Area in Each Future Land Use Category: Intensive Development: 20.23 ac and Wetlands: 7.14 ac

Existing Land Use: Vacant/undeveloped

6. Calculation of maximum allowable development under current Lee Plan:

Residential Units/Density: 14 du/ac

22 du/ac with bonus density

Commercial Intensity: 10,000 sf/ac

based on average calculations

Industrial Intensity: none

7. Calculation of maximum allowable development with proposed amendments:

Residential Units/Density: 14 du/ac

22 du/ac with bonus density

Commercial Intensity: 10,000 sf/ac

based on average calculations

Industrial Intensity: none

Public Facilities Impacts

NOTE: The applicant must calculate public facilities impacts based on the maximum development.

1. Traffic Circulation Analysis: The analysis is intended to determine the effect of the land use change on the Financially Feasible Highway Plan Map 3A (20-year plus horizon) and on the Capital Improvements Element (5-year horizon). Toward that end, an applicant must submit a Traffic Impact Statement (TIS) consistent with Lee County Administrative Code (AC)13-17.

- a. Proposals affecting less than 10 acres, where development parameters are contained within the Traffic Analysis Zone (TAZ) or zones planned population and employment, or where there is no change in allowable density/intensity, may be eligible for a TIS requirement waiver as outlined in the Lee County TIS Guidelines and AC-13-17. Identification of allowable density/intensity in order to determine socio-economic data for affected TAZ(s) must be coordinated with Lee County Planning staff. Otherwise a calculation of trip generation is required consistent with AC-13-17 and the Lee County TIS Guidelines to determine required components of analysis for:
 - i. Total peak hour trip generation less than 50 total trip ends – trip generation.
 - ii. Total peak hour trip generation from 50 to 300 total trip ends – trip generation, trip distribution and trip assignment (manual or Florida Standard Urban Transportation Modeling Structure (FSUTMS) analysis consistent with AC-13-17 and TIS Guidelines), short-term (5 year) and long-range (to current Lee Plan horizon year) segment LOS analysis of the nearest or abutting arterial and major collector segment(s) identified in the Transportation Inventory based on the trip generation and roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is recommended prior to submittal of the application to discuss use of FSUTMS, any changes to analysis requirements, or a combined CPA and Zoning TIS short term analysis.
 - iii. Total peak hour trip generation is over 300 total trip ends - trip generation, mode split, trip distribution and trip assignment (manual or FSUTMS analysis consistent with AC-13-17 and TIS Guidelines), short-term (five-year) and long-range (to current Lee Plan horizon year) segment LOS analysis of arterial and collector segments listed in the Transportation Inventory. LOS analysis will include any portion of roadway segments within an area three miles offset from the boundary of the application legal description metes and bounds survey. LOS analysis will also include any additional segments in the study area based on the roadway segment LOS analysis criteria in AC-13-17. A methodology meeting is required prior to submittal of the application.
- b. Map amendment - greater than 10 acres -Allowable density/intensity will be determined by Lee County Planning staff.

2. Provide an existing and future conditions analysis for the following (see Policy 95.1.3):

- a. Sanitary Sewer
- b. Potable Water
- c. Surface Water/Drainage Basins
- d. Parks, Recreation, and Open Space
- e. Public Schools

Analysis for each of the above should include (but is not limited to) the following (see the Lee County Concurrency Management Report):

- a. Franchise Area, Basin, or District in which the property is located
- b. Current LOS, and LOS standard of facilities serving the site
- c. Projected 2030 LOS under existing designation
- d. Projected 2030 LOS under proposed designation
- e. Existing infrastructure, if any, in the immediate area with the potential to serve the subject property
- f. Improvements/expansions currently programmed in 5 year CIP, 6-10 year CIP, and long range improvements
- g. Provide a letter of service availability from the appropriate utility for sanitary sewer and potable water

In addition to the above analysis, provide the following for potable water:

- a. Determine the availability of water supply within the franchise area using the current water use allocation (Consumptive Use Permit) based on the annual average daily withdrawal rate.
- b. Include the current demand and the projected demand under the existing designation, and the projected demand under the proposed designation.
- c. Include the availability of treatment facilities and transmission lines for reclaimed water for irrigation.
- d. Include any other water conservation measures that will be applied to the site (see Goal 54).

3. Provide a letter from the appropriate agency determining the adequacy/provision of existing/proposed support facilities, including:

- a. Fire protection with adequate response times
- b. Emergency medical service (EMS) provisions
- c. Law enforcement
- d. Solid Waste
- e. Mass Transit
- f. Schools

In reference to above, the applicant must supply the responding agency with the information from application items 5, 6, and 7 for their evaluation. This application must include the applicant's correspondence/request to the responding agency.

Environmental Impacts

Provide an overall analysis of the character of the subject property and surrounding properties, and assess the site's suitability for the proposed change based upon the following:

1. A map of the Plant Communities as defined by the Florida Land Use Cover and Classification system (FLUCCS).
2. A map and description of the soils found on the property (identify the source of the information).
3. A topographic map depicting the property boundaries and 100-year flood prone areas indicated (as identified by FEMA).
4. A map delineating the property boundaries on the most recent Flood Insurance Rate Map.
5. A map delineating wetlands, aquifer recharge areas, and rare & unique uplands.
6. A table of plant communities by FLUCCS with the potential to contain species (plant and animal) listed by federal, state or local agencies as endangered, threatened or species of special concern. The table must include the listed species by FLUCCS and the species status (same as FLUCCS map).

Impacts on Historic Resources

List all historic resources (including structure, districts, and/or archaeologically sensitive areas) and provide an analysis of the proposed change's impact on these resources. The following should be included with the analysis:

1. A map of any historic districts and/or sites listed on the Florida Master Site File which are located on the subject property or adjacent properties.
2. A map showing the subject property location on the archaeological sensitivity map for Lee County.

Internal Consistency with the Lee Plan

1. Discuss how the proposal affects established Lee County population projections, Lee Plan Table 1(b) and the total population capacity of the Lee Plan Future Land Use Map.
2. List all goals and objectives of the Lee Plan that are affected by the proposed amendment or that affect the subject property. This analysis should include an evaluation of all relevant policies under each goal and objective.
3. Describe how the proposal affects adjacent local governments and their comprehensive plans.

State Policy Plan and Regional Policy Plan

List State Policy Plan and Regional Policy Plan goals, strategies and actions, and policies which are relevant to this plan amendment.

Justify the proposed amendment based upon sound planning principles

Support all conclusions made in this justification with adequate data and analysis.

Planning Communities/Community Plan Area Requirements

If located within a planning community/community plan area, provide a meeting summary document of the required public informational session [Lee Plan Goal 17].

Sketch and Legal Description

The certified legal description(s) and certified sketch of the description for the property subject to the requested change. A metes and bounds legal description must be submitted specifically describing the entire perimeter boundary of the property with accurate bearings and distances for every line. The sketch must be tied to the state plane coordinate system for the Florida West Zone (North America Datum of 1983/1990 Adjustment) with two coordinates, one coordinate being the point of beginning and the other an opposing corner. If the subject property contains wetlands or the proposed amendment includes more than one land use category a metes and bounds legal description, as described above, must be submitted in addition to the perimeter boundary of the property for each wetland or future land use category.

SUBMITTAL REQUIREMENTS

Clearly label all submittal documents with the exhibit name indicated below.

For each map submitted, the applicant will be required to submit a 24"x36" version and 8.5"x11" reduced map for inclusion in public hearing packets.

Proposed Amendment – Exhibit M11

The Applicant, Horizon Tamiami, LLC, is requesting to amend Lee Plan Map 1-C, the Mixed Use Overlay Map. The project site is 27.36 acres, located in Section 2, Township 44 South, Range 24 East, north of Brooks Road and east of N. Tamiami Trail. The majority of the subject property has a future land use classification of Intensive Development. The remainder of the property has a future land use classification of Wetlands. The South Florida Water Management District (SFWMD) issued a formal wetland and OSW determination on May 2, 2023. Of the 27.36 acres, 7.20 acres is identified as Wetlands and another 0.29 acres is identified as OSW in the form of man-made ditches. As a result, the Applicant is requesting to add ± 19.87 -acres into the Mixed Use Overlay.

Lee Plan Policy 11.2.3 states that “At the discretion of the Board of County Commissioners, the Mixed Use Overlay boundary may be extended up to one-quarter mile to accommodate developments partially within a Mixed Use Overlay or immediately adjacent to a Mixed Use Overlay. The subject property is adjacent to the Mixed Use Overlay to the south of Brooks Road.

Lee Plan Analysis

Exhibit M12

Lee Plan Analysis:

***Policy 1.1.2:** The Intensive Development future land use category is located along major arterial roads. By virtue of their location, the County's current development patterns, and the available and potential levels of public services, areas with this designation are suited to accommodate high densities and intensities. Mixed use developments of high-density residential, commercial, limited light industrial, and office uses are encouraged to be developed as described in Objective 11.1, where appropriate. The standard density range is from eight dwelling units per acre (8 du/acre) to fourteen dwelling units per acre (14 du/acre), with a maximum total density of twenty-two dwelling units per acre (22 du/acre). The maximum total density may be increased to thirty dwelling units per acre (30 du/acre) utilizing Greater Pine Island Transfer of Development Units.*

The majority of the subject property (±20.2 acres) has a future land use classification of Intensive Development. The Intensive Development future land use category is described as having the highest levels of public services and being best suited to accommodate high densities and intensities with mixed used developments encouraged where appropriate. The Applicant is requesting to add the 20.2-acres to Lee Plan Map 1-C, the Mixed-Use Overlay Map. The property is located at the intersection of N. Tamiami Trail, a state-maintained arterial roadway, and Brooks Road, a county-maintained local road. Urban services are available and adequate to serve future development at this location. This is consistent with **Lee Plan Policy 1.1.2.**

***Goal 2: Growth Management.** To provide for an economically feasible plan which coordinates the location and timing of new development with the provision of infrastructure by government agencies, private utilities, and other sources.*

***Policy 2.1.1:** Most residential, commercial, industrial, and public development is expected to occur within the designated future urban areas on the Future Land Use Map through the assignment of very low densities to the non-urban categories.*

***Policy 2.1.2:** New land uses will be permitted only if they are consistent with the Future Land Use Map and the goals, objectives, policies, and standards of this plan.*

***Objective 2.2: Development Timing.** Direct new growth to those portions of the future urban areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created.*

Policy 2.2.2: *The Future Land Use Map indicates the uses and density ranges that will ultimately be permitted on a given parcel. However, it is not a guarantee that such densities or uses are immediately appropriate, as the map provides for the County's growth beyond the 2045 planning horizon. During the rezoning process the Board of County Commissioners will balance the overall standards and policies of this plan with three additional factors:*

- 1. Whether a given proposal would further burden already overwhelmed existing and committed public facilities such that the approval should be delayed until the facilities can be constructed; and*
- 2. Whether a given proposal is for land so far beyond existing development or adequate public facilities that approval should be delayed in an effort to encourage compact and efficient growth patterns; and*
- 3. Whether a given proposal would result in unreasonable development expectations that may not be achievable because of acreage limitations contained in the Acreage Allocation Table (see Table 1(b)).*

In all cases where rezoning is approved, such approval does not constitute a determination that the minimum acceptable levels of service (see Policy 95.1.3) will be available concurrent with the impacts of the proposed development. Such a determination must be made prior to the issuance of additional development permits, based on conditions which exist at that time, as required by Lee County's concurrency management system.

Urban services are available and adequate to service future development of the property.

|-----------------|--|
| Fire: | North Fort Myers Fire District, Station 2, located at 1280 Barrett Rd., is approximately 3.1 miles away. |
| Police: | Lee County Sheriff's Office, located at 121 Pondella Rd, is approximately 1.3 miles away. |
| EMS: | North Fort Myers Fire District, Station 2, located at 1280 Barrett Rd., is approximately 3.1 miles away. |
| Solid Waste: | The property is within Lee County Solid Waste Franchise Area 5 and is served by Waste Pro. |
| Public Transit: | Lee Tran Route 590 services this segment of N Cleveland Avenue and there is an existing bus stop located approximately .03 miles north on N Cleveland Avenue from the northwest corner of the property and another existing bus stop on the corner of N Tamiami Trl and Brooks Road. |
| Public Schools: | The property is within the Lee County School District West Zone, District Area 5. |
| Public Parks: | The property is approximately 2.3 miles east from Judd Community Park and 2.4 miles south from North Fort Myers Community Park. |

The subject property is one of the few remaining large blocks of land along N. Tamiami Trail, just north of the Edison Bridge. This area of the County has a future land use classification of Intensive Development with Central Urban future land use north and east of the subject property and Wetlands future land use near Powell Creek. The site has frontage on N. Tamiami Trail, a state-maintained arterial roadway, and Brooks Road, a county-maintained local road. Potable water,

sanitary sewer and other urban services are adequate and available to serve the site. **Lee Plan Table 1(b) Year 2045 Allocations** identifies 376 acres available in the Intensive Development future land use category for residential use and 1,121 acres for commercial development in the North Fort Myers planning community. Development of this property promotes compact and contiguous growth patterns in future urban areas where public facilities exist and are adequate to serve future developments. Adding the 20.2 acre subject property to the Lee Plan Map 1-C is consistent with **Lee Plan Goal 2, Objective 2.2: Development Timing, and Policies 2.1.1, 2.1.2, and 2.2.2.**

Standard 4.1.1: Water.

2. If the proposed development lies within the boundaries of a water utility's certificated or franchised service area, or Lee County Utilities' future potable water service area (see Map 4- A), then the development must be connected to that utility.

Standard 4.1.2: Sewer.

1. Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development that generates more than 5,000 gallons of sewage per day, must connect to a sanitary sewer system.

2. If the proposed development exceeds the thresholds listed above and lies within the boundaries of a sewer utility's certificated or franchised service area, or Lee County Utilities' future sanitary sewer service area (see Map 4-B), and that utility has sufficient capacity to provide minimum service to the development, then the development must connect to that sewer utility if there is existing infrastructure adequate to accept the effluents of the development within 1/4 mile from any part of the development.

Lee County Utilities (LCU) provided a Letter of Availability confirming that potable water lines are in operation adjacent to the subject property and that LCU presently has sufficient capacity to provide potable water service as estimated. In addition, Florida Governmental Utility Authority (FGUA) provided a Letter of Availability confirming that sanitary sewer lines are in operation adjacent to the subject property and that FGUA presently has sufficient capacity to provide sanitary sewer service as estimated. This is consistent with **Lee Plan Standards 4.1.1: Water and 4.1.2: Sewer.**

Goal 5: Residential Land Uses. *To accommodate the projected population of Lee County in the year 2045 in appropriate locations, guided by the Future Land Use Map, and in attractive and safe neighborhoods with a variety of price ranges and housing types.*

Policy 5.1.5: *Protect existing and future residential areas from any encroachment of uses that are potentially destructive to the character and integrity of the residential environment. Requests for conventional rezonings will be denied in the event that the buffers provided in Chapter 10 of the Land Development Code are not adequate to address potentially incompatible uses in a satisfactory manner. If such uses are proposed in the form of a planned development or special exception and generally applicable development regulations are deemed to be inadequate, conditions will be attached to minimize or eliminate the potential impacts or, where no adequate conditions can be devised, the application will be denied altogether. The Land Development Code will continue to require appropriate buffers for new developments.*

The subject property is located along N. Tamiami Trail, also known as Business 41, a state-maintained arterial roadway. Lee Tran Route 590 serves this segment of N. Tamiami Trail and there are two bus stops along the property frontage. In addition, there's an existing pedestrian facility along N. Tamiami Trail and a future planned bikeway facility. Nearby parks include Judd Community Park and North Fort Myers Community Park.

The subject property already has a mix of commercial and residential zoning districts – CG, C-1, and RS-1. Existing and proposed uses surrounding the subject property include both commercial and residential. Brooks Road right-of-way is located south of the property. The properties south of Brooks Road are located within the Mixed-Use Overlay and consist of multi-family development, retail, and vacant land. The zoning district is C-2. Powell Creek separates the subject property from the single-family lots to the east. The zoning district is RS-1 and TFC-2. There's a small commercial business with C-1 zoning along the north property line. In addition, there's a multifamily development with TFC-2 zoning and a single-family home with RS-1 zoning to the north of the subject property. North Tamiami Trail right-of-way is located along the west property line. Mostly commercial uses are located on the west side of the right-of-way, including several motels, cocktail bar, single-family lot, and vacant land with C-1 and AG-2 zoning. Amending Lee Plan Map 1-C to add the 20.2-acre property to the Mixed-Use Overlay is consistent with **Lee Plan Goal 5 and Policy 5.1.5.**

Goal 6: Commercial Land Uses: *To permit orderly and well-planned commercial development at appropriate locations within the county.*

Policy 6.1.4: *Commercial development will be approved only when compatible with adjacent existing and proposed land uses and with existing and programmed public services and facilities.*

The subject property has a future land use classification of Intensive Development which is an area where mixed-use developments of high-density residential, commercial, limited light industrial, and office uses are encouraged. The subject property is currently zoned CG, C-1, and RS-1, which is a mix of commercial and residential zoning districts. The surrounding roadway network and other urban services, including potable water and sanitary sewer, are available and adequate to serve a proposed mixed-use development at this location. This is consistent with **Lee Plan Goal 6 and Policy 6.1.4.**

Goal 11: Mixed Use. *Encourage mixed use developments that integrate multiple land uses, public amenities and utilities at various scales and intensities in order to provide: diversified land development; a variety of housing types; greater connectivity between housing, workplaces, retail businesses, and other destinations; reduced trip lengths; more transportation options; and pedestrian and bicycle-friendly environments.*

Objective 11.1: Mixed Use Development. *Allow and encourage mixed use development within certain future land use categories and at appropriate locations where sufficient infrastructure exists to support development.*

Policy 11.1.1: *Developments located within the Intensive Development, Central Urban, or Urban Community future land use categories that have existing connectivity or can demonstrate that connectivity may be created to adjacent neighborhoods are strongly encouraged to be developed with two or more of the following uses: residential, commercial (including office), and light industrial (including research and development use).*

The subject property is currently zoned CG, C-1, and RS-1. The Applicant intends to develop the property as a true mixed-use development with commercial development along the N. Tamiami Trail frontage and multi-family residential along Brooks Road and the center of the site, while preserving the wetlands. The Intensive Development future land use category encourages mixed-use development. The existing roadway infrastructure, Lee Tran facilities, pedestrian and bicycle facilities, and urban services are available and adequate to support a mixed-use development at this location. This is consistent with **Lee Plan Goal 11, Objective 11.1 and Policy 11.1.1.**

Objective 11.2: Mixed Use Overlay. *The County will maintain an Overlay in the future land use map series identifying locations appropriate for mixed use located in proximity to: public transit routes; education facilities; recreation opportunities; and, existing residential, shopping and employment centers. Mixed Use, Traditional Neighborhood, and Transit Oriented development patterns are encouraged and preferred within the Mixed Use Overlay.*

Policy 11.2.1: *The Mixed Use Overlay identifies locations where mixed use development will have a positive impact on transportation facilities through increased transit service, internal trip capture, and reduced travel distance. Requests to expand the Mixed Use Overlay will be evaluated based on all of the following criteria:*

- 1. Located within the extended pedestrian shed of established transit routes; and,*
- 2. Distinct pedestrian and automobile connections to adjacent uses can be achieved without accessing arterial roadways; and,*
- 3. Located within the Intensive Development, Central Urban, or Urban Community future land use categories;*
- 4. Availability of adequate public facilities and infrastructure; and*
- 5. Will not intrude into predominately single-family residential neighborhoods.*

Policy 11.2.2: *Development in the Mixed Use Overlay should accommodate connections to adjacent uses.*

Policy 11.2.3: *At the discretion of the Board of County Commissioners, the Mixed Use Overlay boundary may be extended up to one-quarter mile to accommodate developments located partially within a Mixed Use Overlay or immediately adjacent to a Mixed Use Overlay.*

Policy 11.2.4: *Use of conventional zoning districts will be encouraged within the Mixed Use Overlay in order to promote continued redevelopment.*

Policy 11.2.5: *Lee County will maintain land development regulations for properties within the Mixed Use Overlay that allow for urban forms of development and a variety of uses.*

Policy 11.2.7: *Development, redevelopment, and infill development located within the Mixed Use Overlay may use the area of non-residential uses in their density calculations.*

Lee Plan Policy 11.2.3 permits the Board of County Commissioners to extend the Mixed Use Overlay boundary to accommodate developments located partially within or immediately adjacent to a Mixed Use Overlay. As noted, the properties south of Brooks Road are located within the Mixed Use Overlay, Lee Plan Map 1-C, only separated by the 60-foot right-of-way. The subject property is currently zoned CG, C-1 and RS-1, which permits both commercial and residential uses. The property is located in the Intensive Development future land use category along an

arterial roadway and urban services are available and adequate to serve future development of the property.

Lee Tran Route 590 serves the site, the Lee County School District provided a letter confirming nearby schools had available capacity for a mixed-use development that included multi-family residential development, and employment and shopping centers are located proximate to the site. The property has frontage along a designated corridor overlay (N. Tamiami Trail, also known as Business 41). As previously stated, the site is one of the last remaining large undeveloped properties along this section of N. Tamiami Trail in the Intensive Development future land use category. The site can be viewed as an infill development since the majority of the land on all four sides is currently developed with a mix of residential and commercial uses. Brooks Road is located along the south property line and Powell Creek acts as a physical barrier separating the subject property from the existing single-family lots to the east. Adding the subject property to Lee Plan Map 1-C is consistent with **Lee Plan Objective 11.2 and Policies 11.2.1, 11.2.2, 11.2.3, 11.2.4, 11.2.5, and 11.2.7.**

***Objective 17.3: Public Input.** To provide opportunities for public input as part of the comprehensive plan and land development code amendment process.*

***Policy 17.3.2:** One public information meeting is required for privately-initiated applications that propose a text change within a community plan or revises a map designation within a community plan area boundary. The meeting must be conducted before the application can be found complete.*

***Policy 17.3.3:** Public information meetings required pursuant to the provisions of this subelement must be held within the established community plan area boundary that is affected by the amendment.⁷*

***Policy 17.3.4:** For required public information meetings, the applicant must provide the following:*

- Adequate meeting space to accommodate projected attendance and security measures (as needed).*
- Advance notice of the meeting in a publication of local distribution provided at least ten calendar days prior to the meeting, unless otherwise specified herein.*
- At the meeting, a general overview of the text or map amendment and effect thereof.*
- After the meeting, a meeting summary document submitted to the County that contains the following information: the date, time, and location of the meeting; a list of attendees; a summary of the concerns or issues that were raised at the meeting; and the applicant's response to any issues that were raised.*

A Public Information Meeting was held on April 2, 2024 at the North Fort Myers Recreation Center. The meeting was advertised in the News-Press ten days in advance and two signs were posted on the property advertising the meeting, as required by the North Fort Myers Community Planning Panel. A meeting summary with sign-in sheets is included with this application. This is consistent with **Lee Plan Objective 17.3 and Policies 17.3.2, 17.3.3, and 17.3.4.**

***Goal 30: North Fort Myers Community Plan.** Improve the livability and economic vitality in the North Fort Myers Community Plan area by: promoting compact, mixed use development in the form of town and neighborhood centers; attracting appropriate investment to revitalize older*

neighborhoods and commercial corridors; stabilizing and enhancing, existing neighborhoods; and preserving natural resources.

Policy 30.1.3: *Encourage a diversity of housing types in the North Fort Myers Community Plan area by supporting mixed use projects, with residential above or adjacent to retail and service uses, within the Mixed Use Overlay.*

Objective 30.2: Land Use Centers and Corridors. *To encourage revitalization of designated Town Center overlay districts, road corridor overlay districts and redevelopment areas.*

Policy 30.2.3: *Maintain provisions allowing for greater minimum, maximum base, and maximum total densities and building heights in the Mixed Use Overlay.*

Policy 30.2.6: *Development within the Town and Neighborhood Centers and the Corridor Overlay Districts may use the development standards allowed within the Mixed Use Overlay.*

The goal of the North Fort Myers community plan is to improve the livability and economic vitality in the area by promoting compact, mixed use development; attracting appropriate investment to revitalize older neighborhoods and commercial corridors; stabilizing and enhancing existing neighborhoods; and preserving natural resources. The subject property is located in the North Fort Myers planning community area along a designated corridor overlay (N. Tamiami Trail, also known as Business 41). As previously stated, the site is one of the last remaining large undeveloped properties along this section of N. Tamiami Trail in the Intensive Development future land use category. The site can be viewed as an infill development since the majority of the land on all four sides is currently developed with a mix of residential and commercial uses.

The subject property is located adjacent to lands already within the Mixed-Use Overlay per Lee Plan Map 1-C, to the south of Brooks Road. The site is currently zoned CG, C-1, and RS-1 – a mix of commercial and residential zoning districts. Adding the 20.2 acres to the Mixed-Use Overlay meets the intent of the North Fort Myers Community Plan to promote compact, mixed-use development, revitalizing commercial corridors, and allowing for more urban forms of design in the design regulations for developments in the Mixed Use Overlay. This is consistent with **Lee Plan Goal 30, Objective 30.2, and Policies 30.1.3, 30.2.3, and 30.2.6.**

In summary, the subject property is consistent with the Goals, Objectives and Policies of the Lee Plan for properties in the Mixed Use Overlay.

Certificate of Authorization # 29086

Environmental Impacts Analysis – Exhibit M13

The Applicant owns a ±27.4 acre property located at the northeast intersection of N. Tamiami Trail and Brooks Road. The property owner had a formal wetland determination completed by SFWMD, which determined that 7.2 acres of the property is classified as wetlands. The area classified as wetlands abuts Powell Creek. The remainder of the property is uplands and has a future land use classification of Intensive Development. The Applicant is requesting to add the remaining 20.2 acres to Lee Plan Map 1-C.

The attached Soils Map indicates that the majority (89.1%) of the subject property is underlain with Immokalee sand – Urban land complex soil, #36. The hydric soils, Kesson fine sand, tidal (#24) and Isles fine sand (#39) is located within the wetland area.

The attached FLUCFCS Map identifies Brazilian Pepper, Pine/Oak/Cabbage/Palm with various levels of exotic vegetation, and Melaleuca throughout the 20.2 acres.

Amending Lee Plan Map 1-C to add the 20.2 acres to the Mixed-Use Overlay will not have any impacts to the environmental conditions of the property.

A copy of the Formal Wetland Determination Letter, Soils Map, and FLUCFCS Map is included with this Analysis.

Petition for Formal Determination of Wetlands and Surface Waters
Permit No. 36-108765-P
Application No. 230421-38378
Lee County

Your petition for a formal determination of wetlands and other surface waters is approved. This action is taken based on Chapter 373, Part IV of Florida Statutes (F.S.) and the rules in Chapters 62-330 and 62-340, Florida Administrative Code (F.A.C.). Please read this entire agency action thoroughly and understand its contents.

This action is subject to:

- Not receiving a filed request for a Chapter 120, F.S., administrative hearing.
- All referenced Exhibits.

Should you object to these conditions, please refer to the attached "Notice of Rights" which addresses the procedures to be followed if you desire a public hearing or other review of the proposed agency action. Please contact this office if you have any questions concerning this matter. If we do not hear from you in accordance to the "Notice of Rights", we will assume that you concur with the District's action.

CERTIFICATE OF SERVICE

I hereby certify that this Formal Wetland Determination and Notice of Rights have been mailed or electronically submitted to the addressee (and the persons listed on the attached distribution list) on May 1, 2023 in accordance with Section 120.60(3), F.S. Notice was also electronically posted on this date through a link on the home page of the District's website (www.sfwmd.gov/ePermitting).

Sincerely,

Project Summary

This application is for a formal determination of the landward extent of wetlands and other surface waters (OSW), pursuant to Rule 62-330.201, Florida Administrative Code (F.A.C.), for a 27.36-acre property known as North Fort Myers Parcel. The methodology used for the determination is consistent with Chapter 62-340, F.A.C.

Project Site Description

The 27.36-acre property is located in Section 2, Township 44 South, Range 24 East, Lee County, Florida. More specifically, the property lies north of Brooks Road, east of U.S. 41 (North Tamiami Trail), in North Fort Myers, Florida. A Location Map is attached as Exhibit No. 1.0. The property is surrounded by low-density single family homes to the north; Powell Creek to the east; commercial and retail development and single family homes to the south; and U.S.41 (North Tamiami Trail) to the west. The property is an undeveloped parcel of land that consists of upland and wetland forests adjacent to Powell Creek. A detailed description of the on-site wetlands is below. An aerial photograph depicting the inspection boundary is attached as Exhibit No. 2.0.

Formal Determination of Wetlands and Other Surface Waters

On April 21, 2023, the District received a request for a formal determination of the boundary of wetlands and OSW on a 27.36-acre property known as North Fort Myers Parcel. The landward extent of wetlands and OSW was established by Andy Woodruff with CHW Consultants and verified by Certified Wetland Evaluator (CWE) Matt Brosious on August 18, 2022.

The wetlands and OSW were first delineated under Application No. 220708-35104, which was submitted July 8, 2022. The application was withdrawn; however, the wetland and OSW boundaries have not changed.

Wetlands and other surface waters (OSW), as defined by Subsection 373.019(27), F.S. and Chapter 62-340, F.A.C., were identified on the property. Wetlands on the property were delineated

using the methods established in Chapter 62-340, F.A.C.; more specifically, the wetlands were delineated using the wetland definition and the B and D tests. Wetlands delineated on the property totaled 7.20 acres and OSW totaled 0.29 acres. A wetland and OSW survey is attached as Exhibit No. 3.0. Wetland data forms and representative photographs of the wetlands and upland areas can be found in the permit file. Wetland delineation data forms were filled out by District staff on August 18, 2022.

Wetland and OSW Description:

The wetlands identified on the property totaled 7.20 acres (Exhibit No. 3.0). The wetland canopy generally consisted of laurel oak (*Quercus laurifolia*), cabbage palm (*Sabal palmetto*), slash pine (*Pinus elliottii*), and melaleuca (*Melaleuca quinquenervia*). The sub-canopy was similar to the canopy except for myrsine (*Myrsine guianensis*) and Brazilian pepper (*Schinus terebinthifolius*). The ground cover was mostly open, but did contain swamp fern (*Blechnum serrulatum*). The wetlands were delineated using the B and D tests.

The OSW identified on the property totaled 0.29 acres (Exhibit No. 3.0). The OSW are man-made ditches. The Mean High Water line of Powell Creek forms the eastern property boundary, but is not within the property boundary.

Based on the National Resource Conservation Service (NRCS) data, the property contains three (3) historically mapped hydric soils. The mapped hydric soils on the property are Kesson Fine Sand, Tidal (Map Unit 24), Isles Fine Sand, Frequently Ponded (Map Unit 39) and Brynwood Fine Sand, Wet Urban Land Complex (Map Unit 64). A soils map is attached as Exhibit No. 4.0. Soil pit data is included within the wetland delineation data forms, which were filled out during the August 18, 2022 inspection.

Hydrologic Indicators observed during the delineation included hydric soil indicator Muck Presence (A8), which is a stand-alone D test indicator. Hydrologic indicator data is included within the wetland delineation data forms, which were filled out during the August 18, 2022 inspection.

This Formal Determination of Wetlands and Other Surface Waters is the District's determination of the landward extent (boundaries) of wetlands and OSW within the property based on the documentation submitted by the Petitioner and field application of Chapter 62-340, F.A.C. This action does not authorize any construction activities or constitute conceptual approval of any anticipated projects or activities in wetlands or other surface waters. It does not in any way establish boundaries of sovereign submerged lands, high water elevations or other elevations/boundaries.

Pursuant to Subsection 373.421 (4), F.S., the Governing Board may revoke the Formal Wetland Determination upon a finding that the Petitioner has submitted inaccurate information to the District.

The Formal Wetland Determination shall be binding for the stated duration provided physical conditions on the property do not change so as to alter the boundaries of wetlands and other surface waters during that period.

NOTICE OF RIGHTS

As required by Chapter 120, Florida Statutes, the following provides notice of the opportunities which may be available for administrative hearing pursuant to Sections 120.569 and 120.57, Florida Statutes, or judicial review pursuant to Section 120.68, Florida Statutes, when the substantial interests of a party are determined by an agency. Please note that this Notice of Rights is not intended to provide legal advice. Some of the legal proceedings detailed below may not be applicable or appropriate for your situation. You may wish to consult an attorney regarding your legal rights.

RIGHT TO REQUEST ADMINISTRATIVE HEARING

A person whose substantial interests are or may be affected by the South Florida Water Management District's (District) action has the right to request an administrative hearing on that action pursuant to Sections 120.569 and 120.57, Florida Statutes. Persons seeking a hearing on a District decision which affects or may affect their substantial interests shall file a petition for hearing in accordance with the filing instructions set forth herein within 21 days of receipt of written notice of the decision unless one of the following shorter time periods apply: (1) within 14 days of the notice of consolidated intent to grant or deny concurrently reviewed applications for environmental resource permits and use of sovereign submerged lands pursuant to Section 373.427, Florida Statutes; or (2) within 14 days of service of an Administrative Order pursuant to Section 373.119(1), Florida Statutes. "Receipt of written notice of agency decision" means receipt of written notice through mail, electronic mail, posting, or publication that the District has taken or intends to take final agency action. Any person who receives written notice of a District decision and fails to file a written request for hearing within the timeframe described above waives the right to request a hearing on that decision.

If the District takes final agency action that materially differs from the noticed intended agency decision, persons who may be substantially affected shall, unless otherwise provided by law, have an additional point of entry pursuant to Rule 28-106.111, Florida Administrative Code.

Any person to whom an emergency order is directed pursuant to Section 373.119(2), Florida Statutes, shall comply therewith immediately, but on petition to the board shall be afforded a hearing as soon as possible.

A person may file a request for an extension of time for filing a petition. The District may grant the request for good cause. Requests for extension of time must be filed with the District prior to the deadline for filing a petition for hearing. Such requests for extension shall contain a certificate that the moving party has consulted with all other parties concerning the extension and whether the District and any other parties agree to or oppose the extension. A timely request for an extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

FILING INSTRUCTIONS

A petition for administrative hearing must be filed with the Office of the District Clerk. Filings with the Office of the District Clerk may be made by mail, hand-delivery, or e-mail. Filings by facsimile will not be accepted. A petition for administrative hearing or other document is deemed filed upon receipt during normal business hours by the Office of the District Clerk at the District's headquarters in West Palm Beach, Florida. The District's normal business hours are 8:00 a.m. – 5:00 p.m., excluding weekends and District holidays. Any document received by the Office of the District Clerk after 5:00 p.m. shall be deemed filed as of 8:00 a.m. on the next regular business day.

Additional filing instructions are as follows:

- Filings by mail must be addressed to the Office of the District Clerk, 3301 Gun Club Road, West Palm Beach, Florida 33406.
- Filings by hand-delivery must be delivered to the Office of the District Clerk. Delivery of a petition to the District's security desk does not constitute filing. It will be necessary to request that the District's security officer contact the Office of the District Clerk. An employee of the District's Clerk's office will receive and process the petition.
- Filings by e-mail must be transmitted to the Office of the District Clerk at clerk@sfwmd.gov. The filing date for a document transmitted by electronic mail shall be the date the Office of the District Clerk receives the complete document.

INITIATION OF ADMINISTRATIVE HEARING

Pursuant to Sections 120.54(5)(b)4. and 120.569(2)(c), Florida Statutes, and Rules 28-106.201 and 28-106.301, Florida Administrative Code, initiation of an administrative hearing shall be made by written petition to the District in legible form and on 8 1/2 by 11 inch white paper. All petitions shall contain:

1. Identification of the action being contested, including the permit number, application number, District file number or any other District identification number, if known.
2. The name, address, any email address, any facsimile number, and telephone number of the petitioner, petitioner's attorney or qualified representative, if any.
3. An explanation of how the petitioner's substantial interests will be affected by the agency determination.
4. A statement of when and how the petitioner received notice of the District's decision.
5. A statement of all disputed issues of material fact. If there are none, the petition must so indicate.
6. A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the District's proposed action.
7. A statement of the specific rules or statutes the petitioner contends require reversal or modification of the District's proposed action.
8. If disputed issues of material fact exist, the statement must also include an explanation of how the alleged facts relate to the specific rules or statutes.
9. A statement of the relief sought by the petitioner, stating precisely the action the petitioner wishes the District to take with respect to the District's proposed action.

MEDIATION

The procedures for pursuing mediation are set forth in Section 120.573, Florida Statutes, and Rules 28-106.111 and 28-106.401–.405, Florida Administrative Code. The District is not proposing mediation for this agency action under Section 120.573, Florida Statutes, at this time.

RIGHT TO SEEK JUDICIAL REVIEW

Pursuant to Section 120.68, Florida Statutes, and in accordance with Florida Rule of Appellate Procedure 9.110, a party who is adversely affected by final District action may seek judicial review of the District's final decision by filing a notice of appeal with the Office of the District Clerk in accordance with the filing instructions set forth herein within 30 days of rendition of the order to be reviewed, and by filing a copy of the notice with the appropriate district court of appeals via the Florida Courts E-Filing Portal.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:20,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

1. PURPOSE

OBJECTIVE

This report has been prepared in accordance with Lee County Department of Community Development and Lee County TIS Guidelines criteria for projects seeking a Comprehensive Plan Amendment. This report compares the anticipated traffic generation of the currently approved development versus the proposed development in order to determine any adverse roadway impacts associated with the addition of **Horizon Tamiami** to the Mixed-Use Overlay.

The subject parcel per the most recent boundary survey is 27.37 acres, with 20.23 acres of uplands included in this request (the remaining 7.14 acres are preserved wetlands).

2. SITE DESCRIPTION

SITE LOCATION

Horizon Tamiami is a 20.23-acre project located east of North Tamiami Trail (S.R. 739) north of Brooks Road in Section 2, Township 44 South, Range 24 East, Lee County, Florida (see Exhibit 1). The existing zoning for the property allows construction of ninety-three (93) single-family residential dwelling units (based on fourteen dwelling units per acre on 6.66 acres) and 135,700 square feet of commercial uses (based on 10,000 square feet per acre on 13.57 acres). The proposed Mixed-Use Overlay designation would allow the property to be developed into 202,300 square feet of commercial uses (based on 10,000 square feet per acre on 20.23 acres).

3. OBSERVATIONS

3.1 TRIP GENERATION CALCULATIONS

Vehicular trips generated by the allowable development were calculated by using the equations provided by the Institute of Transportation Engineers, 11th Edition of the Trip Generation Manual, Land Use Code 210 (Single-Family Detached Housing) and Land Use Code 821 (Shopping Plaza 40-150k – Supermarket-Yes) using the average rates or the fitted curve equations shown in the tables.

Table 3. Raw Trip Generation – Total Allowable Development

Table 1 + Table 2:

- A. Daily Average Vehicle Trip Ends, Weekday
 $944 + 11,856 = 12,800$ (6,400 entering; 6,400 exiting)
- B. A.M. Peak Hour Average Vehicle Trip Ends (Adjacent Street)
 $70 + 479 = 549$ (315 entering, 234 exiting)
- C. P.M. Peak Hour Average Vehicle Trip Ends (Adjacent Street)
 $93 + 1,160 = 1,253$ (616 entering, 637 exiting)

Source: TDM, 2023

Vehicular trips generated by the proposed development were calculated by using the equations provided by the Institute of Transportation Engineers, 11th Edition of the Trip Generation Manual, Land Use Code 820 (Shopping Center > 150k) using the fitted curve equations shown in the tables.

Table 4. Raw Trip Generation – Proposed Shopping Center (LUC 820)

202,300 Square Feet of Gross Floor Area:

- A. Daily Average Vehicle Trip Ends, Weekday
 $T = 26.11 (202,300) + 5,863.73 = 11,146$ (5,573 entering; 5,573 exiting)
- B. A.M. Peak Hour Average Vehicle Trip Ends (Adjacent Street)
 $T = 0.59 (202,300) + 133.55 = 253$ (157 entering, 96 exiting)
- C. P.M. Peak Hour Average Vehicle Trip Ends (Adjacent Street)
 $\ln(T) = 0.72 \ln(202,300) + 3.02 = 937$ (450 entering, 487 exiting)

Source: TDM, 2024

3.2 CONCLUSION

When comparing Table 4 to Table 3 above, the proposed amendment will actually result in a decrease in vehicle trips (1,654 total daily trips; 296 A.M. peak trips; and 316 P.M. peak trips) therefore, the surrounding roadway network will continue to operate at acceptable Levels of Service both with and without the trips generated by the proposed development. No roadway capacity improvements will be warranted as a result of the traffic expected to be generated by the proposed development.

Horizon Tamiami Comprehensive Plan Amendment

Level of Service Analyses for Potable Water, Sanitary Sewer, Surface Water Drainage, Parks, Recreation and Open Space, and Public Schools Exhibit M17

Potable Water and Sanitary Sewer

As a proposed development abutting an established mixed-use district, both potable water and sanitary sewer service the development. Per F.A.C. 64E-6.008 Table 1, the expected demand for the allowable ninety-three (93) single family residential dwelling units (assume three bedrooms and less than 2,250 square feet average) is 300 GPD per dwelling unit while the expected demand for the allowable 135,700 square feet of commercial uses is 0.1 GPD per square foot. Therefore, the allowable development can expect an average potable water and sanitary sewer demand of $(93 \times 300) + (135,700 \times 0.1) = 27,900 \text{ GPD} + 13,570 \text{ GPD} = 41,470 \text{ GPD}$.

Per F.A.C. 64E-6.008 Table 1, the expected demand for the proposed 202,300 square feet of commercial uses is 0.1 GPD per square foot. Therefore, the proposed development can expect an average potable water and sanitary sewer demand of $(202,300 \times 0.1) = 20,230 \text{ GPD}$.

Daily Peak Demand = Average Demand $\times 1.3 = 20,230 \text{ GPD} \times 1.3 = 26,299 \text{ GPD}$

Hourly Peak Demand = Average Demand $\times 4 = 20,230 \text{ GPD} \times 4 = 80,920 \text{ GPD} = 3,372 \text{ GPH} = 56.2 \text{ GPM}$

The proposed development is within the Lee County Utilities (LCU) potable water franchise area. LCU owns and maintains existing potable water lines along the parcel's frontages with North Tamiami Trail and with Brooks Road. LCU's North Lee County Water Treatment Plant will provide potable water service to the proposed development.

The proposed development is within the Florida Governmental Utility Authority (FGUA) franchise area. FGUA owns and maintains existing wastewater lines passing through the property and then along the parcel's frontage with Brooks Road. FGUA's Del Prado Wastewater Treatment Plant will provide wastewater service to the proposed development.

According to the 2022 Lee County Concurrency Report, LCU's interconnected water distribution system is permitted with a capacity of 54.3 million gallon per day (MGPD) and is projected to operate at 36.6 MGPD in 2026. Therefore, there is sufficient capacity within the existing water distribution system to serve the 20,230 GPD increase in demand to LCU's system from the project at build-out.

According to the 2022 Lee County Concurrency Report, FGCU's wastewater distribution system is permitted with a capacity of 7.0 million gallon per day (MGPD) and is projected to operate at 8.3 MGPD in 2026.

Surface Water Drainage

Water quantity, water quality, and attenuation will be provided by inter-connected dry detention areas and underground storage chambers prior to discharge to the preserved wetland and eventually Powell Creek. Stormwater runoff from the impervious areas will be directed to the dry detention areas and underground storage chambers via catch basins and culverts. The parcel will require a SFWMD Environmental Resource Permit by virtue of its size (greater than ten acres) and the area of proposed impervious surfaces (greater than two acres).

The property in its existing state has no defined drainage pattern and appears to sheetflow to the existing wetland without benefit of any water quality treatment or attenuation. The property is almost entirely pervious, with most rainfall likely infiltrating the soil prior to discharge to the existing wetland and eventually Powell Creek.

Post-development stormwater discharge from the property will be to the existing wetland and eventually Powell Creek to mimic pre-development drainage patterns. There is no noticeable drainage flow from adjacent properties entering the property other than the FDOT drainage ditch conveying storm water runoff from North Tamiami Trail to the existing wetland. This FDOT drainage ditch will not be impacted by the proposed development except for two (2) culverted crossings.

The proposed dry detention areas, underground storage chambers, culverts, catch basins, and control structures will be owned and maintained by the property owners in perpetuity.

The property is in an AE Flood Zone. Finished floor elevations of the proposed buildings on the property will be elevated to at least 1' above the flood elevation.

Parks, Recreation, and Open Space

Per the 2022 Public Facilities Level of Service and Concurrency Report, the Required Capacity for Parks and Recreation is 5,424 acres of regional parks and 301 acres of community parks. The Available Capacity is currently at 7,066 acres of regional parks and 743 acres of community parks. The subject property is located near North Shore Park, located on US 41 south of the property, and near North Fort Myers Community Park, located on North Tamiami Trail northwest of the property. The allowable residences would have diminished available regional park capacity by 1.4 acres (per the formula in the cited Report) and community parks by 0.2 acres (per the formula in the cited Report). The proposed commercial development doesn't diminish the available capacity of Parks.

Public Schools

The proposed commercial development is in the West Zone per the School Benefit District Map according to the 2022 Lee County Concurrency Report. A total of fifteen (15) school-aged children would be expected to utilize the public school system from the allowable development. The addition of this proposed commercial development to the Mixed Use Overlay will have no impacts to the overall capacity of Lee County Schools.

To whom this may concern:

The subject properties are located within Lee County Utilities Future Service Area as depicted on Maps 4A of the Lee County Comprehensive Land Use Plan. Potable water lines are in operation adjacent to the property mentioned above. However, in order to provide service to the subject parcels, developer funded system enhancements such as line extensions may be required.

Your firm has indicated that this project will consist of 468 multi-family residential units and two commercial units with an estimated flow demand of approximately 96,600 gallons per day. Lee County Utilities presently has sufficient capacity to provide potable water service as estimated above.

Availability of potable water service is contingent upon final acceptance of the infrastructure to be constructed by the developer. Upon completion and final acceptance of this project, potable water service will be provided through our North Lee County Water Treatment Plant.

Sanitary sewer service will be provided by Florida Governmental Utility Authority. The Lee County Utilities' Design Manual requires the project engineer to perform hydraulic computations to determine what impact this project will have on our existing system.

There are no reuse mains in the vicinity of these parcels.

Prior to beginning design work on this project, please meet with LCU Staff to determine the best point of connection and discuss requirements for construction.

This letter should not be construed as a commitment to serve, but only as to the availability of service. Lee County Utilities will commit to serve only upon receipt of all appropriate

Further, this letter of availability of potable water service is to be utilized for Zoning only. Individual letters of availability will be required for the purpose of obtaining building permits.

RE: Wastewater and Reclaim Water Availability – LOA ID#: 23-040 NFMD

Dear Ms. Gervais:

The FGUA has received your Application for Service Availability, and upon review, it has been determined that wastewater disposal service is generally available to the address provided. The attached site map indicates the approximate size and location of the existing mains in the area. Please be advised that main extensions, connection to the reclaimed water system, and other system enhancements funded by the project sponsor may be required.

The application indicated that the proposed project consists of a 5-story (four stories over parking) multi-family residential development, consisting of approximately 468 dwelling units and amenity areas, with an estimated wastewater disposal demand of 96,600 GPD. Currently, FGUA facilities are able to accommodate this demand. During the design process, if existing conditions warrant, a hydraulic analysis may need to be performed by the project engineer to evaluate the impacts the proposed project may have on the existing wastewater system.

This letter should not be construed as a commitment to serve, but only as a statement of the availability of service and is effective for twelve (12) months from the date of issue. The FGUA commitment to serve will be made once a Utility Infrastructure Conveyance and Service Agreement (CSA) is fully executed. To move this project forward, contact Development Services via email at devservices@fgua.com to receive a plan submittal package and schedule the pre-application meeting if required.

Pre-Application Meeting Information

Purpose:

The pre-application meeting is designed to be an informative discussion, specifically geared toward assisting the applicant (owner/developer/engineer) understand the FGUA's policies and development process. The pre-application meeting may be required prior to the formal submission and review of any utility construction plans by the Development Division.

It is our goal to assist you through the FGUA development process as smoothly as possible, and for your development to be a success. This pre-application meeting, if required, will provide you with the details you need to make this a successful and stress-free process.

What to Expect:

If the meeting is required, you will be provided with a variety of both general and specific information regarding the FGUA's development process. This will include, but not be limited to staff contact information, plan review guidelines, current fees, conveyance, and closeout procedures.

Who Should Attend:

It is encouraged that a representative from the property owner, developer, and engineer, at a minimum, attend this meeting. Representatives of the FGUA's Development Division, including the Development Technician, Development Coordinator, Real Property Coordinator and utility system Area Manager will also be in attendance as required.

In an effort to accommodate the potential long-distance commute between the FGUA's Operations Office in Longwood, Florida and the FGUA system areas, these meetings will take place via Microsoft Teams.

Meeting Requests:

Please e-mail Development Services to request a meeting at devservices@fgua.com.

Please have your FGUA Letter of Availability (LOA) Number (included on the first page of your previously issued Letter of Availability) ready when you email to schedule this meeting.

You will also be required to provide a preliminary site utility plan for staff review before the meeting is scheduled.

Ms. Martin,

The Lee County Sheriff's Office has reviewed your service availability request for 20.32 acres of land at the northeast corner of N. Tamiami Trail and Brooks Road in North Fort Myers.

The property requires a Comprehensive Plan Amendment to add it to the adjacent Mixed-Use Overlay Map. Based upon the information you provided, the property at 1460, 1470, 1450 and 1456 N. Tamiami Trail could potentially have 448 multi-family dwelling units at maximum density, with 7.14 acres of wetlands on site.

This proposed change in designation will not impact our Agency's ability to provide law enforcement services to this community. Services will be provided from our Precinct 1 offices in North Fort Myers. At the time of application for a Development Order or building permit, we request that the applicant provide a Crime Prevention Through Environmental Design (CPTED) report done by the applicant and given to the Lee County Sheriff's Office for review and comment.

Please contact Community Response Unit Crime Prevention Practitioner Heather Turco at (239) 477-1863 with any questions regarding the CPTED study.

Hi Veronica,

Solid Waste has reviewed your preliminary plans for development at the NE corner of N. Tamiami Trail and Brooks Road. We have no opposition to the proposed plans of 448 multifamily dwelling units, as plans have been made to account for future growth through the use of our Waste to Resource Recovery Facility and collection will be accomplished using our franchised hauling contractors. Please advise if you need any additional information.

Hi Justin,

I hope you can help me again. I'm submitting a Comprehensive Plan Amendment application to Lee County Community Development to add 20.32 acres of land at the NE corner of N. Tamiami Trail and Brooks Road into the Mixed-Use Overlay. This property is already zoned to permit single-family,

commercial, and other mixed-uses; however, it's technically not located within the Lee Plan Mixed Use Overlay Map. We're required to obtain a Letter of Review/Adequacy from all local support facilities stating that the change to mixed-use overlay won't impact the Lee Tran's ability to provide services for solid waste and recyclables to the future residents and commercial shoppers of this property. At maximum density, the property could potentially have 448 multi-family dwelling units. I've attached a copy of the area location map and map of the mixed use overlay.

The address of the property is 1460, 1470, 1456 and 1450 N Tamiami Trail, N Fort Myers. We're preserving the 7.14 acres of wetlands on-site. Please let me know if you need additional information or have any questions.

Thank you for your time.

LeeTran has received the request regarding the subject property in Fort Myers. After reviewing the site and comparing the location with our existing and planned route locations according to the LeeTran 2021 Transit Development Plan (TDP), the following is determined:

Based on the LeeTran 2021 Transit Development Plan (TDP) evolved network, also reflects within the Lee County Comprehensive Map 3-C section 10-441, the route along Metro Pkwy will not exist therefore, no routes within a one-quarter mile of the proposed development in the near future. Therefore, no improvements are required by the developer.

Good morning,

The School District of Lee County has the following comments on this project:

This project is located in Elementary School Proximity Zone "C"

- The District's Student Generation Rate (SGR) for this area for multi-family development is 0.066 at the elementary level.
- The proposed 448 residential units could be expected to produce up to 29.57 elementary school students.
- Elementary School Proximity Zone "C" is currently operating at approximately 90 % of capacity with about 0 open seats.
- This proposed project will not negatively impact school capacity in the enrollment zone.

This project is located in Middle School Proximity Zone "CC"

- The District's Student Generation Rate (SGR) for this area for multi-family development is 0.043 at the middle school level.
- The proposed 448 residential units could be expected to produce up to 14.78 middle school students.
- Middle School Proximity Zone "CC" is currently operating at approximately 90% of capacity with about 17 open seats.
- This proposed project will not negatively impact school capacity in the enrollment zone.

This project is located in High School Enrollment Zone West, Sub-Zone 1

- The District's Student Generation Rate (SGR) for this area for multi-family development is 0.38 at the high school level.
- The proposed 448 residential units could be expected to produce up to 13.89 high school students.
- West Zone 1 is currently operating at approximately 105% of capacity with about 400 open seats.
- This proposed project will not negatively impact school capacity in the enrollment zone.

Thank you.

Justification of Proposed Amendment – Exhibit M20

The Applicant, Horizon Tamiami, LLC, is requesting to amend Lee Plan Map 1-C, Mixed Use Overlay Map. The Applicant owns property totaling 27.36 acres, located in Section 2, Township 44 South, Range 24 East, north of Brooks Road and east of N. Tamiami Trail. The South Florida Water Management District (SFWMD) issued a formal Wetland and OSW determination on May 2, 2023. Of the 27.36 acres, 7.20 acres is identified as Wetlands. As a result, the Applicant is requesting to add ±20.2-acres into the Mixed Use Overlay.

Lee Plan Policy 11.2.3 states that “At the discretion of the Board of County Commissioners, the Mixed Use Overlay boundary may be extended up to one-quarter mile to accommodate developments partially within a Mixed Use Overlay or immediately adjacent to a Mixed Use Overlay. The subject property is adjacent to the Mixed Use Overlay to the south and west.

The 20.2 acres has a future land use classification of Intensive Development. The Lee Plan states that mixed use developments of high-density residential, commercial, limited light industrial and office uses are encouraged to be developed, where appropriate. The property is located along N. Tamiami Trail, a state-maintained arterial roadway, and Brooks Road, a county-maintained local road. LCU and FGUA have provided letters of availability confirming that potable water and sanitary sewer lines are available and adequate to service a future high density/intensity mixed-use development, and other urban services such as fire/EMS, police protection, solid waste, public transit, schools, and public parks and rec are available and proximate to the site.

The property is currently zoned CG, C-1, and RS-1, which permits commercial and residential uses. A future mixed-use development would be compatible with existing and proposed uses in the area since most are already commercial or multi-family residential. The only single-family subdivision is located east of Powell Creek. The existing wetlands and Powell Creek act as a physical barrier to effectively buffer and shield the single-family lots from a future mixed-use development on the subject property.

The goal of the North Fort Myers community plan is to improve the livability and economic vitality in the area by promoting compact, mixed use development; attracting appropriate investment to revitalize older neighborhoods and commercial corridors; stabilizing and enhancing existing neighborhoods; and preserving natural resources. The subject property is located in the North Fort Myers planning community area along a designated corridor overlay (N. Tamiami Trail, also known as Business 41). The site is one of the last remaining large undeveloped properties along this section of N. Tamiami Trail in the Intensive Development future land use category. The site can be viewed as an infill development since the majority of the land on all four sides is currently developed with a mix of residential and commercial uses.

The subject property is located adjacent to lands already within the Mixed-Use Overlay per Lee Plan Map 1-C, to the south of Brooks Road. The site is currently zoned CG, C-1, and RS-1 – a mix of commercial and residential zoning districts. Adding the 20.2 acres to the Mixed-Use Overlay meets the intent of the North Fort Myers Community Plan to promote compact, mixed-use development, revitalizing commercial corridors, and allowing for more urban forms of design in the design regulations for developments in the Mixed Use Overlay.

HORIZON TAMiami
PLANNING COMMUNITY AREA REQUIREMENTS - PIM SUMMARY
EXHIBIT M21

A Public Information Meeting was held at the North Fort Myers Recreation Center on April 2, 2024 at 6:00 p.m. The Notice of Meeting was published in the News-Press and meeting signs were posted on the property, as required by the North Fort Myers Community Planning Panel. A copy of the News-Press Ad, Meeting Agenda, and Sign-in Sheets are included with this summary.

TDM Consulting presented a Comprehensive Plan Amendment to add 20.23 acres of the subject property to Lee Plan Map 1-C, the Mixed Use Overlay, and a Conventional Rezoning application from RS-1, C-1, and CG to C-1 for a consistent zoning district. A copy of the presentation is included with this Summary.

Questions and Comments:

1. Who is the property owner/developer?
Horizon Tamiami, LLC. TDM has worked with this developer on projects in the City of Fort Myers and Cape Coral and this is their first project in Lee County unincorporated.
2. Doesn't the Mixed-Use Overlay automatically guarantee bonus density?
No. The property has a FLU classification of Intensive Development which permits a base density of 14 du/ac with a bonus density of 22 du/ac.
3. Will this be an affordable housing project – low income?
No, the developer's typical product is aimed at renters at 80-120% of the median income.
4. Why are you rezoning if it already permits mixed-use?
One of the current zoning districts is RS-1, which does not permit multi-family use. Instead of rezoning just the RS-1 portion of the property, we decided to rezone the entire property for a consistent zoning district.
5. Why didn't you rezone to a planned development?
We don't anticipate needing any deviations or variances from the LDC. And although we've gone through several iterations of the site plan, it's still a work in progress. The comprehensive plan amendment is a long process, so we wanted to start that before submitting a site plan.
6. We don't believe the roads will support the density.

The property has a FLU classification of Intensive Development and is already zoned to permit commercial, multi-family, and single-family uses. The traffic engineer is required to analyze the development at maximum density and intensity. The traffic associated with the comprehensive plan amendment will not degrade the level of service of the surrounding roadway network beyond what is already permitted by right.

7. Why isn't there a site plan for us to look at?

The comprehensive plan amendment application is quite complex, but it doesn't require a site plan. Neither does a conventional rezoning application. It would be premature to present a site plan at this stage when we're only in the planning and zoning stages of this development. We'll be back to present at time of DO permitting to show the site plans, landscaping plans, and architectural elevations.

8. Won't you need an FDOT permit?

Yes, the applicant is proposing 2 entrances to the property from N. Tamiami Trail, so FDOT permitting will be required at time of DO permitting.

9. You mentioned a SFWMD permit. Is that a new one?

The previous property owner, Joe Bonora with Catalyst obtained a District Permit. To my knowledge the permit is still current, but will need to be amended with the new site plan.

The North Fort Myers Community Planning Panel would have preferred to see a Site Plan, but realize it's not required at this stage. Overall, they were supportive of the proposed Comp Plan Amendment and Rezoning. The public didn't have much to add. Their biggest concern is traffic.

Horizon Tamiami PIM Presentation

Summary

- Horizon Tamiami, LLC
- Previously presented by Joe Bonora with Catalyst Asset Management
- comprehensive plan amendment and conventional rezoning application
- 27-acre property located at the NE corner of N Tamiami Trl and Brooks Rd (1450, 1456, 1460 and 1470 N Tamiami Trail)
- 2 drainage areas owned by FDOT
- FLU – Intensive Development
- Mixed-use development with commercial development along N Tamiami Trail and MFR along Brooks Rd and the interior.
- We've already had a wetland jurisdictional determination from SFWMD and we're preserving approx. 7 ac of wetlands.

Comprehensive Plan Amendment

- Site is 27.35-acres
- 20.23 ac is uplands and 7.14 ac wetlands
- Requesting to amend the Mixed-Use Overlay Map, Lee Plan Map 1-C, by adding the 20.23 upland acres into the Mixed-Use Overlay.
- Intensive Development FLU permits 14 du/ac with bonus density up to 22 du/ac and an average commercial intensity of 10,000 sf/ac
- Public facilities: potable water, sanitary sewer, fire/EMS & police protection, parks, rec & open space and schools are all available and adequate to serve the proposed development at maximum density/intensity.
- The traffic analysis also demonstrated that the comprehensive plan amendment would not degrade the level of service of the surrounding roadways.
- FDOT permitting will be required at time of development order submittal.
- An Environmental Report

Conventional Rezoning

- Current zoning: RS-1 (SFR), C-1 (Mixed-Use) and CG (General Commercial).
- Requesting to rezone to C-1 for a true Mixed-Use development.
- Intensive Development FLU permits 14 du/ac with bonus density up to 22 du/ac and an average commercial intensity of 10,000 sf/ac (448 dwelling units)
- A Site Plan isn't required for conventional rezoning applications; however, existing site conditions kind of dictate the layout in this instance. Primary entrance to residential development on Brooks Road with a secondary entrance on N. Tamiami. Primary entrance to commercial component from N Tamiami.
- Code required buffers, landscaping, open space, drainage, and parking will be provided at time of development order permitting. The applicant isn't anticipating requesting any deviations or variances at this time.
