taxes.
- What stormwater event the development will be planned for and how off-site stormwater will be addressed.
- A request to include design and architectural features that are compatible with the rural area.
- What will happen with the excess dirt that came from the Caloosahatchee.
- Whether the applicant can ask for more density at a later date.
- Who owns the property now.
- Whether there will be blasting.

It was also noted that the application process is ongoing and that once public hearings are scheduled, the hearing dates would be advertised.

Following the discussion and public comment, the Applicant thanked the attendees and provided contact information. The Applicant's presentation was concluded at approximately 12:30 p.m.

Alva Meeting

The Alva meeting was held at the Alva Community Center, 21471 N. River Rd., Alva, FL 33920, at 7:00 p.m., on Tuesday, March 14, 2023. The meeting notice was published in the News-Press on March 4, 2023. The Affidavit of Publication is attached as Exhibit A.

The list of participants is attached as Exhibit B and demonstrates approximately 48 attendees were present at the meeting in addition to the consultant team.

Jeremy Frantz, AICP, with RVI Planning + Landscape Architecture, Jack Weber, with Neal Communities of Southwest Florida, Shane Johnson, with Passarella and Associates, Yury Bykau, with TR Transportation, and Brandon Frey, P.E., with JR Evans Engineering, introduced the project and presented three exhibits which included an Aerial, and illustrative examples of similar developments, which are attached as Exhibit C, and an MCP, which is attached as Exhibit E.

The Applicant explained the proposed development includes a new Residential Planned Development and update to the Future Water and Sewer Service Area maps to allow a maximum of 1,099 single-family and two-family dwelling units for a maximum density of 1.39 dwelling units per acre. The presentation also noted that the development includes 51 acres of wetland preserve areas, 420 acres of total preserve area and is designed to preserve the current rural character. The Master Concept Plan was also displayed and proposed uses, access points, open space and restoration plan, project perimeter setbacks and stormwater system requirements were also discussed. After the presentation the Applicant opened the floor for attendees to ask questions and make comments.

Questions and comments raised from attendees included the following topics:

- Agricultural style developments such as Riverwind Cove are preferred, not suburban lots.
- Listed species and habitat on the property.
- Density of the project combined with other surrounding developments.
- Whether the Applicant has begun working with SFWMD.
- Questions about transportation impacts, traffic safety, how the access points will function, whether turn lanes would be provided, and whether there would be impacts to hurricane evacuation.
- How the development would impact response times related to EMS and Fire service.
- The sizes of homes and whether fewer units have been considered.
- Concerns about new residents not sharing the same values as existing residents.
- It was noted that public spaces are needed in the area.
- How water and sewer would be provided.
- Whether hearing dates have been established.
- It was noted that the Community Plan should be followed for the area.
- The rain event the community is required to plan for and whether flooding of the surrounding area would increase.
- Whether there are any historic resources on the property.
- Whether the community would result in high-speed or fiber optic internet access becoming available to the surrounding area.
- Whether the development includes properties along the Caloosahatchee.
- Whether the Applicant has worked with the school district.

The Applicant's presentation was concluded at approximately 8:00 p.m.

NOTICE OF PUBLIC INFORMATION MEETING

DATE: Thursday, January 19, 2023

TIME: 6:00 PM

ADDRESS: Bayshore Fire Department Station 131, 17350 Nalle Road, North Fort Myers, FL 33917

In accordance with the North Olga Planning Community Requirements of the Lee County Land Development Code, the Applicant, Neal Communities of Southwest Florida, Inc, will be presenting information to the public on the following request:

The request is to rezone the 788+/- acre Property from Agriculture (AG-2) to Residential Planned Development (RPD) to allow for a maximum of 1,099 single-family dwelling units, private on-site recreational uses, and supportive infrastructure. The maximum building height is 35 feet. The site will connect to centralized water and sewer services. A companion Comprehensive Plan Amendment will include the subject Property in the Lee County Future Water Services Area Map (Map 4A) and the Future Sewer Service Area Map (Map 4B).

The purpose of the meeting is to educate community members and nearby land-owners about the proposed development and to address any questions.

NOTICE OF PUBLIC INFORMATION MEETING

DATE: Tuesday, March 14, 2023

TIME: 7:00 PM

ADDRESS: Alva Community Center, 21471 N. River Rd., Alva, FL 33920

In accordance with the Northeast Lee County Community Plan Requirements of the
 Lee County Land Development Code and Lee Plan, the Applicant, Neal Communi-
 ties of Southwest Florida, Inc, will be presenting information to the public on the
 following request:

The request is to rezone the 788+/- acre Property from Agriculture (AG-2) to Resi-
 dential Planned Development (RPD) to allow for a maximum of 1,099 single-family
 dwelling units, private on-site recreational uses, and supportive infrastructure. The
 maximum building height is 35 feet. The site will connect to centralized water and
 sewer services. A companion Comprehensive Plan Amendment will include the sub-
 ject Property in the Lee County Future Water Services Area Map (Map 4A) and the
 Future Sewer Service Area Map (Map 4B).

The purpose of the meeting is to educate community members and nearby land-
 owners about the proposed development and to address any questions.

news-press.com A GANNETT COMPANY

Attn:

RVI PLANNING, INC
28100 BONITA GRANDE DR STE 305
BONITA SPRINGS, FL 34135

State of Wisconsin, County of Brown:

Before me undersigned authority personally appeared

A. Kolott, who on oath says that
 he or she is a Legal Assistant of the News-Press, a daily
 newspaper published at Fort Myers in Lee County, Florida; that
 the attached copy of advertisement, being a Legal Ad in the
 matter of

Notice of Meetings

In the Twentieth Judicial Circuit Court was published in said
 newspaper editions dated on by publication on the newspaper's
 website, if authorized, on:

06/10/2023

Affiant further says that the said News-Press is a paper of
 general circulation daily in Lee County and published at Fort
 Myers, in said Lee County, Florida, and that the said newspaper
 has heretofore been continuously published in said Lee County,
 Florida each day and has been entered as periodicals matter at
 the post office in Fort Myers, in said Lee County, Florida, for a
 period of one year next preceding the first publication of the
 attached copy of advertisement; and affiant further says that
 he or she has never paid nor promised any person, firm or
 corporation any discount, rebate, commission or refund for the
 purpose of securing this advertisement for publication in the
 said newspaper.

Sworn to and Subscribed before me this 13th of June 2023, by
 legal clerk who is personally known to me.

Affiant

NOTICE OF PUBLIC INFORMATION MEETING

DATE: Tuesday, June 20, 2023

TIME: 11:00 AM

ADDRESS: Cracker Shack Cafe, 18672 SR 31, Alva, FL 33917

In accordance with the North Olga Planning Community Requirements of the Lee
 County Land Development Code, the Applicant, Neal Communities of Southwest
 Florida, Inc. will be presenting information to the public on the following request:

The request is to rezone the 788+/- acre Property from Agriculture (AG-2) to Resi-
 dential Planned Development (RPD) to allow for a maximum of 1,099 single-family
 dwelling units, private on-site recreational uses, and supportive infrastructure. The
 maximum building height is 35 feet. The site will connect to centralized water and
 sewer services. A companion Comprehensive Plan Amendment will include the sub-
 ject Property in the Lee County Future Water Services Area Map (Map 4A) and the
 Future Sewer Service Area Map (Map 4B).

The purpose of the meeting is to educate community members and nearby land-
 owners about the proposed development and to address any questions.
