COMMUNITY DEVELOPMENT

I. REQUEST

Corkscrew Alico, LLC ("Applicant") is requesting a Large-Scale Comprehensive Plan Map Amendment to amend Lee Plan maps as follows for a 78.69+/- acres (77.94+/- acres less 0.75 acre right-of-way) property located at 20351 Corkscrew Road in unincorporated Lee County, Florida, approximately five miles east of Corkscrew Road and Alico Road intersection.

- Map 1-D – Special Treatment Areas Tier 1 – to add the Property to Tier 1,
- Map 2-D – Southeast DR/GR Residential Overlay – to add the Property to the Environmental Enhancement and Preservation Communities Overlay (EEPCO), and
- Maps 4-A and 4-B to designate the Property in the Lee County Utilities (LCU) services area to connect to centralized potable water and sanitary sewer services.

Additionally, the Applicant is proposing a text amendment to Lee Plan Policy 33.2.4 to change the location criteria for acceptance into the EEPCO.

The CPA will be accompanied by a request to rezone from AG-2 to RPD to allow for 78 single-family dwelling units with supporting amenities. A companion RPD has been submitted as case DCI2024-00030.

II. PROPERTY HISTORY

The Property is located north of Corkscrew Road and roughly five miles east of Alico and I75 interchange. The Property is located within the Southeast Lee County Community Area and the Environmental Enhancement and Preservation Communities Overlay. The Property is currently undeveloped on vacant land. Access is provided from Corkscrew Road. However, there is a drainage and stormwater management easement located on the southern portion of the property abutting the right-of-way.

The map amendment will be accompanied by a requested RPD Rezone petition and Bonus Density application. The proposal will allow for a development of with a maximum of 78 single-family dwelling units.

II. EXISTING CONDITIONS

The site has a long history of agricultural exemption and is mostly cleared having served as pasture lands. The 78.69+/- acres (77.94+/- acres and 0.75 acres in the right-of-way) parcel has 23.55± acres of wetlands that will be enhanced and preserved and occupy the northern third of the site, and a total of and 43.75± acres of wetland and upland preserves, or just over 55% of the site. The wetland area is under review by the South Florida Water Management District (SFWMD) Environmental Resource Permit (ERP) number No. 241222-48705. At that point the wetlands and upland preserves will be placed in a conservation easement according to EEPCO policies.

The property is in the Density Reduction/Groundwater Resource (DR/GR) and Wetlands Future Land Use Category. The site is within the Southeast Lee County Planning District, part of the Imperial River Watershed and in both the primary and secondary Panther Habitat Zone. It is not within the Coastal High Hazard Area (CHHA) or an Evacuation Zone nor in any special areas or overlay districts.

Table 1: Inventory of Surrounding Lands

	FUTURE LAND USE	ZONING	EXISTING LAND USE
NORTH	Density Reduction/ Groundwater Resource (DR/GR) & Wetlands	MEPD	Troyer Brothers mine property conservation area
SOUTH	DR/GR & Wetlands	AG-2	Corkscrew Road ROW, Vacant Land
EAST	DR/GR & Wetlands	AG-2 and MEPD	Troyer Brothers mine property conservation areas, Vacant Ag Land
WEST	DR/GR & Wetlands	AG-2	Lee County 20/20 Imperial Marsh Preserve, Vacant

The full range of uses in the surrounding area is in the table above. To the west it abuts Lee County 20/20 lands and to the east are conservation areas of the Troyer Brothers MEPD and vacant agriculturally zoned and used land. To the north is also Troyer Brothers MEPD zoned property with its southern boundary set aside for conservation and restoration lands, which connect the wetlands on the subject property and separates the applicant's residential neighborhood from the mining and extraction approved site plan. Finally, to the south is the Corkscrew Road right-of-way and across the road are large single-family lots and vacant land.

The site has access to significant urban levels services including fire, EMS, police, parks, public schools, and solid waste. On the other hand, it is not served by mass transit and the Corkscrew Road improvements do not extent to the is property so pedestrian sidewalks and shared use paths are not fronting the property, although the long terms plans will include widening of the roadway and bikeway and pedestrian walkways. Also, the property is not served by public water or sewer services and is not within the Lee County Utilities (LCU) service areas. However, LCU extensions of service on Corkscrew Road are planned to reach the property and the development will be required to connect to public services. The applicant will be requesting to amend Maps 4-A and 4-B to designate the Property in the Lee County Utilities (LCU) services area to connect to centralized potable water and sanitary sewer services.

III. PROPOSED DEVELOPMENT

The proposed Residential Planned Development (RPD) will consist of 78 single-family home sites, an amenity center, roads, a surface water management system, and 43.75 acres of wetlands, pine flatwoods and cypress that will be enhanced, planted and restored and placed in a conservation easement. The community is designed with a main entrance leading to a cul-de-sac. Access is proposed centrally to the property onto Corkscrew Road with a 100-foot buffer on Corkscrew Road, again in fulfillment of the EEPCO standards. The property will have a minimum open space a minimum of 60% of the property and conservation areas at a minimum of 55% of the property.

The conservation areas will serve a larger environmental context by preserving a large cypress head wetland that spans beyond the property boundaries to the north, east and west. To the west are Lee County 20/20 Imperial Marsh Preserve and to the east Troyer Brothers land that has conservation areas that abut the subject property. As required by the EEPCO criteria, per the Indigenous Habitat Management Plan (IHMP), the subject property will preserve a minimum of 55% of the property in a conservation easement as part of the plan to meet the intent of the EEPCO to improve, preserve, and restore regional surface and groundwater resources.

The goal of the IHMP is to enhance the existing uplands and wetlands via exotic control. Exotics (as defined by the Florida Exotic Pest Plant Council's List of Invasive Species, Categories 1 and 2), which are present within the proposed preserves, will be removed to re-establish functional wetland and upland ecosystems. The wetland preservation areas consist of cypress and forested habitats that contain high densities of exotics, primarily Melaleuca. The site development plan was designed to preserve the wetlands and higher quality uplands onsite. Additionally, 11.10± acres of pasture will be restored to native upland habitat via exotic vegetation treatment and installation of supplemental planting.

The Property has the potential to play a significant role in the area's hydrology and wildlife corridor. The project is located adjacent to the Imperial Marsh Preserve, a county owned preserve, which abuts the Corkscrew Mitigation Bank to the east. To the west of the project is the Troyer Brothers MPED established preserve land and wildlife corridor which connects to the Imperial Marsh Preserve to the north.

By restoring and enhancing both upland and wetland habitats, this project will create a critical link that supports regional water hydrology and establishes a managed wildlife corridor, ensuring seamless ecological connectivity across the area. ***The subject property is a "whole in the doughnut" if you will between these preserve areas and, even though this is a small piece of property regionally, it is a key parcel to establish connection between the abutting preserve areas in perpetuity.***

<u>KEY ENVIRONMENTAL FEATURES OF THE PROJECT DESIGN</u>

- **Open Space:** The MCP establishes a minimum of 60% open space including 55% in a conservation easement.
- **Conservation Easement:** The revised IHMP establish a minimum of 55% of the property in a conservation easement. This includes 43.75 acres of wetlands, pine flatwoods and cypress that will be enhanced, planted and restored. The proposed restoration plan includes safeguards for the establishment and survivability of restoration plantings, including the use of larger tree and shrub material compared to other large-scale restoration projects in the DRGR; conducting as-built surveys prior to planting to ensure that appropriate grades have been achieved; obtaining soil borings in upland restoration areas to ensure that the

underlying soil types contain the sandy or mixed sandy soils necessary for the establishment of upland habitat types; defined success criteria that require a minimum 80 percent survivability of restoration plantings after five years.

- **Wetland Enhancement and Planting:** Per the revised IHMP the project will retain 100% of the on-site wetlands, or 23.55 acres. This includes 12.80 acres of existing indigenous wetlands that will be enhanced and reestablished and 10.75 acres of non-indigenous wetlands that will be mechanically enhanced and planted.
- **Upland Enhancement:** Per the revised IHMP approximately 8.10 acres of uplands will be enhanced and preserved or placed in a conservation easement. This consists of upland pine flatwoods that contain moderate densities of exotics.
- **Restoration:** Per the revised IHMP approximately 11.10 acres of uplands that were previously cleared and converted to agriculture will be restored and placed within the conservation easement or preserved.
- **Initial Exotic Vegetation Treatment:** Per the revised IHMP all exotic and nuisance species (defined per LDC Sec. 10-420(f) and Category I and II species on the Florida Exotic Pest Plant Council's List of Invasive Species) within the upland and wetland preservation areas will be treated.
- **Increased Contiguity of Preserve Areas:** The revised IHMP results in a larger, more contiguous preserve area with a connection to abutting Lee County 20/20 lands than what naturally exists or would ever exist without approval of this project.
- **Enhanced Lake Management Plan (ELMP):** The plan follows best practices for erosion control and bank stabilization; deep lake management; and fertilizer and pesticide use to reduce nitrogen and phosphorous loading to the stormwater management system.
- **Enhanced Water Quality Monitoring:** A more robust surface water and groundwater quality monitoring program will be implemented in accordance with the updated Enhanced Lake Management Plan (ELMP), ensuring ongoing environmental oversight and compliance.
- **Improved Stormwater Management:** The project has a long history of agricultural operations, which have resulted in disconnected surface water flow paths and isolated sub-basins. The attenuation of stormwater will improve the hydrologically impacted project area through enhanced recharge of groundwater to the Water Table Aquifer. After treatment, stormwater will be directed to the restoration areas to help improve the onsite hydrology. Additional polishing of the runoff water quality and nutrient uptake will occur in the large restoration areas further reducing downstream nutrient loading.
- **Minimal Irrigated Area:** The total irrigated area has been reduced to 12.76 acres of turf grass and landscaping, or only 16.2% of the total project.
- **Reduced Irrigation Demand:** The proposed project will include two stormwater management lakes that will intersect permeable limestone of the Water Table Aquifer. Irrigation will utilize an installed drip irrigation system to reduce overall irrigation requirements by at least 30% compared to traditional spray methods and adhere to Lee County and SFWMD conservation measures. All existing permitted wells for the Troyer Brother's Farm project identified located on the Property will be plugged and abandoned. The proposed irrigation system will consist of stormwater harvesting from the stormwater lake management system with up to 100% of these withdrawals re-supplied by groundwater. The proposed source of groundwater to supplement lake withdrawals will be fresh groundwater from a backup standby well installed in the Surficial Aquifer System and/or Sandstone Aquifer underlying the site as permitted with the SFWMD.

- **Sustainable Water Sources:** Irrigation will continue to utilize a combination of surface water (detained stormwater) and groundwater, which is expected to reduce overall groundwater withdrawals.
- **Increased Groundwater Recharge Potential:** Integrated modeling indicates that the redesigned stormwater management system will increase groundwater recharge to the underlying Water Table Aquifer.
- **Water Use Permit Reduction:** By removing the acreage for future possible irrigation the projected water use will meet the criteria for a small Individual Water Use Permit issued by the SFWMD and will not exceed annual average allocation of 100,000 gallons per day (gpd). The agricultural operations, known as the Troyer Brother's Farm project, maintained a water use permit (WUP No. 36-01461-W) for the irrigation through the SFWMD since the early 1990's. The permit currently includes the allocations for the irrigation of 1,181-acres of potatoes or about 3.13 million gallons per day (MGD) on an annual average basis and 8.2 MGD on a maximum monthly basis from the Sandstone Aquifer. The permit includes an additional 14.83 million gallons (MG) allocated for freeze protection from the Water Table Aquifer.
- **Hydrological Improvements:** In addition to the conservation and preserve areas, the project proposes collection, treatment, and conveyance of stormwater within the project's water management system including littoral planting areas, the use of water treatment best management practices (BMPs) of fertilizers, herbicide, and fungicide applications, and centralized control over the application of irrigation water.

<u>BUFFERS</u>

- NORTH: No buffer is required between the preserve areas of the MEPD (Z-18-022) and the subject property preserve area proposed on the northernmost third of the site.

- EAST: No buffer is required between the preserve areas of the MEPD (Z-18-022) and the subject property preserve area proposed on the northernmost third of the site. The remainder of the site does not require a buffer as it abuts agricultural land zoned AG-2.

- SOUTH: A 100-foot buffer along Corkscrew Road per the enhanced buffer requirement per Lee Plan Policy 33.2.4:2.a.6.

- WEST: Lee County 20/20 Imperial Marsh Preserve lands lie to the west. No buffer is required between the Imperial Marsh Preserve and the subject property preserve area proposed on the northernmost third of the site. The remainder of the site, where single-family is proposed, requires a 30-foot Type "F" buffer which is proposed on the MCP.

The revised Indigenous Habitat Management Plan (IHMP) has been reviewed by staff and addresses these issues although no buffers are required in the northern portion where preserve / wetlands and restoration are proposed. Regionally, the Indigenous Preserve Restoration Map, as shown in response to #20, is buffer free to provide connection east, west, and north to the abutting proposed preserve areas as part of abutting zoning resolutions (east and north) and to the Lee County 20/20 Imperial Marsh Preserve lands to the west.

IV. PUBLIC INFRASTRUCTURE

The Property has access to the necessary utilities to service the project and all urban services are adequate to serve the proposed development.

- Lee County Utilities (LCU) is the franchise provider to the subject property. In a letter received June 27, 2024, from LCU they state, "The subject property is not located within Lee County Utilities Future Service Area as depicted on Maps 4A and 4B of the Lee County Comprehensive Land Use Plan. Potable water and sanitary sewer lines are not in place but are proposed." The companion CPA case requested the extension of the LCU franchise area to this property and that connection to the future lines be made with LCU capacities determined at the time of local development order. The utility expansion will loop to infrastructure at the SR 82 intersection to serve portions of the Kingston and FFD settlement agreement developments. The project will be required to be able to secure connection to public facilities prior to receiving an approved building permit.
- The site offers direct access to Corkscrew Road, a county maintained arterial roadway. The site has a singular vehicular ingress and egress point for residents. A secondary ingress and egress point will be provided to be used for emergency personnel only. The roadway has an acceptable level of service to support the requested development according to the Traffic Impact Statement by TR Transportation.
- The site is within the Estero Fire District, Lee County Sheriff's District, Solid Waste District Area. Letters of capacity availability have been received from fire, Lee County Sheriff, Lee County Emergency Medical Service (EMS) and Lee County Solid Waste.
- The subject property is 10 miles to the east of Pinewoods Elementary School, 13 miles to the east of Three Oaks Middle School, and 12.5 miles to the east of Estero High School. A letter of capacity availability has been received from Lee County School District.
- The site is not affected by the Corkscrew Road improvements as the improvements are to the west of the Alico Intersection and the subject property is to the east of said intersection.

VI. LEE PLAN COMPLIANCE

The following is an analysis of the Comprehensive Plan Amendment, and the companion Residential Planned Development (RPD), meets consistency with goals, objectives and policies of the Lee County Comprehensive Plan (Lee Plan).

Other policies within the Lee Plan are analyzed in later sections showing compliance with the following:

- 1.4.5, 1.6.10, 2.1, 2.2, 2.2.1, 4.1.1, 4.1.2, 5.1.1. 5.1.2, 5.1.3, 5.1.5, 5.1.10, 33.1.2, 33.1.3, 33.1.4, 33.2.4, 54.1.6, 61.3.6, 60.1.1, 60.1.3, 60.4.2, 60.4.3, 63.1.1, 63.2.1, 123.2.10, 125.1.2, 125.1.3, 124.1, 125.1.4, 126.1.1, and 126.1.4.

POLICY 1.4.5: The Density Reduction/Groundwater Resource (DR/GR) future land use category includes upland areas that provide substantial recharge to aquifers most suitable for future wellfield development. These areas also are the most favorable locations for physical withdrawal of water from those aquifers. Only minimal public facilities exist or are programmed.

1. **New land uses in these areas that require rezoning or a development order must demonstrate compatibility with maintaining surface and groundwater levels at their historic levels utilizing hydrologic modeling, the incorporation of increased storage capacity, and inclusion of green infrastructure. The modeling must also show that no adverse impacts will result to properties located upstream, downstream, as well as adjacent to the site. Offsite mitigation may be utilized, and may be required, to demonstrate this compatibility. Evidence as to historic levels must be submitted as part of the rezoning application and updated, if necessary, as part of the mining development order application.**

   See the hydrologic restoration plan and stormwater management plan. More advanced hydrological modelling will be completed by the end of 2024 as the SFWMD ERP application is made.

2. **Permitted land uses include agriculture, natural resource extraction and related facilities, conservation uses, public and private recreation facilities, and residential uses at a maximum standard density of one dwelling unit per ten acres (1 du/10 acres). See Objectives 33.3 and 33.2 for potential density adjustments resulting from concentration or transfer of development rights.**

   The Corkscrew 80 RPD is a single-family subdivision that is seeking to be added to the EEPCO as a development that protects, preserves, and restores strategic regional hydrological and wildlife connections through conservation and restoration efforts for a minimum of 55% of the property.

   The density of the property, that is either DR/GR or Wetlands FLUC, is seven units. Once accepted into the Tier 1 Special Treatment Area and then into the EEPCO, the density permitted will be 1 dwelling unit per acre, or 78 residential dwelling units within the DR/GR FLUC given Policy 33.2.4.3(e)(1) and Objective 33.3.

OBJECTIVE 1.5: WETLANDS. Designate on the Future Land Use Map those lands that are identified as Wetlands in accordance with § 373.019(27), Fla. Stat. through the use of the unified state delineation methodology described in Fla. Admin. Code R. 62-340, as ratified and amended in §373.4211, Fla. Stat.

Per the Indigenous Habitat Management Plan (IHMP) approximately 23.55 acres of wetlands will be enhanced and preserved as shown on the Enhancement and Preservation Map. Exotic vegetation will be treated and/or removed per the Initial Exotic Vegetation Treatment section. Exotics may be mechanically removed and treated from wetland areas that are currently dominated with exotics and therefore have very few native species present (i.e. polygon currently mapped as FLUCCS Code 619M). The limits of the wetland areas from which exotics will be mechanically removed will be determined based onsite specific conditions at the time of clearing. These wetlands will be placed into a conservation easement, in line with the Environmental Enhancement and Preservation Communities Overlay (EEPCO) policies, ensuring their protection. This designation aligns with Lee County's Future Land Use Map, supporting both development and long-term wetlands preservation.

POLICY 1.6.10: The Southeast Lee County Residential Overlay (Map 2-D) is described in Objective 33.2. This Overlay affects only Southeast Lee County and identifies five types of land:

5. **"Environmental Enhancement and Preservation Communities:" Properties adjacent to Corkscrew and Alico Roads that have the potential to improve and restore important regional hydrological and wildlife connections.**

   The Corkscrew 80 site is proposed to be in the Environmental Enhancement and Preservation Communities Overlay (EEPCO) per this CPA Map and Text Amendment. The approval of the CPA and the companion RPD will preserve 55% of the site as wetlands and upland reclaimed and restored preserves. Per the IHMP the restored, reclaimed and restored lands will create a permanent wildlife connection given it is the property between the Lee County 20/20 Imperial Marsh Preserve to the west, the Imperial Marsh, and continuation of similar lands to the east and north as set aside through the Troyer Brothers MPED.

   See the Hydrogeologic Water Resources Report and Enhanced Lake Management Plan (ELMP) and the Stormwater Management Plan.

OBJECTIVE 2.1: DEVELOPMENT LOCATION. Contiguous and compact growth patterns will be promoted through the rezoning process to contain urban sprawl, minimize energy costs, conserve land, water, and natural resources, minimize the cost of services, prevent development patterns where large tracts of land are by-passed in favor of development more distant from services and existing communities.

As outlined in detail within the application, the project represents an infill development in a growing corridor of Lee County where residential development has been approved both east and west of this location citing approvals for 1 million square feet of nonresidential uses and over 27,000 homes in the Corkscrew corridor.

Various single-family and multifamily developments are proposed or located east and west of the Property, making for efficient use of planned extension of infrastructure to the Kingston Property. Included in the applicant's proposal is to add the property to the Lee Plan Map 1-D – Special Treatment Areas Tier 1 category, Map 2-D to be added to the EEPCO, and amend Maps 4-A and 4-B to designate the Property in the Lee County Utilities (LCU) services area to connect to centralized potable water and sanitary sewer services once expansion to the site is complete.

OBJECTIVE 2.2: DEVELOPMENT TIMING. Direct new growth to those portions of the Future Urban Areas where adequate public facilities exist or are assured and where compact and contiguous development patterns can be created. Development orders and permits (as defined in F.S. 163.3164(7)) will be granted only when consistent with the provisions of Sections 163.3202(2)(g) and 163.3180, Florida Statutes and the county's Concurrency Management Ordinance.

The Applicant has provided letters of availability and a detailed explanation of the public facilities and services available to support future development of the Property. The proposed rezoning fully complies with the above policy's intent to direct new growth to appropriate areas of the county.

POLICY 2.2.1: Rezoning's and Development of Regional Impact proposals will be evaluated as to the availability and proximity of the road network; central sewer and water lines; community facilities and services such as schools, EMS, fire and police protection, and other public facilities; compatibility with surrounding land uses; and any other relevant facts affecting the public health, safety, and welfare.

The road network in the region has been specifically constructed to support residential communities that are dependent on access to major transportation networks. Corkscrew Road connects to I-75 and the Ben Hill Griffin Parkway and the future Alico Road connector to the west, and to the east SR 82 providing ample access for residents.

The Property is not currently located within Lee County Future Water and Sewer Franchise Areas and the applicant has submitted a Map text amendment to extend potable water and sewer to the site. LCU has stated that water and sewer service line extensions are proposed to this site.

The site offers direct access to Corkscrew Road, a county maintained arterial roadway with phase 1 of the expansion to 4 lanes being completed soon and phase 2 taking place in the near future which will expand the roadway in front of this property. The site has a singular vehicular ingress and egress point for residents with Estero Fire agreeing to not object to a lack of second connection given the narrow nature of this property and other nearby curb cuts on Corkscrew Road. The roadway has an acceptable level of service to support the requested development according to the Traffic Impact Statement by TR Transportation.

The site is within the Estero Fire District, Lee County Sheriff's District, Solid Waste District Area. Letters of capacity availability have been received from fire, Lee County Sheriff, Lee County Emergency Medical Service (EMS) and Lee County Solid Waste.

The subject property is 10 miles to the east of Pinewoods Elementary School, 13 miles to the east of Three Oaks Middle School, and 12.5 miles to the east of Estero High School. A letter of capacity availability has been received from Lee County School District.

The proposed Master Concept plan is designed to increase compatibility with surrounding areas and enhance the natural environmental features of the region through the provision of expansive preserve areas and significant distances between residential lots and the project boundaries.

As a result, the proposed development is completely internalized from surrounding development. Finally, buffering, maximum building heights, and development standards are similar to other planned developments approved in the Southeast Lee County Community Area.

GOAL 4

OBJECTIVE 4.1: WATER, SEWER, AND ENVIRONMENTAL STANDARDS. Consider water, sewer, and environmental standards during the rezoning process. Ensure the standards are met prior to issuing a local development order. (Ord. No. 17-13)

STANDARD 4.1.1: WATER.

1. ***Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development in excess of 30,000***

square feet of gross leasable (floor) area per parcel, must connect to a public water system (or a "community" water system as that is defined by Fla. Admin. Code R. 62-550).

The site is currently not serviced by Lee County Utilities for sewer or water, but service extension is proposed by LCU and the applicant is requesting to be added to the service franchise maps for sewer and water preemptively with the understanding that now construction or development order approval can take place without connection to public water and sewer infrastructure.

The proposed residential development will be 1.0 dwelling units per gross acre and does not purpose any commercial or industrial development. The request to expansion of LCU service area will be in compliance with the level of service standards required by Lee County.

2. ***If the proposed development lies within the boundaries of a water utility's certificated or franchised service area, or Lee County Utilities' future potable water service area (see Map 4- A), then the development must be connected to that utility.***

   According to Lee Plan Map 4-A the site lies outside the LCU Future Water Service Area. The request change to the map to be added to the service area is consistent with LCU's proposed expansion of service lines to the site.

3. ***The developer must provide proof that the prior commitments of the water utility, plus the projected need of the developer, do not exceed the supply and facility capacity of the utility.***

   A Letter of Availability has been obtained from Lee County Utilities confirming that the property is not located within the Lee County Utilities Future Water Service Area; however, service lines are proposed as part of the Kingston agreement east of this location looping to service on SR 82.

   The applicant has filed a Comprehensive Plan Map Amendment to amend Map 4-A and extend centralized potable water service to the property. The 2023 Concurrency Report states, "Any new connection to a multiple-user, single-development, or single-user private system WTP in unincorporated Lee County will be reviewed for available WTP capacity on a case-by-case basis and will require a determination of availability of capacity at the time of development application."

4. ***All waterline extensions to new development will be designed to provide minimum fire flows, as well as adequate domestic services as required by Fla. Admin. Code R. 62-555.***

   The Applicant agrees to ensure the extended water lines to the new development will provide ample flow to support fire flow levels while adhering to the domestic service requirement by Fla. Admin. Code R. 62-555.

5. ***If a new development is located in a certificated or franchised service area, or Lee County Utilities' future potable water service area (see Map 4-A), and the utility cannot provide the service or cannot provide the service except at a clearly unreasonable cost to the developer, the developer is encouraged to petition the***

appropriate regulatory agency to contract the service area so that the development may establish its own community water system or invite another adjacent utility to expand its service area in order to provide the required service.

A Letter of Availability has been obtained from Lee County Utilities confirming that the property is not located within the Lee County Utilities Future Water Service Area. The letter states that although potable water lines are not in place, they are proposed. The applicant has filed a Comprehensive Plan Map Amendment to amend Map 4-A and extend centralized potable water service to the property.

6. ***If a development lies outside any service area as described above, the developer may:***
   - ***request that the service area of Lee County Utilities or an adjacent water utility be extended to incorporate the property;***
   - ***establish a community water system for the development; or***
   - ***develop at an intensity that does not require a community water system.***

   The applicant has filed a Comprehensive Plan Map Amendment to amend Map 4-A to add the property to the LCU potable water service franchise area and connect to the service extensions that are proposed.

7. ***Lee County Utilities may provide potable water service to properties not located within the future water service area when such potable water service is found to benefit public health, safety, and welfare, including protection of Lee County's natural resources.***

   The proposed expansion of LCU water service to the property will aid in the health, safety, and welfare, of the Corkscrew Road corridor residents.

STANDARD 4.1.2: SEWER.

1. ***Any new residential development that exceeds 2.5 dwelling units per gross acre, and any new single commercial or industrial development that generates more than 5,000 gallons of sewage per day, must connect to a sanitary sewer system.***

   The site is currently not serviced by Lee County Utilities for sewer or water, but service extension is proposed by LCU and the applicant is requesting to be added to the service franchise maps for LCU.

   The proposed residential development is 1.0 dwelling units per gross acre and does not purpose any commercial or industrial development. The request to expansion of LCU service area will be in compliance with the level of service standards required by Lee County.

2. ***If the proposed development exceeds the thresholds listed above and lies within the boundaries of a sewer utility's certificated or franchised service area, or Lee County Utilities' future sanitary sewer service area (see Map 4-B), and that utility has sufficient capacity to provide minimum service to the development, then the development must connect to that sewer utility if there is existing infrastructure adequate to accept the effluents of the development within l/4 mile from any part of the development.***

The requested changes to Lee Plan Map 4-B will expansion the current connections to fully service the development while maintaining the necessary level of service requirements by Lee County.

3. ***If there is not sufficient capacity nor adequate infrastructure within l/4 mile of the development, the developer must provide proof in the form of a clearly stated rejection of service.***

   A Letter of Availability has been obtained from Lee County Utilities confirming that the property is not located within the Lee County Utilities Future Sewer Service Area; however, service lines are proposed as part of the Kingston development agreement looping service to infrastructure on SR 82.

   The applicant has filed a Comprehensive Plan Map Amendment to amend Map 4-B and extend centralized sewer service to the property. The 2023 Concurrency Report states, "Any new connection to a multiple-user, single-development, or single-user private system WTP in unincorporated Lee County will be reviewed for available WTP capacity on a case-by-case basis and will require a determination of availability of capacity at the time of development application."

4. ***If a new development is located in a certificated or franchised service area, or Lee County Utilities' future sanitary sewer service area (see Map 4-B), and the utility cannot provide the service, or cannot provide the service except at a clearly unreasonable cost to the developer, the developer may establish on a temporary basis a self-provided sanitary sewer facility for the development, to be abated when the utility extends service to the site. The developer may also petition the appropriate regulatory agency to contract the service area of the utility in order that another utility may be invited to provide the service.***

   The Applicant agrees to ensure the extended sewer lines to the new development will provide ample flow to support fire flow levels while adhering to the domestic service requirement by Fla. Admin. Code R. 62-555.

5. ***If a development lies outside any service area as described above, the developer may:***
   - ***request that the service area of Lee County Utilities or an adjacent sewer utility be expanded to incorporate the property;***
   - ***establish a self-provided sanitary sewer system for the development;***
   - ***develop at an intensity that does not require sanitary sewer service; or***
   - ***if no more than 5000 gallons of effluent per day per parcel is produced, an individual sewage disposal system per Fla. Admin. Code R. 64E-6 may be utilized, contingent on approval by all relevant authorities.***

   The project will be accompanied by a Lee Plan Comprehensive Plan Amendment to Map 4-B as the site lies outside the LCU Future Sewer Service Area. The requested changes to Lee Plan Map 4-B will expansion the current connections to fully service the development while maintaining the necessary level of service requirements by Lee County.

The Applicant agrees to ensure the extended sewer lines to the new development will provide ample flow to support fire flow levels while adhering to the domestic service requirement by Fla. Admin. Code R. 62-555.

6. ***Lee County Utilities may provide sanitary sewer service to properties not located within the future sewer service area when such sanitary sewer service is found to benefit public health, safety, and welfare, including protection of Lee County's natural resources.***

   The proposed expansion of LCU sewer service to the property will aid in the health, safety, and welfare, of the Corkscrew Road corridor residents.

GOAL 5 (RESIDENTIAL LAND USES)

OBJECTIVE 5.1: All development approvals for residential, commercial, and industrial land uses must be consistent with the following policies, the general standards under Goal 4, and other provisions of this plan. (Ord. No. 94-30, 00-22)

POLICY 5.1.1: Residential developments requiring rezoning and meeting Development of County Impact (DCI) thresholds must be developed as Planned Developments except if located within the Mixed-Use Overlay.

The request is to develop the 77.94-acre site as a Residential Planned Development (RPD), in accordance with the requirement for developments exceeding Development of County Impact (DCI) thresholds. This project does not fall within the Mixed-Use Overlay, and therefore, a Planned Development is the appropriate zoning mechanism. The proposed RPD will ensure a coordinated and structured approach to development, incorporating land use, environmental conservation, and infrastructure planning in compliance with county regulations.

POLICY 5.1.2: Prohibit residential development where physical constraints or hazards exist, or require the density and design to be adjusted accordingly. Such constraints or hazards include but are not limited to flood, storm, or hurricane hazards; unstable soil or geologic conditions; environmental limitations; aircraft noise; or other characteristics that may endanger the residential community.

The overall site was designed with careful consideration of any potential physical constraints or hazards in the proposed RPD. The site is not located within a Coastal High Hazard Area (CHHA), evacuation zone, or flood-prone area. Additionally, the property does not face significant risks related to unstable soils, geologic conditions, or aircraft noise as shown in the environmental report titled "Exhibit M12 - Environmental Impact Analysis" and the Exhibit M6 – Soils Map.

Additionally, environmental constraints have been thoroughly evaluated as part of the Atwell Indigenous Habitat Management Plan (IHMP). Furthermore, stormwater management systems, including two lakes and detention areas, will be designed to manage surface water and mitigate potential storm hazards – see the Stormwater Management Plan by JR Evans.

The proposed design and density of the development have been adjusted accordingly to ensure the safety and long-term viability of the residential community, while preserving natural resources and complying with all relevant regulations.

POLICY 5.1.5: Protect existing and future residential areas from any encroachment of uses that are potentially destructive to the character and integrity of the residential environment. Requests for conventional rezonings will be denied in the event that the buffers provided in the LDC, Chapter 10, are not adequate to address potentially incompatible uses in a satisfactory manner. If such uses are proposed in the form of a Planned Development or special exception and generally applicable development regulations are deemed to be inadequate, conditions will be attached to minimize or eliminate the potential impacts or, where no adequate conditions can be devised, the application will be denied altogether. The LDC will continue to require appropriate buffers for new developments.

The residential neighborhood proposed does not pose threats to other areas. The mining zoning abutting the property to the east and north could create incompatibility issues. However, the Troyer Brothers MEPD zoning set aside conservation and restorations in all areas that abut the property and the site design of the master concept plan preserve areas in conservation easements in the entire northern third of the property and on the eastern and western boundaries.

POLICY 5.1.7: Maintain development regulations that require that community facilities (such as park, recreational, and open space areas) in residential developments are functionally related to all dwelling units and easily accessible via pedestrian and bicycle pathways. These pathways must be interconnected with adjoining developments and public pathways whenever possible. Townhouses, condominiums, apartments, and other types of multi-family residential development must have directly accessible common open space.

The proposed RPD includes community amenity center with recreational facilities including pickleball courts, clubhouse and pool. Sidewalks are provided on both sides of all internal roadways and provide pedestrian and bicycle connections to Corkscrew Road. All open space and amenities will be directly accessible to all residents within the RPD.

POLICY 5.1.10: In those instances where land under single ownership is divided into two or more land use categories by the adoption or revision of the Future Land Use Map, the allowable density under this Plan will be the sum of the allowable densities for each land use category for each portion of the land. This density can be allocated across the property provided that:

1. The Planned Development zoning is utilized; and

2. No density is allocated to lands designated as non-urban or Environmentally Critical that would cause the density to exceed that allowed on such areas; and

3. The land was under single ownership at the time this policy was adopted and is contiguous; in situations where land under single ownership is divided by roadways, railroads, streams (including secondary riparian systems and streams but excluding primary riparian systems and major flow-ways such as the Caloosahatchee River and Six Mile Cypress Slough), or other similar barriers, the land will be deemed contiguous for purposes of this policy; and

4. The resultant Planned Development affords further protection to environmentally sensitive lands if they exist on the property.

The property is in two land use categories: wetlands and DR/GR.

Density Reduction/Groundwater Resource	46.00+/-	Acres	59	% of Total
Wetland	31.94+/-	Acres	41	% of Total

The sensitive lands as determined by the IHMP specifies there is 54.75 acres of uplands and 23.55 acres of wetlands. The IHMP, per the requirements of the EEPCO will preserve a minimum of 55% of the site or 43.75 acres total in conservation areas protecting the lands in perpetuity broken down into 8.10 acres of restored uplands, 12.80 acres of existing indigenous wetlands that will be enhanced and reestablished, 10.75 acres of non-indigenous wetlands that will be mechanically enhanced and planted, and 11.10 acres of uplands that were previously cleared and converted to agriculture will be restored and placed within the conservation easement or preserved.

POLICY 5.2.4: The site design of the proposed development must be compatible with surrounding land uses to the maximum extent possible.

The neighboring property to the west is Lee County 20/20 Lands and the property to east is an undeveloped MEPD which provides for minimal impact on abutting residents to be affected by the development through conservation areas abutting the development. The zoning conditions and LDC requirements address potential impacts on adjacent uses. The proposed CPA includes development standards which comply with the Southeast Lee County Community Area.

POLICY 33.1.2: The DR/GR Priority Restoration Strategy consists of seven tiers of land where protection and/or restoration would be most critical to restore historic surface and groundwater levels and to connect existing corridors or conservation areas (see Map 1-D). Within these tiers, density incentives will be utilized as a mechanism to improve, preserve, and restore regional surface and groundwater resources and wildlife habitat of state and federally listed species; with Tier 1 and Tier 2 being the most incentivized tiers. Lee County may consider amendments to this Overlay based on changes in public ownership, land use, new scientific data, and/or demands on natural resources. This Overlay does not restrict the use of the land.

This policy is the foundation of the CPA Map Amendment in this application as a proposed Tier 1 property to be accepted into the EEPCO. The applicant believes and will seek to prove that the 78-acre property is a key piece of the regional flowway and wildlife connection that spans from the Lee County 20/20 Imperial Marsh Preserve to the west and the Imperial Marsh to the northeast with the Troyer Brothers MPED conservation areas and wildlife corridor completing the connection in alignment with the northern portion of the subject property that are proposed conservation lands.

<u>The subject property is a “whole in the doughnut” if you will between these preserve areas and, even though this is a small piece of property regionally, it is a key parcel to establish connection between the abutting preserve areas in perpetuity.</u>

POLICY 33.1.3: Pursue acquisition (partial or full interest) of land within the Tier 1 areas in the Priority Restoration Strategy Overlay through direct purchase; partnerships with other government agencies; long-term purchase agreements; right of first refusal contracts; land swaps; or other appropriate means to provide critical connections to conservation lands that serve as the backbone for water resource management and wildlife movement within Southeast Lee County. Tier 2 lands are of equal ecological and water resource importance as Tier 1 but have better potential to remain in productive agricultural use. Tier 3 lands and the southern two miles of Tiers 5, 6, and 7 can provide an important wildlife connection to conservation lands in Collier County and an anticipated regional habitat link to the Okaloacoochee Slough State Forest. Tiers 1, 2, 3, and the southern two miles of Tiers 5, 6, and 7 may qualify for unique development incentives outlined in Objectives 33.2 and 33.3 due

to the property's potential for natural resource benefits and/or wildlife connections. Additionally, the County may consider incentives, within all tiers, for private landowners to improve water resources and natural ecosystems.

The sensitive lands as determined by the IHMP specifies there is 54.75 acres of uplands and 23.55 acres of wetlands. Once accepted as a Tier 1 property, the IHMP, per the requirements of the EEPCO, will preserve a minimum of 55% of the site or 43.75 acres total in conservation areas protecting the lands in perpetuity broken down as 8.10 acres of restored uplands, 12.80 acres of existing indigenous wetlands that will be enhanced and reestablished, 10.75 acres of non-indigenous wetlands that will be mechanically enhanced and planted, and 11.10 acres of uplands that were previously cleared and converted to agriculture will be restored and placed within the conservation easement or preserved.

POLICY 33.1.4: Restoration of critical lands in Southeast Lee County is a long-term program that will progress in phases based on available funding, land ownership, and natural resource priority. On individual sites, restoration can be carried out in stages:

1. Initial restoration efforts would include techniques such as filling agricultural ditches and/or establishing control structures to restore the historic water levels as much as possible without adversely impacting nearby properties.

2. Future restoration efforts would include the eradication of invasive exotic vegetation and the reestablishment of appropriate native ecosystems based upon the restored hydrology.

Per the IHMP:

- **Conservation Easement:** The revised IHMP establish a minimum of 55% of the property in a conservation easement. This includes 43.75 acres of wetlands, pine flatwoods and cypress that will be enhanced, planted and restored. The proposed restoration plan includes safeguards for the establishment and survivability of restoration plantings, including the use of larger tree and shrub material compared to other large-scale restoration projects in the DRGR; conducting as-built surveys prior to planting to ensure that appropriate grades have been achieved; obtaining soil borings in upland restoration areas to ensure that the underlying soil types contain the sandy or mixed sandy soils necessary for the establishment of upland habitat types; defined success criteria that require a minimum 80 percent survivability of restoration plantings after five years.
- **Wetland Enhancement and Planting:** Per the revised IHMP the project will retain 100% of the on-site wetlands, or 23.55 acres. This includes 12.80 acres of existing indigenous wetlands that will be enhanced and reestablished and 10.75 acres of non-indigenous wetlands that will be mechanically enhanced and planted.
- **Upland Enhancement:** Per the revised IHMP approximately 8.10 acres of uplands will be enhanced and preserved or placed in a conservation easement. This consists of upland pine flatwoods that contain moderate densities of exotics.
- **Restoration:** Per the revised IHMP approximately 11.10 acres of uplands that were previously cleared and converted to agriculture will be restored and placed within the conservation easement or preserved.
- **Initial Exotic Vegetation Treatment:** Per the revised IHMP all exotic and nuisance species (defined per LDC Sec. 10-420(f) and Category I and II species on the Florida Exotic Pest Plant Council's List of Invasive Species) within the upland and wetland preservation areas will be treated.

- **Increased Contiguity of Preserve Areas:** The revised IHMP results in a larger, more contiguous preserve area with a connection to abutting Lee County 20/20 lands than what naturally exists or would ever exist without approval of this project.

POLICY 33.1.7: Impacts of proposed land disturbances on surface and groundwater resources will be analyzed using integrated surface and groundwater models that utilize site-specific data to assess potential adverse impacts on water resources and natural systems within Southeast Lee County. Lee County Division of Natural Resources will determine if the appropriate model or models are being utilized, and assess the design and outputs of the modeling to ensure protection of Lee County's natural resources.

Per the Hydrological Restoration Report dated October 2025 are the following excerpts:

In compliance with Lee Plan Policy 33.1.7, an integrated surface and groundwater model has been developed to assess the project's effects on hydrological conditions. This model compares the impacts of residential development, which is expected to improve surface and groundwater conditions through enhanced water management practices.

In the absence of residential development approval, agricultural lands are the primary alternative. This report compares the hydrological impacts of both scenarios, examining their effects on water quantity, soil health, resultant biodiversity, and long-term sustainability of water resources. By presenting these findings, the report aims to inform decision-making and support sustainable management of Southeast Lee County's natural resources. A 1D hydrologic and hydraulic surface water model and a 2D integrated surface water and groundwater model were created for both scenarios. The 2D overland and groundwater parameters for this study were defined with ground surfaces, land use layers, soils layers, groundwater elevations surfaces, basins layers, and rainfall layers.

Once these inputs were defined, they were entered into the ICPR model to simulate behavior of the surface water management system under varying hydrologic conditions.

The proposed project will provide a weir at the existing northern berm providing a better stablished pathway for the northern flow to travel though the project's property. An opening in the southern berm abutting the Corkscrew Road right-of-way is being proposed to allow the water to discharge into Corkscrew Road more directly. This will provide some relief for the eastern residential properties from the consistent flooding caused by the accumulation of water near their connecting driveway to Corkscrew Road.

A 5-year (2015 to 2019) storm event was run to compare the impacts of both scenarios on the groundwater table. A groundwater mass balance report was generated in ICPR to determine the groundwater recharge differences. The results indicate that due to the use of a dewatering pump that would be needed for crop-raising, the total groundwater recharge volume of the agricultural scenario is lower at the end of the modeled simulation than that of the residential scenario, 8,494 ac-ft and 14,962 ac-ft, respectively.

The proposed stormwater lakes and the restoration of the open space around the development basins *will enhance infiltration and recharge of the groundwater table*. Furthermore, *the reestablished flow way will facilitate a more even distribution of runoff across properties north of Corkscrew Road, preventing water accumulation in specific areas and thereby reducing the risk of flooding in surrounding properties*.

See the remainder of the report for discussion so the scenarios and detailed conclusions.

POLICY 33.2.4: Lands that provide a significant regional hydrological and wildlife connection have the potential to improve, preserve, and restore regional surface and groundwater resources and indigenous wildlife habitats. These lands, located along Corkscrew and Alico Roads, can provide important hydrological connections to the Flint Pen Strand and the Stewart Cypress Slough as well as important wildlife habitat connections between existing CREW and Lee County properties. As an incentive to improve, preserve, and restore regional surface and groundwater resources and wildlife habitat of state and federally listed species additional densities and commercial uses may be granted if the project is found consistent with and demonstrates through a planned development rezoning the following:

1. ***These lands are within the "Environmental Enhancement and Preservation Communities" Overlay as designated on Map 2-D of the Plan.***
2. **The property is rezoned to a planned development that meets the following:**
    a. **Planned development must include a minimum of 60% open space, not including previously mined lakes, which will be used to accommodate the following:**
        1. **Restore and accommodate existing and historic regional flow-ways where they currently or previously existed;**

            See the Hydrological Restoration Report and Stormwater Management Plan by JR Evans. It states, in summary, that "the proposed stormwater lakes and the restoration of the open space around the development basins *will enhance infiltration and recharge of the groundwater table*. Furthermore, *the reestablished flow way will facilitate a more even distribution of runoff across properties north of Corkscrew Road, preventing water accumulation in specific areas and thereby reducing the risk of flooding in surrounding properties*."

            The County opined that utilizing the potential ground and surfacewater conditions under an agricultural scenario is inappropriate given that the existing site is dormant. The applicant beleives that entitling the property to restrict such an intense use is appropriate and consistent with the Lee Plan. The policy provides density as an incentive to "improve, preserve and restore," which this project demonstrates throughout the application documents. Also, it is common, and almost expected, that projects will permit and entitle themselves to the highest and most intense use, regardless of whether or not they intend to use those resources at some point. This is the bar by which they should be measured, not the variable intensities that fall beneath this ceiling over time. Changing the zoning from agricultural to Residential Planned Development requires us to take measures that preserve the surface water and groundwater resources, which are demonstrated in the HRP and other documents.

            An Enhanced Like Management Plan (ELMP) has been created and is submitted as "Hydrogeologic Water Resources Report_Lake Mgt_09292025 eSealed.pdf".

        2. **Restore and accommodate existing and historic groundwater levels;**

            See #1 above.

        3. **Restore and preserve wetlands;**

            Per the Atwell Indigenous Habitat Management Plan (IHMP):

Approximately 23.55 acres of wetlands will be enhanced and preserved as shown on the Enhancement and Preservation Map. Exotic vegetation will be treated and/or removed per the Initial Exotic Vegetation Treatment section below. Exotics may be mechanically removed and treated from wetland areas that are currently dominated with exotics and therefore have very few native species present (i.e. polygon currently mapped as FLUCCS Code 619M). The limits of the wetland areas from which exotics will be mechanically removed will be determined based onsite specific conditions at the time of clearing.

After the completion of the initial exotic removal and/or treatment, the enhanced wetlands will be evaluated for supplemental planting. This planting will focus on the areas that currently contain low densities of native trees (FLUCCS Code 619M). These areas will be planted with cypress and scattered slash pines in a random pattern at densities of approximately 220 trees per acre. If live native trees are present, those trees will count towards the required planting density. Plant material will consist of container grown three gallon trees and will be installed at the beginning of the first wet season following the completion of the initial exotic treatment event (Table 1). In areas with less than 50 percent cover by native wetland ground cover species two complete growing season following the initial exotic treatment, native wetland ground cover species will be installed at densities of 1,742± plants per acre (5± feet on center). The wetlands will also be evaluated at that time for the presence of native shrubs. Areas devoid of native shrubs will be planted with scattered clusters of one gallon shrubs consisting of seven shrubs planted 10 feet on center in each cluster. The final species list will be based upon site specific conditions and on plant material availability at the time of planting.

4. Restore and preserve indigenous upland habitats;

Per the Atwell Indigenous Habitat Management Plan (IHMP):

The Corkscrew property has the potential to play a significant role in the area's hydrology and wildlife corridor. The project is located adjacent to the Imperial Marsh Preserve, a county owned preserve, which abuts the Corkscrew Mitigation Bank to the east. To the west of the project is the Troyer Brothers preserve land which connects to the Imperial Marsh Preserve to the north.

By restoring and enhancing both upland and wetland habitats, this project will create a critical link that supports regional water hydrology and establishes a managed wildlife corridor, ensuring seamless ecological connectivity across the area.

The current land use practices within the property and exotic vegetation infestation significantly diminish wildlife utilization. The IHMP provides an avenue for the enhancement and preservation of this important piece of land.

<u>Upland Enhancement</u>
Approximately 8.10 acres of uplands will be preserved and enhanced. This consists of upland pine flatwoods that contain moderate densities of exotics. Exotics will be treated as described below. It is anticipated that supplemental planting will not be required for these areas.

Upland Restoration

Approximately 11.10 acres of uplands within the preserve were previously cleared and converted to agriculture. The treatment of exotics within the uplands will occur as described below. After the completion of the initial exotic removal and/or treatment, these uplands will be planted with native trees, shrubs, and groundcover species (Table 2). Plant material will be installed at the beginning of the first wet season following the completion of the initial exotic treatment event. If live native trees are present, those trees will count towards the required planting density. The final species list will be based upon site specific conditions and on plant material availability at the time of planting.

5. **Provide critical wildlife connections to adjacent conservation areas; and**

   See #4 above.

6. **Provide 100' foot buffer along Corkscrew Road East of Alico Road.**

   See the MCP which has been designed to meet this requirement.

b. **Includes an enhanced lake management plan, that:**
   1. **Applies best management practices for fertilizers and pesticides;**
   2. **Provides erosion control and bank stabilization; and**
   3. **Establishes lake maintenance requirements.**

   A SFWMD ERP permit is being sought under application No. 241222-48705 to permit the proposed surface water management system. As part of the application the applicant has contracted with a consultant to produce An Enhanced Like Management Plan has been created and is submitted as "Hydrogeologic Water Resources Report_Lake Mgt_09292025 eSealed.pdf"

c. **Develop a site specific ecological and hydrological restoration plan which includes at a minimum the following: preliminary excavation and grading plans, analysis of hydrological improvements and water budget narrative, replanting plan, habitat restoration plan, success criteria, long term monitoring and maintenance.**

   Atwell has provided an IHMP as part of this submittal which addresses wetland preservation and restoration, upland restoration, and reclaiming former agricultural lands. The plan addresses replanting plan, habitat restoration plan, success criteria, long term monitoring and maintenance. The preserved 55% of the property connects to a wildlife corridor to the east via Troyer Brothers MPED to the Lee County 20/20 Imperial Marsh Preserve.

   A Hydrological Restoration Report (HRR) is part of this submittal by JR Evans. The HRR is in part addressed and coordinated within the IHMP by Atwell. The details of the restoration plan, such as preliminary excavation and grading plans, analysis of hydrological improvements and water budget narrative have been completed and will be made part of the SFWMD ERP permit is being sought under application No. 241222-48705.

d. **Preservation areas must be platted in separate tracts and dedicated to an appropriate maintenance entity. For projects larger than 1,000 acres a CDD or a master homeowners association must be created that will accept responsibility for perpetually maintaining the preservation requirements identified in the planned**

development, prior to issuance of certificate of compliance (CC) for first local development order.

Understood. The conservation area will be platted in a separate tract as demonstrated on the MCP.

e. **Record a Conservation Easement for a minimum of 55% of the planned development, not including previously mined lakes, to be dedicated to the appropriate maintenance entity that provides Lee County or some other public agency, acceptable to Lee County, with third party enforcement rights. All Conservation Easements required as part of the planned development must be recorded within 5 years from first development order approval.**

At the time of local development order (DO) a conservation easement will be recorded on the 42.80± acres of wetland and upland preserve areas as shown on the MPC.

f. **Indigenous management plans must address human-wildlife coexistence.**

See the Indigenous Habitat Management Plan (IHMP) by Atwell.

g. **Uses Florida Friendly Landscaping with low irrigation requirements in common elements.**

The applicant intends to meet this requirement at the time of DO.

h. **The stormwater management system must demonstrate through design or other means that water leaving the development meets state and federal water quality standards. The developer must obtain authorization from the Division of Natural Resources prior to discharge of stormwater from the development into the County's MS4 system directly or indirectly.**

See the Stormwater Management Plan narrative in the resubmittal of the CPA titled "Exhibit M12 – Stormwater Management Plan".

i. **Irrigation and fertilizers (or other chemicals) for agricultural purposes must be entirely eliminated at time of first development order approval for row crops and no later than 5 years from first development order approval for citrus groves. If cessation of citrus groves is to be phased, a phasing plan provided at the time of zoning must demonstrate regional environmental benefits, including but not limited to regional or historic surface water and wildlife connections, occurring with the first phase of development.**

The site is a former agricultural area that is now inactive. The redevelopment of the site will remove the property from converting back into an agricultural use.

j. **Protects public wells through compliance with the requirements of the Well Field Protection Ordinance.**

The property is outside the wellfield protection zones as marked on "Exhibit M6 – Wellfield Zones Map 4-C".

k. Each planned development within the Overlay will be required to mitigate the traffic impacts of the planned development and provide its proportionate share of the needed roadway improvements in accordance with Administrative Code (AC) 13-16. The proportionate share amount can be offset, in accordance with AC 13-16, by the dedication of needed right-of-way or the construction of improvements that would measurably lessen the need for roadway improvements, or by payment of impact fees, or use of impact fee credits, or as otherwise set forth in a written agreement between Lee County and the Developer. Prior to a final determination of a Project's proportionate share amount, compliance may be met through an enforceable instrument that obligates the property owners within a planned development to pay the Project's proportionate share, with said instrument being recorded prior to the issuance of any development order. For the developments known as WildBlue (CPA2014-00004) and Corkscrew Farms (CPA2015- 00001) if the instrument is recorded prior to the final determination of the proportionate share amount, the proportionate share payment may not exceed $1,600 per unit above the road impact fee amount.

Understood.

l. Connect to public water and sewer service. Connect to reuse water if available at time of development order approval.

Understood. The development is required to connect and can only be developed when utilities are available. As part of the process this application is requesting to add the property into the Lee County sewer and water franchise areas.

m. Obtain written verification as to adequate public services for the planned development, from the sheriff, EMS, fire district, and Lee County School District.

Written verification has been received from all agencies listed. See the “Exhibit M14 - Public Facilities Impacts Analysis” and “Exhibit M17 - Letters of Determination for Service”.

n. Demonstrate that the planned development will not result in significant detrimental impacts on present or future water resources.

See the Hydrologic Restoration Plan, the Stormwater Management Plan, the IHMP, Enhancement Lake Management Plan and draft Water Quality Monitoring Plan submitted as part of this application.

POLICY 54.1.2: In developing and implementing local landscape regulations including the preservation, reforestation, and wetlands restoration requirements, preference will be given to native species which are adapted to the region's climatic regime.

The site is currently undeveloped and contains 23.55 acres of wetlands that will be maintained during development and deeded into conservation areas in perpetuity including an additional 19.20 acres, or a minimum of 55% of the site. A majority of the conservation areas will abut the conservation lands to the west and those set aside through the zoning abutting to the east and north.

POLICY 54.1.6: Maintain development regulations that require new development to connect to a reuse water system if a system is near the development and has sufficient capacity.

In a letter from LCU they state that the property does not have reuse available at this location. At the current time there is no service to the sight for water or sewer with service expansions proposed by LCU in the future, which may or may not include reuse. The project will connect to reuse of available at the time of local development order.

POLICY 60.1.1: Require design of surface water management systems to protect or enhance the groundwater.

See the Stormwater Management Plan.

POLICY 60.1.3: Examine steps necessary to restore principal flow-way systems to assure the continued environmental function, value, and use of natural surface water flow-ways and associated wetland systems.

See the Hydrological Restoration Plan.

POLICY 60.4.2: The County encourages new developments to design their surface water management system to incorporate existing wetland systems.

See the Stormwater Management Plan.

POLICY 60.4.3: The County encourages the preservation of existing natural flow-ways and the restoration of historic natural flow-ways.

See the Hydrogeologic Water Resources Report and Enhanced Lake Management Plan and Stormwater Management Plan.

POLICY 61.1.1: Lee County recognizes that all fresh waters are a resource to be managed and allocated wisely and will support allocations of the resource on the basis 1) of ensuring that sufficient water is available to maintain or restore valued natural systems, and 2) of assigning to any specified use or user the lowest quality freshwater compatible with that use, consistent with financial and technical constraints.

The Applicant has applied for an Environmental Resource Permit (ERP) from the South Florida Water Management District (SFWMD) being sought under application No. 241222-48705. A master drainage system and 55% of the site in a recorded conservation easement are proposed with this request and shown on the MCP. These elements will be established through the ERP and subsequent development orders and are designed in compliance with this policy.

OBJECTIVE 61.3: GENERAL SURFACE WATER MANAGEMENT STANDARDS. Lee County will continue to provide sufficient performance and/or design standards for development protective of the function of natural drainage systems.

POLICY 61.3.6: Require developments to provide surface water management systems, acceptable programs for operation and maintenance, and post-development runoff conditions that reflect the natural surface water flow rate, direction, quality, hydroperiod, and drainage basin.

See the Hydrological Restoration Plan and Stormwater Management Plan.

POLICY 63.1.1: The Wellfield Protection Ordinance will be amended whenever better technical data is developed and whenever additional potable wellfields are proposed.

The property is outside of the wellfield protection zones as noted on “Exhibit M6 – Wellfield Zone Lee Plan Map 4-C”.

POLICY 63.2.1: For maximum protection of groundwater resources, identify future wellfields and/or relocation site(s) for existing wellfields well in advance of need. Coordinate with SFWMD, other water suppliers, and DEP to avoid duplication and to assist in data collection and interchange.

An ERP is being sought under application No. 241222-48705. The permit, to the extent it complete, will be provided prior to the staff report for this case and the appearance in front of the Lee County LPA.

123.2.10: Require that development adjacent to aquatic and other nature preserves, wildlife refuges, and recreation areas be designed to protect the natural character and public investment in these areas.

The wetlands that occupy the northern third of the site abut conservation areas to the west, east and north. Additionally, the IHMP propose to restore and reclaim uplands that abut the Lee County 20/20 Imperial March Preserve lands to the west and the zoned conservation areas in the Troyer Brothers MPED.

OBJECTIVE 124.1: Protect and conserve the natural functions of wetlands and wetland systems by maintaining wetland protection regulations.

Wetlands for this project will not be impacted and in fact will be restored and improved according to the IHMP. The zoning MCP plan also specifies the area considered wetlands to be preserved and the SFWMD ERP is underway per application No. 241222-48705, depicting these same areas as preserved. In addition, the Lee Plan requires the site provide 55% recorded in a conservation easement which is also depicted on the MCP and in the ERP application.

POLICY 125.1.2: New development and additions to existing development must not degrade surface and ground water quality.

The proposed RPD will include two stormwater lakes within the MCP to address water quality. The surface water system will also be required to obtain an ERP from the South Florida Water Management District at the time of DO. The proposed amendment will not impact existing infrastructure in the area, including roadways, schools, and EMS.

POLICY 125.1.3: The design, construction, and maintenance of artificial drainage systems must provide for retention or detention areas and vegetated swale systems that minimize nutrient loading and pollution of freshwater and estuarine systems.

The proposed RPD will include two stormwater lakes within the MCP to address water quality. The surface water system will also be required to obtain an ERP from the South Florida Water Management District at the time of DO. The proposed amendment will not impact existing infrastructure in the area, including roadways, schools, and EMS.

POLICY 125.1.4 Developments which have the potential of lowering existing water quality below state and federal water quality standards will provide standardized appropriate monitoring data.

A water quality monitoring program will take place as required by the SFWMD and ERP as modified.

126.1.1: Natural water system features which are essential for retention, detention, purification, runoff, recharge, and maintenance of stream flows and groundwater levels shall be identified, protected, and managed.

The acceptance of the property as a Tier 1 resource and the data in the Hydrologic Restoration Plan and the IHMP puts 55% of the property in protection and removes the remaining portion of the property from the possibility of future agricultural operations.

126.1.4: Development designs must provide for maintaining or improving surface water flows, groundwater levels, and lake levels at or above existing conditions.

Again, see the Hydrologic Restoration Plan, the Stormwater Management Plan, the IHMP, Enhancement Lake Management Plan and draft Water Quality Monitoring Plan submitted as part of this application.

LEGAL DESCRIPTION

(PER EXHIBIT A OF TITLE CERTIFICATION PREPARED BY LEHNERT LAW, PLLC, EFFECTIVE DATE JUNE 13, 2025 AND SCHEDULE A, FIRST AMERICAN TITLE COMMITMENT NUMBER 110426235, COMMITMENT DATE: SEPTEMBER 11, AT 8:00AM)

THE EAST ONE-HALF OF THE EAST ONE-HALF OF THE WEST ONE-HALF OF SECTION 21, TOWNSHIP 46 SOUTH, RANGE 27 EAST, LEE COUNTY, FLORIDA; SUBJECT TO PUBLIC ROAD RIGHT-OF-WAY ALONG THE SOUTH SECTION LINE 100 FEET WIDE, THE CENTERLINE OF WHICH IS THE SOUTH LINE OF THE SECTION.

PROPERTY IS ALSO DESCRIBED AS:

A PARCEL OF LAND LOCATED IN THE WEST HALF OF SECTION 21, TOWNSHIP 46 SOUTH, RANGE 27 EAST, LEE COUNTY, FLORIDA, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGIN AT THE SOUTHEAST CORNER OF THE SOUTHWEST QUARTER OF SECTION 21, TOWNSHIP 46 SOUTH, RANGE 27 EAST, LEE COUNTY, FLORIDA, THENCE RUN S.89°23'32"W., ALONG THE SOUTH LINE OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21, FOR A DISTANCE OF 660.13 FEET TO THE SOUTHWEST CORNER OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21; THENCE RUN N.00°14'02"W., ALONG THE WEST LINE OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21, FOR A DISTANCE OF 5,263.56 FEET TO THE NORTHWEST CORNER OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21; THENCE RUN N.89°14'38"E., ALONG THE NORTH LINE OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21, FOR A DISTANCE OF 642.19 FEET TO THE NORTHEAST CORNER OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21; THENCE RUN S.00°25'45"E., ALONG THE EAST LINE OF THE EAST HALF OF THE EAST HALF OF THE WEST HALF OF SAID SECTION 21, FOR A DISTANCE OF 5,265.14 FEET TO THE POINT OF BEGINNING.

PARCEL CONTAINS 78.693 ACRES, MORE OR LESS.

NOTE:

PER TITLE CERTIFICATION PREPARED BY LEHNERT LAW, PLLC, EFFECTIVE DATE JUNE 13, 2025, RECORD TITLE TO THE PROPERTY DESCRIBED HEREON IS VESTED IN:

SEA 202, LLC, A GEORGIA LIMITED LIABILITY COMPANY, (AS TO AN UNDIVIDED 22% TENANT IN COMMON INTEREST) PURSUANT TO THAT SPECIAL WARRANTY DEED RECORDED IN OFFICIAL RECORDS INSTRUMENT NO. 2024000044590, PUBLIC RECORDS OF LEE COUNTY, FLORIDA.

CORKSCREW 78, LLC, A FLORIDA LIMITED LIABILITY COMPANY, (AS TO AN UNDIVIDED 50% TENANT IN COMMON INTEREST) PURSUANT TO THAT SPECIAL WARRANTY DEED RECORDED IN OFFICIAL RECORDS INSTRUMENT NO. 2024000044590, PUBLIC RECORDS OF LEE COUNTY, FLORIDA.

CORKSCREW ALICO, LLC, A FLORIDA LIMITED LIABILITY COMPANY, (AS TO AN UNDIVIDED 28% TENANT IN COMMON INTEREST) PURSUANT TO THAT SPECIAL WARRANTY DEED RECORDED IN OFFICIAL RECORDS INSTRUMENT NO. 2024000044590, PUBLIC RECORDS OF LEE COUNTY, FLORIDA.

THE PERSONS OR ENTITIES HOLDING A MORTGAGE SECURED BY THE PROPERTY ARE:

MORTGAGE FROM SEA 202, LLC, A GEORGIA LIMITED LIABILITY COMPANY, CORKSCREW 78, LLC, A FLORIDA LIMITED LIABILITY COMPANY, AND CORKSCREW ALICO, LLC, A FLORIDA LIMITED LIABILITY COMPANY TO CENTENNIAL BANK, AN ARKANSAS BANKING CORPORATION, DATED FEBRUARY 16, 2024 AND RECORDED FEBRUARY 19, 2024 IN OFFICIAL RECORDS INSTRUMENT NO. 2024000044595, PUBLIC RECORDS OF LEE COUNTY, FLORIDA.

DEPOSIT RELEASE MORTGAGE FROM SEA 202, LLC, A GEORGIA LIMITED LIABILITY COMPANY, CORKSCREW 78, LLC, A FLORIDA LIMITED LIABILITY COMPANY, AND CORKSCREW ALICO, LLC, A FLORIDA LIMITED LIABILITY COMPANY TO TOLL SOUTHEAST LP COMPANY, INC., A DELAWARE CORPORATION, DATED FEBRUARY 25, 2025 AND RECORDED MARCH 3, 2025 IN OFFICIAL RECORDS INSTRUMENT NO. 2025000055670, LEE COUNTY, FLORIDA.

THE PROPERTY IS SUBJECT TO ROAD RIGHT OF WAY ACROSS THE SOUTH PROPERTY LINE AS DESCRIBED IN WARRANTY DEED RECORDED IN INSTRUMENT NO. 2017000045370.

NOTE:

PER SCHEDULE B, PART II, FIRST AMERICAN TITLE COMMITMENT NUMBER 110426235, COMMITMENT DATE: SEPTEMBER 11, 2024 AT 8:00 AM, THE PROPERTY SURVEYED HEREON IS SUBJECT TO THE FOLLOWING MATTERS OF RECORD.

(#) INDICATES EXCEPTION NUMBER (SCHEDULE B, PART II)

9. RESERVATIONS FOR OIL, GAS AND MINERALS CONTAINED IN INDENTURE RECORDED IN DEED BOOK 262, PAGE 361, AS AFFECTED BY NOTICE OF INTEREST IN OIL, GAS AND MINERALS RECORDED IN BOOK 1093, PAGE 493; WARRANTY DEED IN FAVOR OF CONSOLIDATED-TOMOKA LAND CO., A DELAWARE CORPORATION, RECORDED IN BOOK 553, PAGE 114; WARRANTY DEED IN FAVOR OF INDIGO GROUP, INC., A FLORIDA CORPORATION, RECORDED IN BOOK 4516, PAGE 2118, AND QUIT CLAIM DEED RECORDED IN INSTRUMENT NO. 2023000301646. (NO DETERMINATION HAS BEEN MADE AS TO THE CURRENT RECORD OWNER OF THE INTEREST EXCEPTED HEREIN. (SURFACE ENTRY RIGHTS AND EXPLORATION HAVE BEEN WAIVED AND ARE DELETED PURSUANT TO THE MARKETABLE RECORD TITLE ACT.) (AFFECTS THE PROPERTY SURVEYED HEREON, EXCEPTION IS BLANKET IN NATURE AND CAN NOT BE PLOTTED).

10. RESERVATION OF OIL, GAS AND MINERALS CONTAINED IN SPECIAL WARRANTY DEED RECORDED IN BOOK 1286, PAGE 216, AS AFFECTED BY QUIT CLAIM DEED IN FAVOR OF THE PROSPECT COMPANY, RECORDED IN BOOK 1603, PAGE 1249 AND QUIT CLAIM DEED IN FAVOR OF LEE COUNTY, A POLITICAL SUBDIVISION, RECORDED IN BOOK 3288, PAGE 350, AND COUNTY DEED RECORDED IN INSTRUMENT NO. 2023000301646. (NO DETERMINATION HAS BEEN MADE AS TO THE CURRENT RECORD OWNER OF THE INTEREST EXCEPTED HEREIN. (SURFACE ENTRY RIGHTS AND EXPLORATION HAVE BEEN WAIVED AND ARE DELETED PURSUANT TO THE MARKETABLE RECORD TITLE ACT.) (AFFECTS THE PROPERTY SURVEYED HEREON, EXCEPTION IS BLANKET IN NATURE AND CAN NOT BE PLOTTED).

11. OIL, GAS AND MINERAL RIGHTS CONTAINED IN WARRANTY DEED IN FAVOR OF INDIGO GROUP, INC., A FLORIDA CORPORATION, RECORDED IN BOOK 4516, PAGE 2118, AS AFFECTED BY QUIT CLAIM DEED RECORDED IN INSTRUMENT NO. 2023000301646. (NO DETERMINATION HAS BEEN MADE AS TO THE CURRENT RECORD OWNER OF THE INTEREST EXCEPTED HEREIN. (SURFACE ENTRY RIGHTS AND EXPLORATION HAVE BEEN WAIVED AND ARE DELETED PURSUANT TO THE MARKETABLE RECORD TITLE ACT.) (AFFECTS THE PROPERTY SURVEYED HEREON, EXCEPTION IS BLANKET IN NATURE AND CAN NOT BE PLOTTED).

12. EASEMENT FOR PUBLIC ROAD RIGHT-OF-WAY ACROSS THE SOUTH PROPERTY LINE AS SET FORTH IN WARRANTY DEED RECORDED IN INSTRUMENT NO. 2017000045370. (AFFECTS THE PROPERTY SURVEYED HEREON AND IS PLOTTED AS SHOWN)

13. TERMS AND CONDITIONS OF ANY EXISTING UNRECORDED LEASE(S), AND ALL RIGHTS OF LESSEE(S) AND ANY PARTIES CLAIMING THROUGH THE LESSEE(S) UNDER THE LEASE(S).

NOTE: ALL OF THE RECORDING INFORMATION CONTAINED HEREIN REFERS TO THE PUBLIC RECORDS OF LEE COUNTY, FLORIDA, UNLESS OTHERWISE INDICATED. ANY REFERENCE HEREIN TO A BOOK AND PAGE OR INSTRUMENT NUMBER IS A REFERENCE TO THE OFFICIAL RECORD BOOKS OF SAID COUNTY, UNLESS INDICATED TO THE CONTRARY.

CORKSCREW 80 CPA TIER ANALYSIS
EXECUTIVE SUMMARY

This memo is a summary of the Southeast Lee Planning Area *DR/GR Priority Restoration overlay* that resulted in the Special Treatment Areas, or Tiers, found in Lee Plan Map 1-D and an analysis of Lee Plan Goal 33 as it applies to the property included in the Corkscrew 80 CPA-RPD.

OVERVIEW

The two studies that together created the priority approach to preservation of major lands in the DR/GR are the *Ecological Memorandum of the Density Reduction/Groundwater Resource Area (DR/GR)* and the *Prospects for Southeast Lee County (Dover-Kohl Study)*. A third study focused on implementation of the recommendations targeting specific sites for public acquisition. It was called the *Imperial Marsh Preserve Management Plan*.

The Ecological Memorandum, the first and most detailed study, placed the subject property in the Priority II area identified as lands "predominantly in agricultural use and would add additional water storage capacity and habitat values to previously restored Priority I areas." Priority I areas in this study were reserved for "large intact areas of native lands or farm fields". The size of the property was a major factor for the property not being included in the Priority I area yet, once those were restored, Priority II areas would be the next most important lands. The Priority I lands have been actively pursued and acquisition or preservation efforts made. The subject property abuts a restored public acquisition making it part of the next most important priority.

The follow up policy report by Dover-Kohl placed the property in a Priority I area which was generally described as lands that were "core flowways, [had the] largest restoration potential, native habitat intact or easily recoverable". The Imperial Marsh Plan – a deep dive into three specific properties that were targets for public acquisition and restoration – identified three sites that were available for public acquisition at the time of the study, one of which was site 93 that abuts the subject property to the west, which later became part of Lee County 20/20.

The Dover-Kohl study recommendations to Lee County staff placed the subject property in Priority 1 and Scenario 1 as the highest priority and most effective in meeting the policy goals. The final Lee Plan amendment language recommendations from Dover-Kohl placed the tiering system for the subject property as Tier 2. Tier 2 is a significant recommendation as it included future lands that are significant parts of regional preservation efforts and have become successful acquisitions for public ownership.

The final adopted Lee Plan amendments and map identifying the tier assignments removed the property from any classification for reasons that were not specified. Based on the data it does not seem it was because of a lack of ecological or hydrological benefit, but rather on choices for the initial priorities that would produce the most benefit and were available at the time for possible public acquisition. A recommendation was included to revisit the tier assignments every seven years, but the final version adopted in the Lee Plan made a more general guideline in Policy 33.1.2 stating, "Lee County may consider amendments to this Overlay based on changes in public ownership, land use, new scientific data, and/or demands on natural resources." There are only a few properties of any tier remaining that have not been restored and preserved either privately through zoning actions or through public acquisition. It is time to revisit the next group of properties that were considered high priorities which include the subject property.

CONCLUSION

Approval of this Comprehensive Plan Amendment to move this property into the EEPCO and the Tier 1 priority area will allow a majority of the Property to be preserved and restored and the remaining area to develop at densities that are supported by the County's investment in public infrastructure in the Corkscrew Road corridor. If not moved into the overlay, the resulting development would be urban sprawl, by allowing for very low-density residential uses on well and septic systems located directly on an arterial roadway network, and the restoration and conservation requirements in the EEPCO would not be applied. This is an area where the County has significant financial investment in infrastructure improvements for the purpose of accommodating future population growth including investments in conservation lands abutting the property.

In general, the eastern Corkscrew Road corridor is an environmentally dynamic and urbanizing area with entitlements allowing for nearly 27,000 residences and 1 million square feet of supportive commercial uses. Non-residential uses include a range of neighborhood retail services, a gas station, Publix anchored commercial shopping centers and more. Residential development is characterized by scattered, older, large lot homesteads and large master planned communities within large tracts of preserved and restored environmentally sensitive areas. In time, the corridor will develop into a bedroom community of 50-60,000 residents, while being an example of the balance between growth and conservation efforts, most of which has been funded by private development. This request represents another such opportunity.

It is well documented in this analysis and past studies that the property and surrounding areas are of critical environmental importance. The subject property is central to a local confluence of public and private preservation and conservation areas. In the past studies the land was identified as having significant ecological and hydrological value and was included among the highest priorities for restoration and preservation. The requested move to EEPCO and Tier 1 will allow for residential development to cluster on site at the same densities as the master planned communities in the corridor and complete the local connection of wildlife corridors, wetlands, restoration efforts and conservation. A decision to not include it in the overlay or only accept it into a lesser tier, resulting in lower density, not only misses the opportunity to capitalize on privately funded environmental improvements but also underutilizes the infrastructure in place.

For these reasons, the Applicant submits that the proposed Comprehensive Plan Map Amendment is based upon sound planning principles and respectfully requests approval.

APPENDIX
BACKUP DATA

SECTION 1

The first section is a summary of the prioritization process for preservation in Southeast Lee County's DR/GR area as it applies to the property included in the Corkscrew 80 CPA-RPD.

OVERVIEW: A THREE-PRONGED FOUNDATION

The prioritization of DR/GR lands into Tiers 1–7 was driven by:

1. Detailed ecological and hydrological analysis (Ecological Memorandum)
2. Policy and scenario planning (Dover-Kohl Study)
3. On-the-ground and GIS-based restoration needs (Imperial Marsh Plan)

Together, these documents created a hierarchy based on ecological function, hydrology, habitat connectivity, and feasibility of preservation or restoration.

1. The Ecological Memorandum provided the scientific basis—historic hydrology, wetland loss, agricultural conversion—for identifying the most valuable and restorable lands.
2. The Dover-Kohl Study translated that into a tiered planning strategy, integrating public policy goals and stakeholder input.
3. The Imperial Marsh Plan shows the boots-on-the-ground execution of these priorities.

Tiering was based on:

- Ecological function and degradation level
- Hydrological connectivity and flow
- Restoration feasibility
- Proximity to existing conserved areas
- Land use pressures and conversion risk

KEY PROCESSES AND CRITERIA USED TO PRIORITIZE LAND

1. Ecological and Hydrological Reconstruction (Ecological Memorandum)

The Ecological Memorandum, prepared by Kevin L. Erwin Consulting Ecologist, Inc., provided the scientific backbone for prioritization.

Methods Used:

- Historic aerial interpretation (1953) and GIS overlay with 2007 aerials
- Mapping of historic hydropatterns (see Figure 1, p.5) and present-day wetland conditions (Figure 4, p.10)
- Quantitative assessment of wetland loss, conversion, and fragmentation
- Hydropatterns classified by depth and duration of wet season inundation

Key Findings:

- 40% of wetlands lost since 1953, with >60% loss of deep/long-hydroperiod wetlands
- 85% of agriculture developed on formerly wetland soils (especially citrus and row crops)
- Agricultural lands often retain enough shallow groundwater to be restorable
- Three priority levels for wetland restoration were mapped (Figures 6–9, pp.14–17), categorized by:
    - Strategic hydrological position
    - Degree of fragmentation

- Adjacent land use compatibility
- Ecological and habitat restoration potential

This ecological data fed directly into the restoration framework that shaped the Tier system later referenced in policy.

Priority Areas

The highest priority restoration areas (Priority 1) are typically large intact areas of native lands or farm fields that have strategic importance due their location. These high priority restoration areas provide necessary reconnections of fragmented hydropatterns and native habitat corridors with a secondary but very important benefit to wildlife.

Priority II areas are predominantly in agricultural use and would add additional water storage capacity and habitat values to previously restored priority I areas. Priority III areas are non-strategic lands, some near existing active mines where drainage impacts may be an issue on adjacent properties.

CONCLUSION

Ecological Memorandum as it Applies to Corkscrew 80

Figure 9 was taken from the study with the location of the subject property identified. The Corkscrew 80 property was included as a Priority II area which abuts a property that is now part of the Lee County 20/20 conservation lands. The Priority I areas were highlighted as large intact parcels likely disqualifying the subject parcel from Priority I status as even future smaller properties accepted for conservation were not in Priority I.

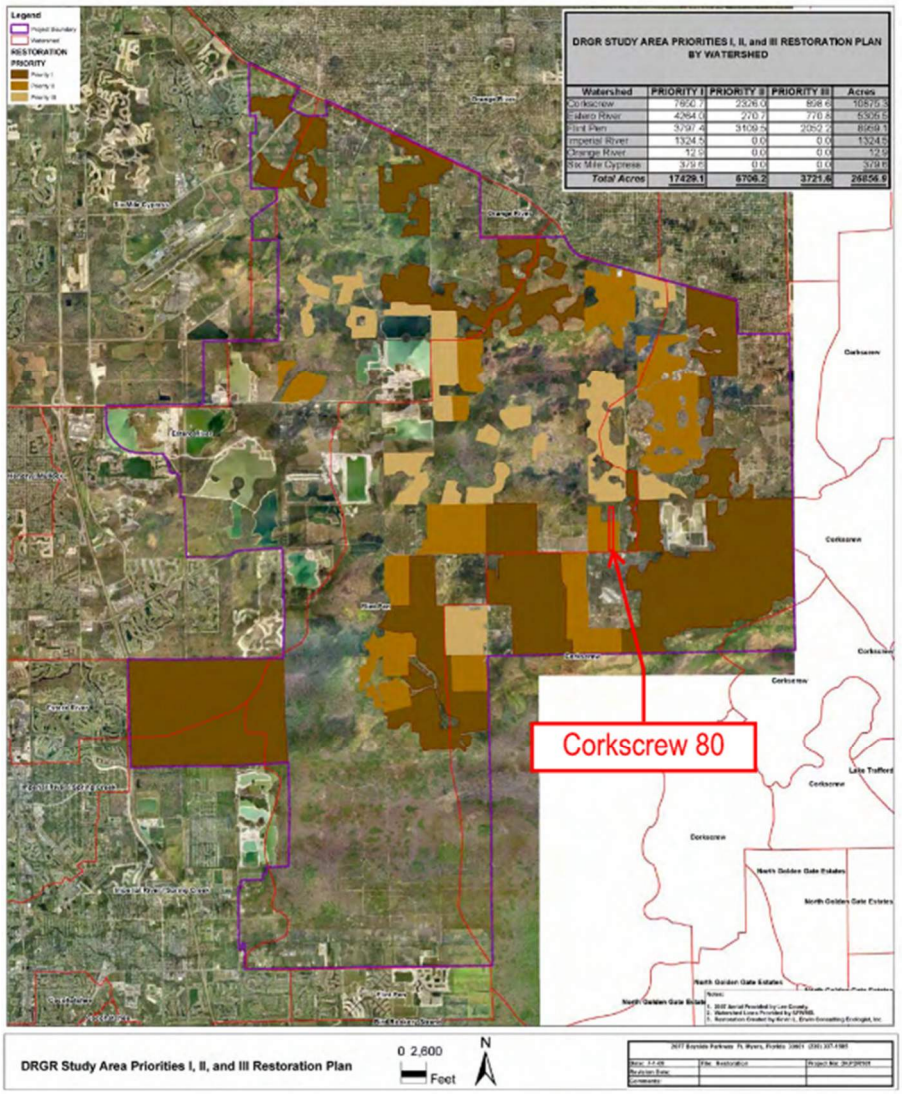

Figure 9

2. Restoration Priorities and Tier Logic (Dover-Kohl Study – Prospects for Southeast Lee County)

The Dover-Kohl study applied Erwin's ecological findings in a planning context, generating:

- A conceptual land use scenario model
- A mapped hierarchy of conservation priorities
- Tiered recommendations based on flowways, recharge zones, and ecological corridors

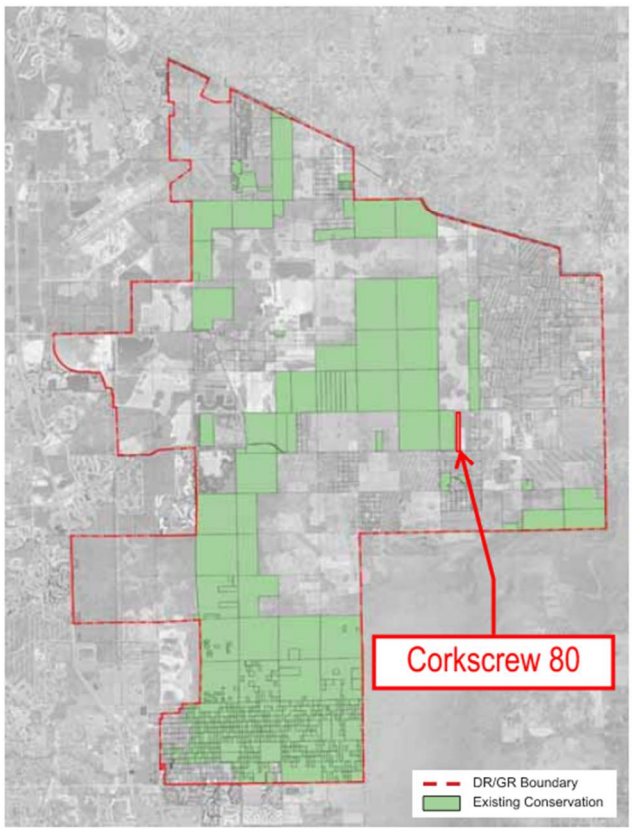
Criteria for Tier Assignment:

- Tiers 1–2: Core flowways, largest restoration potential, native habitat intact or easily recoverable
- Tiers 3–4: Intermediate value—partially developed or fragmented, but still functionally valuable
- Tiers 5–6: Buffer zones, less ecological urgency, moderate compatibility with development
- Tier 7: Degraded or converted lands with limited or no restoration feasibility

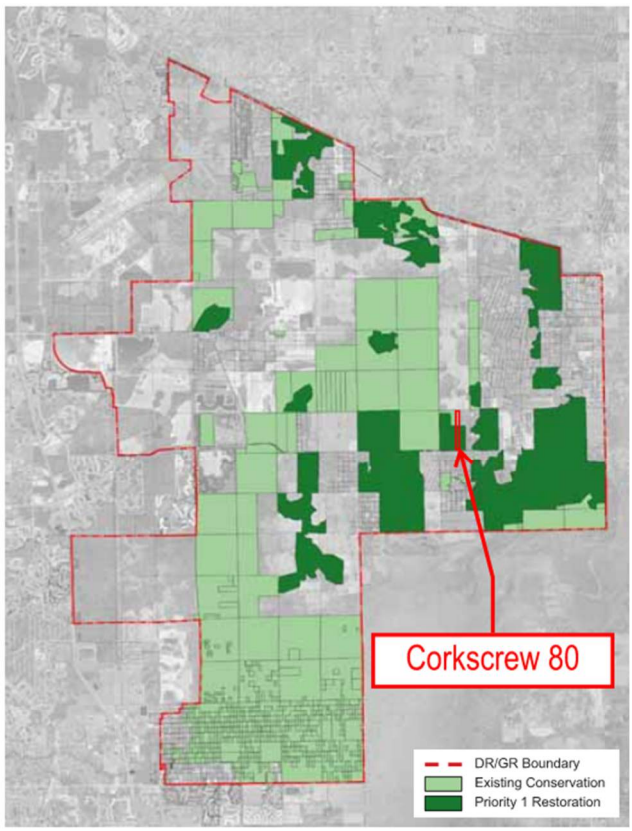
The study first created four larger categories mapping Priority Areas 1-4 focusing on restoration potential and desirability. On the following pages are graphics taken from the Dover-Kohl Study that identify the location of the subject property as it relates to the recommended conservation lands. The restoration lands are ranked on their capacity for flowway restoration and their role in maintaining historic groundwater levels.

The first graphic below shows the conservation lands that were existing qat the time of the study (circa 2008) and added the lands that should be the highest priority for restoration. While there were many criteria a simplification of the property's locations shows large properties with connections or shared boundaries to existing conservation areas or lands within those existing conservation areas that are desirable for restoration. As you can see below the subject property was placed in this Priority I category.

Restoration Priorities and a Step-by-Step Restoration Strategy



Existing lands conserved within the DR/GR

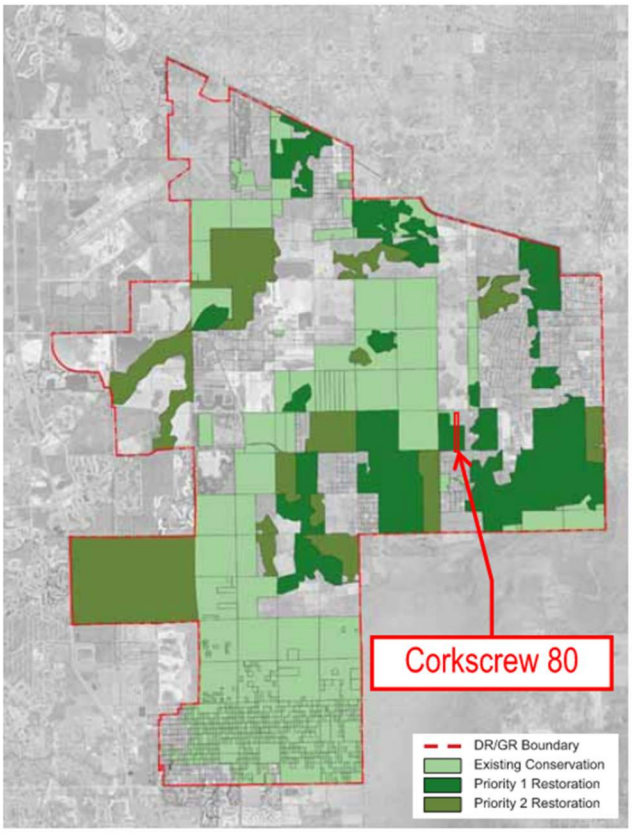


Priority 1 lands that could be restored

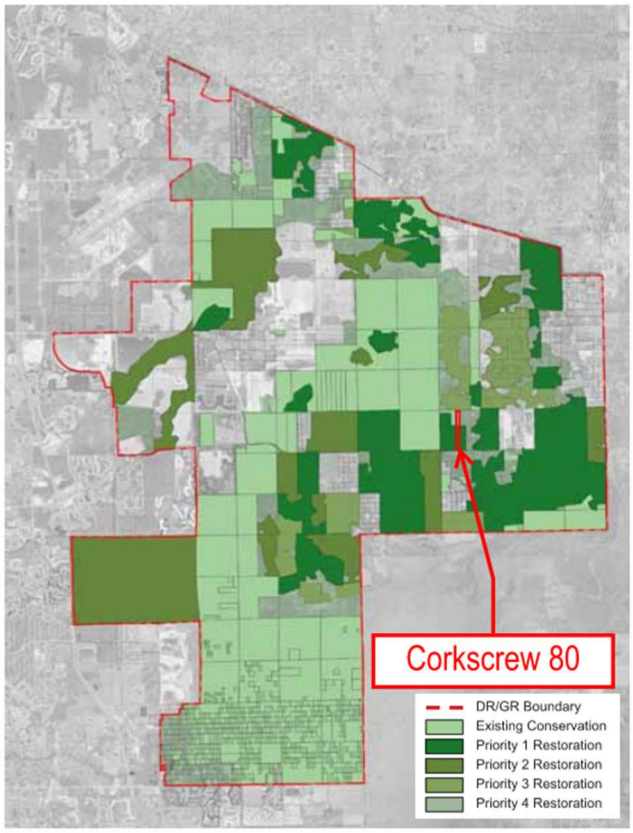
Restoration lands are ranked based on their capacity for flowway restoration and their role in maintaining historic groundwater levels.

4.12 July 2008

The next graphic further delineates the DR/GR into lesser prioritizations. The property to the north of the subject property was active agriculture that was heavily bermed and fragmented from larger conservation areas.



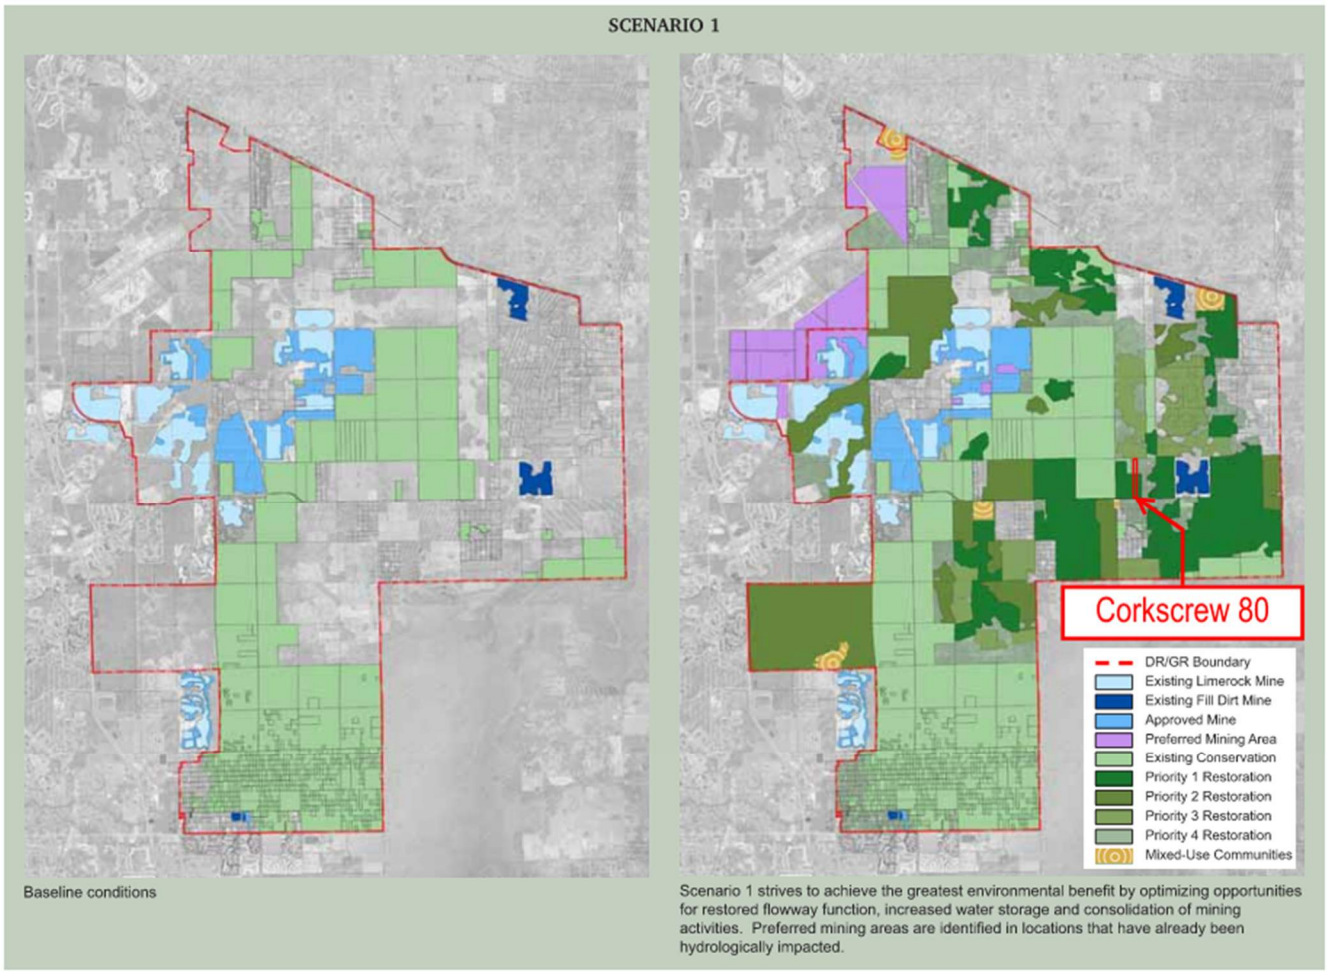
Priority 2 lands that could be restored have been added.



Priority 3 and 4 lands that could be restored have been added.

July 2008 4.13

The study further recommended three scenarios. The subject property was included as Priority 1 in all three scenarios. Scenario 1 was the final recommendation by the consultant because it provided the "best overall balance protecting vital natural resources while meeting the demand for limerock products for southwest Florida." The best opportunities for flowway restoration and increased water storage were identified in this scenario. Priority 1 lands would begin to link flowways together; Priority 2, 3, and 4 lands would further complete the system over time.



The graphic on the next page is the final recommendation to Lee County staff which included the initial mapping of the Tiers. The subject property was placed in Tier 2 as were other significant areas that have been made part of major regional conservation and restoration efforts such as the SFWMD Corkscrew Mitigation Bank, Corkscrew Mitigation Bank, Greater Imperial Marsh (Airport Mitigation Park) and Imperial Marsh Preserve (Galloway Tract) as shown to the right.

CONCLUSION

Prospects for Southeast Lee County Study as it Applies to Corkscrew 80

The Corkscrew 80 property was included as a Priority I Restoration area citing the property as part of those which provided "core flowways, largest restoration potential, native habitat intact or easily recoverable."

The initial Tier recommendation made by Dover-Kohl in the proposed Lee Plan amendments document placed the subject property in Tier 2 as part of land that was potentially eligible for public acquisition.

The final adoption of Tiers was to leave the subject property off the Tier list. There is no clear explanation, but it can be a logical conclusion that the property, for various reasons, wasn't available for public acquisition and therefore was not a priority at the time of the recommended actions and was a smaller property. This is clarified in the recommended policy language stating, "Map 25 identifies seven tiers of land potentially eligible for acquisition, with Tier 1 and Tier 2 being the highest priority for protection from irreversible land-use changes."

As a protection against changes in the area the map was to be regularly reevaluated stating, "Lee County will evaluate this overlay map every seven years to determine if changes in public ownership, land use, and demands on water resources justify updating this map." Lee County changed this language to be more general, but the intent is to revisit the Tier mapping over time.

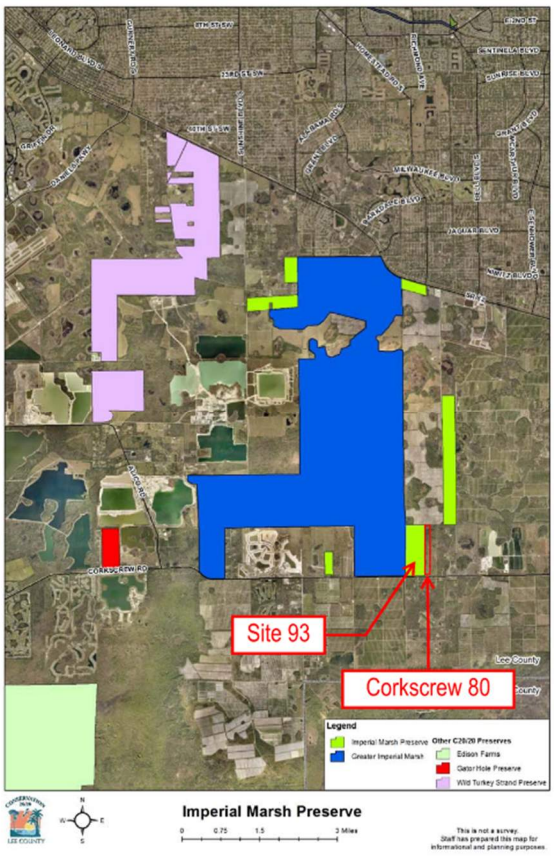
3. Site-Level Validation (Imperial Marsh Management Plan)

The Imperial Marsh Preserve (IMP) illustrates how individual parcels were evaluated for inclusion and tiering:

- Site 93: Actively restored and monitored—likely Tier 1 or 2
- Sites 321/334: Reserved for mitigation and passive restoration—mid-range Tier (3–5)
- Site 567: Panther corridor and shallow marsh creation planned—Tier 2 or 3 likely

This real-world management reflects the criteria hierarchy outlined in the Dover-Kohl and Erwin reports: the more intact or strategically valuable the land, the higher its Tier and conservation urgency.

Figure 1: Location



<u>SITE 93 Restoration Efforts</u>

The site was acquired by Lee County and incorporated into C20/20 in 2000. Since then, various management activities have occurred, including a hydrologic restoration project. The hydrologic restoration included the installation of a series of small depressional marshes, berm breaks and ditch plugs on the interior berm, and a control structure set at an elevation of 29 feet NGVD 29 to optimize water levels in the preserve. The control structure includes a set of movable risers if adjustments are necessary in the future. The material from the marsh

creation was used to create a raised staging area adjacent to Corkscrew Road, which serves as a parking and wildlife viewing area. A diversity of native vegetation, including cypress, buttonbush (Cephalanthus occidentalis), dahoon holly (Ilex cassine) and red maple were planted in the interior of the western field in 2013. Exotic removal is on-going.

Figure 4: Site 93 Soils

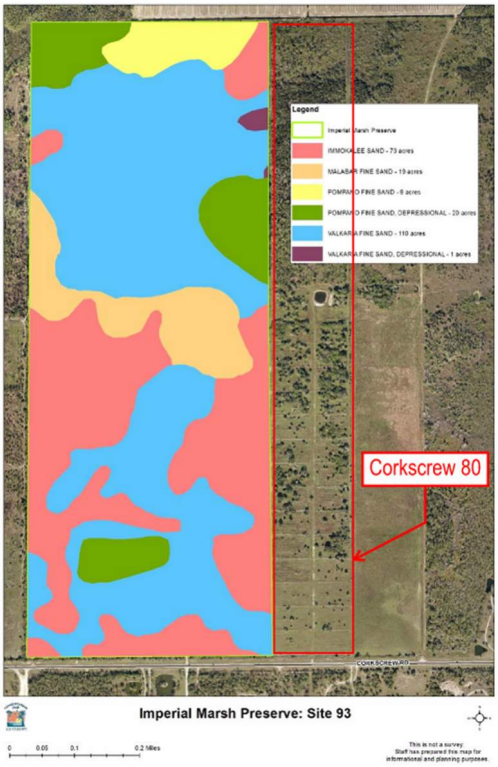


Figure 12: National Wetlands Inventory

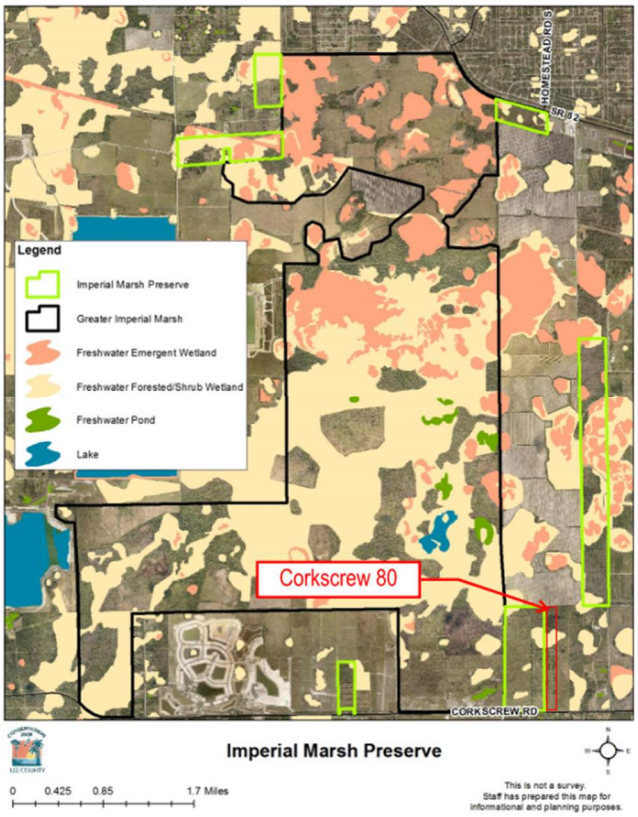


CONCLUSION

Imperial Marsh Management Plan

Site 93 was available for public acquisition at the time of implementation of the Dover-Kohl recommendations where the subject property was not considered at the time. Nevertheless, the property had the same ecological and hydrological ranking in the studies that made up the recommendations.

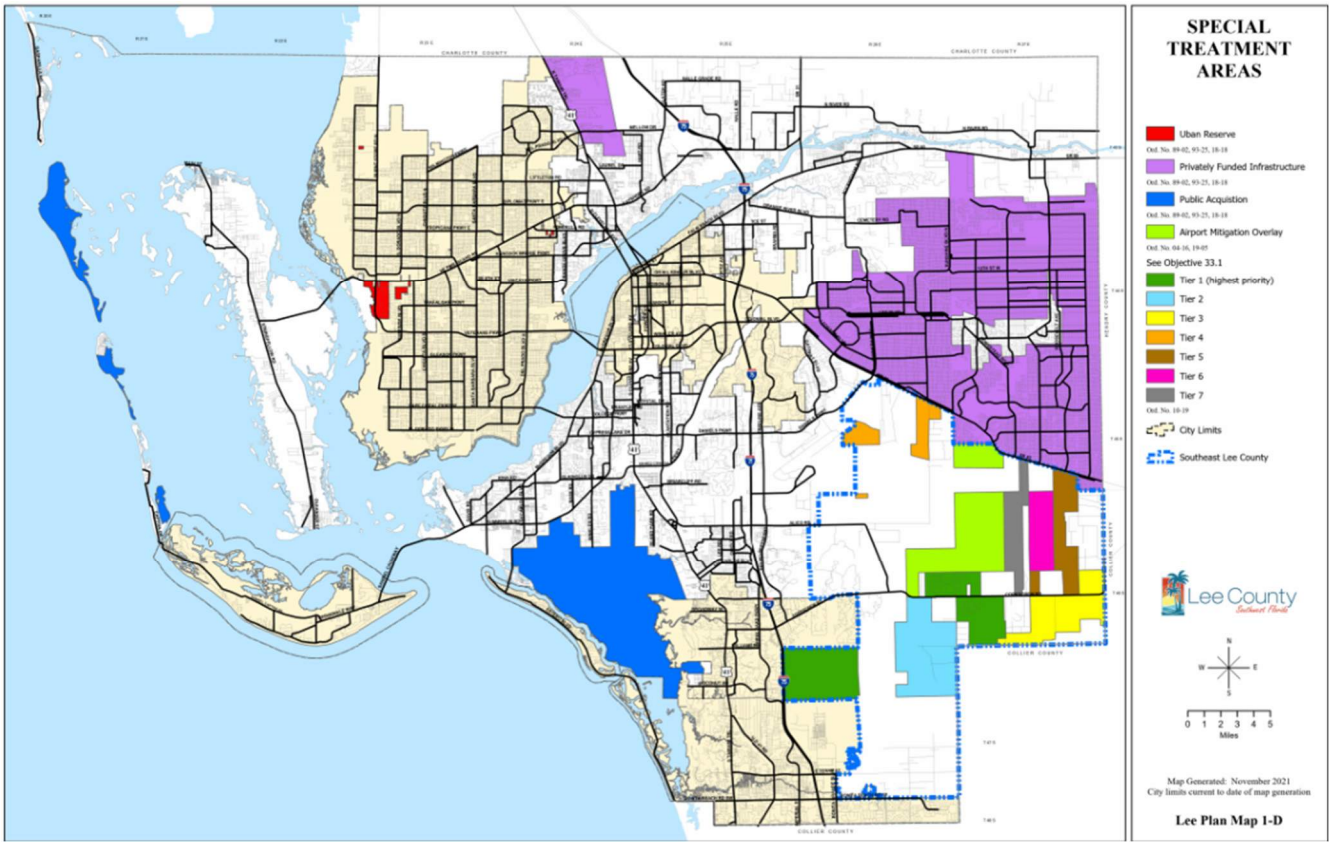
SECTION 2

Section 2 breaks down the current policies of the Lee Plan, specifically Goal 33, as it applies to the subject property.

Goal 33

The goal statement is to “Protect Southeast Lee County’s natural resources through public and private acquisition and restoration efforts. Development incentives will be utilized as a mechanism to preserve, enhance, and protect natural resources, such as regional flow-ways and natural habitat corridors in the development of privately owned land.”

The statement expands the original studies focus from acquisitions as a primary tool for restoration to also include development incentives as the mechanism to not only restore but also to "preserve, enhance, and protect" resources through development of privately owned lands. This is important as the original studies final priorities were directed towards lands that could first be acquired and controlled by local or state agencies but now allows for incentives for private developers. This expansion of the goal fits the subject property precisely and should lead to a stronger conclusion that this property is correct to be considered for as a high priority property on a revised Map 1-D, particularly given that nearly all tiered properties on the current map have been acquired or are part of private development zoning or developers' agreements with conservation and restoration incentives. One such property is the Jameson Tier 4 property abutting SR 82, otherwise, the current tier priorities have run their course.



Policy 33.1.1

The first policy establishes the that, "Large-scale ecosystem integrity in Southeast Lee County should be maintained and restored. Protection and/or restoration of land is of even higher value when it connects existing corridors and conservation areas. Restoration is also highly desirable when it can be achieved in conjunction with other uses on privately owned land including agriculture." The subject property is an extension of a Lee County conservation area and is offering restoration to its current wetlands that connect to the abutting conservation lands as well as 55% conservation overall. Adding this property is consistent with the original study that included this as a high priority area.

Policy 33.1.2

This policy created the **seven tiers** of land where "protection and/or restoration would be most critical to restore historic surface and groundwater levels and to connect existing corridors or conservation areas." Important to note that the subject property connects to existing conservation lands consistent with this policy.

This policy also established the criteria for revisiting the map but does not create a timeline as recommended in the original studies stating, "Lee County may consider amendments to this Overlay based on changes in public ownership, land use, new scientific data (per this application), and/or demands on natural resources." The subject property has been affected by public ownership as the Lee County 20/20 land abutting took place as a recommendation of the studies.

Lee Plan Description in Policy 33.1.3

TIERS	Qualifiers	***Subject Property Analysis***
1	Pursue acquisition (partial or full interest) of land within the **Tier 1** areas in the Priority Restoration Strategy Overlay through direct purchase; partnerships with other government agencies; long-term purchase agreements; right of first refusal contracts; land swaps; or other appropriate means to *provide critical connections to conservation lands that serve as the backbone for water resource management and wildlife movement within Southeast Lee County*.	*QUALIFIES: The subject property was considered part of the highest priority lands in SE Lee County in the original study. The property shares environmentally sensitive areas with the abutting Lee County 20/20 conservation land which also connects to the SFWMD Corkscrew Mitigation Bank, the Corkscrew Mitigation Bank, and the Greater Imperial Marsh (Airport Mitigation Park).* *The tier 1 policy allows for "other appropriate means" of capturing land for conservation which we believe is by providing development incentives to privately owned land to meet conservation goals without public funding.*
2	**Tier 2** lands are of *equal ecological and water resource importance as Tier 1* but have better potential to remain in productive agricultural use.	*UNQUALIFIED: The site has been agriculturally used in the past but is not in a favorable location to reestablish agricultural uses nor is that use desired on a small, isolated property next to conservation lands.*
3	**Tier 3** lands and the southern two miles of **Tiers 5, 6, and 7** can provide an *important wildlife connection to conservation lands in Collier County and an anticipated regional habitat link to the Okaloacoochee Slough State Forest*.	*UNQUALIFIED: The property can provide a wildlife corridor improvement but is not of the size or correct location to directly affect the regional habitat link to Collier County conservation lands or the Okaloacoochee Slough State Forest.*
4	Not addressed in the Lee Plan.	*NA*
5-7	**Tiers 1, 2, 3**, and the southern two miles of **Tiers 5, 6, and 7** may qualify for unique development incentives outlined in Objectives 33.2 and 33.3 due to the property's *potential for natural resource benefits and/or wildlife connections*. Additionally, the County may consider incentives, within all tiers, for private landowners to *improve water resources and natural ecosystems*.	*UNQUALIFIED: The subject property is west of the tier 5-7 properties and do not share primary characteristics with those properties. The tier 5-7 properties to the east of the subject property form a large mass that are north of and can feed wildlife connections and hydrological benefits south to tier 3 lands that go into Collier County.* *The subject property's characteristics are more consistent with tier 1 and 2 lands to the west particularly as it abuts Lee County 20/20 conservation land, which connect to the SFWMD Corkscrew Mitigation Bank, the Corkscrew Mitigation Bank, and the Greater Imperial Marsh (Airport Mitigation Park)* *The County's adopted incentives did not provide explicit incentives for private development after tier 3 but the Lee Plan clearly allows for such a benefit.*

RE: ENVIRONMENTAL BENEFITS SUMMARY MEMO
CORKSCREW 80 CPA-RPD | DCI2024-00030 and CPA2024-00011 and 12

Dear Ms. Burgess:

This memo is to summarize the revised data, reports and new information that address the comments from staff asking for further justification for entrance into the Environmental Enhancement and Preservation Communities Overlay (EEPCO) and Tier 1 priority.

As has been established in the referenced cases the Corkscrew Alico, LLC, ("Applicant") seeks to develop property located at 20351 Corkscrew Road in unincorporated Lee County, Florida, approximately five miles east of Corkscrew Road and Alico Road intersection. The Applicant has applied for a Large-Scale Comprehensive Plan Map Amendment to amend the following Lee Plan maps:

- Map 1-D – Special Treatment Areas Tier 1 – to add the Property to Tier 1,
- Map 2-D – Southeast DR/GR Residential Overlay – to add the Property to the Environmental Enhancement and Preservation Communities Overlay (EEPCO), and
- Maps 4-A and 4-B to designate the Property in the Lee County Utilities (LCU) services area to connect to centralized potable water and sanitary sewer services.

Additionally, the Applicant seeks to rezone the 78.69+/- acres (77.94+/- acres and 0.75 acres in the right-of-way) from AG-2 to RPD to allow for 78 single-family dwelling units with supporting amenities.

Approach

The proposed development located within Lee County's Density Reduction/Groundwater Resource (DR/GR) area, has been strategically developed to ensure full compliance with the broad natural resource protection standards outlined in the Lee Plan pertaining to surface water quality, groundwater protection, and indigenous preservation/protected species habitat. The approaches are noted in detail in the following documents contained in the resubmittal:

1. Indigenous Habitat Management Plan (IHMP)
2. Protected Species Management Plan (PSMP)
3. Hydrogeologic Water Resources Report and Enhanced Lake Management Plan
4. Hydrologic Restoration Report and Map
5. Imperial Marsh Preserve (site 93) Enhancement Plan

The project is designed not only to maintain current natural resource protection conditions but also to provide measurable enhancements, including offsite improvements to 20 acres of Lee County 20/20 lands.

Key features of the project redesign include:

- **Open Space:** The MCP establishes a minimum of 60% open space including 55% in a conservation easement.
- **Conservation Easement:** The revised IHMP establish a minimum of 55% of the property in a conservation easement. This includes 43.75 acres of wetlands, pine flatwoods and cypress that will be enhanced, planted and restored. The proposed restoration plan includes safeguards for the establishment and survivability of restoration plantings, including the use of larger tree and shrub material compared to other large-scale restoration projects in the DRGR; conducting as-built surveys prior to planting to ensure that appropriate grades have been achieved; obtaining soil borings in upland restoration areas to ensure that the underlying soil types contain the sandy or mixed sandy soils necessary for the establishment of upland habitat types; defined success criteria that require a minimum 80 percent survivability of restoration plantings after five years.
- **Wetland Enhancement and Planting:** Per the revised IHMP the project will retain 100% of the on-site wetlands, or 23.55 acres. This includes 12.80 acres of existing indigenous wetlands that will be enhanced and reestablished and 10.75 acres of non-indigenous wetlands that will be mechanically enhanced and planted.
- **Upland Enhancement:** Per the revised IHMP approximately 8.10 acres of uplands will be enhanced and preserved or placed in a conservation easement. This consists of upland pine flatwoods that contain moderate densities of exotics.
- **Upland Restoration:** Per the revised IHMP approximately 11.10 acres of uplands that were previously cleared and converted to agriculture will be restored and placed within the conservation easement or preserved.
- **Initial Exotic Vegetation Treatment:** Per the revised IHMP all exotic and nuisance species (defined per LDC Sec. 10-420(f) and Category I and II species on the Florida Exotic Pest Plant Council's List of Invasive Species) within the upland and wetland preservation areas will be treated.
- **Increased Contiguity of Preserve Areas:** The revised IHMP results in a larger, more contiguous preserve area with a connection to abutting Lee County 20/20 lands than what naturally exists or would ever exist without approval of this project.
- **Enhanced Lake Management Plan (ELMP):** The plan follows best practices for erosion control and bank stabilization; deep lake management; and fertilizer and pesticide use to reduce nitrogen and phosphorous loading to the stormwater management system.
- **Enhanced Water Quality Monitoring:** A more robust surface water and groundwater quality monitoring program will be implemented in accordance with the updated Enhanced Lake Management Plan (ELMP), ensuring ongoing environmental oversight and compliance.
- **Improved Stormwater Management:** The project has a long history of agricultural operations, which have resulted in disconnected surface water flow paths and isolated sub-basins. The attenuation of stormwater will improve the hydrologically impacted project area through enhanced recharge of groundwater to the Water Table Aquifer. After treatment, stormwater will be directed to the restoration areas to help improve the onsite hydrology. Additional polishing of the runoff water quality and nutrient uptake will occur in the large restoration areas further reducing downstream nutrient loading.
- **Minimal Irrigated Area:** The total irrigated area has been reduced to 12.76 acres of turf grass and landscaping, or only 16.2% of the total project.
- **Reduced Irrigation Demand:** The proposed project will include two stormwater management lakes that will intersect permeable limestone of the Water Table Aquifer. Irrigation will utilize an

installed drip irrigation system to reduce overall irrigation requirements by at least 30% compared to traditional spray methods and adhere to Lee County and SFWMD conservation measures. All existing permitted wells for the Troyer Brother's Farm project identified located on the Property will be plugged and abandoned. The proposed irrigation system will consist of stormwater harvesting from the stormwater lake management system with up to 100% of these withdrawals re-supplied by groundwater. The proposed source of groundwater to supplement lake withdrawals will be fresh groundwater from a backup standby well installed in the Surficial Aquifer System and/or Sandstone Aquifer underlying the site as permitted with the SFWMD.

- **Sustainable Water Sources:** Irrigation will continue to utilize a combination of surface water (detained stormwater) and groundwater, which is expected to reduce overall groundwater withdrawals.
- **Increased Groundwater Recharge Potential:** Integrated modeling indicates that the redesigned stormwater management system will increase groundwater recharge to the underlying Water Table Aquifer.
- **Water Use Permit Reduction:** By removing the acreage for future possible irrigation the projected water use will meet the criteria for a small Individual Water Use Permit issued by the SFWMD and will not exceed annual average allocation of 100,000 gallons per day (gpd). The agricultural operations, known as the Troyer Brother's Farm project, maintained a water use permit (WUP No. 36-01461-W) for the irrigation through the SFWMD since the early 1990's. The permit currently includes the allocations for the irrigation of 1,181-acres of potatoes or about 3.13 million gallons per day (MGD) on an annual average basis and 8.2 MGD on a maximum monthly basis from the Sandstone Aquifer. The permit includes an additional 14.83 million gallons (MG) allocated for freeze protection from the Water Table Aquifer.
- **Hydrological Improvements:** In addition to the conservation and preserve areas, the project proposes collection, treatment, and conveyance of stormwater within the project's water management system including littoral planting areas, the use of water treatment best management practices (BMPs) of fertilizers, herbicide, and fungicide applications, and centralized control over the application of irrigation water.
- **Imperial Marsh Preserve (site 93) Enhancement Plan:** In addition to onsite enhancements, the project proposes, offsite improvements to the benefit of Lee County, to enhance a 20-acre portion of the adjacent Imperial Marsh Preserve to improve the natural communities and wildlife habitat.

Thank you for your consideration of the above information.

RE: Corkscrew 80 Acres

Dear Mr. Moncada,

Earth Tech Environmental is pleased to submit this Phase I Environmental Site Assessment (ESA) report for the referenced property. As requested, the report investigates the land use history, site activities, and regulatory history of the property and its vicinity. This Phase I ESA was conducted in material compliance with the scope and limitations of the American Society of Testing and Materials (ASTM) E1527-21.

Please feel free to contact us if you have any questions.

Andrew McAuley
Senior Environmental Consultant
Earth Tech Environmental, LLC.

EXECUTIVE SUMMARY

Earth Tech Environmental (ETE) has conducted a Phase I Environmental Site Assessment (ESA) on the property located at 20351 Corkscrew Road in Lee County, Florida referred to as the Corkscrew 80 Acre Property (Subject Property). This report is in conformance with the scope and limitations of The American Society for Testing and Materials (ASTM) Practice E1527-21 for Phase I ESAs. Any exceptions to these practices are described in Section 9.0 of this report.

The Subject Property for this report consists of a single parcel (STRAP # 21-46-27-00-00001.0000) located in Estero, Florida 33928. The Subject Property is located on the north side of Corkscrew Road approximately 10.30-miles east of I-75 (see Figures 1 & 2). According to the Lee County Property Appraiser's website, the Subject Property totals approximately 79.27 acres. The Subject Property is vacant and undeveloped, consisting primarily of improved pastures and densely wooded areas. The ESA included a site inspection on July 30, 2024, in which no recognized environmental conditions (RECs) were identified.

Environmental Data Management, Inc. (EDM), under a subcontract to ETE, performed a comprehensive review of environmental databases for facilities/reports that are either on the Subject Property or within specified radii of the Subject Property. The Subject Property was not listed in any of the databases reviewed. No information of concern was noted on the Subject Property or surrounding properties within the various radii in the EDM report and various databases reviewed.

This assessment has revealed no Recognized Environmental Conditions (RECs), Historical RECs (HRECs) and/or Controlled RECs (CRECs) in connection with the Subject Property and no further assessment is recommended.

1.0 INTRODUCTION

ETE has conducted a Phase I Environmental Site Assessment (ESA) of the Subject Property located in Lee County (Figure 1). According to the Lee County Property Appraisers website, the Subject Property is owned by Sea 202 LLC.

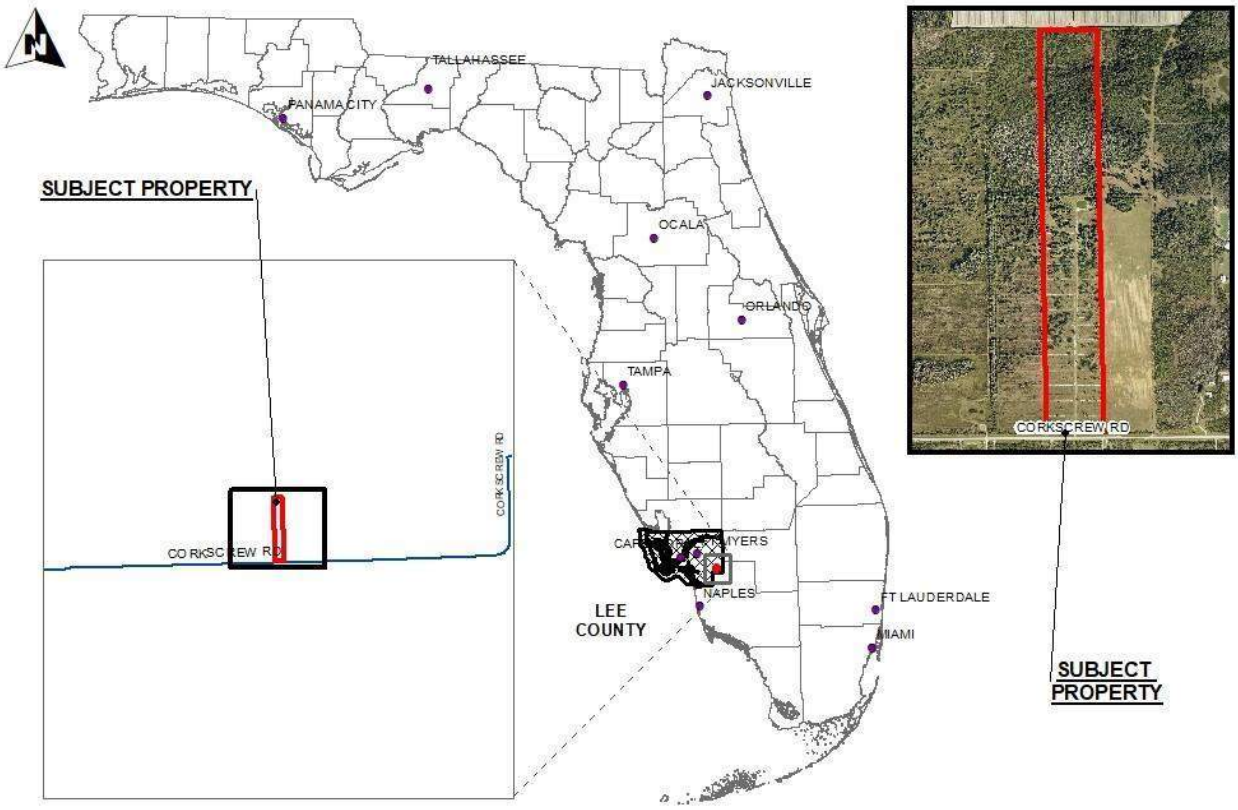

Figure 1. *Location Map*

Figure 2. *Vicinity Map*

1.1 Purpose

The Phase I ESA was requested by Toll Brothers, the prospective purchaser of the Subject Property.

Based on the information provided, ETE understands that the purpose for having this Phase I ESA performed is to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental

Response, Compensation, and Liability Act of 1980 (CERCLA) liability. The scope of services presented below is intended to satisfy this purpose.

The objective of this Phase I ESA is to identify Recognized Environmental Conditions (RECs), Historical RECs (HRECs), and/or Controlled RECs (CRECs) in connection with the Subject Property.

The term "REC" as defined by ASTM is "(1) the presence of hazardous substances or petroleum products in, on or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on or at the Subject Property under conditions that pose a material threat of a future release to the environment."

The term "HREC" as defined by ASTM is "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations)."

The term "CREC" as defined by ASTM is "a recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitation)."

This Phase I ESA includes information gathered from federal, state, and local agencies, personal interviews with people familiar with the Subject Property and surrounding properties, and a site visit conducted by ETE.

1.2 Detailed Scope of Services

The Phase I ESA conducted by ETE included, but was not limited to, the following services:

- conducting an onsite assessment of the Subject Property to collect data and observe environmental conditions related to the property/surrounding properties
- drive-by observations of adjacent properties and the site vicinity
- review of regulatory databases and agency file information
- interviews with people familiar with the Subject Property, as available
- review of available historical documents
- preparation of this written report presenting the Phase I ESA findings including a summary of conclusions and recommendations

1.3 Significant Assumptions

ETE made the following assumptions in reaching the findings and conclusions outlined in this Phase 1 ESA:

- regulatory agency information - ETE considers all information provided by EDM and regulatory agencies to be complete, accurate, and current
- other regulatory information - ETE considers all other information obtained from regulatory or enforcement agencies to be complete, accurate, and current
- interviews - ETE assumes all information obtained through interviews to be complete, unbiased and provided in good faith

1.4 Limitations and Exceptions

This report is expressly for the sole and exclusive use of the party for whom this report was originally prepared for a particular purpose. Only the party for whom this report was originally prepared and/or other specifically named parties have the right to make use of and rely upon this report. Reuse of this report or any portion thereof for other than its intended purpose, or if modified, or if used by third parties, shall be at the user's sole risk.

An environmental site assessment is intended for the purpose of determining the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. ETE, therefore, does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination. Nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and applicable laws, codes, regulations, or standards.

The methodologies include reviewing information provided by other sources. ETE treats information obtained from record reviews and interviews concerning the property as reliable. The ASTM protocol does not require ETE to independently verify the information. Therefore, ETE cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. ETE warrants that the findings contained in this report have been prepared in general conformance with accepted professional practices at the time of report preparation as applied by similar professionals. Future changes in standards, practices, or regulations cannot be anticipated and have not been addressed. The observations and recommendations presented in this report are time dependent and the findings presented in this report apply solely to site conditions existing at the time when the assessment was performed.

1.5 Special Terms and Conditions

The scope of work for this Phase I ESA did not include testing of electrical equipment for the potential presence of polychlorinated biphenyls (PCBs) or the assessment of natural hazards such as naturally occurring asbestos or methane gas, or assessment of non-chemical hazards such as the potential for damage from hurricanes or floods.

1.6 User Reliance

This Phase I ESA was conducted for the use of and reliance by and is certified to the following parties:
Toll Brothers

No warranties, either expressed or implied, are made in the preparation or dissemination of this document or the information contained herein for the purpose of reliance by third parties.

2.0 SITE DESCRIPTION

This section presents a general overview of the Subject Property, any onsite improvements, and a description of surrounding properties.

2.1 Location and Legal Description

The Subject Property for this report consists of a single parcel (STRAP # 21-46-27-00-00001.0000) located in Estero, Florida 33928. The Subject Property is located on the north side of Corkscrew Road approximately 10.30-miles east of I-75 (see Figures 1 & 2). According to the Lee County Property Appraiser's website, the Subject Property totals approximately 79.27 acres. The Subject Property is vacant and undeveloped, consisting primarily of improved pastures and densely wooded areas. The Subject

Property is identified within Section 21, Township 46, Range 27E. An aerial site map is shown below as Figure 3.

Strap No.	Brief Legal Description	Property Use Code
21-46-27-00-00001.0000	E ½ OF E ½ OF W ½ LESS RD RW	Pasture, Semi-Improved, Poor Pasture, Native, Good Pasture, Waste

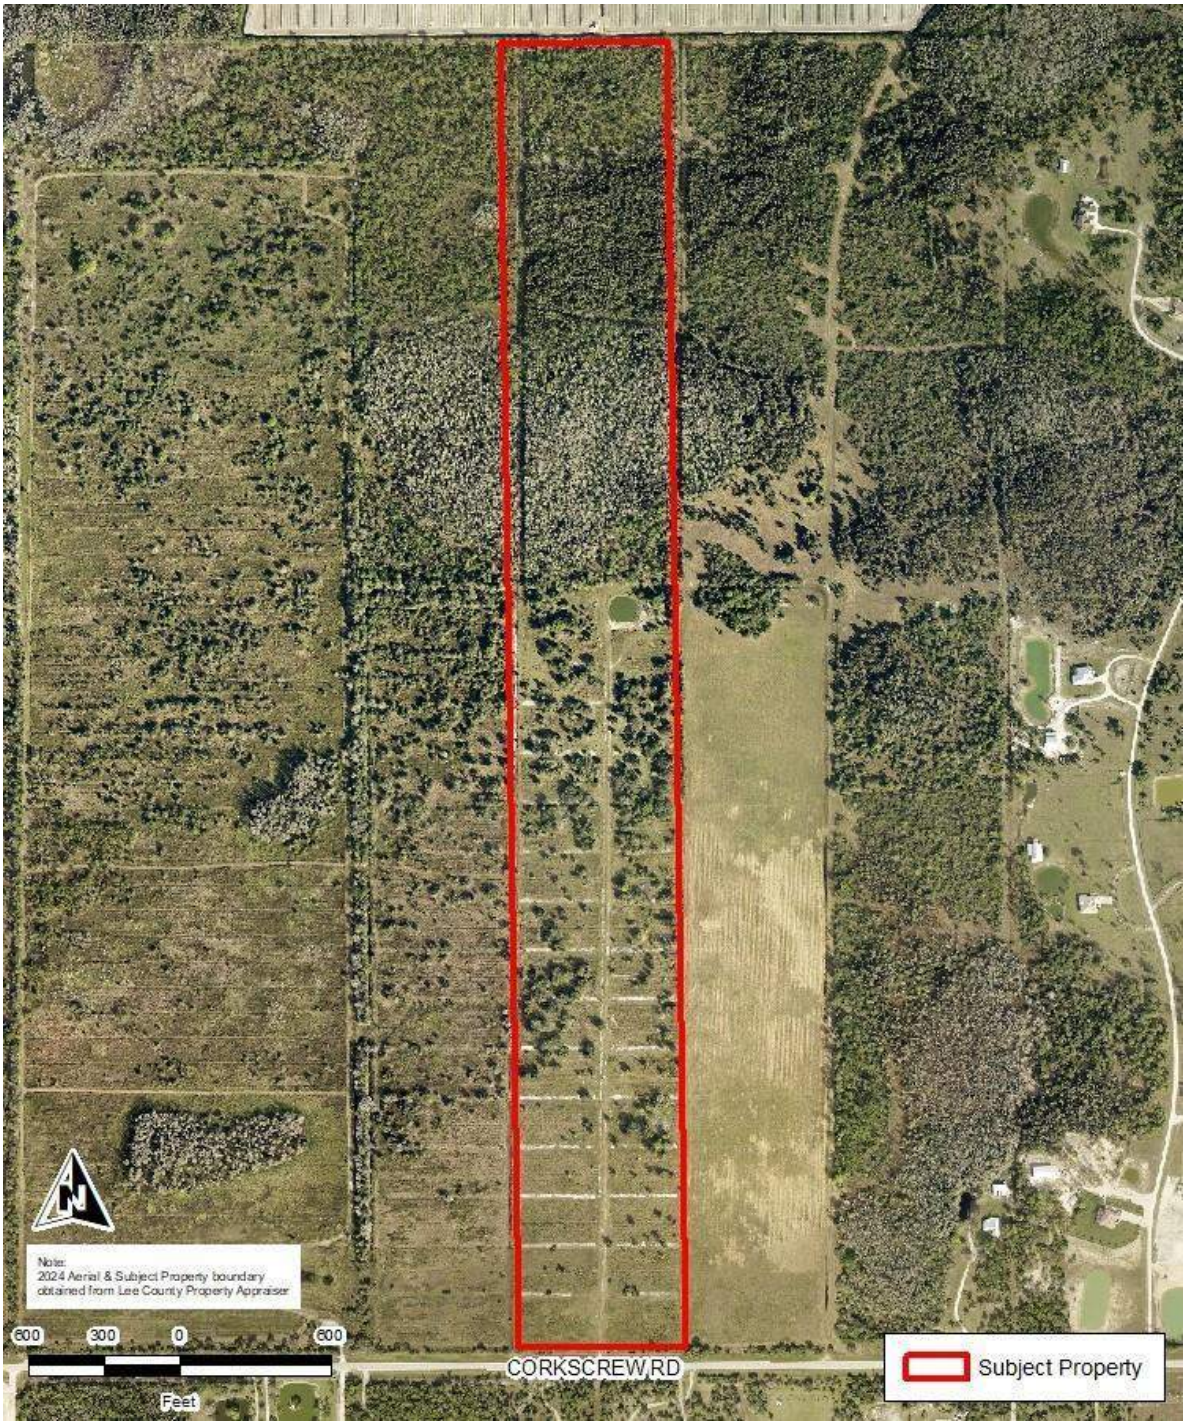

Figure 3. *Aerial Site Map*

2.2 Site and Vicinity General Characteristics

The aerial site map shown in Figure 3 highlights the parcel and the adjoining properties.

Onsite:	The northern portion of the Subject Property is densely vegetated, the southern portion consists of improved pasture.
Vicinity:	The Subject Property is largely surrounded by vacant/undeveloped land portions of which a used as improved and/or unimproved pasture to the east and west. A large agricultural tract is present to the north of the Subject Property. Corkscrew Road runs along the southern boundary and sparse single-family residential development is present to the south (across Corkscrew Road).

2.3 Current Use of the Property

The majority of the Subject Property is used as improved pasture, cattle were present during the time of the site inspection. The northern portion of the Subject Property is densely wooded.

2.4 Descriptions of Structures, Roads, and Other Improvements on the Subject Property

No structures, roads, and/or improvements are present on the Subject Property.

Roads

Access to the Subject Property is off of Corkscrew Road, which runs along the southern boundary of the Subject Property.

Potable Water Supply/Sewage Disposal

The Subject Property does not appear to have been historically developed, therefore it is assumed that no onsite water supply and/or sewage disposal system exist on the Subject Property.

2.5 Current Uses of the Adjoining Properties

The table below is a description of the current uses of the adjoining properties based on aerials reviewed.

North:	Agricultural
East:	Vacant/Undeveloped, Improved Pasture
South:	Corkscrew Road, Single-Family Residential
West:	Vacant/Undeveloped, Improved Pasture

3.0 USER-PROVIDED INFORMATION

This section identifies information provided to ETE by the current owner/agent/potential buyer or by additional searches conducted by ETE at the Client's request. A representative of the prospective purchaser, Kris Moncada, submitted the completed User Questionnaire to ETE on July 29, 2024. A copy of the User Questionnaire is attached in Appendix A of this report.

3.1 Title Records

Title work for the property was not provided for this report.

3.2 Environmental Cleanup Liens

An environmental lien search was not completed by ETE for the Subject Property. Mr. Moncada indicated on the User Questionnaire that they have not checked and are not aware of any environmental liens.

3.3 Activity and Use Limitations (AULs)

Mr. Moncada indicated on the User Questionnaire that, to the best of his knowledge, he is not aware of engineering controls (e.g., slurry walls, caps), land use restrictions, or institutional controls (e.g., deed restriction, covenants) that may be in place at the site or filed under federal, tribal, state or local law.

3.4 Specialized Knowledge

Mr. Moncada indicated on the User Questionnaire that, to the best of his knowledge, he does not have specialized knowledge that might indicate the past or present use of such substances on the Subject Property or nearby properties.

3.5 Fair Market Value (FMV)

Mr. Moncada indicated on the User Questionnaire that, to the best of his knowledge, he is not aware of a reduction in value of the Subject Property because of past or present environmental concerns.

3.6 Obvious Indicators

Mr. Moncada indicated on the User Questionnaire that, to the best of his knowledge, he is not aware of obvious indicators of possible contamination on or near the site.

3.7 Commonly Known or Reasonably Ascertainable Information

Mr. Moncada indicated on the User Questionnaire that, to the best of his knowledge, he is not aware of any other past uses of the Subject Property or any specific chemicals that may have been present at the Subject Property.

3.8 Owner, Property Manager, and Occupant Information

According to the Lee County Property Appraiser's website the Subject Property is currently owned by Sea 202 LLC.

3.9 Reason for Performing Phase I

The Phase I ESA was requested by Toll Brothers, the prospective purchaser of the Subject Property.

3.10 Other

No other information was provided.

4.0 RECORDS REVIEW

The following section presents the results of a review of federal and state regulatory databases. Also reviewed were aerial photographs, topographic/QUAD maps, soil survey maps, and city directories pertaining to the Subject Property, adjacent properties, and proximate properties.

4.1 Standard Environmental Record Sources

Regulatory agency database information was obtained from EDM, which maps and lists properties in Federal and State environmental databases with existing conditions or status' that may have the potential to affect the Subject Property. EDM's environmental database site report is included in this ESA as Appendix B.

4.2 Federal Environmental Record Sources

The following are comments regarding several of the Federal databases that were reviewed in accordance with the ASTM E1527-21 requirements. See the EDM report in Appendix B for an entire list of Federal databases reviewed.

National Priorities List (NPL; 1.0-mile)
The National Priorities List (NPL) contains facilities and/or locations where environmental contamination has been confirmed and prioritized for cleanup activities under the Superfund Program. EDM's NPL Report includes sites that are currently on the NPL as well as sites that have been proposed, withdrawn and/or deleted from the list. Previously, information for the NPL was managed under the CERCLIS data management system. In 2014, this system was replaced with the Superfund Enterprise Management System (SEMS).

- There are no listed NPL facilities within 1.0-mile of the Subject Property.

Superfund Enterprise Management System Active Site Inventory List (SEMSACTV; 0.50-mile)
The US EPA Superfund Enterprise Management System tracks potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. The SEMSACTV list contains sites that are on or being considered for inclusion on the National Priorities List (NPL).

- There are no listed SEMSACTV facilities within 0.50-miles of the Subject Property.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS; 0.50-mile)
The CERCLIS database contains data on potentially hazardous waste sites that have been reported to EPA by states, municipalities, private companies, and private persons pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

- There are no listed CERCLIS facilities within 0.50-miles of the Subject Property.

Superfund Enterprise Management System Archived Site Inventory List (SEMSARCH; 0.50-mile)
The US EPA Superfund Enterprise Management System contains archived data of CERCLIS or SEMS records where the EPA has completed assessment activities and determined no further steps to list the site on the NPL will be taken.

- There are no listed SEMSARCH facilities within 0.50-miles of the Subject Property.

CERCLIS-No Further Remedial Action Planned (NFRAP; 0.50-mile)
The CERCLIS-NFRAP database contains data on sites where, following an initial investigation, no contamination was found, or contamination was removed quickly without the need for the site to be placed on the NPL.

- There are no listed NFRAP facilities within 0.50-miles of the Subject Property.

Emergency Response Notification System List (ERNS; 0.25-mile)
The ERNS database contains data on toxic chemical spills and other accidents and is a cooperative data sharing effort among the EPA, DOT and the National Response Center (NRC).

- There are no listed ERNS facilities within 0.25-miles of the Subject Property.

Corrective Action Report (CORRACTS; 1.0-mile)
The CORRACTS database identifies hazardous waste handlers with Resource Conservation and Recovery Act (RCRA) corrective action activity.

- There are no listed CORRACTS facilities within 1.0-mile of the Subject Property.

Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facilities (TSD; 1.0-mile)
The RCRA TSD Facilities database includes selected information on facilities that generate, transport, store, treat and/or dispose of hazardous waste, as defined by RCRA.

- There are no listed TSD facilities within 1.0-mile of the Subject Property.

RCRA Generators Lists (NONTSD; 0.50-mile)
RCRA large-quantity generators (LQG) are those facilities that generate at least 1,000 kilograms per month (kg/month) of non-acutely hazardous waste or meet other applicable RCRA requirements. Resource Conservation and Recovery Information System (RCRIS) small-quantity generators (SQG) generate between 100 and 1,000 kg/month of non-acutely hazardous waste or meet other applicable RCRA requirements. RCRIS conditionally exempt SQG generate less than 100 kg/month of non-acutely hazardous waste or meet other applicable RCRA requirements.

- There are no listed NONTSD facilities within 0.50-miles of the Subject Property.

Tribal Tanks List (TRIBLTANKS; 0.25-mile)
The US EPA Region IV Tribal Tanks database lists Active and Closed storage tank facilities on Native American Lands.

- There are no listed TRIBLTANKS facilities within 0.25-miles of the Subject Property.

Tribal LUST List (TRIBLLUST; 0.50-mile)
The Tribal LUST List is derived from the US EPA Region IV Tribal Tanks database by extracting those sites with indicators of past and/or current releases.

- There are no listed TRIBLLUST facilities within 0.50-miles of the Subject Property.

Brownfields Management System (USBRWNFLDS; 0.50-miles)
The US EPA Brownfields program provides information on environmentally distressed properties that have received grants or targeted funding for cleanup and redevelopment.

- There are no listed USBRWNFLDS facilities within 0.50-miles of the Subject Property.

Institutional and/or Engineering Controls (USINSTENG; 0.25-miles)
The Institutional and/or Engineering Controls List is compiled from data elements contained in the NPL, CORRACTS, and USBRWNFLDS Lists.

- There are no listed USINSTENG facilities within 0.25-miles of the Subject Property.

NPL Liens List (NPLLIENS; 1.0-mile)
The US EPA NPL Liens List identifies those sites where under authority granted by CERCLA, liens have been filed against real property in order to recover expenditures from remedial action or when the property owner receives a notice of potential liability.

- There are no listed NPLLIENS facilities within 1.0-mile of the Subject Property.

Enforcement and Compliance History (ECHO; 0.50-miles)
The US EPA Enforcement and Compliance History Online (ECHO) database provides integrated compliance and enforcement information on facilities regulated under the Clean Air Act (CAA), Clean Water Act (CWA), Safe Drinking Water Act (SDWA) and Resource Conservation and Recovery Act (RCRA).

- There are no listed ECHO facilities within 0.50-miles of the Subject Property.

4.3 State Environmental Record Sources

The following are the major state databases that were reviewed in accordance with the ASTM E1527-21 requirements. See EDM report (Appendix B) for a complete list of all State databases reviewed.

State NPL Equivalent (STNPL; 1.0-mile)
The FDEP State Funded Cleanup list contains facilities and/or locations where there are no viable responsible parties; the site poses an imminent hazard; and the site does not qualify for Superfund or is a low priority for EPA. Remedial efforts at these sites are currently being addressed through State funded cleanup action.

- There are no listed STNPL facilities within 1.0-mile of the Subject Property.

State-Equivalent CERCLIS Hazardous Waste Sites (STCERC; 0.50-miles)
These sites are being assessed and/or cleaned up as a result of identified or suspected contaminations from the release of hazardous substances.

- There are no listed STCERC facilities within 0.50-miles of the Subject Property.

Solid Waste Facilities List (SLDWST; Site and Adjoining Properties)
This database identifies locations that have been permitted to conduct solid waste handling activities including landfills, transfer stations and sites handling bio-hazardous wastes.

- There are no listed SLDWST facilities within 0.50-miles of the Subject Property.

State Leaking Underground Storage Tank Database (LUST; 0.50-miles)
The LUST database is a list of reported leaking Underground Storage Tank incidents.

- There are no listed LUST facilities within 0.50-miles of the Subject Property.

State Registered Underground/Aboveground Storage Tank (TANKS; 0.25-miles)
This database contains listings for current UST and AST sites; listed as TANKS in the EDM report.

- There are no listed TANKS facilities within 0.25-miles of the Subject Property.

State and Tribal Brownfield Sites (BRWNFLDS; 0.50-miles)
Brownfields are typically defined as abandoned, idled or underused industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

- There are no listed BRWNFLDS facilities within 0.50-miles of the Subject Property.

State Voluntary Cleanup Sites (VOLCLNUP; 0.50-miles)

This list identifies those sites that have signed an agreement to cleanup a site either voluntarily or pursuant to enforcement activity.

- There are no listed VOLCLNUP facilities within 0.50-miles of the Subject Property.

State Institutional Control/Engineering Control Registries (INSTENG; 0.25-miles)
This database contains sites that have had institutional and/or engineering controls implemented to regulate exposure to environmental hazards.

- There is no listed INSTENG facilities within 0.25-miles of the Subject Property.

State Dry Cleaners List (DRY; 0.50-miles)
This database contains listings for dry cleaners within 0.50-miles of the Subject Property.

- There are no listed DRY facilities within 0.50-miles of the Subject Property.

Florida Department of Environmental Protection Public Water Systems (FLPWS; 0.50-miles)
The FDEP Drinking Water Program Basic Facility Report and Public Water System Well data contain information on the location and type of public water systems and wells regulated by the department.

- There are no listed FLPWS facilities within 0.50-miles of the Subject Property.

Florida Department of Health Well Surveillance Program Public Water Wells (WELLSADOHC; 0.50-miles)
This section coordinates with the County Health Departments to locate potable wells and conduct water sampling for contaminants of concern in public wells.

- There are no listed WELLSADOHC within 0.50-miles of the Subject Property.

Florida Department of Health Well Surveillance Program Private Water Wells (WELLSADOHN; 0.25-miles)
This section coordinates with the County Health Departments to locate potable wells and conduct water sampling for contaminants of concern in private wells.

- There are no listed WELLSADOHN within 0.25-miles of the Subject Property.

Southwest Florida Water Management District Public Water Supply Report (SWFWMDPUB; 0.50-mile)
This database contains information on the location and characteristics of SWFWMD Public Water Supply wells and withdrawal points.

- There are no listed SWFWMDPUB facilities within 0.50-miles of the Subject Property.

Southwest Florida Water Management District Domestic Water Supply Report (SWFWMDDOM; 0.25-mile). This database contains information on the location and characteristics of SWFWMD Domestic Water Supply wells.

- There are no listed SWFWMDDOM facilities within 0.25-miles of the Subject Property.

St. Johns River Water Management District Public Water Supply Report (SJRWMDPUB; 0.50-miles)
This database contains information on the location and characteristics of permitted water well and pump stations used for Public Water Supply.

- There are no listed SJRWMDPUB facilities within 0.50-miles of the Subject Property.

St. Johns River Water Management District Private Water Supply Report (SJRWMDPRV; 0.25-miles)
This database contains information on the location and characteristics of permitted water well and pump stations used for private purposes.

- There are no listed SJRWMDPRV facilities within 0.25-miles of the Subject Property.

South Florida Water Management District Public Water Supply Report (SFWMDPUB; 0.50-miles)
This database contains information on permitted Public Water Supply well, pump and culvert locations as specified on Water Use Permits.

- There are no listed SFWMDPUB facilities within 0.50-miles of the Subject Property.

South Florida Water Management District Private Water Well Report (SFWMDPRV; 0.25-miles)
This database contains information on the location and characteristics of permitted water well and pump stations used for private purposes. These sites include uses for irrigation, commercial use, dewatering/mining and power. They do not include private potable sources, as they do not require SFWMD permitting.

- There are eight (8) listed SFWMDPRV facilities within 0.25-miles of the Subject Property.
    1. Permit No. 36-01461-W is located 0.01-miles north of the Subject Property. According to the EDM Report this facility has an existing irrigation well.
    2. Permit No. 36-01461-W is located 0.09-miles northeast of the Subject Property. According to the EDM Report this facility has a proposed irrigation well.
    3. Permit No. 36-07768-W is located 0.11-miles northwest of the Subject Property. According to the EDM Report this facility has an existing irrigation well.
    4. Permit No. 36-01461-W is located 0.13-miles southeast of the Subject Property. According to the EDM Report this facility has an abandoned unspecified well.
    5. Permit No. 36-01461-W is located 0.13-miles southeast of the Subject Property. According to the EDM Report this facility has an existing irrigation well.
    6. Permit No. 36-06775-W is located 0.16-miles south of the Subject Property. According to the EDM Report this facility has a proposed irrigation well.
    7. Permit No. 36-01461-W is located 0.18-miles east of the Subject Property. According to the EDM Report this facility has an abandoned unspecified well.
    8. Permit No. 36-01461-W is located 0.20-miles northeast of the Subject Property. According to the EDM Report this facility has an abandoned unspecified well.

4.4 Additional Environmental Record Sources

Additional database records were provided in the database search report. These are summarized in the EDM database report.

- There are a few mapped sites within the EDM Report whose plotted coordinates fall just outside of the ASTM search radii, but whose property boundaries may still extend into the search area. These sites typically include large commercial or industrial tracts that may merit inclusion in the evaluation process. Detailed data reports on (any of) these sites may be made available upon request, however based on the geographic distance and hydrologic location from the Subject Property these do not appear to present a concern. See Proximal Site Summary Table (Appendix B, pp. 10 of the EDM Report).

4.5 Physical Setting Source(s)

USGS Quadrangle Maps

The U.S. Geological Survey (USGS) 7.5-minute Florida quadrangle maps were reviewed for the Subject Property. They are included in Appendix B, on pp. 12-18 of the EDM Report. From the quadrangle, there is a lower elevation section in the northern portion of the Subject Property. No potential sources of impact to the Subject Property or adjoining properties were identified in the topographic map review.

NRCS Soils Mapping

National Resource Conservation Service (NRCS) maps for Lee County were reviewed to determine subsurface soil characteristics for the Subject Property. The parcel boundary was overlain on the soil survey and the resulting map is included on the following page (Figure 4).

According to NRCS, the Subject Property contains the following historical soil types:

Valkaria fine sand (14)

This is a nearly level, poorly drained soil on sloughs. Slopes are smooth to concave and range from 0 to 1 percent. Typically, the surface layer is about 2 inches of dark grayish brown fine sand. The subsurface layer is 5 inches of very pale brown fine sand. The subsoil is loose fine sand to a depth of 80 inches or more. The upper 9 inches is yellow, the next 4 inches is brownish yellow, the next 6 inches is yellowish brown, and the lowermost 54 inches is pale yellow, yellow, brown, and very pale brown.

Pompano fine sand, depressional (27)

This is a nearly level, poorly drained soil in depressions. Slopes are concave and less than 1 percent. Typically, the surface layer is gray fine sand about 3 inches thick. The substratum is fine sand to a depth of 80 inches or more. The upper 32 inches is light brownish gray with few, fine, faint yellowish brown mottles. The lower 45 inches is light gray.

Immokalee sand (28)

This is a nearly level, poorly drained soil in flatwoods areas. Slopes are smooth to convex and range from 0 to 2 percent. Typically, the surface layer is black sand about 4 inches thick. The subsurface layer is dark gray sand in the upper 5 inches and light gray sand in the lower 27 inches. The subsoil is sand to a depth of 69 inches. The upper 14 inches is black and firm, the next 5 inches is dark reddish brown, and the lower 14 inches is dark yellowish brown. The substratum is very pale brown sand to a depth of 80 inches or more.

Valkaria fine sand, depressional (41)

This is a nearly level, poorly drained soil in depressions. Slopes are concave and less than 1 percent. Typically, the surface layer is dark gray fine sand about 1 inch thick. The subsurface layer is about 4 inches of light gray fine sand. The subsoil is fine sand about 33 inches thick. The upper 4 inches is brownish yellow, the next 16 inches is yellow, and the lower 13 inches is light yellowish brown. The substratum is pale brown fine sand with few fine faint brown mottles to a depth of 80 inches or more.

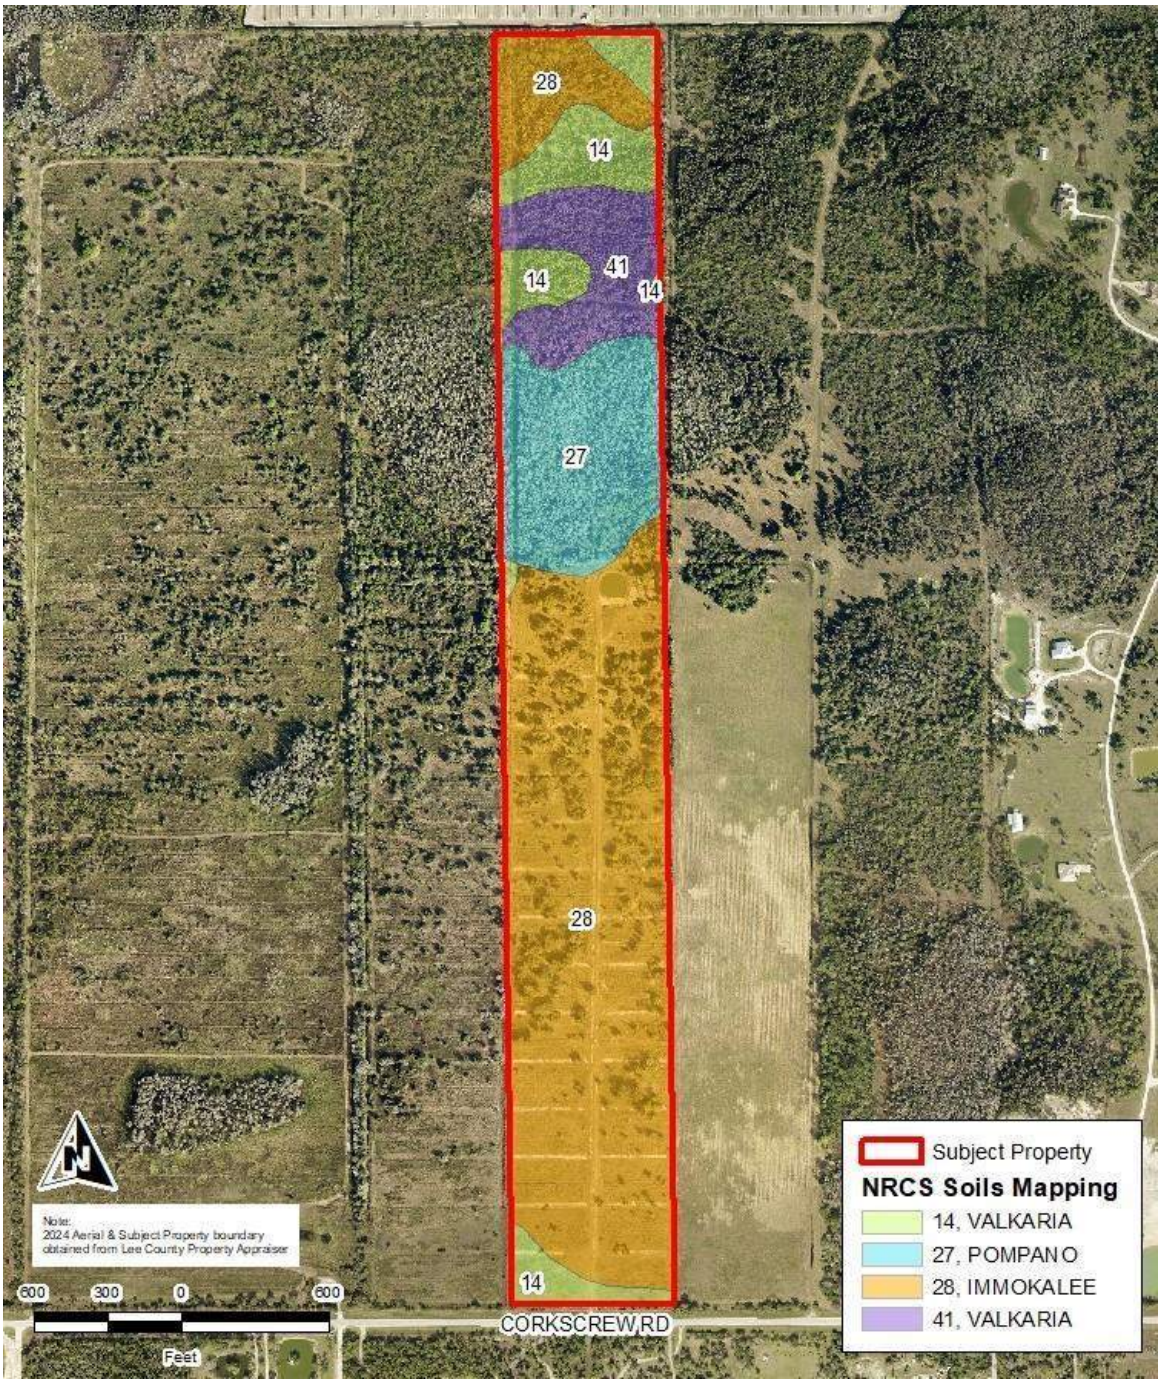

Figure 4. *NRCS Soils Map*

4.6 Historical Use Information on the Property

To evaluate historical use of the Subject Property, ETE reviewed readily available topographic maps and historical aerial photographs.

Aerial Photographs

ETE performed a historical aerial photograph analysis for the Subject Property (Appendix C). Interpretations of past uses of the Subject Property and other comments are provided in the table below.

SUBJECT PROPERTY INTERPRETED USE	
YEAR	**EDM REPORT**
1944	The Subject Property is vacant and undeveloped.
1658	No significant changes noted on the Subject Property.
1968	The southern portion of the Subject Property is cleared and appears to be part of a larger agricutural tract that predominantly extends to the west.
1976	No significant changes noted on the Subject Property.
1986	No significant changes noted on the Subject Property.
1996	No significant changes noted on the Subject Property.
2005	No significant changes noted on the Subject Property.
2014	No significant changes noted on the Subject Property.
2023	No significant changes noted on the Subject Property.

Based on the historical aerials reviewed, the southern portion of the Subject Property was cleared and used for agricultural purposes between 1958 and 1968 and remained in its current state today.

4.7 Historical Use Information on Adjoining Properties

To evaluate the historical use of the adjoining properties, ETE reviewed readily available topographic maps and aerial photographs.

Aerial Photographs

ETE performed a historical aerial photograph analysis for the adjoining properties (Appendix C). Interpretations of past uses of the adjoining properties/vicinity and other comments are provided in the table below.

ADJOINING PROPERTIES INTERPRETED USE	
YEAR	**EDM REPORT**
1944	The adjoining properties are vacant and undeveloped.
1658	No significant changes noted on the adjoining properties.
1968	The adjoining property to the southwest and southeast are cleared and are part of a large agricultural tract. Corkscrew Road is present running along the southern boundary of the Subject Property.
1976	No significant changes noted on the adjoining properties with the exception of a primitive trail present along the northern boundary of the Subject Property.
1986	No significant changes noted on the adjoining properties.
1996	The adjoining property to the north is cleared; no other significant changes noted on the adjoining properties.
2005	The adjoining property to the north is used for agricultural purposes, sparse single-family residential is present to the south of the Subject Property (across Corkscrew Road).
2014	No significant changes noted on the adjoining properties.
2023	No significant changes noted on the adjoining properties.

Based on the historic aerial review no significant environmental concerns with the adjoining properties were identified.

4.8 Previous Reports Prepared by Earth Tech Environmental or Others

The client provided ETE with a Phase I ESA that was prepared by Kross Inspectors (Kross) dated August 2, 2023, on the Subject Property. Kross concluded in their Phase I ESA that:

- "*This assessment has not revealed evidence of* ***recognized environmental conditions*** *(RECs) or* ***historical recognized environmental conditions*** *(HRECs) in connection with the Subject Property.*"

- "*This assessment has not revealed evidence of **recognized environmental conditions** (RECs) or **historical recognized environmental conditions** (HRECs) in connection with the surrounding/adjoining properties.*"

Kross concluded their assessment with the following recommendations:

- *"At the time of this report there were no recognized environmental contaminations and/or violations that would deem further action.*"

5.0 SITE RECONNAISSANCE

On July 30, 2024, Mr. Andrew McAuley performed an onsite assessment of the Subject Property to observe general site conditions and identify visible evidence of Recognized Environmental Conditions (RECs). Photographs taken during ETE's site inspection are included in Appendix D. Mr. McAuley's qualifications are included in Appendix E.

5.1 Methodology and Limiting Conditions

ETE was provided full access to the Subject Property. The methodology for the site visit included a drive/walkover survey of the property, starting at the perimeter of the parcel and working inward towards the center. Geo-referenced aerial photographs with the site boundaries overlain, were used to assist in identifying approximate parcel boundaries while in the field.

5.2 General Site Setting

Access to the Subject Property is through a gate that is off Corkscrew Road, which runs along the southern boundary. The southern half of the Subject Property appears to be mechanically maintained and is used for cattle grazing with an access trail running north-to-south through the central portion. The northern portion of the Subject Property contains a small cattle pond and densely wooded forest. Cattle were present on the Subject Property during the site inspection portion of this assessment. No structures or evidence of old structures were observed on the Subject Property.

Current Uses of Adjoining Properties

North:	Agricultural
East:	Vacant/Undeveloped, Improved Pasture
South:	Corkscrew Road, Single-Family Residential
West:	Vacant/Undeveloped, Improved Pasture

5.3 Exterior (Site) Observations

The following items were looked for as indicated in the ASTM standard:

Hazardous Substances and Petroleum Products in Connection with Identified Uses

The presence of hazardous substances or petroleum products in connection with the Subject Property was investigated.

- No hazardous substances and/or petroleum products were observed on the Subject Property.

Storage Tanks

Aboveground Storage Tanks (ASTs), Underground Storage Tanks (USTs), vent pipes, fill pipes, or access ways indicating USTs were looked for during the site visit.

- No storage tanks were observed on the Subject Property.

Odors

The Subject Property was checked for strong or noxious odors and their sources during the site visit.

- No odors were observed on the Subject Property.

Pools of Liquid

The property was searched for standing pools of liquid.

- No pools of liquid were observed on the Subject Property.

Drums

Storage drums were looked for during the site visit.

- No drums were observed on the Subject Property.

Hazardous Substances and Petroleum Products Containers Not Necessarily in Connection with Identified Uses. Hazardous substances and petroleum products containers were looked for during the site visit.

- No hazardous substances and/or petroleum products not in connection with the Subject Property's current use were observed.

Unidentified Substance Containers

Open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were looked for during the site visit.

- No unidentified substance containers were observed on the Subject Property.

PCBs

Polychlorinated biphenyls (PCBs) are synthetic chemicals used as coolants and lubricants in transformers and electrical equipment which ceased to be produced in the United States in 1977 but are still found in the environment. Production of PCBs ceased due to evidence that they build up in the environment and can cause harmful health effects. Products made before 1977 that may contain PCBs include old fluorescent lighting fixtures and electrical devices containing PCB capacitors and hydraulic oils.

Electrical or hydraulic equipment known to contain PCBs or likely to contain PCBs were looked for during the site visit

- No potential PCB-containing equipment was observed on the Subject Property.

Pits, Ponds, Lagoons, or Subsurface Structures

- No pits, lagoons, and/or subsurface structures were observed on the Subject Property. A small cattle pond was observed in the northern portion of the Subject Property.

Stained Soil or Pavement

- No stained soil and/or pavement was observed on the Subject Property.

Stressed Vegetation

- No areas of stressed vegetation were observed on the Subject Property.

Solid Waste and Debris

- No significant solid waste and/or debris was observed on the Subject Property. An older piece of farm equipment and a deer stand was observed in the northern portion of the Subject Property.

Wastewater

- Wastewater was not observed discharging into any drains or underground injection systems on the Subject Property.

Wells

- No wells were observed on the Subject Property.

Septic Systems

- No evidence of an onsite septic system was observed on the Subject Property.

6.0 INTERVIEWS

This section presents the communication between the environmental professional and contacts associated with the Subject Property.

6.1 Interviews with Site Contacts

No interviews with site contacts were conducted.

6.2 Interviews with Local Government Officials

No interviews with local government officials were conducted.

7.0 FINDINGS

This section presents the environmental professional's findings based on the information reviewed and the site reconnaissance.

The Subject Property for this report consists of a single parcel (STRAP # 21-46-27-00-00001.0000) located in Estero, Florida 33928. The Subject Property is located on the north side of Corkscrew Road approximately 10.30-miles east of I-75 (see Figures 1 & 2). According to the Lee County Property Appraiser's website, the Subject Property totals approximately 79.27 acres. The Subject Property is vacant and undeveloped, consisting primarily of improved pastures and densely wooded areas. The ESA included a site inspection on July 30, 2024, in which no recognized environmental conditions (RECs) were identified.

Environmental Data Management, Inc. (EDM), under a subcontract to ETE, performed a comprehensive review of environmental databases for facilities/reports that are either on the Subject Property or within specified radii of the Subject Property. The Subject Property was not listed in any of the databases reviewed. No information of concern was noted on the Subject Property or surrounding properties within the various radii in the EDM report and various databases reviewed.

Kross Inspectors (Kross) conducted a Phase I ESA on the Subject Property on August 2, 2023. Kross concluded in their assessment that no evidence of recognized environmental conditions (RECs) or historical recognized environmental conditions (HRECs) in connection with the Subject Property or the surrounding/adjoining properties were identified and deemed no further assessment was recommended.

8.0 OPINION

This section presents the environmental professional's opinion(s) of the impact on the Subject Property of conditions identified in the findings section.

No direct evidence was observed during the site inspection to indicate the past, present, and/or potential future release of hazardous substances or petroleum products on the Subject Property.

No information of concern was noted on the Subject Property or surrounding properties within the various radii in the EDM report and various databases reviewed.

9.0 DEVIATIONS/DATA GAPS

This section presents any deviations/data gaps encountered during this Phase I ESA.

The ASTM Practice E1527-21 standard requires a listing of "data gaps" encountered during the site investigation process that affects the ability of the environmental professional to identify a recognized environmental condition. The ASTM Practice E1527-21 standard also requires that the environmental professional estimate the relative importance of the data gaps. Generally, gaps in available data are related to the availability of historical data sources for specific sites of concern. The environmental professional uses multiple historical data sources as a method to provide coverage for data gaps. For this site, the following items may constitute a data gap as defined by ASTM:

1. A 1944 aerial was the earliest aerial available for review. Per ASTM Standards, aerials prior to 1940 should be reviewed. However, since the Subject Property appeared to be undeveloped in 1944, ETE does not consider this gap as significant.

10.0 ADDITIONAL SERVICES

The following additional services were not provided as part of the scope for conducting this Phase I ESA:

- Radon assessment
- Soil and groundwater sampling
- Environmental Liens
- Title search
- Asbestos
- Lead-based paint
- Lead in drinking water
- Per- and Polyfluoroalkyl substances (PFAS)
- Ecological resources, i.e. wetlands & endangered species
- Regulatory compliance
- Indoor air quality
- Cultural and historic resources
- Mold

11.0 CONCLUSIONS

Earth Tech Environmental (ETE) has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 for Phase I ESAs. Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

This assessment has revealed no Recognized Environmental Conditions (RECs), Historical RECs (HRECs) and/or Controlled RECs (CRECs) in connection with the Subject Property and no further assessment is recommended.

12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional as defined in 40 CFR part 312. I have the specific qualifications of education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312.

By certifying this report, Earth Tech Environmental does not represent or warrant that the Client will automatically qualify for any legal defense to any liability under the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. §9601 et seq.) or under any other law or regulation pertaining to the Subject Property.

Andrew McAuley
Senior Environmental Consultant
Earth Tech Environmental, LLC.

APPENDIX A
USER PROVIDED DOCUMENTS

USER QUESTIONNAIRE for PHASE ONES

AS REQUIRED by ASTM Standard E1527-13 (published 2013)

Site Name: CORKSCREW / ENCLAVE AT ESTERO

Address: 20351 CORKSCREW RD. ESTERO, FL. 33928

The person who will use the Phase One should provide the following information. Please fill in this form to the best of your ability, explaining any Yes answers on a separate sheet of paper. Without these answers, our report would have to note that the Phase One is incomplete, and your Landowner Liability Protections could be at risk. We need these answers before we conduct the site visit.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens that may be filed or recorded against the subject property under federal, tribal, state or local law. Failure to check for these liens could put your Landowner Liability Protections at risk.

   Have you checked for these environmental cleanup liens? ☐ Yes ☒ No
   Are you aware of any such liens against the subject property? ☐ Yes ☒ No

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the site or filed under federal, tribal, state or local law.

   Are you aware of any possible AULs involving the subject site? ☐ Yes ☒ No

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property or an adjoining property, you would probably know of any chemicals, oil, degreasers, gasoline, or other hazardous substances commonly used in that type of business.

   Do you have any specialized knowledge that might indicate the past or present use of such substances on the subject or nearby properties? ☐ Yes ☒ No

4. **Fair Market Value (FMV).** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the property.

   Is the purchase price significantly below fair market value? ☐ Yes ☒ No

5. **Obvious Indicators.** This involves past or present spills, stains, releases, cleanups, etc. on or near the site.

   Do you know of any obvious indicators of possible contamination on or near the site? ☐ Yes ☒ No

6. **Common Knowledge.** Please use a separate sheet if necessary.

   a. Describe the past uses of the property: UNKNOWN

   b. Describe any specific chemicals that may have been present at the property: UNKNOWN

   c. Describe any other information that may help us identify possible contamination: N/A

RE: Phase I Environmental Site Assessment
20351 Corkscrew Road
Estero, FL 33928
Project Number: 23043244

Dear Mike Silverman,

Kross Inspectors has been engaged to provide a Phase I Environmental Site Assessment of the above referenced Subject Property. The results of your assessment can be found within.

This assessment was performed in accordance with standards set forth by the American Society for Testing and Materials (ASTM). The specific standards utilized for this assignment are ASTM E1527-21, and E2600-15.

The intended user of this report is identified within as the "Client". Users other than the Client may rely upon information provided within and distribute copies of the report only upon written consent of the author, Kross Inspectors.

Should you require a reliance letter for additional users, please provide written request to the office of Kross Inspectors.

Thank you for choosing Kross Inspectors for your Environmental Site Assessment needs. Please contact us at (239) 677-4403 with any questions or if you require additional information.

Sincerely,

Jim Kreider

1.0 Executive Summary

At the request of Mike Silverman (hereinafter “Client”), Kross Inspectors, (hereinafter "we", "us", and "our") performed a Phase I Environmental Site Assessment (ESA) of the Subject Property located at 20351 Corkscrew Road, Estero, FL 33928 (the Subject Property). This assessment has been conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E1527-21, and E2600-15 for Phase I Environmental Site Assessments.

1.1 Subject Property Summary Table

The following table is a summary of the pertinent details related to the assignment:

Project Summary Table							
Name of Client(s):	Mike Silverman						
Client Contact:	Mike Silverman						
Client Project No.:	23043244						
Description of Project:	Phase I Environmental Site Assessment						
Reason for Phase I:	Real Estate Transaction						
Subject Property Owner:	CORKSCREW 80 EAST LLC						
Subject Property Contact & Phone Number:	None						
Subject Property Name:	Parcel: 21-46-27-00-00001.0000						
Subject Property Address:	20351 Corkscrew Road						
City:	Estero	**State:**	FL	**Zip:**	33928	**County:**	Lee
Legal Description:	E 1/2 OF E 1/2 OF W 1/2 LESS RD RW						
Tax Map Designation:	**Neighborhood:**	N/A					
	Parcel Identification Number(s):	21-46-27-00-00001.0000					
Section:	21	**Township:**	46	**Range:**	27		
Subject Property Area:	78.97 Acres						
Number of Buildings:	None						
Approximate Building Area (Total):	NA						
Year Built:	NA						
Zoning Information:	AG-2, Agricultural						
Current Subject Property Usage:	Vacant Parcel						
Assessor:	Jim Kreider						
Accompanied/Escorted By:	None						
Assessment Date:	August 2, 2023						
Weather Conditions:	90°F – Sunny

1.2 Summary of Findings Table

The following table summarizes the individual sections of this assessment. This table, alone, is a quick reference and does not constitute the complete assessment. The report must be reviewed in its entirety.

Findings Summary						
Assessment Section	**Acceptable**	**Identified Findings – NOT A REC**	**REC**	**Further Action**	**Est. Cost Budget**	**Ref. Section(s)**
Historical Review	X					5.0, 7.1
Regulatory Review	X					7.0
State / Local Review	X					5.7, 7.1
Site Use	X					2.3, 6.2
Hazardous Materials	X					6.3
USTs	X					6.6
ASTs	X					6.6
PCBs	X					6.7, 6.8
Waste / Discharges	X					6.4, 6.5, 6.9
Vapor Encroachment	X					7.3
Surrounding Areas	X					3.0, 7.2
ASTM Non-Scope Findings Summary						
ACM	X					8.1
Lead Paint	X					8.2
Lead in Drinking Water	X					8.3
Radon	X					8.4
Mold	X					8.5
Indoor Air Quality	X					8.6
Endangered Species	X					8.7

NA = Not Applicable NFA = No Further Action P-II = Phase II Testing P-III = Phase III Remediation

1.3 Conclusions

We have successfully performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E1527-21, and E2600-15 of the Subject Property as described in Section 9 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 9 of this report. This assessment has not revealed evidence of *recognized environmental conditions* (RECs) or *historical recognized environmental conditions* (HRECs) in connection with the Subject Property.

This assessment has not revealed evidence of *recognized environmental conditions* (RECs) or *historical recognized environmental conditions* (HRECs) in connection with the surrounding/adjoining properties.

We have also performed cursory evaluations per ASTM: E 1527-21 “Non-Scope” items such as; asbestos-containing materials, lead-based paint, lead in drinking water, radon, mold, Indoor Air

© 2023 Inspector Education Services, Inc

Quality (IAQ) and endangered species. It is emphasized these limited screenings do not constitute a comprehensive survey of the premises and are meant only to provide a cursory evaluation regarding the overall prevalence of suspect items at the Subject Property.

- As the Subject Property is not developed, there **should not** be the potential for asbestos-containing materials (ACM) at the Subject Property.

- As the Subject Property is not developed, lead-based paint (LBP) **should not** be present at the Subject Property.

- As the Subject Property is not developed, lead (Pb) (exceeding acceptable EPA levels) in drinking water **should not** be present at the Subject Property.

- Due to the location of the Subject Property, there should not be the potential for Radon (Rn). The EPA has identified the area as a Zone 3 level of risk. Elevated levels of Radon can be found more prevalent in Zone 1 and Zone 2 counties.

- During the assessment, our assessor conducted a limited cursory screening for indications of excessive or amplified mold growth, or for conditions favorable for mold growth.

- During the assessment, our assessor conducted a cursory screening for indications may cause poor Indoor Air Quality (IAQ).

- Following the guidance of the Endangered Species Act (ESA), in which the government protects endangered and threatened plants and animals (listed species) and their habitats, we were not able to identify or acquire any readily accessible documentation which would restrict the use of the Subject Property.

Further evaluation of the items above, to confirm their presence, would require sampling by a qualified and possibly licensed professional depending on state requirements. This service is known as a Phase II Environmental Site Assessment.

1.4 Recommendations

At the time of this report there were no recognized environmental contaminations and/or violations that would deem further action.

© 2023 Inspector Education Services, Inc

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 Subject Property Location

The Subject Property is located at 20351 Corkscrew Road, Lee County. The Subject Property is located in the City of Estero. The latitude is North 26.45801491; longitude is West -81.62066425.

2.2 Site and Vicinity Characteristics

The Subject Property consists of one (1) rectangular shaped parcel located on the north side of Corkscrew Road. There are no buildings on the Subject Property. The parcel totals 78.97 acres. The zoning at the Subject Property is identified as AG-2, Agricultural.

2.3 Current Use of the Subject Property

The Subject Property is vacant land. The Subject Property has no buildings. (Ref. 6.2 Subject Property Use)

2.4 Description of Subject Property Improvements

The original Subject Property was part of an undeveloped land parcel and remains undeveloped.

2.5 Utilities / Source of Heating

Type	Description	Provider
Heating -	N/A	Florida Power & Light or LCEC
Cooling -	N/A	Florida Power & Light or LCEC
Water Service -	N/A	Lee County Utilities
Sewer Service -	N/A	Lee County Utilites

2.6 Physical Setting

2.6.1 Topography

According to the United States Geological Survey (USGS) 7.5 Minute Series Topographic Map, the Subject Property is located at approximately twenty-eight (28) feet above mean sea level. The terrain at the Subject Property is generally flat.

2.6.2 Soils

Based on the United States Department of Agriculture - Soil Conservation Service data, the following table depicts the dominant soil classification/type at the Subject Property:

Soil Component Name:	Immokalee sand
Soil Surface Texture:	Sand
Hydrologic Group:	Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.
Soil Drainage Class:	Poorly. Soils may have a saturated zone. a layer of low hydraulic conductivity, or seepage. Depth to water table is 6-18 inches.
Hydric Status:	Does not meet the requirements for hydric soil.
Corrosion Potential to Uncoated Steel:	HIGH

© 2023 Inspector Education Services, Inc

Depth to Bedrock Minimum:	>80 inches

2.6.3 Geology

Based on a review of the United States Geological Survey (USGA), the geologic formation in the vicinity of the Subject Property is the Shelly sediments of Plio-Pleistocene age. Tertiary-Quaternary Fossiliferous Sediments of Southern Florida - Molluskbearing sediments of southern Florida contain some of the most abundant and diverse fossil faunas in the world. The origin of these accumulations of fossil mollusks is imprecisely known (Allmon, 1992). The shell beds have attracted much attention due to the abundance and preservation of the fossils but the biostratigraphy and lithostratigraphy of the units has not been well defined (Scott, 1992). Scott and Wingard (1995) discussed the problems associated with biostratigraphy and lithostratigraphy of the Plio-Pleistocene in southern Florida. These "formations" are biostratigraphic units. The "formations" previously recognized within the latest Tertiary-Quaternary section of southern Florida include the latest Pliocene - early Pleistocene Caloosahatchee Formation, the early Pleistocene Bermont formation (informal) and the late Pleistocene Fort Thompson Formation. This section consists of fossiliferous sands and carbonates. The identification of these units is problematic unless the significant molluscan species are recognized. Often exposures are not extensive enough to facilitate the collection of representative faunal samples to properly discern the biostratigraphic identification of the formation. In an attempt to alleviate the inherent problems in the biostratigraphic recognition of lithostratigraphic units, Scott (1992) suggested grouping the latest Pliocene through late Pleistocene Caloosahatchee, Bermont and Fort Thompson Formations in to a single lithostratigraphic entity, the Okeechobee formation (informal). In mapping the shelly sands and carbonates, a generalized grouping as Tertiary-Quaternary shell units (TQsu) was utilized. This is equivalent to the informal Okeechobee formation. The distribution of the Caloosahatchee and Fort Thompson Formation are shown on previous geologic maps by Cooke (1945), Vernon and Puri (1964) and Brooks (1982). The Nashua Formation occurs within the Pliocene - Pleistocene in northern Florida. However, it crops out or is near the surface is an area too small to be shown on a map of this scale. Lithologically these sediments are complex, varying from unconsolidated, variably calcareous and fossiliferous quartz sands to well indurated, sandy, fossiliferous limestones (both marine and freshwater). Clayey sands and sandy clays are present. These sediments form part of the surficial aquifer system.

2.6.4 Hydrology

The following table identifies the hydrology for the Subject Property:

Groundwater Flow Direction*:	Unknown
Depth to Groundwater* (approx.):	6-18 inches
National Wetland Inventory:**	Yes
State Wetland Restriction*:**	No
FEMA 100 Year Flood Plain:	No
FEMA 500 Year Flood Plain:	No
Conservation Lands:	No

* Groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures or dewatering operations.
** A county may be recognized in the National Wetland Inventory but does not mean that the Property itself is subject to be listed.

© 2023 Inspector Education Services, Inc

*** A Property can be identified in a state identified wetland inventory and not listed in the National Wetland Inventory.

© 2023 Inspector Education Services, Inc

3.0 SURROUNDING VICINITY CHARACTERISTICS

3.1 Surrounding Area

The Subject Property is located at 20351 Corkscrew Road, Lee County. The Subject Property is located in the City of Estero. The latitude is North 26.45801491; longitude is West -81.62066425.

3.2 Adjoining Properties Table

The following table describes adjacent and abutting properties current usage:

Direction	Description	
	Use	Current Occupant
Northwest -	Vacant Commercial	Vacant Land
North -	Vacant Commercial	Vacant Land
Northeast -	Vacant Commercial	Amigo's Cafe
East -	Vacant Commercial	Vacant Land
Southeast -	Single Family Residential	Private Residences
South -	Single Family Residential	Private Residences
Southwest -	Single Family Residential	Private Residences
West -	Vacant Commercial	Vacant Land

© 2023 Inspector Education Services, Inc

4.0 USER PROVIDED INFORMATION

4.1 Title Records/Environmental Liens/Activity and Use Limitations

A review of a Chain of Title supplied by Lee County Clerk of Courts was included in the scope of work for this assessment project. The Chain of Title was researched from a recorded transaction dated 07-11-1978 to 02-22-2017. The last recorded transaction was dated 02-22-2017. No inaccuracies, liens, or fraudulent conveyance in the Chain of Title were identified.

Type of Deed	Title Received From	Title Transferred To	Date Recorded	Instrument #
Warranty Deed	Patrick J. Hayes, W. S. Chen and Yung – Yue Hu, Individually and as Trustees	Corkscrew 80 East, LLC	02-22-2017	2017000045370
Warranty Deed	Quinton B. McNew, as Trustee	Patrick J. Hayes, Robert W. S. Chen and Yung - Yue Hu, Trustees	02-20-1985	Book/Page 1769/1514
Warranty Deed	Oscar M. Corbin, Jr., Trustee	Quinton B. McNew, Trustee	02-11-1985	Book/Page 1768/1556
Special Warranty Deed	The Travelers Insurance Company	Oscar M. Corbin, Jr., as Trustee	07-11-1978	Book/Page 1286/216

4.2 Environmental Liens/Activity and Use Limitations

An Environmental Lien search as well as an Activity and Use Limitations (AUL) search was performed on the target Subject Property. No environmental liens or AUL's were identified.

4.3 Specialized Knowledge or Experience

The Client or Subject Property owner/representative reported no indication of any specialized knowledge or experience regarding the Subject Property to us.

4.4 Commonly Known or Reasonably Ascertainable Information

No commonly known or specialized knowledge of the Subject Property was reported to us by the Client or Subject Property owner/representative.

4.5 Subject Property Value Reduction due to Environmental Conditions

No information was provided to us by the Client or Subject Property owner/representative regarding a reduction of the Subject Property value due to environmental problems or conditions.

4.6 Reason for Performing Phase I ESA

It is our understanding and belief that the Phase I ESA is being performed in consideration of a Real Estate Transaction.

© 2023 Inspector Education Services, Inc

5.0 HISTORICAL RECORDS REVIEW

Our company has conducted research in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Subject Property. Standard historical sources have been sought in an attempt to document the past uses of the Subject Property as far back as it can be shown that the Subject Property contained structures; or from the time the Subject Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

5.1 Sanborn Fire Insurance Maps

Fire insurance maps were created for insurance underwriters and often contain information regarding the uses of individual structures and the locations of fuel and/or chemical storage tanks that may have been on a particular property. These maps were generally prepared for urban areas beginning in the middle to late 1880s and continuing generally into the 2000s.

A search of the Fire Insurance Maps for the Subject Property and surrounding area was conducted by Inspector Education Services (IES). IES provided a Map report of several historic maps depicting the Subject Property. There were no pertinent details obtained from review of the report.

5.2 Historical Topographic Map Review

A search of historical topographic maps for the Subject Property was conducted by IES. There were no pertinent details obtained from review of the topographic maps.

5.3 Historic City Directories

A City Directory Abstract Report for the Subject Property address was not completed as historical records and aerials show this parcel has been vacant since its creation.

5.4 Aerial Photograph Review

A search of Aerial Photographs for the Subject Property and surrounding area was conducted by IES. IES provided an Aerial Photography report of several historic photographs depicting the Subject Property. The following pertinent details were obtained from review of the report:

Year(s)	Description	
1968, 1973, 1976, 1979, 1986, 1995, 1999	**Subject Property**	Undeveloped Land
	Adjacent Properties	Undeveloped Land
2004, 2008, 2012, 2016, 2022	**Subject Property**	Undeveloped Land
	Adjacent Properties	Developed Land

5.5 Prior Investigation Reports

We were not given prior investigative reports.

5.6 Knowledgeable Parties

Based upon the historic use research, the Subject Property has been vacant. Prior to the existing development, the Subject Property consisted of undeveloped wooded marshlands.

5.7 Other Historical Research / Records

No other historical research or records were reviewed or provided.

© 2023 Inspector Education Services, Inc

5.8 Summary and Conclusion of Historical Use Records

According to local building departments records, the Subject Property has remained vacant and has consisted of undeveloped land. The findings of the historic records review did not identify any prior uses of the Subject Property that are considered to be *recognized environmental conditions* in connection with the Subject Property.

5.9 Data Gaps

Historic land use data prior to 1968 was not readily available at the time of the assessment. The Subject Property has not been developed for any use due to historical records reviews. It is our opinion that no significant data gaps were identified with regard to historical use research.

© 2023 Inspector Education Services, Inc

6.0 SITE RECONNAISSANCE / INTERVIEWS

6.1 Interviews

Our inspector, Tim Friis, conducted the site reconnaissance on August 2, 2023. The inspector was not escorted. No information was obtained from an interview. An AAI interview questionnaire was forwarded to Client for completion by parties knowledgeable of the Subject Property. Responses provided are incorporated within.

6.2 Subject Property Use

The Subject Property is utilized as a Vacant Parcel.

6.3 Hazardous Substance / Petroleum Products Storage / Handling

No significant quantity of hazardous substance/petroleum product storage or handling was noted at the Subject Property at the time of the assessment. No evidence of any spills, releases of hazardous substances or petroleum products was noted at the Subject Property during the site reconnaissance.

6.4 Waste Generation, Storage and Disposal

As the Subject Property is not developed, solid waste is not generated.

6.5 Waste Discharges

As the Subject Property is not developed, sanitary sewage is not generated.

6.6 Bulk Petroleum Storage Tanks

No bulk petroleum storage tanks (Above Ground or Underground) were observed on the Subject Property. The Subject Property is not identified on any LST or Spills site databases.

6.7 Polychlorinated Biphenyls (PCBs)

No transformers, meters, or electrical distribution panels are on the Subject Property. No suspected PCB containing hydraulic equipment was identified at the Subject Property.

6.8 Hydraulic Equipment / Storage

Hydraulic equipment was not observed to be in use at the Subject Property.

6.9 Drains / Sumps

No floor drains or sump pits were noted at the Subject Property other than for sewage management. No environmental concerns were noted with these systems. No additional floor drains or sump pits were noted at the Subject Property.

6.10 Exterior Pits / Ponds / Lagoons

No evidence of pits, ponds or lagoons was identified on the Subject Property in connection with waste treatment or disposal.

6.11 Stained Soil, Pavement / Stressed Vegetation

No staining of soils or pavement, or evidence of stressed vegetation, was noted during the assessment.

6.12 Groundwater Wells and Septic Systems

No ground water wells or septic systems were observed.

© 2023 Inspector Education Services, Inc

6.13 Fill Material

No evidence of recently deposited or non-native fill materials was noted at the Subject Property. Based on the location and history of the Subject Property, historic urban fill materials may exist on the Subject Property.

© 2023 Inspector Education Services, Inc

7.0 REGULATORY RECORD REVIEWS

A search of environmental regulatory databases, by service from ERIS, was conducted in accordance with the requirements of the ASTM. We have also reviewed the "unmappable" listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that cannot be plotted with confidence but are identified as being located within the general area of the Subject Property based on the partial street address, city name or zip code. In general, a listing cannot be mapped due to inaccurate or incomplete address information in the database that was supplied by the corresponding regulatory agency. Any listings from the unmappable summary that were identified by us as a result of the area reconnaissance and/or cross-referencing to mapped listings are included in the corresponding database discussion within this section.

Regulatory Database	Search Distance	On-Site Listings	Adj. Property Listings	Total Within Search Distance
Fed. NPL	1-mile	0	0	0
Fed. Delisted NPL	1/2-mile	0	0	0

© 2023 Inspector Education Services, Inc

- *The results of the review for each database are discussed below. The locations for the facilities discussed in this section are shown on the figures in the full ERIS report, included as Appendix D.*
- *The chart above is a summary of major potential concerns that could have an impact on the Subject Property and does not represent the entire review, included as Appendix D.*
- *According to the EPA Policy Toward Owners of Property Containing Contaminated Aquifers, dated July 3, 1995, the EPA will not take enforcement action against a property owner who owns property under which is an aquifer contaminated by subsurface migration from an off-site source or sources. Therefore, the Subject Property owner would not be liable for any contamination of the underlying aquifer that was attributed to an off-site source.*

7.1 On-Site Database Listings

- The Subject Property does not have any recognized environmental concerns listed on regulatory databases searched for this assignment.

7.2 Adjoining Property Database Listing

- No adjoining properties were identified on regulatory databases reviewed as having recognized environmental concerns.

7.3 Vapor Encroachment Conditions

ASTM – Vapor Encroachment Screening (VES) is the "presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater either on or near the TP."

- Neither the Subject Property nor any surrounding properties were identified as causing vapor encroachment.

7.4 Federal Agency Record Review

EPA – The National Priorities List (NPL), also known as the Superfund list, is the United States Environmental Protection Agency (USEPA) listing of uncontrolled or abandoned hazardous waste sites. These sites are targeted for possible long-term remedial action under the Superfund Act of 1980. The list is primarily based on the EPA's Hazardous Ranking System.

- No NPL listing was identified within a one-mile radius of the Subject Property.

EPA – Delisted NPL Site List (DNPL) provides a list of sites formerly listed on the NPL that have since been "de-listed" after the EPA has determined that no further response is appropriate.

- No DNPL listings were identified within a $^1/_2$-mile radius of the Subject Property.

EPA – The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) is the EPA database of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation, by the EPA for the release or threatened release of hazardous substances.

- No CERCLIS listings were identified within a ½ - mile radius of the Subject Property.

EPA – CERCLIS-NFRAP (No Further Remedial Action Planned) is the EPA database of archived sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been

© 2023 Inspector Education Services, Inc

completed and that the EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

- No CERCLIS-NFRAP listings were identified within a ½ - mile radius of the Subject Property.

EPA – The Resource Conservation and Recovery Information System (RCRIS) is a database of facilities, which generate or treat, store or dispose of EPA regulated hazardous waste, or meet other applicable requirements of the Resource Conservation and Recovery Act (RCRA). Inclusion on this database does not imply that mishandling or a release of hazardous waste has occurred at the facility. RCRIS categories are as follows:

Corrective Action (CORRACTS) list is a list of hazardous waste treatment, storage or disposal facilities and other RCRIS facilities (due to past interim status or storage of hazardous waste beyond 90 days) that have been notified by the USEPA to undertake corrective action under RCRA.

- No CORRACTS listings were identified within a one-mile radius of the Subject Property.

Treatment, Storage and Disposal Facilities (TSD). Facilities listed under TSD are sites that treat, store and/or dispose of EPA regulated hazardous waste.

- No TSD listings were identified within a $^1/_2$-mile radius of the Subject Property.

Large Quantity Generators (LQG). Facilities listed under LQG either generate more than 1000 kilograms (kg) of EPA regulated hazardous waste per month, or meet other applicable requirements of RCRA.

- Neither the Subject Property nor any adjoining properties were listed on the LQG database.

Small Quantity Generators (SQG). Facilities listed under SQG either generate from 100 kilograms (kg) to 1000 kg of EPA regulated hazardous waste per month, or meet other applicable requirements of RCRA.

- Neither the Subject Property nor any adjoining properties were listed on the SQG database.

EPA – The Emergency Response Notification System (ERNS) is a national database used to store information concerning the sudden and/or accidental release of hazardous substances, including petroleum, in quantities greater than the reportable quantity, as maintained at the National Response Center. The database contains preliminary information from spill reports made to various federal departments including the EPA.

- No listings were identified for the Subject Property.

7.5 State Agency Record Review

State Hazardous Waste Sites (SHWS) database contains potential or confirmed hazardous substance release properties. This is the state equivalent to NPL *and* CERCLIS.

© 2023 Inspector Education Services, Inc

- No SHWS listings were identified within a one-mile radius of the Subject Property.

Solid Waste Facility/Landfill (SWF/LF) list provides information on the location of registered state landfills and associated transfer facilities.

- No SWF/LF listings were identified within a $^1/_2$-mile radius of the Subject Property.

Leaking Underground/Aboveground Storage Tank (LST) is a comprehensive listing of all reported active and inactive leaking storage tank sites.

- No LST listings were identified within a $^1/_2$-mile radius of the Subject Property.

Registered Storage Tank Database is the listing of registered storage tank sites. This includes the AST and UST databases.

- Neither the Subject Property nor any adjoining properties were listed on the AST or UST databases.

Delisted Contaminated Sites (DEL CONTAM SITE) is a listing of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

- No DEL CONTAM SITE listings were identified within a $^1/_2$-mile radius of the Subject Property.

Contaminated Sites (DWM CONTAM) is a listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

- No DWM CONTAM listings were identified within a $^1/_2$-mile radius of the Subject Property.

Engineering Controls Site Listing (ENG Controls) list provides information on the location of remediation sites using engineering controls as part of the response action. Engineering controls include various forms of caps, building foundations, liners and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

- No ENG Control listings were identified within a $^1/_2$-mile radius of the Subject Property.

Institutional Controls Site Listing (INST Controls) list provides information on the location of remediation sites using institutional controls as part of the response action. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on-site. Deed restrictions are generally required as part of the institutional controls.

- No INST Control listings were identified within a $^1/_2$-mile radius of the Subject Property.

© 2023 Inspector Education Services, Inc

Voluntary Cleanup Program (VCP) list provides information on the location of sites involved in a Voluntary Cleanup Program. Under a Voluntary Cleanup Program, a property owner will voluntarily enter into an agreement with a state or local environmental regulatory agency to conduct an investigation and remediation for specific area(s) of concern.

- No VCP listings were identified within a $^1/_2$-mile radius of the Subject Property.

Brownfields (BF) list provides information on the location of sites involved in a federal, state or local Brownfields program.

- No BF listings were identified within a $^1/_2$-mile radius of the Subject Property.

7.6 Additional Environmental Records

Additional Environmental Records identify the listings of any hazardous substances or petroleum products that has/had occurred in connection with the Property. Those identified may be under State/municipal specific database(s), State/municipal run programs, and/or State/municipal historic databases.

- Neither the Subject Property nor the adjoining properties were identified on other current environmental databases.

7.7 Historically Recognized Environmental Conditions

Historically Recognized Environmental Conditions (HRECs) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls. HRECs are *de minimis* conditions, and, therefore, are not classified as RECs.

US Historical Auto Station is a comprehensive listing of all reported active and inactive auto stations in connection with the Subject Property.

- Neither the Subject Property nor the adjoining properties were identified as listed on the US Hist. Auto Stat. databases.

US Historical Cleaners is a comprehensive listing of all reported active and inactive drycleaners in connection with the Subject Property.

- Neither the Subject Property nor the adjoining properties were identified as listed on the US Hist. Cleaners databases.

7.8 Local Government Agencies

Lee County Appraisal District:

- We conducted a search of publicly accessible records for the Subject Property address on the Real Property Account Information website.

The Subject Property was not identified on other databases not covered by the ASTM standards within the local government agencies.

Review of the remaining sites identified within the ASTM search parameters did not identify any site that is considered to be a recognized environmental condition in connection with the Subject Property.

© 2023 Inspector Education Services, Inc

8.0 NON-ASTM SCOPE CONCERNS

8.1 Asbestos-Containing Material (ACM)

As the Subject Property is not developed, there **should not** be the potential for asbestos-containing materials at the Subject Property. No suspect friable materials were observed in the accessed areas. Additional quantities of ACM or suspect ACM may exist in enclosed areas or areas not accessed during the assessment. It is emphasized that this limited screening does not constitute a comprehensive asbestos survey of the premises and is meant only to provide a cursory evaluation regarding the overall prevalence of suspect ACM at the Subject Property.

8.2 Lead-Based Paint

As the Subject Property is not developed, lead-based paint **should not** be present at the Subject Property. Painted surfaces were noted to be in good condition in accessed units.

8.3 Lead in Drinking Water

The potable water source on the subject site is provided by the Lee County Utilities. Considering required regular testing protocols, it is presumed the water source contains regulated levels of lead and complies with all federal and state regulations.

8.4 Radon

Radon is a naturally occurring, colorless, odorless gas that is a byproduct of the decay of radioactive materials potentially present in bedrock and soil. Radon gas may enter the lowest level of a building through floor cracks, structural joints or plumbing conduits. The United States Environmental Protection Agency (USEPA) guidance level for annual residential exposure to radon is 4.0 picocuries per liter of air (pCi/L). The guidance level is not a regulatory requirement for private owners of commercial real estate but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Based on information obtained from data obtained by the USEPA, the Subject Property is located in an area with a low potential for radon concentrations that exceed current USEPA action guidelines. Lee County is classified as a Zone 3 or ‘low risk’ area for radon. Considering the low risk area, radon is not considered a significant concern.

8.5 Mold

No mold was observed at the Subject Property during this assessment.

8.6 Indoor Air Quality (IAQ)

No indoor air quality issues were observed at the Subject Property during this assessment. No visible mold was observed within the Subject Property during this assessment.

8.7 Endangered Species

Following the guidance of the Endangered Species Act (ESA), in which the government protects endangered and threatened plants and animals and their habitats, we were not able to identify or acquire any readily accessible documentation, which would restrict the use of the Subject Property.

An alligator was observed to be living in the ponds on the Subject Property.

9.0 PURPOSE AND LIMITATIONS

9.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice; E1527-21 *Phase I Environmental Site Assessment Process* (update 11/2013), and E2600-15 *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*. The ASTM describes these methodologies as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions (RECs), historically recognized environmental conditions (HRECs), controlled recognized environmental conditions (CRECs), and potential vapor encroachment screening (VES).

The term *recognized environmental conditions (RECs)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *REC*s.

A *historical recognized environmental condition (HREC)* as defined by ASTM E1527-21 is "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)." HRECs are not RECs, though they have been in the past. HRECs are *de minimis* conditions, and, therefore, are not classified as RECs. For example, many HRECs will be historical auto service centers where the hazardous waste has either been cleared by a regulatory authority or naturally depleted over time to a *de minimis* condition.

A *controlled recognized environmental condition (CREC)* is defined by ASTM E1527-21 as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a NFA letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, AULs, institutional controls, or engineering controls)." For example, lead-contaminated aquifers that are filtered before becoming available for human consumption.

ASTM E2600-15 defines a *vapor encroachment screening (VES)* as the "presence or likely presence of chemicals of concern (COC) vapors in the subsurface of the target property (TP)

caused by the release of vapors from contaminated soil or groundwater either on or near the TP." For example, an industrial factory may have plumes that feed hazardous chemicals into the atmosphere. Properties close to this factory may be at risk for chemicals in the vapor to contaminate their soil or aquifer, or the vapors themselves could leak into the building.

The chief components of this assessment are described as follows:

- Review and discussion of current Subject Property conditions regarding the presence or absence of hazardous chemicals/petroleum products; generation, treatment, storage or

© 2023 Inspector Education Services, Inc

disposal of hazardous, regulated or medical wastes; electrical equipment that utilizes oils which potentially contain PCBs; and bulk storage tanks (above or below ground).

- Review and discussion of the usage of adjacent and nearby properties to identify the potential for contamination (if present and/or suspected) to migrate onto the Subject Property.

- Summary of physical characteristics of the Subject Property through a review of available topographic, geologic and groundwater data.

- Research of the historic uses of the Subject Property and adjoining properties through a review of reasonably ascertainable standard sources, such as fire insurance maps (Sanborn), city directories, aerial photographs, prior reports, topographic maps, and interviews.

- A regulatory review of federal and state environmental databases, and other local environmental records, within specific search distances defined by the ASTM.

A cursory evaluation for the following "Non-ASTM" concerns, such as the following:

- Suspect Asbestos-Containing Materials (ACM)
- Lead-Based Paint (LBP)
- Lead in Drinking Water (Pb)
- US EPA Designated Radon Potential (RN)
- Mold
- Indoor Air Quality (IAQ)
- Endangered Species

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

9.2 Inaccessible Locations

All areas of the Subject Property were made available to the assessor. Limitations include (occupants, furniture, machinery, and privacy restricted areas).

9.3 Limitations and Exceptions

Historic research data gaps are detailed in Section 5.9, if applicable. No other exceptions or deletions from the ASTM Standard E1527-21, and E2600-15 are reported.

9.4 Abbreviations/Acronyms

We may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos-containing Material
AST	– Aboveground Storage Tank
ASTM	– American Standard for Testing Materials
CREC	– Controlled Recognized Environmental Condition
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
LBP	– Lead-based Paint
LST	– Leaking Underground/Aboveground Storage Tank
Pb	– Lead

© 2023 Inspector Education Services, Inc

RN – Radon
REC – Recognized Environmental Condition
Tanks – Registered AST/UST
AST – Aboveground Storage Tank
UST – Underground Storage Tank
DEL COMTAM SITE – Delisted Contaminated Site
DWM CONTAM – Contaminated Site
VES – Vapor Encroachment Screening

9.5 Special Terms and Conditions

Our company has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. The methodology of this Phase I Environmental Site Assessment was consistent with the ASTM Standard Practice for E1527-21, and E2600-15. Findings within this report are based on information collected from observations made on the day of the site investigation and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation or other construction purposes. We make no representation or warranty that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on our visual observations of the Subject Property, the municipal research findings reasonably obtained, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Our company relies completely on the information, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, we did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment.

Regardless of the findings stated in this report, we are not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report focuses on the Subject Property and neighboring properties that could impact the Subject Property. Neighboring properties listed in governmental environmental records are identified within specific search distances. The search distance varies depending upon the particular government record being checked. The regulatory research is designed to meet the requirements of ASTM Standard E1527-21, and E2600-15. The information provided in the regulatory database report is assumed to be correct and complete.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

© 2023 Inspector Education Services, Inc

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. “Reasonable efforts” are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify subsurface equipment that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

We are not a professional title insurance firm and make no guarantee, explicit or implied, that the records, which were reviewed, represent a comprehensive or precise delineation of past Subject Property ownership or tenancy for legal purposes.

10.0 ENVIRONMENTAL PROFESSIONAL (EP) ATTESTMENT

Kross Inspectors has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 2252.

I, James L Kreider, declare that, to the best of my professional knowledge and belief, meet the definition of *Environmental Professional* (EP) as defined by the Environmental Protection Agency and ASTM referenced in §2252.10 of 40 CFR 2252. By my signature, I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property.

Name: James L Kreider
Environmental Professional

10.1 EP Statement of Qualifications (SOQ)

James L Kreider has been conducting real estate transaction assessments since 2002 including Residential Real Estate Appraisals, Home Inspections, Property Condition Assessments, Insurance Inspections, Radon Measurements, and Environmental Risk Assessments. As an Environmental Professional, James has conducted over 1,500 Phase I Environmental Site Assessments for various types of properties including, residential, commercial, industrial, and agricultural uses.

The IES Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering and institutional controls.

Following established procedures, IES uses client-supplied property information to:

- Search for parcel information and/or legal description
- Research official land title documents recorded at jurisdictional agencies such as recorder's office, registries of deeds, county clerks' offices, etc.
- Access a copy of the deed
- Search for environmental encumbrance(s) associated with the deed
- Provide a copy of any environmental encumbrance(s) based upon a review of keywords in the instrument(s) (title, parties involved and description)
- Provide a copy of the deed or cite documents received

No warranty of Accuracy or Liability for IES: The information contained within this report has been produced by Inspector Education Services, Inc ("IES") using Aerial images produced by multiple resources. The images contained herein do not purport to be and do not constitute a guarantee of the accuracy of the information contained herein. Although IES has endeavored to present you with information that is accurate, IES disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising there from. Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Mar 23, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Mar 23, 2023

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 24, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Apr 24, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 24, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 24, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 24, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: May 25, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Aug 8, 2022

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Mar 23, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

Superfund Waste Cleanup & State-Funded Action Sites: SHWS

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database is state equivalent CERCLIS.

Government Publication Date: Jun 16, 2023

Delisted State-Funded Action Sites: DELISTED SHWS

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jun 16, 2023

ERIC Waste Cleanup: ERIC

Environmental Restoration Integrated Cleanup (ERIC) is a single database for tracking contaminated site cleanup activities in the Florida Department of Environmental Protection (DEP)'s Division of Waste Management (DWM). Includes records from 11 different DEP data systems, allowing tracking of a contaminated site throughout the course of cleanup regardless of which program area took the lead.

Government Publication Date: May 8, 2023

Florida Department of Environmental Protection Cleanup Sites: CLEANUP DEP

The Cleanup Sites layer feeds the FDEP's Contamination Locator Map (CLM). It provides locations and document links for sites currently in the cleanup process and sites awaiting cleanup funding. Cleanup programs include: Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Government Publication Date: May 23, 2023

Waste Cleanup Responsible Party Sites: WCRPS

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Apr 11, 2021

Delisted Waste Cleanup Sites: DELISTED WCP

List of sites which once appeared on - and have since been removed from - the list of Waste Cleanup Sites made available by the Florida Department of Environmental Protection.

Government Publication Date: May 23, 2023

Solid Waste Facilities and Landfills: SWF/LF

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: May 25, 2023

Leaking Tanks: LST

The Storage Tank Regulation Section is part of the Petroleum Restoration Program in the Florida Department of Environmental Protection (FDEP)s Division of Waste Management. In 1983, Florida was one of the first states in the union to pass legislation and adopt rules for underground and aboveground storage tank systems. Since then, over 28,000 facilities have reported discharges of petroleum products from storage tank systems. Florida relies on groundwater for about 92 percent of its drinking water needs, and has some of the most stringent rules in the country.

Government Publication Date: Jun 28, 2023

Delisted Leaking Tanks: DELISTED LST

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Jun 28, 2023

Underground Storage Tanks: UST

List of Underground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: May 11, 2023

Aboveground Storage Tanks: AST

List of Aboveground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity.The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances.

Government Publication Date: May 11, 2023

Storage Tank Facilities: TANK

List of storage tank facilities made available by the Florida Department of Environmental Protection (FL DEP) for which tank information is not available. In the case of closed facilities - where all tanks have been removed or closed, and there is also no petroleum discharge or on-going cleanup activity - the owner data may not be current, but rather would represent the most recent information made available to FL DEP.

Government Publication Date: May 11, 2023

Delisted AST UST Storage Tanks: DEL UST AST TANK

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.

Government Publication Date: Jul 2, 2015

Delisted Storage Tanks: DEL STORAGE TANK

List of sites that once appeared on - and have since been removed from - the list of UST and AST storage tank facilities made available by the Florida Department of Environmental Protection.

Government Publication Date: May 11, 2023

Federal Facilities Listing: FF TANKS

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.

Government Publication Date: Jun 1, 2023

Storage Tank/Contaminated Facility Search: STCS

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search. Note that tank details do not appear for facilities for which all tanks have been removed.

Government Publication Date: May 12, 2023

Institutional Controls Registry: INST

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.

Government Publication Date: Feb 21, 2023

Engineering Controls: ENG

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Feb 21, 2023

Voluntary Cleanup Sites: VCP

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jul 1, 2022

Brownfield Sites: BROWNFIELDS

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.

Government Publication Date: Sep 8, 2021

Brownfield Areas: BROWNFIELD AREA

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.

Government Publication Date: Apr 20, 2023

Hazardous Waste Facility List: HAZ WASTE FAC

List of Hazardous Waste Financial Assurance Facilities made available by the Division of Waste Management of the Florida Department of Environmental Protection (FDEP). The FDEP's Hazardous waste financial responsibility requirements exist to ensure that certain hazardous waste facilities and transporters have the financial resources available to provide for closure, postclosure and corrective action requirements and/or pay for bodily injury or property damage that might result from accidents, spills or other unexpected events, known as liabilities. These closure, postclosure, corrective action and liability requirements are called financial assurance.

Government Publication Date: Jul 5, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 20, 2023

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 20, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Apr 26, 2023

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been detected in water and/or soil is provided by the U.S. Environmental Protection Agency (EPA). EPA Disclaimer with FOIA file: Inclusion on the list does not necessarily mean that drinking water has been affected, nor does inclusion mean that anyone at the site has been exposed or is at risk for detrimental health effects.

Government Publication Date: Jun 15, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN
An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP
An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP
Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).
Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER
The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS
The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.
Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS
A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Apr 15, 2023

Delisted Drycleaner Facilities: DELISTED FED DRY
List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).
Government Publication Date: Apr 15, 2023

Formerly Used Defense Sites: FUDS
Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.
Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Jun 5, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

Priority Ranking List: PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

Government Publication Date: Mar 7, 2022

Dry Cleaning Facilities: DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

Government Publication Date: Apr 13, 2023

Delisted Dry Cleaning Facilities: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

Government Publication Date: Apr 13, 2023

Historical Dry Cleaners: HISTORICAL DRYC

The Florida Department of Environmental Protection (FDEP) provided this historical database of regulated and non-regulated dry cleaning facilities. These facilities were at one time tracked and registered by the FDEP OCULUS Electronic Document Management System as "drums" in the underground storage tank database.

Government Publication Date: Aug 2, 2013

Oil and Hazardous Materials Incidents: SPILLS

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Apr 26, 2023

Contaminated Sites: DWM CONTAM

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

Government Publication Date: Oct 12, 2022

Delisted Contaminated Sites: DEL CONTAM SITE

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

Government Publication Date: Sep 30, 2015

Aqueous Film Forming Foam (AFFF): PFAS AFFF

A list of fire fighter training facilities that use or possibly used Aqueous Film Forming Foam (AFFF). This list is made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: May 31, 2023

PFAS Investigation at Federal Facilities: PFAS

List of sites - including Federal Facilities - in Florida at which either a) there has been confirmed or suspected usage of Aqueous Film Forming Foam (AFFF), or b) the Division of Waste Management has identified as a potential source or environmental impact related to per- and polyfluoroalkyl substances (PFAS). The Florida Department of Environmental Protection (DEP) is committed to the protection of the groundwater resources of the state and the public health and safety of residents. The DEP will continue its efforts to investigate and understand PFAS in the environment and the ecological and human health risks associated with PFAS contamination. Listings made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: May 24, 2023

Ground Water Contamination Areas: GW CONTAM

List of areas of known groundwater contamination made available by the Florida Department of Environmental Protection (DEP). 38 counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

Government Publication Date: Jul 12, 2023

Underground Injection Control Wells: UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Government Publication Date: Apr 27, 2023

Well Surveillance Program Facilities: WELL SURVEILLANCE

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.

Government Publication Date: Jul 20, 2023

Cattle Dip Vats: CDV SOUTHEAST

A list of Cattle Dip Vats in Southeast Florida made available by the Florida Department of Environmental Protection.

Government Publication Date: Jan 19, 2017

Tier 2 Report: TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.

Government Publication Date: Mar 6, 2023

Delisted County Records: DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: May 8, 2023

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX B
EDM DATABASE REPORT

Environmental Data Report

Standard ASTM Research

Subject Property:

Corkscrew 80 Acres

Andrew McAuley
Earth Tech Environmental, LLC
10600 Jolea Avenue
Bonita Springs, FL 34135

Subject: **Standard ASTM Research - EDM Project #26975**

Dear Mr. McAuley

Thank you for choosing Environmental Data Management, Inc. The following report provides the results of our environmental data research that you requested for the following location:

Corkscrew 80 Acres
20351 Corkscrew Road
Estero, Florida 33928

The following is a summary of the components contained within this report:

- **Executive Summary** –lists the databases that were searched for this report, the search distance criteria and the number of sites identified for each database.
- **Map of Study Area**– street map showing the location of the Subject Property and any regulatory listed sites identified within the search criteria.
- **Site Summary Table** –displays the Map ID number, Permit or Registration number, Name/Address and the Government Database(s) for the identified regulatory listed sites.
- **Detail Reports** – data detail for each database record identified.
- **Proximal Records Table** – a listing of potentially relevant sites identified just beyond the search criteria.
- **Non-Mapped Records Table** - lists those government records that do not contain sufficient address information to plot within our GIS system, but may still exist within your study area.
- **Addl Maps (where applicable)** – includes Recent Aerial Photo, USGS Topographic maps, FEMA Floodplain & NWI Wetland Map, map of statewide American Indian Lands and our Environmental Impact Areas map, showing the location of suspect sites such as NPL/STNPL, Brownfields, FUDS, etc.... Our Florida well data report is also include with the Standard and Comprehensive formats.
- **Agency List Descriptions –** defines the regulatory databases included in this report along with the dates that each database was last updated by the respective agency and EDM.

At EDM we take great pride in our work, and continually strive to provide you with the most accurate and thorough research service available. This report is only intended as a means to assist in identifying locations that may pose an environmental concern relative to the property under evaluation. Its use is not intended to replace the need for a complete environmental assessment or regulatory file review, but rather as a supplement to the overall evaluation.

Thank you again for selecting EDM as your data research provider. Should you have any questions regarding this report or our service, please feel free to contact us. We appreciate the opportunity to be of service to you and look forward to working with you in the future.

ENVIRONMENTAL DATA MANAGEMENT, INC.

Report Date: 7/29/2024

*** Disclaimer ***

Please understand that the regulatory databases we utilize were not originally intended for our use, but rather for the source agency's internal tracking of sites for which they have jurisdiction or other interest. As a result of this difference in intended use, their data is frequently found to be incomplete or inaccurate, and is less than ideal for our use. Our report is not to be relied upon for any purpose other than to "point" at approximate locations where further evaluation may be warranted. No conclusion can be based solely upon our report. Rather, our report should be used as a first step in directing your attention at potential problem areas, which should be followed up by site inspections, interviews with relevant personnel, regulatory file review and other means as specified in the ASTM Standard E 1527-13. Readers proceed at their own risk in relying upon this data, in whole or in part, for use within any evaluation. More detailed language with regard to such limitations and our Terms and Conditions may be found on our website at edm-net.com.

Proximal Site Summary Table

This table includes mapped sites whose plotted coordinates fall just outside of the ASTM or client defined research distance but whose property boundaries may still extend into the search area. These sites are typically large commercial or industrial tracts that may merit inclusion in the evaluation process. Detail data reports on any of these sites may be requested and will be sent as an addendum to this report at no additional cost.

The **Just** value is the total parcel assessment (less any considerations for the cost of sale). This is the closest value to *Fair Market Value* we produce and is dated as of January 1st of the tax year in question (F.A.C. 12D-1.002).

The **Land** value is the portion of the total parcel assessment attributed to the land.

The **Market Assessed** value is the total parcel assessment (less any considerations for the cost of sale) based upon the assessment standard. Most parcels are assessed based either upon the *Highest and Best Use* standard or the *Present Use* standard (*F.S. 193.011*) . For *Agriculturally Classified* parcels (or parts thereof), only agricultural uses are considered in the assessment (*F.S. 193.461 (6) (a)*). The difference between the *Highest and Best Use/Present Use* and the *Agricultural Use* is often referred to as the *Agricultural Exemption*.
(i.e. Market Assessed = Just - Agricultural Exemption)

The **Capped Assessed** value is the *Market Assessment* after any *Save Our Homes* or *10% Assessment Limitation* cap is applied. This assessment cap is applied to all properties and limits year-to-year assessment increases to either the *Consumer Price Index* or 3%, whichever is lower for Homestead properties OR 10% for non-Homestead properties.

The **Exemptions** value is the total amount of all exemptions on the parcel.

The **Taxable** value is the *Capped Assessment* after exemptions (*Homestead, etc.*) are applied to it. This is the value that most taxing authorities use to calculate a parcel's taxes.
(i.e. Taxable = Capped Assessed - Exemptions)

Agency List Descriptions

USEPA and State Databases are updated on a quarterly basis. Supplemental Databases are updated on an annual basis.

Florida Department of Environmental Protection (FDEP)

State Designated Brownfields(BRWNFLDS)

The FDEP Brownfields database contains a listing of State Designated Brownfield Areas and Brownfield Sites. Brownfields are typically defined as abandoned, idled or underused industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Agency File Date: 6/24/2024 **Received by EDM:** 6/24/2024 **EDM Database Updated:** 6/24/2024

Dry Cleaners List(DRY)

The FDEP Dry Cleaning Facilities List is comprised of data from the FDEP Storage Tank and Contamination Monitoring (STCM) database and the Drycleaning Solvent Cleanup Program- Priority Ranking List. It contains a listing of those Dry Cleaning sites (and suspected historical Dry Cleaning sites) who have registered with the FDEP and/or have applied for the Dry Cleaning Solvent Cleanup Program.

Agency File Date: 7/22/2024 **Received by EDM:** 7/22/2024 **EDM Database Updated:** 7/23/2024

FDEP Public Water Systems(FLPWS)

The FDEP Dinking Water Program Basic Facility Report and Public Water System Well data contain information on the location and type of public water systems and wells regulated by the department.

Agency File Date: 3/19/2024 **Received by EDM:** 3/21/2024 **EDM Database Updated:** 3/21/2024

Institutional and/or Engineering Controls(INSTENG)

The FDEP Institutional Controls Registry Database (INSTENG) contains sites that have had Institutional and/or Engineering Controls implemented to regulate exposure to environmental hazards

Agency File Date: 6/24/2024 **Received by EDM:** 6/28/2024 **EDM Database Updated:** 6/28/2024

Leaking Underground Storage Tanks List(LUST)

The FDEP LUST list identifies facilities and/or locations that have notified the FDEP of a possible release of contaminants from petroleum storage systems. This Report is generated from the FDEP Storage Tank and Contamination Monitoring Database (STCM).

Agency File Date: 6/21/2024 **Received by EDM:** 6/21/2024 **EDM Database Updated:** 6/21/2024

Solid Waste Facilities List(SLDWST)

The SLDWST list identifies locations that have conducted solid waste handling activities such as Landfills, Transfer Stations, Disaster Debris Staging Areas and sites handling Bio-Hazardous wastes. Sites listed with "##" after the Facility ID Number are historical locations, obtained from documents on record at local agencies.

Agency File Date: 7/23/2024 **Received by EDM:** 7/23/2024 **EDM Database Updated:** 7/23/2024

State CERCLIS/SEMS Equivalent(STCERC)

The STCERC list is compiled from the FDEP Site Investigation Section list, the Florida SITES list(historical) and the FDEP Cleanup Sites list. These sites are being assessed and/or cleaned up as a result of identified or suspected contamination from the release of hazardous substances. The FDEP Cleanup Sites list programs include: Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Agency File Date: 5/29/2024 **Received by EDM:** 6/21/2024 **EDM Database Updated:** 6/21/2024

State NPL Equivalent(STNPL)

The FDEP State Funded Cleanup list contains facilities and/or locations where there are no viable responsible parties; the site poses an imminent hazard; and the site does not qualify for Superfund or is a low priority for EPA. Remedial efforts at these sites are currently being addressed through State funded cleanup action.

Agency File Date: 6/25/2024 **Received by EDM:** 6/25/2024 **EDM Database Updated:** 6/25/2024

Underground/Aboveground Storage Tanks(TANKS)

The FDEP TANKS list contains sites with registered aboveground and underground storage tanks containing regulated petroleum products.

Agency File Date: 4/11/2024 **Received by EDM:** 4/11/2024 **EDM Database Updated:** 4/22/2024

Voluntary Cleanup List(VOLCLNUP)

The VOLCLNUP List is derived from the FDEP Brownfields Site Rehabilitation Agreement (BSRA) database, the FDEP ERIC Waste Cleanup database and the FDEP Office of Waste Cleanup Responsible Party Sites database (not available as of June 2021). The VOLCLNUP List identifies sites that have signed an agreement to Voluntarily cleanup a site and/or sites where legal responsibility for site rehabilitation exists pursuant to Florida Statutes and is being conducted either voluntarily or pursuant to enforcement activity.

Agency File Date: 4/11/2024 **Received by EDM:** 4/21/2024 **EDM Database Updated:** 4/23/2024

Florida Department of Health (FDOH)

FDOH Well Surveillance Program Public Water Wells(WELLSADOHC)

The FDOH Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments to locate potable wells and conduct water sampling for contaminants of concern. This report contains data on public water wells that is contained in the Well Surveillance Program database.

Agency File Date: 2/2/2021 **Received by EDM:** 3/9/2021 **EDM Database Updated:** 3/12/2021

FDOH Well Surveillance Program Private Water Wells(WELLSADOHN)

The FDOH Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments to locate potable wells and conduct water sampling for contaminants of concern. This report contains data on private water wells that is contained in the Well Surveillance Program database.

Agency File Date: 2/2/2021 **Received by EDM:** 3/9/2021 **EDM Database Updated:** 3/12/2021

Florida Water Management District (WMD)

SFWMD Private Water Well Report(SFWMDPRV)

The South Florida Water Management District (SFWMD) Water Use Regulation Facility database contains information on private well, pump and culvert locations as specified on Water Use Permits. These sites include uses for irrigation, commercial use, dewatering/mining and power. They do not include private potable sources, as they do not require SFWMD permitting.

Agency File Date: 2/22/2024 **Received by EDM:** 3/8/2024 **EDM Database Updated:** 3/8/2024

SFWMD Public Water Supply Report(SFWMDPUB)

The South Florida Water Management District (SFWMD) Water Use Regulation Facility database contains information on permitted Public Water Supply well, pump and culvert locations as specified on Water Use Permits.

Agency File Date: 2/22/2024 **Received by EDM:** 3/8/2024 **EDM Database Updated:** 3/8/2024

SJRWMD Private Water Well Report(SJRWMDPRV)

The St Johns River Water Management District (SJRWMD) Consumptive Use Permit database contains information on the location and characteristics of permitted water well and pump stations used for private purposes.

Agency File Date: 3/7/2024 **Received by EDM:** 3/11/2024 **EDM Database Updated:** 3/14/2024

SJRWMD Public Water Supply Report(SJRWMDPUB)

The St Johns River Water Management District (SJRWMD) Consumptive Use Permit database contains information on the location and characteristics of permitted water well and pump stations used for Public Water Supply.

Agency File Date: 3/7/2024 **Received by EDM:** 3/11/2024 **EDM Database Updated:** 3/14/2024

SWFWMD Domestic Water Supply Report(SWFWMDDOM)

The Southwest Florida Water Management District (SWFWMD) Well Construction Permit database contains information on the location and characteristics of SWFWMD Domestic Water Supply wells. Due to gross locational inaccuracies in the data prior to 2007, only data related to Permits issued after January 2007 is presented.

Agency File Date: 1/22/2024 **Received by EDM:** 3/1/2024 **EDM Database Updated:** 3/8/2024

SWFWMD Public Water Supply Report(SWFWMDPUB)

The Southwest Florida Water Management District (SWFWMD) Water Use Permit and Well Construction Permit databases contain information on the location and characteristics of SWFWMD Pulic Water Supply wells and withdrawal points.

Agency File Date: 1/22/2024 **Received by EDM:** 3/1/2024 **EDM Database Updated:** 3/8/2024

United States Environmental Protection Agency (EPA)

Comp Env Resp, Compensation & Liability Info Sys List(CERCLIS)

The US EPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) database tracks potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are proposed to be on the NPL, are on the NPL and sites that are in the screening and assessment phase for possible inclusion on the NPL. The CERCLIS database was retired in November of 2013 and has been replaced by the Superfund Enterprise Management System (SEMS).

Agency File Date: 11/12/2013 **Received by EDM:** 2/18/2016 **EDM Database Updated:** 2/18/2016

RCRIS Handlers with Corrective Action(CORRACTS)

The US EPA Corrective Action Sites (CORRACTS) database is a listing of hazardous waste handlers that have undergone RCRA corrective action activity.

Agency File Date: 7/15/2024 **Received by EDM:** 7/16/2024 **EDM Database Updated:** 7/16/2024

Enforcement and Compliance History(ECHO)

The US EPA Enforcement and Compliance History Online (ECHO) database provides integrated compliance and enforcement information on facilities regulated under the Clean Air Act (CAA), Clean Water Act (CWA), Safe Drinking Water Act (SDWA) and Resource Conservation and Recovery Act (RCRA).

Agency File Date: 1/21/2023 **Received by EDM:** 1/26/2023 **EDM Database Updated:** 1/27/2023

Emergency Response Notification System List(ERNS)

The Emergency Response Notification System (ERNS) database stores information on oil discharges and hazardous substance releases. The ERNS program is a cooperative data sharing effort among the EPA, DOT and the National Response Center (NRC), which currently provides access to this data.

Agency File Date: 7/6/2024 **Received by EDM:** 7/16/2024 **EDM Database Updated:** 7/16/2024

Archived Cerclis Sites(NFRAP)

The US EPA NFRAP list contains archived data of CERCLIS records where the EPA has completed assessment activities and determined that no further steps to list the site on the NPL will be taken. NFRAP sites may be reviewed in the future to determine if they should be returned to CERCLIS based upon newly identified contamination problems at the site. The NFRAP database was retired in November of 2013 and has been replaced by the Superfund Enterprise Management System (SEMS) .

Agency File Date: 10/25/2013 **Received by EDM:** 2/18/2016 **EDM Database Updated:** 2/18/2016

RCRA-LQG,SQG,CESQG and Transporters(NONTSD)

The EDM NONTSD list is a subset of the US EPA RCRAInfo System and identifies facilities that generate and transport hazardous wastes. These facilities may be Large Quantity Generators (LQG), Small Quantity Generators (SQG), Conditionally Exempt SQG's (CESQG) as well as" Non-Notifiers" and "Non-Handlers".

Agency File Date: 6/24/2024 **Received by EDM:** 6/28/2024 **EDM Database Updated:** 7/5/2024

National Priorities List(NPL)

The US EPA National Priorities List (NPL) contains facilities and/or locations where environmental contamination has been confirmed and prioritized for cleanup activities under the Superfund Program. EDM's NPL Report includes sites that are currently on the NPL as well as sites that have been Proposed, Withdrawn and/or Deleted from the list. Previously, information for the NPL was managed under the CERLIS data management system. In 2014 this system was replaced with the Superfund Enterprise Management System (SEMS). EPA last updated CERCLIS in November of 2013. EDM's NPL Report contains available SEMS data and the archived CERCLIS data relative to NPL sites.

Agency File Date: 7/22/2024 **Received by EDM:** 7/22/2024 **EDM Database Updated:** 7/22/2024

NPL Liens List(NPLLIENS)

The US EPA NPL Liens List identifies those sites where under authority granted by CERCLA, liens have been filed against real property in order to recover expenditures from remedial action or when the property owner receives a notice of potential liability.

Agency File Date: 6/24/2024 **Received by EDM:** 7/17/2024 **EDM Database Updated:** 7/17/2024

SEMS Active Site Inventory List(SEMSACTV)

The US EPA Superfund Enterprise Management System (SEMS) tracks potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. The SEMSACTV list contains sites that are on the National Priorities List (NPL) as well as sites that are prosposed for or in the screening and assessment phase for possible inclusion on the NPL. SEMS has replaced the CERCLIS database, which was retired in November of 2013.

Agency File Date: 6/26/2024 **Received by EDM:** 7/16/2024 **EDM Database Updated:** 7/16/2024

SEMS Archived Site Inventory List(SEMSARCH)

The US EPA Superfund Enterprise Management System (SEMS), contains archived data of CERCLIS or SEMS records where the EPA has completed assessment activities and determined that no further steps to list the site on the NPL will be taken. These sites may be reviewed in the future to determine if they should be returned to SEMS based upon newly identified contamination problems at the site. SEMS has replaced the CERCLIS database, which was retired in November of 2013. The SEMSARCH database contains these newly archived records under the SEMS database management system.

Agency File Date: 6/26/2024 **Received by EDM:** 7/16/2024 **EDM Database Updated:** 7/16/2024

Tribal Lust List(TRIBLLUST)

EDM's Tribal LUST list is derived from the USEPA Region IV Tribal Tanks database by extracting those sites with indicators of past and/or current releases.

Agency File Date: 2/24/2010 **Received by EDM:** 3/9/2010 **EDM Database Updated:** 3/9/2010

Tribal Tanks List(TRIBLTANKS)

The USEPA Region IV Tribal Tanks database lists Active and Closed storage tank facilities on Native American lands.

Agency File Date: 2/24/2010 **Received by EDM:** 3/9/2010 **EDM Database Updated:** 3/9/2010

RCRA-Treatment, Storage and/or Disposal Sites(TSD)

The EDM TSD list is a subset of the US EPA RCRAInfo system and identifies facilities that Treat, Store and/or Dispose of hazardous waste.

Agency File Date: 6/24/2024 **Received by EDM:** 6/28/2024 **EDM Database Updated:** 7/5/2024

Brownfields Management System(USBRWNFLDS)

The US EPA Brownfields program provides information on environmentally distressed properties that have received Grants or Targeted funding for cleanup and redevelopment . Tribal Brownfield sites are included in the USBRWNFLDS database.

Agency File Date: 5/25/2023 **Received by EDM:** 5/25/2023 **EDM Database Updated:** 5/30/2023

Institutional and/or Engineering Controls(USINSTENG)

The USINSTENG list is compiled from data elements contained in the NPL, CORRACTS, USBRWNFLDS and RCRAInfo databases.

Agency File Date: 2/21/2024 **Received by EDM:** 2/21/2024 **EDM Database Updated:** 2/21/2024

Environmental Impact Areas

Brownfield Areas and Sites

The FDEP Brownfields database contains a listing of State Designated Brownfield Areas and Brownfield Sites. Brownfields are typically defined as abandoned, idled or underused industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Agency File Date: 6/24/2024 **Received by EDM:** 6/24/2024 **EDM Database Updated:** 6/24/2024

https://floridadep.gov/waste/waste-cleanup/content/brownfields-program

Cattle Dipping Vats

From the 1910's through the 1950's, vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides such as DDT where also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

Some of the sites have been located and are currently under investigation. However, most of the listings are from old records of the State Livestock Board, which listed each vat as it was put into operation. In addition, some privately operated vats may have existed which were not listed by the Livestock Board. EDM's Cattle Dipping Vat sites are retrieved from the Voluntary Cleanup and STCERC datablases. For additional information on Cattle Dipping Vats visit the FDEP and FDOH websites at:

Agency File Date: 10/31/2018 **Received by EDM:** 1/25/2019 **EDM Database Updated:** 1/25/2019

https://floridadep.gov/waste/district-business-support/content/cattle-dipping-vats-cdv

http://www.floridahealth.gov/environmental-health/drinking-water/cattledipvathome.html

Formerly Used Defense Sites

The DoD is responsible for the environmental restoration of properties that were formerly owned by, leased to or otherwise possessed by the United States and operated under the jurisdiction of the Secretary of Defense prior to October 1986. Such properties are known as Formerly Used Defense Sites (FUDS). The Army is the executive agent for the program and the U.S. Army Corps of Engineers manages and directs the program's administration. For more information on the FUDS Program, including maps and data on individual sites, visit the Army Corps of Engineers website at:

Agency File Date: 5/29/2018 **Received by EDM:** 1/25/2019 **EDM Database Updated:** 1/25/2019

http://www.usace.army.mil/Missions/Environmental/Formerly-Used-Defense-Sites/

FUDS Munitions Response Sites

The DoD developed the Military Munitions Response Program (MMRP) in 2001 to addresses munitions-related concerns, including explosive safety, environmental, and health hazards from releases of unexploded ordnance (UXO), discarded military munitions (DDM), and munitions constituents (MC) found at locations, other than operational ranges, on active and Base Realignment and Closure (BRAC) installations and Formerly Used Defense Sites (FUDS) properties. The MMRP addresses non-operational range lands with suspected or known hazards from munitions and explosives of concern (MEC) which occurred prior to September 2002, but are not already included with an Installation Response Program (IRP) site cleanup activity. For more information on the FUDS MMRP Program, including maps and data on individual sites, visit the Army Corps of Engineers website at:

Agency File Date: 5/14/2018 **Received by EDM:** 1/25/2019 **EDM Database Updated:** 1/25/2019

http://www.asaie.army.mil/Public/ESOH/mmrp.html

Groundwater Contamination Areas

The Ground Water Contamination Areas GIS layer is a statewide map showing the boundaries of delineated areas of known groundwater contamination pursuant to Chapter 62-524, F.A.C., New Potable Water Well Permitting In Delineated Areas. 38 Florida counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. This GIS layer represents approximately 427,897 acres in 38 counties in Florida that have been delineated for groundwater contamination. However, it does not represent all known sources of groundwater contamination for the state of Florida.

This information is intended to be used by regulatory agencies issuing potable water well construction permits in areas of ground water contamination to protect public health and the ground water resource. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

Agency File Date: 2/23/2024 **Received by EDM:** 3/1/2024 **EDM Database Updated:** 3/1/2024

https://floridadep.gov/water/source-drinking-water/content/delineated-areas

Institutional Controls

The FDEP Institutional Controls GIS layer is a statewide map showing the approximate boundaries of delineated areas where Institutional Controls are in place.

An institutional control provides for certain restrictions on a property. For example, a site may be cleaned up to satisfy commercial contamination target levels and an institutional control may be placed on that property indicating that it may only be used for commercial activities. If the owner of the property ever wanted to use that property for residential purposes, the owner would have to ensure that any contamination meets residential target levels.

The locational data for this layer is provided by the responsible party and reviewed by FDEP staff. Neither FDEP or EDM assumes respondibility for the accuracy of the boundary data.

Agency File Date: 11/2/2023 **Received by EDM:** 11/3/2023 **EDM Database Updated:** 11/3/2023

https://ca.dep.state.fl.us/mapdirect/?webmap=cff8d21797184421ab4763d3e4a01e48

National Priorities List

The US EPA National Priorities List (NPL) contains facilities and/or locations where environmental contamination has been confirmed and prioritized for cleanup activities under the Superfund Program. EDM's NPL site boundaries data include sites that are currently on the NPL as well as sites that have been Proposed, Withdrawn and/or Deleted from the list.

Agency File Date: 11/14/2018 **Received by EDM:** 12/10/2018 **EDM Database Updated:** 1/22/2019

https://www.epa.gov/superfund/search-superfund-sites-where-you-live

Solid Waste Facilities

The FDEP SLDWST list identifies locations that have been permitted to conduct solid waste handling activities.

Agency File Date: 1/5/2024 **Received by EDM:** 1/5/2024 **EDM Database Updated:** 1/5/2024

https://floridadep.gov/waste

State Funded Cleanup Sites

The FDEP State Funded Cleanup list contains facilities and/or locations where there are no viable responsible parties; the site poses an imminent hazard; and the site does not qualify for Superfund or is a low priority for EPA. Remedial efforts at these sites are currently being addressed through State funded cleanup action.

Agency File Date: 2/21/2024 **Received by EDM:** 2/27/2024 **EDM Database Updated:** 2/27/2024

https://floridadep.gov/waste/waste-cleanup/documents/state-funded-cleanup-program-site-list

APPENDIX C
EDM HISTORIC AERIAL REPORT

Historical Aerial Photograph Report

Subject Property:

Corkscrew 80 Acres
20351 Corkscrew Road
Estero, Florida 33928

Bonita Springs, FL 34135

Subject: **Historical Aerial Photos-- EDM Project #: 26975**
Client Project#

Dear Mr. McAuley:

Thank you for choosing Environmental Data Management, Inc. The following report contains a series of Historical Aerial Photographic images for the following location:

Corkscrew 80 Acres
20351 Corkscrew Road
Estero, Florida 33928

These images were selected to provide you with an aerial photographic record of this location at approximate ten year intervals and/or one photograph per decade, where available.

Should you have any questions regarding this report or our service, please feel free to contact us. We appreciate the opportunity to be of service to you and look forward to working with you in the future.

ENVIRONMENTAL DATA MANAGEMENT, INC.

Professional Affiliations

Florida Association of Environmental Professionals (FAEP)

Mr. McAuley joined Earth Tech Environmental, LLC (ETE) in 2017 and brings with him 8 years of experience working as a Hydrogeologist II and Environmental Consultant in New York State prior to moving to Florida. Andrew graduated from Hofstra University with a Bachelor of Science Degree in Geology. Since joining ETE he has been able to apply his past experience from New York on a variety of projects as well as become extensively familiar with Ecological based assessments and agency regulations.

Relevant Experience

Andrew's extensive background includes Phase I Environmental Site Assessments (ESAs), Phase II ESAs, Phase III remedial oversight, AST/UST removal, Soil/Groundwater/Indoor Air Quality sampling reporting, Mold/Lead/Asbestos sampling and remedial protocol reporting. In New York Andrew has overseen various projects including Brownfields sites, Landfill Gas Extraction System installation, Monitoring Well/Remediation System Installation/Maintenance, and multiple Chemical/Petroleum/Bio-Hazard Waste Cleanup projects.

Since joining ETE Andrew has expanded his experience into Ecological Assessments such as Protected Species Surveys, Wetland Determinations, Vegetation/Hydrology Monitoring, Submerged Resource Surveys, and Environmental Resource Permitting.

Andrew's work experience includes:

- Phase I ESAs
- Phase II ESA Sampling/Reporting
- Phase III Remedial Oversight/Reporting
- Chemical/Petroleum/Bio-Hazard Cleanup
- Monitoring Well Installation/Maintenance
- Air-Sparge/Soil Vapor Extraction Systems
- Groundwater Assessments
- Indoor Air Quality Assessments
- Contaminated Soil Assessments
- Waste Classification Management
- Turbidity Monitoring
- Mold/Lead/Asbestos Assessments
- AST/UST Removal
- Mangrove Monitoring
- Project Management/Coordination
- Wetland Jurisdictional Determinations
- Wetland Mapping/Flagging
- Vegetation Monitoring
- Protected Species Surveys
- Bonneted Bat Surveys
- Gopher Tortoise Surveys
- GIS Mapping
- Bald Eagle Monitoring
- Ecological Assessments
- Environmental Resource Permitting
- Exotic Plant Treatment/Removal
- Submerged Resource Surveys
- Seagrass Surveys

SECTION 1

EXECUTIVE SUMMARY

The Corkscrew 80 RPD (aka, Enclave at Corkscrew) Project is a proposed residential development located in Section 21, Township 46 South, Range 27 East in Lee County, Florida. The project is situated on the north side of Corkscrew Road, approximately 5 miles east of Alico Road and is primarily bordered by vacant lots to the west and south with existing and former agricultural areas to the north and east. The site consists of 77.94-acres of predominantly former agricultural areas designated as improved pasture and existing wetland and upland areas. The proposed project will include approximately 34.11-acres of single-family residential development. Additionally, the project proposes to preserve approximately 29.5 acres of untouched wetlands in the northern portion of the property and provide an additional 9.75 acres of perimeter preservation within the developable areas. The project will include a 5.24-acre stormwater management system consisting of two lakes, and development of associated infrastructure (i.e., roads, buildings, open space).

The project site has been used for agriculture (crop production and pasture) since the late 1970's. The earliest water use permit (WUP No. 36-01461-W) for the property was issued by the South Florida Water Management District (SFWMD) for the irrigation of 630 acres of potatoes in 1990 and subsequently increased to 1,158 acres in 1991. The permit currently includes the allocations for the irrigation of 1,181-acres of potatoes or about 3.13 million gallons per day (MGD) on an annual average basis and 8.2 MGD on a maximum monthly basis from the Sandstone Aquifer. The permit includes an additional 14.83 million gallons (MG) allocated for freeze protection from the Water Table Aquifer. Projected irrigation demands for the proposed 12.76 acres of residential turf grass and landscaping are 15.12 MG on an annual average basis (or about 0.04 MGD) and 1.9 MG on a maximum monthly basis (or about 0.6 MGD).

Projected irrigation water demands, and proposed irrigation supplies for the project will be developed from a combination of stormwater harvesting of the project's stormwater management system with supplements from a backup standby well installed in the surficial aquifer system and/or Sandstone Aquifer underlying the site as permitted with the SFWMD. Neither of the proposed irrigation water sources are currently used or projected to be used by Lee County Utilities (LCU) or any other major water user in the area. Impact analyses conducted for the project indicate that the proposed irrigation water use meets all conditions for water use permitting with the SFWMD, including impacts to the aquifer system, the environment, or existing legal users including LCU.

The proposed Corkscrew 80 RPD development currently lies within the southeastern extent of the Density Reduction Groundwater Resource (DRGR) land use designation for Lee County, which is intended to provide protections to groundwater resources through restrictions on residential density. The Owner is requesting rezoning from Agricultural (AG-2) to a Residential Planned Development (RPD) to allow for 85 single-family dwelling units. The applicant has carefully considered the Lee Plan Goals and Policy requirements in their project design resulting in a project that meets the criteria of the Lee Plan Goals and Policy for water supply, water management, water levels, and water quality. The subject property is appropriate for residential development as it provides a contiguous and compact growth pattern for the Lee County Planning Community.

2.1 PROJECT OVERVIEW

The Corkscrew 80 project is an approximately 77.94-acre proposed residential development located in Section 21, Township 46 South, Range 27 East in Lee County, Florida. Refer to ***Figure 1*** for a regional location map for the project. The site consists of predominantly vacant land to the west (Lee County 20/20 Lands) and south with existing and former agricultural areas to the north and east. The Troyer Brothers Mining Excavation Planned Development (MEPD) zoned property includes conservation and restoration lands along its southern boundary abutting the northern and eastern Project boundary. The proposed project will include approximately 34-acres of residential development to allow for 85 single-family dwelling units within the project area. The northern third of the property will include proposed wetland conservation areas, which will connect conservation areas spanning to the north and east (Troyer Brothers MEPD) as well as to the west (Lee County 20/20 Lands) of the project site preserving the existing cypress wetlands.

The project is situated on the north side of Corkscrew Road, approximately 5 miles east of the intersection of Alico Road. The project lies within the Imperial River Watershed and the regionally extensive Flint Pen sub-watershed. Existing stormwater runoff for the site generally sheet-flows to the internal agricultural drainage ditches and is conveyed offsite to drainage diches located to the east and west of the site and to the existing drainage and stormwater management easement located on the southern portion of the property along Corkscrew Road. Regional surface water flows are generally conveyed from north to south in the vicinity of the project site.

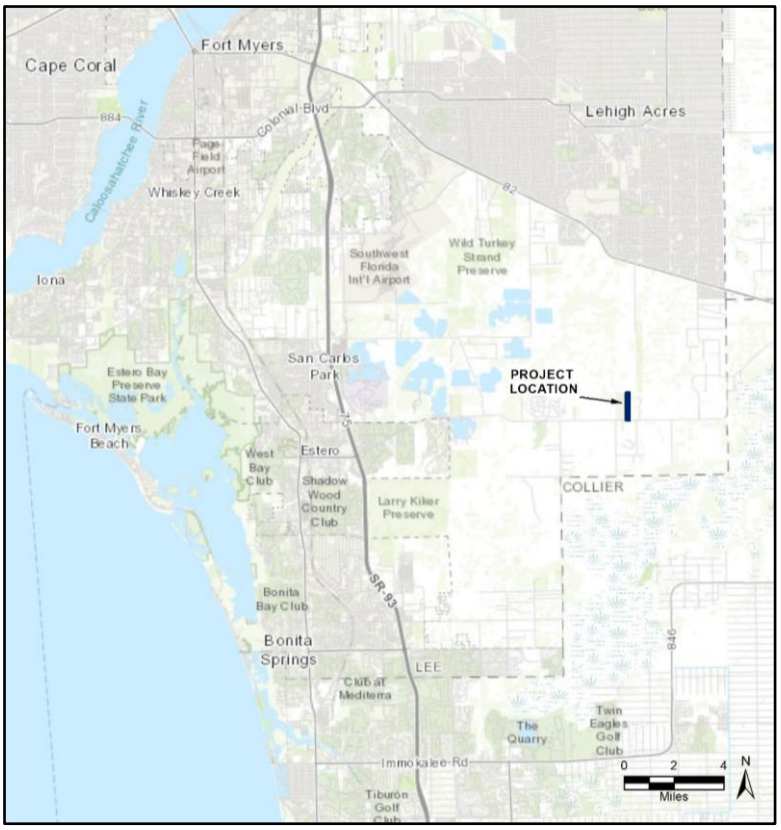

Figure 1. Location of the Corkscrew 80 RPD Project

The project has a long history of agricultural operations, which have resulted in disconnected surface water flow paths and isolated sub-basins in the vicinity of the site. Further, these drainage features have isolated the site from the primary DRGR area. The Corkscrew 80 RPD Project will include a number of stormwater management lakes to provide improved flood management and water quality treatment of stormwater runoff. A number of onsite design and control features are planned to protect and enhance the water quality in the onsite lakes prior to leaving the development into the adjacent water management basins. The stormwater management system will be designed to meet or exceed state and local water quality standards as outlined and regulated by SFWMD and Lee County. Refer to ***Figure 2*** for a map depicting the regional watershed setting for the Corkscrew 80 RPD project. Review of the SFWMD

database indicates a surface water management system (i.e., Environmental Resource Permits [ERPs]) has been applied for and currently under review.

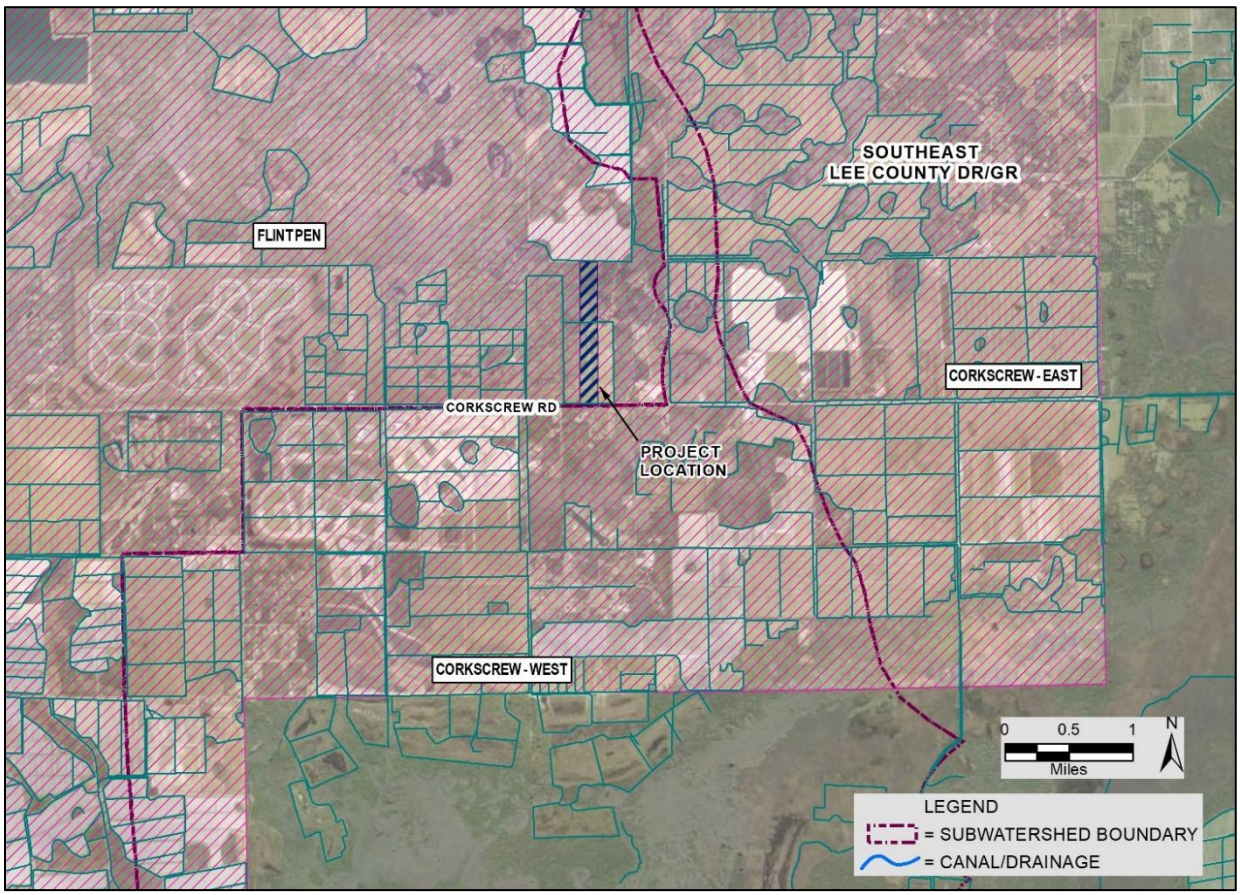

Figure 2. Corkscrew 80 RPD Site, Regional Watershed Setting

2.2 PAST LAND USE AND WATER USE

The site falls within a single 77.9-acre parcel including approximately 29.5 acres of wetland areas occupying the northern third of the site. The majority of the site has been cleared and currently serves as pasture for agricultural operations. The site was largely undisturbed land until the late 1970's, when it was converted to agricultural use which encompassed the Corkscrew 80 RPD site. The agricultural operations, known as the Troyer Brother's Farm project, maintained a water use permit (WUP No. 36-01461-W) for the irrigation through the SFWMD since the early 1990's. Information on file with the SFWMD indicates that the farm initially irrigated up to 630 acres of potatoes until it was subsequently increased to 1,158 acres in 1991 and 1,181 acres in 2001 sectioned into three primary parcel areas. The water table is manipulated during farming operations to maintain optimum moisture to crop roots via a series of agricultural seepage/furrow ditches. The permit currently includes the allocations of about 3.13 MGD on an annual average basis and 8.2 MGD on a maximum monthly basis from the Sandstone Aquifer (the primary water source) via withdrawals from 17 Sandstone Aquifer wells. An additional 14.83 MG is allocated for freeze-protection for withdrawals from the Water Table Aquifer via withdrawals from two standby wells. All existing permitted wells for the Troyer Brother's Farm project identified on the Corkscrew 80 RPD will be plugged and abandoned by a Florida licensed well driller prior to development. Irrigation water demands for the proposed 12.76 acres of residential turf via improved drip irrigation systems is 15.12 MG on an annual average basis (or about 0.04 MGD) and 1.9 MG on a maximum monthly basis (or about 0.6 MGD).

3.1 INTRODUCTION

The hydrostratigraphy underlying the Corkscrew 80 RPD project is typical for southern Lee County with a series of aquifers and confining beds occupying the Surficial, Intermediate, and Floridan aquifer systems. ***Figure 3*** provides a schematic showing the groundwater sources in Lee County. In general, freshwater sources are the Water Table and the Lower Tamiami Aquifers of the Surficial Aquifer System. The underlying Sandstone and Hawthorn Zone 1 Aquifers of the Intermediate Aquifer System are slightly to moderately brackish. Highly brackish and saline water sources include the Lower Hawthorn Aquifer and underlying zones of the Upper Floridan Aquifer.

Four primary aquifers are of significance beneath the Corkscrew 80 RPD site and are described below in order of increasing depth. These are the Water Table, the Sandstone, the Hawthorn Zone 1, and the Lower Hawthorn Aquifers. The Lower Tamiami Aquifer is unconfined at this location and therefore considered a part of the Water Table Aquifer (Surficial Aquifer System). Deeper underlying aquifers are too saline for direct use at the site. The primary sources of information used to characterize the groundwater resources include information from Lee County, SFWMD, and U. S. Geological Survey (USGS).

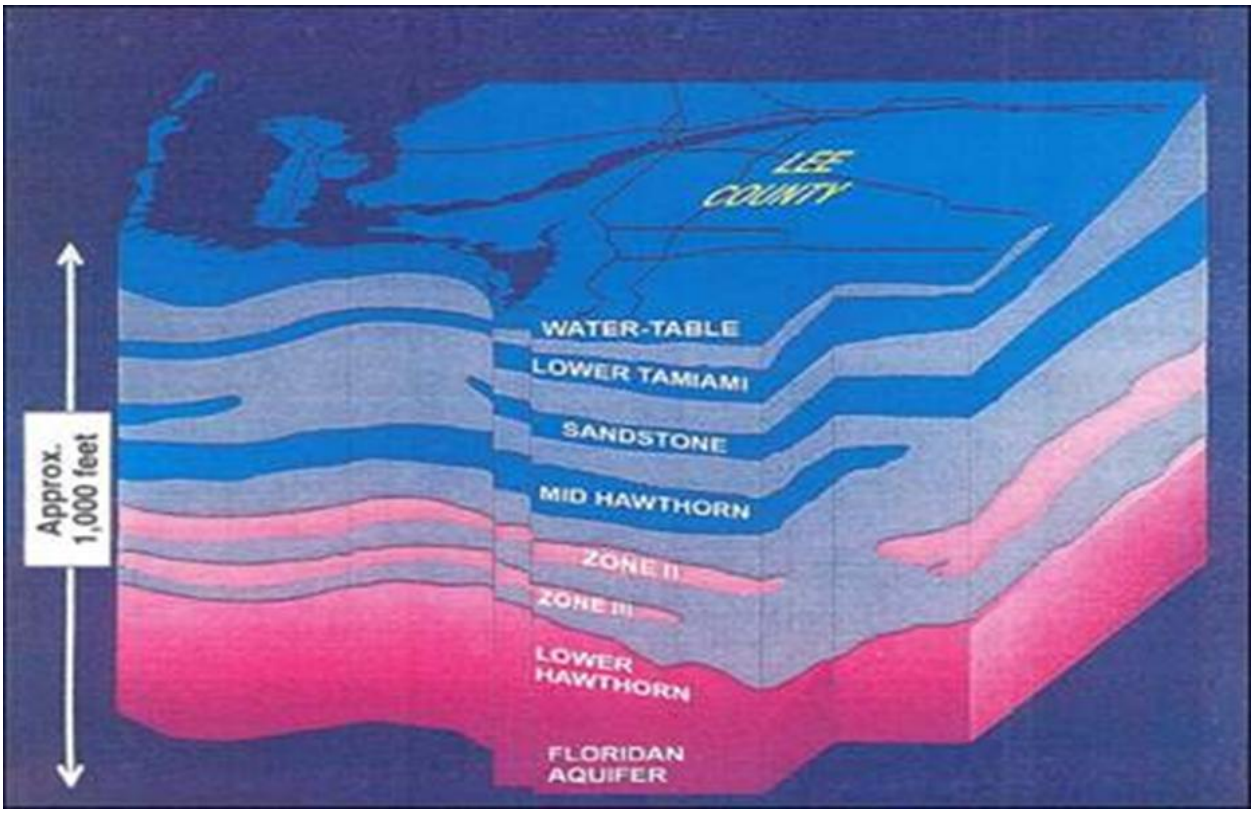

Figure 3. Aquifer System Underlying Lee County (Lee County Integrated Water Masterplan)

3.2 REGIONAL AQUIFERS

3.2.1 Water Table Aquifer/Surficial Aquifer System

The Water Table aquifer is an unconfined aquifer that covers all of Lee County. The aquifer is defined as occurring at or near land surface downward to the top of the first regional confining bed. Beneath the Corkscrew 80 RPD project, the thickness of the aquifer is approximately 110 feet. The upper unconsolidated portion of the Wate Table Aquifer consists of a layer of fine sand and shell with an average thickness of about 15 to 20 feet overlying about 90 feet of porous

limestone beneath the site. The sand is described as brown to gray fine silica sand with variable amounts of silt. The shell layer has been described as gray to white unconsolidated coarse shell and silty fine sand. The top of the underlying limestone occurs at depths of about 20 feet below land surface. The limestone has been described as ranging from white to brown to gray in color, very hard to very soft, sandy, and fossiliferous, with occasional thin beds of coralline limestone and frequent zones of high permeability where loss of drilling fluid circulation occurred. The limestone present within the lower portion of the Water Table Aquifer includes the Pinecrest and Ochopee Members of the Pliocene age Tamiami Formation. The Water Table Aquifer is underlain by low permeability marls and clays with an estimated thickness of about 80 feet at this site. The confining unit below the Water Table Aquifer consists of the Cape Coral Clay Member of the Peace River Formation known as the Upper Hawthorn Confining unit and is encountered approximately 110 feet below land surface.

The limestone portions of the aquifer typically have a moderate to high permeability making the aquifer suitable for medium to large capacity water production wells. The aquifer is used for domestic self-supply and irrigation of agricultural and landscaping foliage. The aquifer is recharged directly by rainfall with discharges occurring by way of natural or man-made surface drainage features, evaporation, and transpiration, and by pumpage from wells. Groundwater flow and levels in the aquifer fluctuate seasonally in response to climatic conditions but are also impacted by local and regional drainage features.

Water quality in the Water Table Aquifer is generally very good and useful for both potable and irrigation needs, although high concentration of naturally occurring iron and organic material are common. Lake extraction is the most efficient use of this aquifer for irrigation purposes, which also typically results in less iron and organic staining, as well as reduced impact to area water levels.

The Water Table Aquifer is used in the area of the project site for public water supply by Lee County Utilities, for agricultural irrigation, for livestock, and by private residences for domestic self-supply. The project site is located a sufficient distance outside the established Lee County Wellfield Protection Area (LCWPA) of the Surficial Aquifer and Sandstone Aquifers. Use of the Surficial Aquifer to supplement stormwater from the onsite lake system is proposed to meet irrigation demands at the Corkscrew 80 RPD project. The proposed irrigation water use meets all conditions for water use permitting with the SFWMD including impacts to the aquifer system, the environment, or existing legal users, including LCU. The projected water use will meet the criteria for a small Individual Water Use Permit issued by the SFWMD and will not exceed annual average allocation of 100,000 gallons per day (gpd). In addition, the project will include a surface water management system that provides for improved management of water levels in the Water Table Aquifer and will increase overall groundwater recharge to the underlying limestones of the Tamiami Formation in the vicinity of the site.

3.2.3 Sandstone Aquifer

The Sandstone Aquifer is the uppermost aquifer in the Intermediate Aquifer System and consists of unconsolidated sands and poorly consolidated sandstones within the Lehigh Acres Sandstone Member of the Peace River Formation. Based on the total depths of nearby public water supply wells and permitted agricultural wells, the top of the Sandstone Aquifer occurs between 140 to 190 feet below land surface in the vicinity of the Corkscrew 80 RPD project site. The Sandstone Aquifer is the uppermost aquifer in the Intermediate Aquifer System and consists of unconsolidated sands and poorly consolidated sandstone. The unit varies in thickness in the vicinity of the project site, ranging from about 40 to 100 feet. The aquifer is recharged where overlying confining beds are thin or absent in Hendry and Glades County or where there is large use of the aquifer that induces increased recharged directly from the Water Table Aquifer through

the overlying confining beds. Discharge from the aquifer generally occurs as pumpage from wells. Large fluctuations in seasonal water levels are common further north of the project site due to the heavy use of the aquifer in those areas with wet season levels near their historic highs but dry season water levels often at depths of 50 feet or more. For this reason, the aquifer is considered a source of limited availability although opportunities for seasonal use and storage may be considered.

The Sandstone Aquifer is considered a freshwater source although there are large areas, especially in the southwestern portions of Lee County and areas near and parallel to the Caloosahatchee River where there are elevated salinity levels which may limit the usefulness of the aquifer for public supply. Salinities, however, are generally low enough for general irrigation supply. Productivity of the aquifer is moderate to low, but it does provide large quantities of water for public water supply by LCU, for domestic self-supply in eastern Lee County and for agricultural irrigation in eastern Lee and western Hendry counties. The use of groundwater from the Sandstone Aquifer is not proposed for the project.

3.2.4 Mid Hawthorn Aquifer

The Hawthorn Zone 1 Aquifer, also referred to the Mid Hawthorn Aquifer in south Lee and Collier counties, is the lowermost aquifer in the Intermediate Aquifer System in Lee County. It consists of moderately permeable limestones of the Arcadia Formation and is separated from the overlying Sandstone Aquifer and underlying Lower Hawthorn Aquifer by thick clay confining beds of the Peace River and Arcadia Formations. It has moderate yield characteristics that limit its use for large capacity water supply. However, it has been used as a water supply source for commercial or irrigation. It exists as a sequence of interbedded limestones and marls that occur at depths between 300 and 400 feet below land surface. Where present, the Mid Hawthorn Aquifer is generally a lower yield, discontinuous water bearing unit that has utility as a limited supply resource or for seasonal storage in an aquifer storage and recovery (ASR) system. This aquifer is recharged north of Charlotte County where the aquifer is much nearer to land surface and overlying confinement is thin or nonexistent.

The Hawthorn Zone 1 Aquifer is typically brackish in southern Lee County and salinity increases considerably to the south into Collier County. Review of data from wells that tap into this aquifer within about a mile of the project site indicates dissolved chloride concentrations approximately between 350 and 1,200 mg/L. Considering the brackish water quality of the Mid-Hawthorn Aquifer and limited blending capacity onsite, this source is not suitable for use at the Corkscrew 80 RPD project.

3.2.5 Lower Hawthorn Aquifer

The Lower Hawthorn Aquifer is the uppermost water bearing unit in the Upper Floridan Aquifer System. The aquifer has good yield potential but contains brackish water that is only useful for irrigation if blended with other freshwater resources and is only useful for public water supply using reverse osmosis or other desalination technologies. The top of this aquifer is anticipated to be encountered at depths between about 500 and 600 feet below land surface at the Corkscrew 80 RPD project site. The aquifer is separated from the overlying Hawthorn Zone I Aquifer by the Lower Hawthorn Confining Zone, which consists of marine silts and clays of very low permeability. The Lower Hawthorn Confining Zone has a thickness of about 100 feet.

The aquifer is recharged in the central Florida highlands area between Tampa and Orlando where the aquifer beds are near land surface and confining beds are thin or absent. In general, the SFWMD supports increased use of the Lower Hawthorn/Upper Floridan aquifer especially for public water supply use. The Corkscrew 80 RPD project proposes no use of the Lower Hawthorn Aquifer.

4.1 ONSITE LAKE

The Corkscrew 80 RPD project will include a stormwater management system to provide flood control and water quality treatment of runoff. Several design and control features will be planned for the Corkscrew 80 RPD development to protect and enhance the quality of water in the lake system and adjacent watersheds and provide for hydrological improvements on the site (refer to ***Figure 4*** for a conceptual site plan).

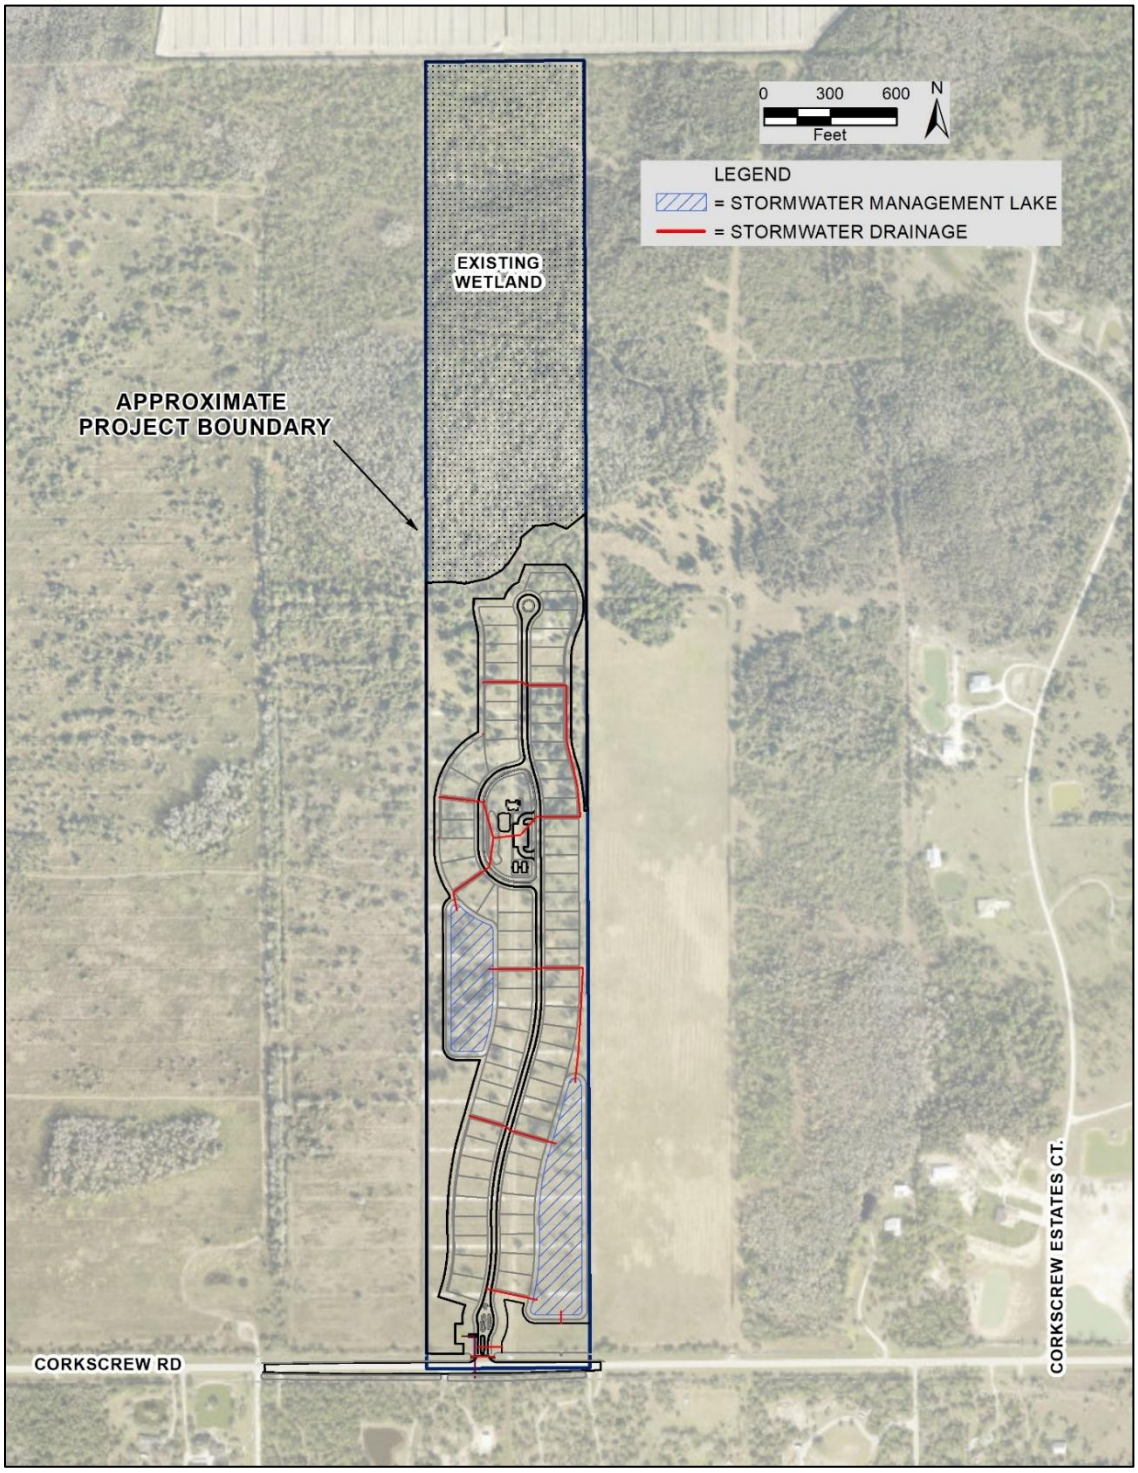

Figure 4. Conceptual Site Plan

These elements will include collection, treatment, and conveyance of stormwater within the **p**roject's water management system including littoral planting areas, the use of water treatment best management practices (BMPs), and centralized control over the application of irrigation water.

Improved surface water quality and attenuation is anticipated through the design and installation of the stormwater management system (example presented on ***Figure 5***). The stormwater management system will include the collection and detention of all water generated on the site and will provide stormwater treatment through various dry and wet detention elements within the development footprint that meet or exceed water quality requirements of the SFWMD, the Florida Department of Environmental Protection (FDEP), and Lee County. The attenuation of stormwater will improve the hydrologically impacted project area through enhanced recharge of groundwater to the Water Table Aquifer. After treatment, stormwater will be directed to the restoration areas to help improve the onsite hydrology. Additional polishing of the runoff water quality and nutrient uptake will occur in the large restoration areas further reducing downstream nutrient loading.

Figure 5. Typical Stormwater Management Lake

The Corkscrew 80 RPD project will include a Lake Management Plan following BMPs for erosion control and bank stabilization; deep lake management; and fertilizer and pesticide use to reduce nitrogen and phosphorous loading to the stormwater management system. Additionally, the project will incorporate multiple required BMPs to ensure a maximum potential treatment stormwater including a water quality treatment train consisting of a combination of sediment traps, dry / wet detention, and planted filter marshes that provide a high level of treatment of both onsite generated stormwater and regional flow-through of surrounding area watersheds.

Centralized control of the operation of the irrigation system results in improved adherence to BMPs and water use compliance than if individual homeowners have control of these functions or the ability to override irrigation programming. Irrigation of residential lots and common areas will be centrally controlled to meet conditions of applicable water use permits, local ordinances, and periodic water use restrictions. Individual homeowners will not have the ability to override irrigation times or quantities.

4.2 ENHANCE LAKE MANAGEMENT PLAN (ELMP)

With the understanding of the historical background and intended development of the Corkscrew 80 RPD property, the purpose of this ELMP is to ensure compliance with applicable Lee County Comprehensive Plan Goals, Objectives, and Policies, specifically that complies with Lee Plan Policy 33.2.4(2)(b). The Developer will be responsible for maintaining compliance with this ELMP until formal control has been turned over to the Homeowner's/Property Owner's Association (HOA). This responsibility will include, but not limited to, the operation and maintenance of the community's stormwater management system, lakes, associated conveyance and control systems, and other components as outlined within this ELMP and as determined under the final development order approval. The Corkscrew 80 RPD project will include a Lake Management

Plan following BMPs for erosion control and bank stabilization; deep lake management; and fertilizer and pesticide use to reduce nitrogen and phosphorous loading to the stormwater management system.

Deep Lake Management: The Corkscrew 80 RPD proposed stormwater management lakes will be deeper than 12 feet with a maximum depth of 20 feet. In accordance with Lee County Land Development Code (Section 10-329(d)(3)), these lakes are therefore designated as "deep lakes" and are subject to specific criteria. Based on Lee County Code, the proposed deep lakes will satisfy the following criteria:

1) The stormwater management deep lakes will not exceed a maximum water depth of 20 feet and will not penetrate any continuous impervious layer of clay or rock.
2) A destratification (i.e., aeration) system will be installed in any lake that exceeds a 12-foot water depth. Documentation that the proposed destratification system is adequately sized and designated for each lake deeper than 12 feet will be submitted to Lee County for approval.
3) Native shade trees meeting the specifications of Lee County Land Development Code Section 10-420 will be planted around each deep lake perimeter at approximately one tree per 100 feet of lake shoreline measured at the detention lake's water level control elevation. Trees and other plants may be grouped or clustered together around the lake perimeter.
4) The deep lake management techniques, including operation of the destratification system, will be maintained for the life of the stormwater management system and will be recorded in the development covenants, in accordance with the County Attorney's Office.
5) A post-construction bathymetric survey verifying each deep lake's finished water depth, sealed by a professional surveyor and mapper, will be submitted to Lee County for approval.

Nuisance and Exotic Vegetation Control: The HOA will be responsible for the removal (in perpetuity) of all nuisance and exotic vegetation from the stormwater management system, as defined by Lee County Land Development Code. Exotic and nuisance plants will be managed through a maintenance contract with a licensed contractor to provide such services. After the initial clearing of the development tracts, exotics are to be maintained/removed through hand clearing or appropriate herbicide treatments by a licensed applicator and in accordance with manufacturer specifications, and all applicable local, state and/or federal guidelines and requirements. Herbicides shall be labeled for use in water areas and are not to be detrimental to littoral plantings.

1) Lakes must be inspected annually, and any prohibited vegetation must be removed by use of hand-clearing or appropriate chemical treatment. Only aquatic-approved compounds may be utilized in the stormwater management system lakes.
2) Herbicides and/or algaecides may only be applied by a licensed professional applicator, who meets the requirements of Lee County, and in accordance with manufacturer specifications. All applicable local, state and/or federal guidelines and requirements will also be followed.

Littoral Vegetation: The HOA will be responsible for the maintenance (in perpetuity) of all littoral zone vegetation from the stormwater management system as defined by Lee County Land Development Code. Required littoral vegetation must remain in a healthy and vigorous state in perpetuity in all the stormwater management lakes within the project. The use of trimming,

mowing, and herbicides to remove desirable littoral plants is prohibited. Any trimming or removal of vegetation within littoral areas by Contractors performing landscape or lake maintenance work to promote the survival and viability of littoral vegetation must be performed by hand or by approved herbicides and methods. Appropriate native lake littoral plantings for stormwater management lakes are expected to grow in their natural state. Inspections of littoral plantings to verify the survival of required plants and replanting of littoral vegetation when required must be in accordance with County requirements.

1) Littoral plants that die from natural causes, disturbance, or other activities will be replaced in order to sustain the long-term health and viability of the littoral system. The presence of littoral plants through the lakes is desirable and may contribute to improve the water quality within the lakes.

2) The spread of littoral plans will be encouraged through the designated littoral areas.

3) Disturbance activities such as mechanical trimming and mowing will be prohibited within the littoral zones. Use of herbicides shall be allowed provided that they are utilized to target specific exotics and do not result in by-kill of native littoral species. Any trimming or removal of vegetation required to promote the survival and viability of littoral vegetation will be performed by hand or by approved aquatic herbicides and methods.

Best Management Practices: Fertilizers, Herbicide, and Fungicide Applications: The Corkscrew 80 RPD development through the HOA will provide centralized control of all landscaping maintenance including application of fertilizers and pesticides to all landscaped areas within the Corkscrew 80 RPD development. In compliance with Lee County Fertilizer Ordinance 08-08, a contract will be executed by the future HOA with a company that has at least one person certified in BMPs and be registered with Lee County Tax Collector.

Fertilizer applications will be in compliance with Lee County Fertilizer Ordinance 08-08. The following provisions will be followed.

1) Any person(s) applying commercial fertilizer to an urban landscape must receive a limited certification for urban landscape commercial fertilizer application in compliance with Florida Statue 482.1562 prior to application of any and all fertilizers. The limited certification provides a means of documenting and ensuring compliance with best management practices for commercial fertilizer application to urban landscapes.

2) Fertilizers containing nitrogen and/or phosphorus will not be applied from June 1st to September 30th and will not exceed application limits provided in the Lee County Fertilizer Ordinance.

3) Grass clippings and/or vegetative material shall not be washed, swept, or blown into stormwater drains, ditches, conveyances, water bodies, roadways or other impervious surface.

4) Fertilizer shall not be applied within 10 feet of the top of bank from any lake, designated wetland or wetland defined by the rules of the FDEP (Chapter 62-340 Florida Administrative Code [F.A.C.]). These practices are not expected to apply to newly established landscaping or reclaimed water that may be used on site.

5) Fertilizer may not be applied, spilled, or otherwise deposited on any impervious surfaces. Any fertilizer applied, spilled, or deposited on any impervious surface must be immediately and completely removed.

6) Spreader deflector shields are required when fertilizing by use of any broadcast or rotary spreaders.

7) A low maintenance zone is recommended adjacent to an on the sloped portion of lake banks. The vegetation within the low maintenance zone is encouraged to be maintained higher than surrounding areas to allow the vegetation to help absorb and filter nutrients from runoff.

All applications of pesticides, herbicides and/or fungicides shall be applied by a licensed applicator and applied in accordance with manufacturer specifications, all applicable local, state and/or federal guidelines and requirements and as further outlined in this section. Application of all fertilizers, pesticides, herbicides, and/or fungicides will be controlled and managed by the HOA for turf maintenance. Individual homeowners will be allowed to apply lawn maintenance chemicals.

Commercial applicators of chemical lawn products must register annually with the HOA, its successors, or assigns, and provide a copy of their current occupational license, proof of business liability insurance, and proof of compliance with licensing requirements. It should be noted that the HOA will be required to contract for the application of all pesticides, herbicides and/or fungicides within the project, including on all residential lots, and individual lot owners shall be prohibited from applying pesticides, herbicides and/or fungicides to their lots without prior approval of the HOA/CDD.

The use of any chemical product in a manner that will allow airborne or waterborne entry of such products into surface water is prohibited. This will not apply to the use of chemical agents by certified lake management specialists or the development's maintenance staff for the control of algae and nuisance vegetation within the stormwater lakes or ponds; however, application of such agents must be in compliance with this section.

It is recommended that pesticides, fungicides, and herbicides be used only in response to a specific problem and in the manner and amount recommended by the manufacturer to address the specific problem. Broad application of pesticides, fungicides, and herbicides as a preventative measure is strongly discouraged.

Erosion Control and Lake Bank Stabilization: The Corkscrew 80 RPD development will have a series of wet and dry detention areas as part of the stormwater management system. Erosion control and lake bank stabilization will apply best management practices to create a lake shoreline that will minimize overland stormwater runoff velocities and concentrated stormwater runoffs such that the soil maintains in place under normal storm events. Littoral plantings will be provided along the stormwater management lake banks for stabilization purposes. Should shoreline stabilization be necessary, a proposal will be developed by a professional engineer and submitted for review under separate cover.

The project’s stormwater system will meet the standards for quality and quantity treatment of stormwater as outlined and regulated by the SFWMD and Lee County. Outfall or discharge structures associated with the flow to and from the lakes will follow routine inspection to confirm proper operations.

Lake banks will be inspected annually by the HOA/CDD to identify areas of erosion. If erosion is identified, the erosion must be repaired, and the source of erosion shall be eliminated if possible. The following best management practices are encouraged to be incorporated in the project design to help minimize potential ban erosion and maintain long-term bank stabilization:

1. Implement practicable drainage conveyance systems of swales, gutters, downspouts, drains and inlets that would capture the concentrated flows and direct it to the lake areas rather than as overland sheet flows.
2. Downspouts not directed underground will be oriented away from lake banks.

3. Design discharge structures at or below the dry season lake elevation to reduce the potential for overland flow.
4. Design lot grades to reduce the area draining to the lakes.
5. Provide, at a minimum, a 90% compaction rate based upon compaction test results of all stabilized lake bank slopes.
6. Utilize vegetation and/or other engineered protection methods, where appropriate and necessary, to manage sheet flow rates

IRRIGATION WATER DEMAND

Water demands for the project will consist of outside potable water and in-house irrigation uses. Centralized potable water or sanitary sewer utilities are not currently installed in the vicinity of the Corkscrew 80 RPD project site. An amendment to Lee County's services area maps (Maps 4-A and 4-B) to designate the Corkscrew 80 RPD project within the services areas is proposed for future connections. Irrigation demands will be met with onsite sources including harvesting stormwater from the onsite stormwater lake system with up to 100% re-supply by groundwater withdrawals. The lake withdrawals will provide an efficient and low impact method for tapping the Water Table Aquifer underlying the project site and effectively harvest available stormwater supplies. Lake volume storage will minimize potential impacts to surface and groundwater levels. Analyses of potential impacts attributed to proposed irrigation withdrawals and limited request use for the project indicate no adverse impacts to the aquifer systems, area wetlands, or existing water users in the area including LCU.

5.1 POTABLE WATER AND WASTEWATER

LCU will provide potable water and wastewater services respectively for the project. This will eliminate the need for individual domestic self-supply wells and individual onsite sewage treatment and disposal systems (septic tanks) which are common for many rural areas of Lee County. Provision of central public utilities for the project will provide several desirable environmental and hydrological advantages. Supplying potable water for the project from the nearby water treatment facility will remove potentially competing water use from the freshwater aquifers and allow for improved planning and control of area water resources. Similarly, provision of a central sewer system will eliminate septic tank discharges in the area providing a higher level of protection to the existing water resources.

5.2 IRRIGATION WATER

The proposed project will include two stormwater management lakes that will intersect permeable limestone of the Water Table Aquifer. Irrigation will utilize an installed drip irrigation system to reduce overall irrigation requirements and adhere to Lee County and SFWMD conservation measures. The proposed irrigation system will consist of stormwater harvesting from the stormwater lake management system with up to 100% of these withdrawals re-supplied by groundwater. The proposed source of groundwater to supplement lake withdrawals will be fresh groundwater from a backup standby well installed in the Surficial Aquifer System and/or Sandstone Aquifer underlying the site as permitted with the SFWMD. Actual percentages of lake and groundwater withdrawals will be determined during the water use permitting process with the SFWMD and adjusted seasonally. Lake recharge will not occur when the stormwater management system is discharging offsite. The combination of groundwater and fresh stormwater will maintain a chloride level of less than 200 mg/L in compliance with SFWMD policy. Use of stormwater as a primary irrigation resource reduces potential use of potable water supplies, provides additional stormwater treatment, reduces offsite discharges of stormwater, reduces nutrient levels of the stormwater outfalls, and reduces reliance on groundwater systems being used to supply potable water to Lee County.

The irrigated area for the project is estimated to be less than 12.76-acres of turf grass and landscaping. Standard Blaney-Criddle calculations used by the SFWMD for irrigation supply permitting indicate this acreage will result in irrigation water demands of 1.9 MGM on a maximum monthly basis (or about 62,500 gpd) and 15.12 MGY on an average annual basis (or about 41,400 gpd) via improved drip irrigation systems. The project will meet the criteria for issuance of a small Individual Water Use Permit from the SFWMD.

The proposed project will also explore the use of computerized irrigation systems that incorporate onsite data and conditions to provide irrigation on an as-needed basis rather than simply on a scheduled basis. Such systems have been shown to result in reductions in irrigation water use by over 30% in southwest Florida. In general, these systems operate based on computer software that take into account soil moisture, rainfall, and elements that influence evaporation and transpiration to determine which locations require irrigation, how much irrigation is needed, and when to apply irrigation water.

6.1 WATER LEVELS

Water Science reviewed hydrographs of nearby Water Table Aquifer monitoring wells maintained by Lee County Division of Natural Resources (LCDNR), shown on ***Figure 6***. The monitoring wells reviewed for the project site with long term water level data (2007 to present) are 49-GW23, located about 1.2 miles east of the project site in the Trafford Watershed, 49-GW24, located adjacent to the project site along Corkscrew Road, 49-GW25, located about 1.3 miles west of the project site, and 49-GW3, located about 6.25 miles northwest of the project site all located within the Estero Bay Watershed

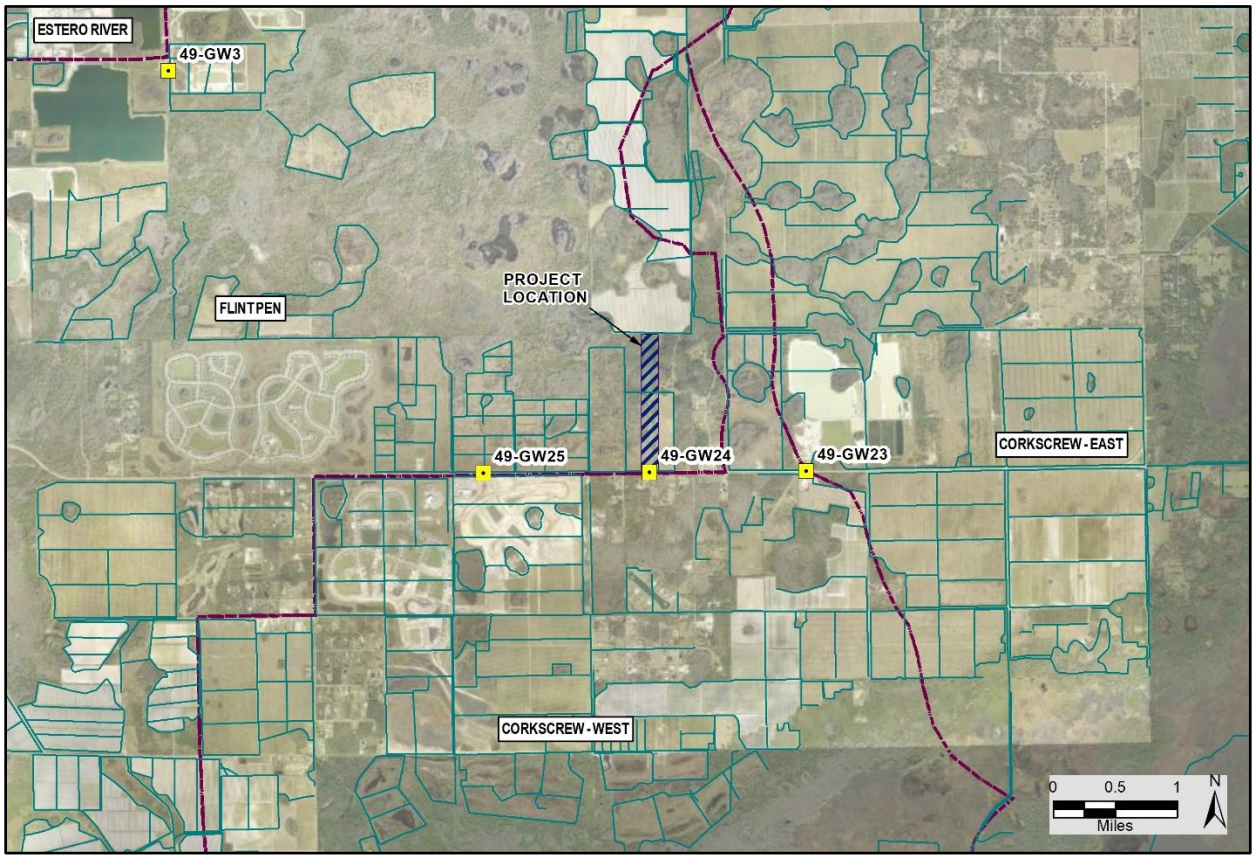

Figure 6. Location of Nearby LCDNR Monitoring Wells

The topography in the area of the site, which influences water elevations, generally decreases from east to west of the project and drops significantly from the uplands along Corkscrew Road to the Corkscrew Regional Ecosystem Watershed (CREW) lands spanning south and southwest of the project site towards the Imperial River/Kehl Canal/regional drainage feature. The Imperial River acts as a natural drainage feature for the surrounding areas including surface water from the Flint Pen and CREW watersheds, located southwest of the project area. Monitor well 49-GW24 located adjacent to the site to the south, show elevated water levels ranging seasonally from 22 to 28 feet NAVD. Monitor well 49-GW23 located east of the project area, well 46-GW25 located west of the project area, and upstream Monitor Well 49-GW3 show water levels ranging seasonally between about 21 to 27 feet NAVD. All monitor wells show a steady range over the period of record of 2007 to present with a steady rise in water levels starting about 2020 in monitor wells 49-GW23 and 49-GW24. Refer to ***Figure 7*** for a hydrograph of nearby Lee County Monitor wells.

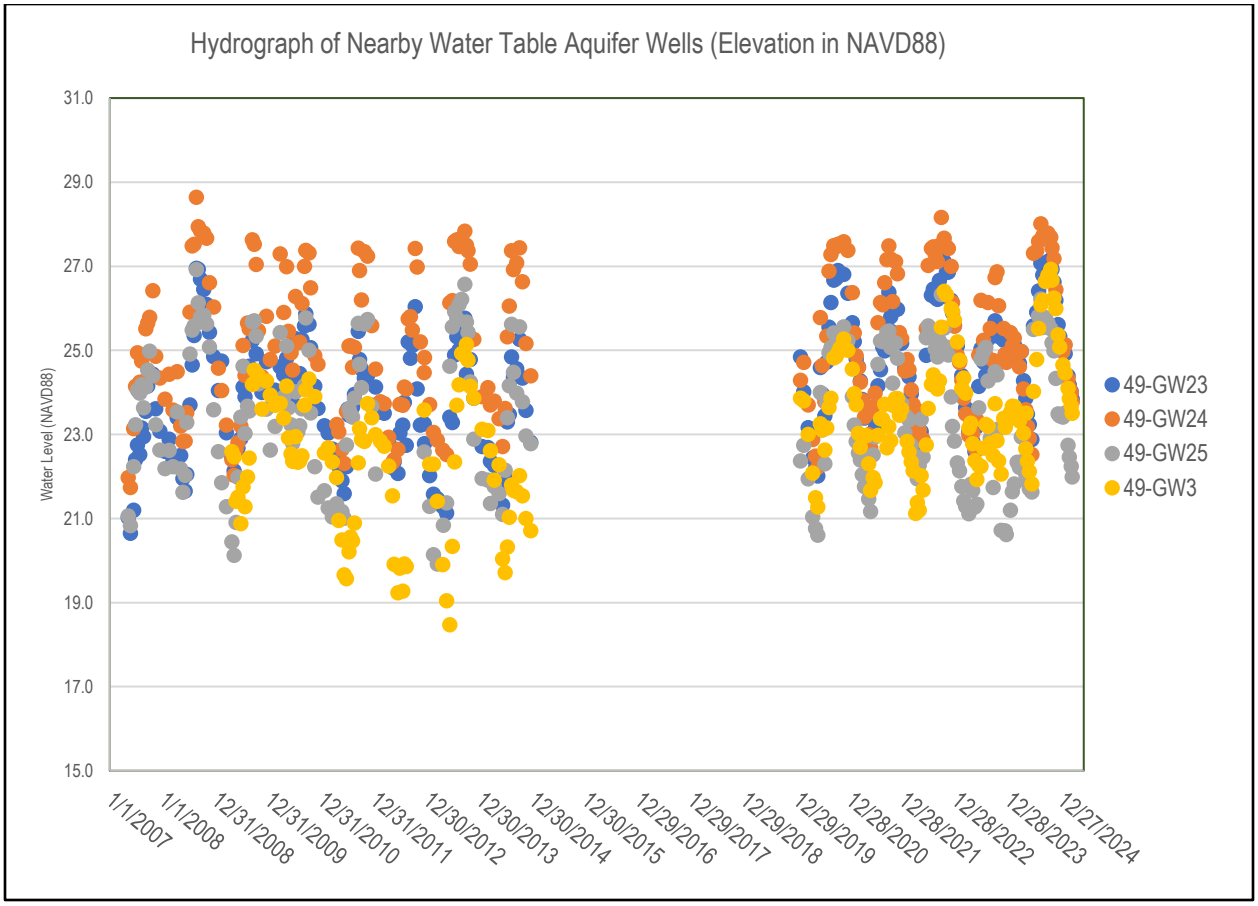

Figure 7. Hydrographs of Nearby Water Level Monitoring Stations

The proposed irrigation system will consist of stormwater harvesting from the stormwater lake management system with up to 100% of these withdrawals re-supplied by groundwater. The proposed source of groundwater to supplement lake withdrawals will be fresh groundwater from a backup standby well installed in the Surficial Aquifer System and/or Sandstone Aquifer underlying the site as permitted with the SFWMD. The potential impacts for groundwater withdrawals from the Surficial Aquifer are discussed in detail under Section 6.2. The project's water management system will provide enhanced water quality treatment and storage thereby providing a positive impact to groundwater recharge and regional water quality.

6.2 GROUNDWATER MODELING

The Corkscrew 80 RPD project will require irrigation water demands of 1.9 MGM on a maximum monthly basis (or about 62,500 gpd) and 15.12 MGY on an average annual basis (or about 41,400 gpd). The project will distribute irrigation water from the onsite lake system, with groundwater recharge proposed from Surficial Aquifer groundwater. The proposed withdrawal facilities include one surface water pump (designated SWP-1) and one backup Surficial Aquifer well (designated PW-1) as shown on ***Figure 9***.

Groundwater Modeling – Surficial Aquifer

To determine the potential impacts to the Surficial Aquifer due to the proposed groundwater allocations, Water Science developed a single-layer analytic groundwater flow model to assess the potential drawdown impacts in accordance with Section 3.0 of the Applicants Handbook (AH) for Water Use Permit Applications using AquiferWin32. The conceptual model consists of a single-layered unconfined aquifer (representing the Surficial Aquifer) with one well (PW-1) pumping at a maximum pumping rate of 62,500 gallons per day. Details of the model and the information used to develop the mode are discussed below.

Hydraulic Coefficients: Water Science reviewed nearby aquifer performance test (APT) data from the SFWMD ePermitting database and previously accepted modeling data (Water Use Permit 36-06587-W) for the Tello Farms project located approximately one mile southeast of the project site to obtain hydraulic coefficients of the Surficial Aquifer System. Based on this information, the reported transmissivity of the Surficial Aquifer is 104,720 gallons per day per food (gpd/ft) in the vicinity of the project. An estimated specific yield of 0.15 was assumed in the model. A summary of model inputs is provided as ***Table 1***.

Table 1. Summary of AquiferWin^{32} Inputs – Surficial Aquifer.

Aquifer Coefficient	Value (unit)
Transmissivity	104,720 gpd/ft
Specific Yield	0.15
Aquifer Thickness	109
β/r2 (required by AquiferWin^{32}™)	1.11E-03

NOTE: β/r^2 was calculated from the following formula:

β/r^2 = 1/b^2

r = radial distance

b = aquifer thickness

Simulation 1- Proposed Pumpage Only Surficial Aquifer: The groundwater model simulated withdrawals from one Surficial Aquifer well at a maximum pumping rate of 62,500 gpd (proposed maximum daily allocation). The model was run for 90 days without recharge from rainfall. Starting heads were presumed to be 0 feet with no initial hydraulic gradient represented. The simulation used the Newman solution 1972 for unconfined aquifers. Refer to ***Exhibit A*** for excerpts of the input/output file from the computer simulation.

Results of the computer simulation indicate that the maximum drawdown in the Surficial Aquifer due to proposed pumpage is about 0.57 feet at the simulated well node. The maximum drawdown at the project boundary is approximately 0.23 feet observed at the western project boundary. The cone of depression (defined as 0.1-foot drawdown contour for the Surficial Aquifer) does not extend to identified onsite or offsite wetlands (***Figure 8).***

The lake withdrawals will provide an efficient and low impact method for tapping the Water Table Aquifer underlying the project site and effectively harvest available stormwater supplies during wet season events. Lake volume storage will minimize potential impacts to surface and groundwater levels. At higher permeabilities, the lake system is expected to support withdrawals without the need for groundwater re-supply. However, at lower permeabilities and during seasonal low water table elevations, groundwater recharge may be necessary should the lake system be unable to support withdrawals. As needed, surface water withdrawals will be re-supplied by groundwater from a proposed backup production well (designated PW-1). The well will not be used for artificial augmentation of lakes and groundwater withdrawals will not exceed surface water withdrawals. Water levels in the Water Table Aquifer are anticipated to range seasonally between about 21 to 28 feet NAVD in the vicinity of the project. Based on the requested allocations, the expected drawdown in the Surficial Aquifer associated with higher permeabilities is presumed to be negligible to upstream, downstream, adjacent users or potentially sensitive areas. Therefore, the potential for harm to the water resource availability as a result of the withdrawal of the recommended allocation is considered minimal.

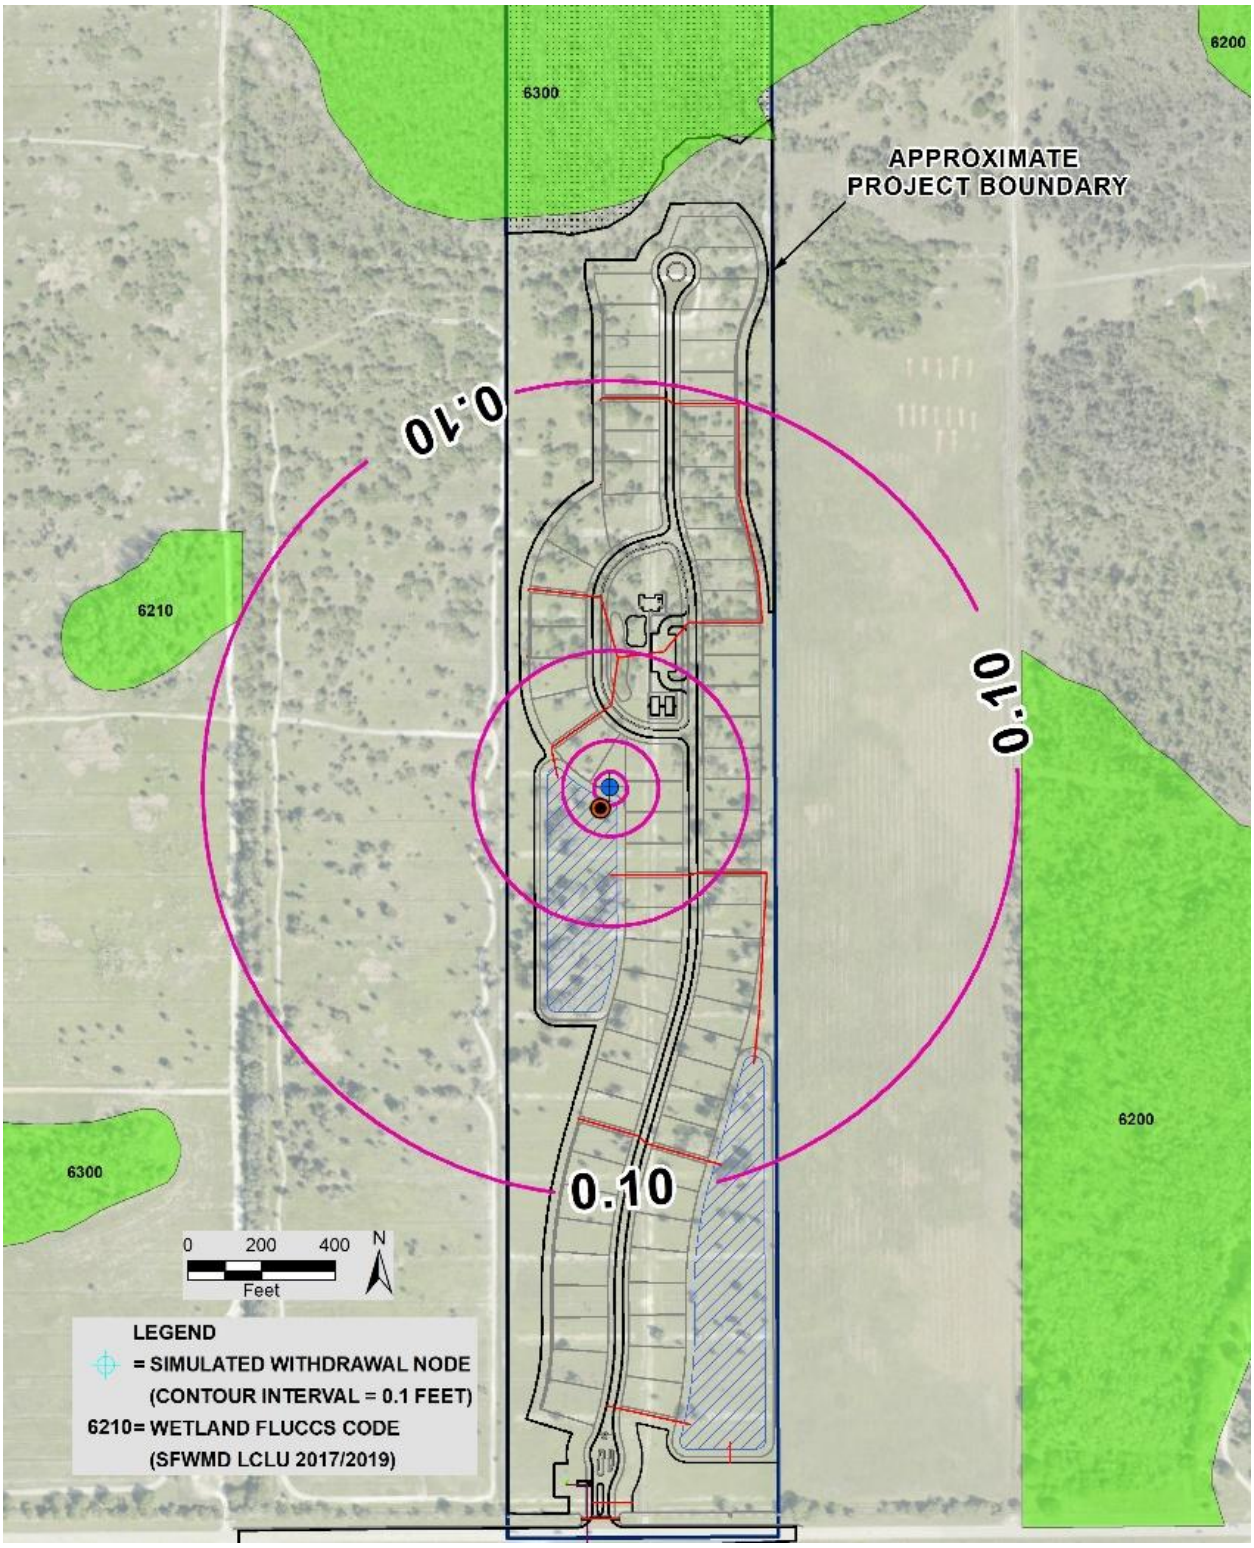

Figure 8. Simulated Drawdown Due to Proposed Withdrawals

SURFACE WATER AND GROUNDWATER MONITORING PLAN

This Surface Water and Groundwater Monitoring Plan will be initiated to establish baseline conditions for the project site and to quantify potential adverse impacts as a result of the proposed residential development. The Surface Water and Groundwater Monitoring Plan includes sampling locations, sampling frequency, reporting requirements, and evaluations of the water level and water quality within the Corkscrew 80 RPD project site. The proposed monitoring plan may be further refined during the Development Order process that may include additional or removal of groundwater and/or surface water sampling locations.

7.1 MONITORING

The development plans for the Corkscrew 80 RPD project site indicate that there are two proposed interconnected lakes to capture stormwater runoff. A proposed outfall control structure is located on the southern project extent of the project, where water can flow out of the stormwater management system and leave the project site. The Surface Water and Groundwater Monitoring Plan includes the installation of two shallow monitor wells tapping the upper portion of the Water Table Aquifer (WT-1 and WT-2), a surface water sample location (typical outfall location), and one staff gauge installed within the irrigation withdrawal lake (SG-1) upon operational completion. Refer to ***Figure 9*** for a map showing the proposed monitoring locations of the Surface Water and Groundwater Monitoring Plan including proposed irrigation withdrawal facilities. All monitor wells and the staff gauge will be equipped with electronic water level transducers set to record water levels every 6 hours. Surface water and groundwater monitoring parameters are provided in ***Table 2***

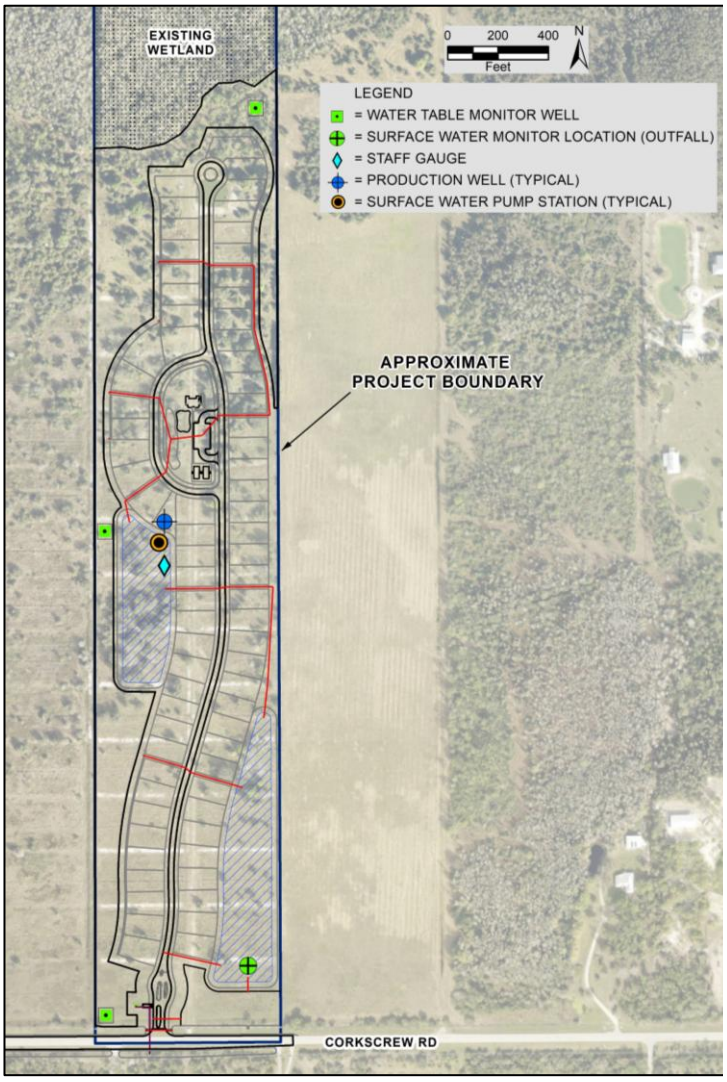

Figure 9. Map Showing Conceptual Monitoring Locations

The proposed Surface Water and Groundwater Monitor Plan include a baseline sampling event prior to construction commencement followed by semi-annual events. The semi-annual sampling events are proposed to occur twice per year during the wet season (June through October). The early wet season monitoring event is proposed to occur in June while the late wet season event is proposed to occur in October. The monitoring will include stage measurements using previously established benchmarks (piezometers) and the discharge condition will be recorded as either a “yes or no”

depending on whether or not water is flowing through the control structures at the time of sampling.

Table 2. Proposed Monitoring Parameters and Schedule

Surface Water Monitoring Parameter	Minimum Detection Level (MDL)	Units	Analysis Type
Stage	0.01	Feet (NAVD)	Field
Turbidity	0.01	NTU	Field
Discharge Condition	NA	Yes or No	Field
Specific Conductance	2	umhos/cm	Field
pH	0.01	S.U.	Field
Dissolved Oxygen	0.1	mg/L	Field
Temperature	0.1	C	Field
Nitrate-Nitrite (NOx)	0.1	mg/L	Laboratory
Total Nitrogen	0.1	mg/L	Laboratory
Chlorophyll A	1.0	mg/m^3	Laboratory
Nitrite	0.01	mg/L	Laboratory
Nitrate	0.01	mg/L	Laboratory
Total Phosphorus	0.05	mg/L	Laboratory
Hardness (as $CaCO_3$)	N/A	mg/L	Laboratory
Iron	0.20	mg/L	Laboratory
Copper	1.0	µg/L	Laboratory
E. coli	100?	MPN	Laboratory

7.1.1 Quality Assurance

Water samples will be collected and handled following protocols contained in FDEP Quality Assurance Rule F.A.C. 62-160 and adopted as the 2014 FDEP Standard Operating Procedures for Field Activities (DEP-SOP-001/01), effective 7/30/2014. Water Quality samples will be collected from both monitor wells and the staff gauge monitoring station. One field blank and a field duplicate will be collected during each sampling event for quality assurance purposes. Chain of custody forms and laboratory analysis reports will be provided in corresponding quarterly reports.

Water samples will be tested by a certified laboratory under the National Environmental Laboratory Accreditation Program (NELAP) using approved test methods and QA testing requirements (i.e., blanks, sample duplicates, surrogates, matrix spikes etc.) as contained in F.A.C 62-160 QA Rules.

7.1.2 Water Monitoring Reporting and Analysis

An annual report which will include a comparison of State Surface Water Quality standards, plots of parameters, and any conclusions or recommendations will be provided to the Division of Natural Resources annually for at least 5 years. The monitoring reports will be submitted once per year as an Electric Data Deliverable (EDD) in a comma delimited text format approved by the Lee County Division of Natural Resources in their approved format within 60 days of receipt of laboratory reports from two wet season monitoring events during the reporting period. Conclusions and recommendations will be based on applicable target levels, statistical analyses, and trends of measured constituents.

Results of water sampling will be compared to applicable State Water Quality Standards based on F.A.C. Chapter 62-302, if listed and deviation from the initial baseline sampling will be analyzed for potential negative impacts and corrected if necessary. Parameters that do not have numeric

target levels will be evaluated for trends. The surface water laboratory results will undergo statistical analysis for the development of conclusions and recommendations within the annual reports.

Water Quality Monitoring will continue for a minimum of 5 years from the date of completion of the stormwater management system. After 5 years of meeting or exceeding state water quality monitoring standards, the developer may amend or discontinue water quality monitoring and reporting after written request, review, and approval by LCDNR.

7.1.3 Contingency Plan

Should indications of water quality concerns be identified by exceedances of target levels, deviations from baselines, or through statistical trend analyses, site conditions will be reviewed for possible onsite and offsite incidents that could be attributed to elevated readings. If no incident or cause can be identified, the samples will be re-collected and re-analyzed for the parameter of concern. Following any re-sampling event, the Applicant will coordinate with the LCDNR to aid in identifying potential causes and potential needs to modify monitoring parameters, frequency, and/or reporting. If resampling shows water quality concerns, Lee County will be notified to discuss potential corrective actions.

Potential investigative and corrective actions may include:

- Review potential nearest upgradient facility lakes;
- Review and revision of lake management, stormwater management, and landscape fertilizer application procedures and schedules;
- Include additional surface water sampling sites; and
- Notification to impacted residents and applicable authorities as needed.

7.2 CONCLUSION

The Corkscrew 80 RPD affords a unique opportunity to improve the hydrologically impacted project area through enhanced stormwater management and recharge of groundwater to the Water Table Aquifer. The proposed project provides a high level of protection, preservation, and enhancement of groundwater resources in accordance with Lee County's goals and objectives.

SECTION 8

PROFESSIONAL CERTIFICATION

I, Michael C. Alfieri, hereby certify that I am a Professional Geologist licensed in the State of Florida and that the accompanying document was prepared by me or under my supervision and is in general conformance with the Department of Business and Professional Regulation, Division of Professions, Board of Professional Geologists Practice Rules and Statutes (Rules Chapter No. 61G16-1 through 61G16-9/ Statute: Chapter 492). Based on current methodologies and the current state of the professional practice of geology, the geologic information provided is true and correct to the best of my knowledge and belief based on the data collected.

Michael C. Alfieri, P.G., P.Hg., CGWP

1 INTRODUCTION

1.1 OVERVIEW

Enclave at Corkscrew (herein referred to as "Project") encompasses 78± acres located in Lee County, Section 21, Township 46 South, Range 27. The site is located approximately 5.2 miles east of the Alico Road and Corkscrew Road intersection.

1.2 HISTORIC WATER USE

The Enclave at Corkscrew property is located on land that has been historically used for pastural uses. The Project area falls within the footprint of a larger agricultural facility with a water use permit issued by the South Florida Water Management District (SFWMD) (Permit # 36-01461-W): Agricultural operations have a historic permitted water use extending from the 2000's through to the present. Currently, the larger footprint consists of approximately 1180.8 acres of irrigates farm fields. Per limiting condition 4 of Permit # 36-01461-W, App # 010709-2, the permitted annual allocation of water use is approximately 1,062 million gallons of water. This allocation is from both the water table aquifer and the sandstone aquifer.

1.3 HISTORIC WATER MANAGEMENT

There are no SFWMD Surface Water Management or Environmental Resource Permits for the site. Based on available topography and aerials, the property is presently enclosed by perimeter berms on the north, south, east and west sides. Additionally, there is a berm between the existing onsite wetland and the upland area on the northern section of the property. Some of the runoff from the existing wetland flows south through openings in the berm, and the rest flows east and then south via an existing swale located east of the project boundary. The onsite runoff accumulates in the southern boundary of the project and travels east until the water stages up and spills into the Corkscrew Road roadside swales where it ultimately discharges into Corkscrew Swamp.

A SFWMD ERP permit is being sought under application No. 241222-48705 to permit the proposed surface water management system.

2 ANALYSIS METODOLOGY

2.1 OVERVIEW

The purpose of this analysis is to evaluate the potential impacts of the proposed project on the groundwater table in Southeast Lee County, focusing on both agricultural and residential applications. In compliance with Lee Plan Policy 33.1.7, an integrated surface and groundwater model has been developed to assess the project's effects on hydrological conditions. This model compares the impacts of residential development, which is expected to improve surface and groundwater conditions through enhanced water management practices.

In the absence of residential development approval, agricultural lands are the primary alternative. This report compares the hydrological impacts of both scenarios, examining their effects on water quantity, soil health, resultant biodiversity, and long-term sustainability of water resources. By presenting these findings, the report aims to inform decision-making and support sustainable management of Southeast Lee County's natural resources. A 1D hydrologic and hydraulic surface water model and a 2D integrated surface water and groundwater model were created for both scenarios. The 2D overland and groundwater parameters for this study were defined with ground surfaces, land use layers, soils layers, groundwater elevations surfaces, basins layers, and rainfall layers.

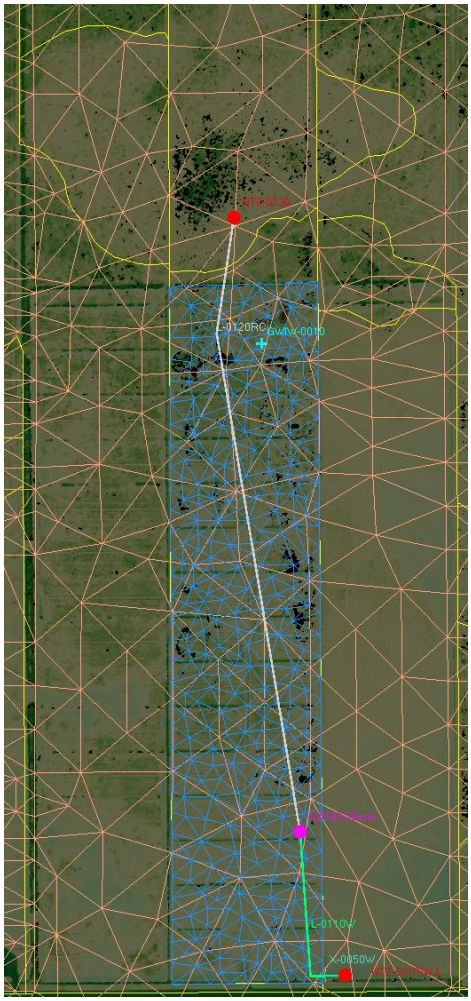
Once these inputs were defined, they were entered into the ICPR model to simulate behavior of the surface water management system under varying hydrologic conditions.

2.2 AGRICULTURAL SCENARIO

A surface of the existing conditions was created using LIDAR and was input into the overland and groundwater regions along with an existing conditions land use layer and a soils layer. The runoff from the property currently discharges east and flows parallel to Corkscrew Road until reaching a residential driveway. The water then accumulates and stages up before spilling over the Corkscrew Road right-of-way (ROW) berm into the roadside swales. A time/stage node is used to simulate the Corkscrew Road tailwater conditions and a weir link with the geometry of the existing outfall flow path at the southeastern property line was used to connect the onsite Ex Basin and the Outfall node.

A well and a rating curve link was incorporated into the model to connect the onsite basin with the northern existing wetland. This link simulates the operation of a 2,500 GPM dewatering pump, which is triggered via rating curve to turn on and off and maintain water levels beneath the wet season water table elevation. A time/stage node was used to model the water elevation by the northern existing wetland. Figure 1 below shows the ICPR nodal map along with the Overland and Groundwater regions triangulation.

Figure 1. Agricultural Scenario Model



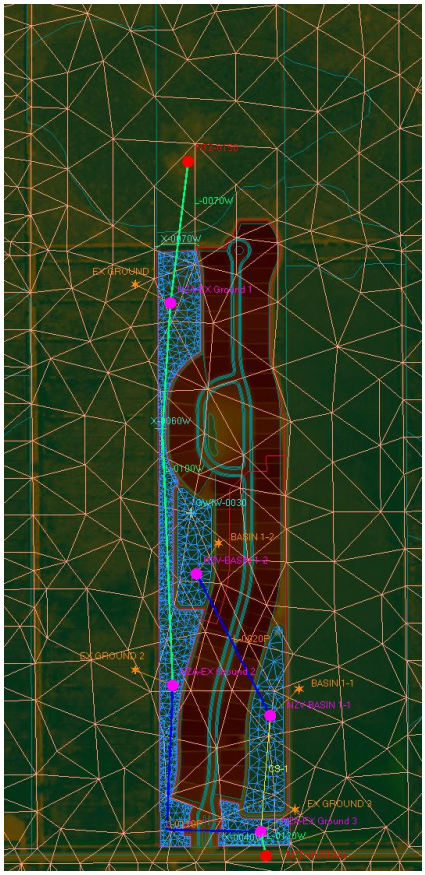
2.3 RESIDENTIAL SCENARIO

The proposed project will provide a weir at the existing northern berm providing a better stablished pathway for the northern flow to travel though the project's property. An opening in the southern berm abutting the Corkscrew Road right-of-way is being proposed to allow the water to discharge into Corkscrew Road more directly. This will provide some relief for the eastern residential properties from the consistent flooding caused by the accumulation of water near their connecting driveway to Corkscrew Road.

The 1D ICPR elements in the development basins (Basin 1-1 and Basin 1-2) were modeled based on the design submitted to the South Florida Water Management District (SFWMD) in Application No. 241222-48705. Nodes and links were added to the restoration areas to simulate the movement of the runoff coming from the north through the project and discharging into the Corkscrew Road roadside.

Since the proposed lakes and restoration basins are the main areas where the surface and groundwater connect, pond control volumes were added to these portions of the project. A well was added to basin 1-2 to simulate recharge in order to satisfy irrigation demands. The modeled irrigation rates per land use are provided in the ICPR input report in Appendix A, and the Blaney-Criddle calculations for the proposed drip system are included in Appendix D. The 2D overland region ties the 1D elements to the groundwater region. Figure 2 below shows the ICPR nodal map including the Overland and Groundwater regions triangulation.

Figure 2. Post-Development Conditions Model



3 WATER BUDGET NARRATIVE

Historically, the subject property functioned primarily as agricultural land and was subdivided into distinct crop areas supported by a manually constructed drainage network. This system, implemented around the 1970s, consisted of a series of shallow ditches designed to lower the groundwater table and quickly convey stormwater away from cultivated areas. A continuous berm was also constructed around the perimeter of the site to restrict the inflow of offsite runoff, isolating the property's internal hydrology from the surrounding landscape. While these measures were effective for agricultural productivity at the time, they significantly altered the natural surface water flow patterns both inside and outside of the project and disrupted the area's hydrologic connectivity.

Throughout this time, the legacy of this modification has resulted in a disturbed drainage regime that affects not only the subject parcel but also adjacent lands. Although active agricultural operations have ceased, these altered conditions persist today. The site now exists as largely cleared, dormant land with residual grading and drainage features still visible across the site.

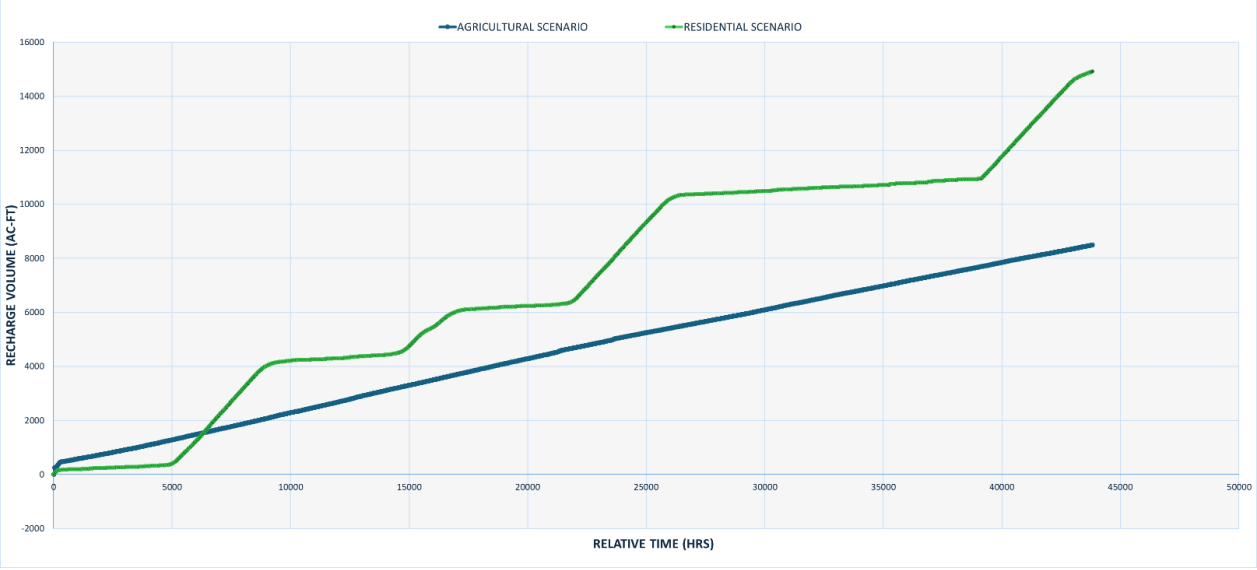
The proposed restoration and development plan seeks to address these long-standing hydrologic disruptions through a balanced approach that integrates stormwater management, ecological restoration, and responsible site design. The project will introduce an engineered stormwater system designed to emulate pre-disturbance flow patterns and reestablish natural hydrologic functions. By regrading the site, creating isolated depressional areas, and managing stormwater inflows and outflows through control structures, the system will promote the restoration of a more natural hydroperiod and improve downstream flow distribution.

Through these changes, the project aims to restore the site's water budget, support sustainable development, and enhance water quality functions. Ultimately, this approach will replace the agricultural drainage network with a modern, environmentally responsive system that both mitigates previous impacts and supports long-term ecological resilience.

4 RESULTS

A 5-year (2015 to 2019) storm event was run to compare the impacts of both scenarios on the groundwater table. A groundwater mass balance report was generated in ICPR to determine the groundwater recharge differences. The results indicate that due to the use of a dewatering pump that would be needed for crop-raising, the total groundwater recharge volume of the agricultural scenario is lower at the end of the modeled simulation than that of the residential scenario, 8,494 ac-ft and 14,912 ac-ft, respectively. A hydrograph comparing the recharge volume over time is provided in Figure 3 below and results of the event are included in Appendices B and C.

Figure 3. Agricultural Scenario Vs. Residential Scenario



The proposed stormwater lakes and the restoration of the open space around the development basins will enhance infiltration and recharge of the groundwater table. Furthermore, the reestablished flow way will facilitate a more even distribution of runoff across properties north of Corkscrew Road, preventing water accumulation in specific areas and thereby reducing the risk of flooding in surrounding properties.

2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: 8310: Electric Power Facilities [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: 8320: Electrical Power Transmission Lines [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: 8330: Water Supply Plants (Including pumping stations) [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: 8340: Sewage Treatment [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: 8350: Solid Waste Disposal [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

Crop Coef: P:2150: Field Crops [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: Groundwater
Shut Off Elevation: 0.00 ft
GW Irrigation Well Feature: GWIW-0010
Irrigation Rule: Unrestricted

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	2.930	0.70
2050	1	1	1.00	1.50	2.930	0.70

Crop Coef: void [Crop Coefficient Zone]

Crop Coef Set: CROP COEFS_PRE
Allow Saturated ET: True
Irrigation Source: None

Year	Month	Day	Crop Coef [dec]	Root Depth [ft]	Irrigation Rate [ipd]	Irrigation Eff [dec]
1950	1	1	1.00	1.50	0.000	0.00
2050	1	1	1.00	1.50	0.000	0.00

APPENDIX B

AGRICULTURAL SCENARIO RESULTS

Scenario	Absolute Time	Relative Time [hrs]	Recharge Volume [ac_ft]
Agricultural Scenario 2D Model	2015:1:1:0.0000	0.0000	0.00
Agricultural Scenario 2D Model	2015:1:2:0.0000	24.0000	6.54
Agricultural Scenario 2D Model	2015:1:2:0.0000	24.0000	6.54
