- B. Reason why Variance is needed** [Attach extra sheets if additional space is needed]:
Please see responses included with Written Request

- C. Variance Criteria.** Explain how each variance request meets the criteria set forth in 34-145(b)(3) and (4). [34-202(b)(6)(a)]

- What are the property's inherent exceptional conditions that cause the application of the regulation to create a hardship (as defined in LDC section 34-2) on the property owner?
- Are the exceptional conditions the result of actions of the property owner taken subsequent to the adoption of the ordinance? ☐ YES ☒ NO (If YES, explain.)
- Is the requested variance the minimum variance that will relieve the unreasonable burden caused by the application of the regulation to the property? ☒ YES ☐ NO (Explain.)
- Will granting the variance be injurious to the neighborhood or otherwise detrimental to the public welfare? ☐ YES ☒ NO (Explain.)
- Is the requested variance consistent with the Lee Plan? ☒ YES ☐ NO (Explain.)
- If applicable, how does the variance meet the special findings criteria of 34-145(b)(4)?

D. Site Plans:

- All requests for a variance (excluding a setback variance on a collector or arterial road) must include a site plan showing: [34-202(b)(6)(b)]
 - All existing public streets, easements or other reservations of land within the site;
 - All existing and proposed structures on the site; and
 - The location of the proposed variance.
- All requests for a variance from a required street setbacks on a collector or arterial road must include a site plan, drawn to scale, showing: [34-202(b)(6)(b)]
 - The location of all proposed structures, easements, rights-of-way and vehicular access onto the property, including entrance gates or gatehouses; and
 - The extent of modification from street setbacks requested.

**PART 5
ADDITIONAL REQUIREMENTS**

A. Flood Hazard:

- ☐ Not applicable
- ☒ The property is within an Area of Special Flood Hazard as indicated in the Flood Insurance Rate Maps (FIRM)s.
- ☐ The minimum elevation required for the first habitable floor is _____ NAVD (MSL)

B. Excavations/Blasting:

- ☒ No blasting will be used in the excavation of lakes or other site elements.
- ☐ If blasting is proposed, provide information regarding proposed blasting (including soil borings, a map indicating the location of the proposed blasting, and other required information).

- Verizon Wireless Letter of Support
- FAA Application 2025-ASO-21892-OE
- FAA Pre-Screening Tool
- Lease Memorandum
- Photo Simulation Package
- Fall Zone Letter

Vertex is requesting Special Exception and Variance approvals for a 149' Wireless Communications Facility ("Tower") to be located at 6227 Deer Run in unincorporated Fort Myers, Florida; Lee County STRAP 01-46-24-00-00001.0000. The total parent parcel is approximately 280.34 acres, MOL (according to the Lee County Property Appraiser's Office), and has a golf course with amenities on the land. The parent parcel is primarily zoned RM-2 (73%) as well as PUD (24%) and CT (3%), with future land use designations of "Suburban" (93%) and "Wetlands" (7%).

The Tower will be designed to accommodate T-Mobile, Verizon Wireless and two other wireless telecommunication providers (such as AT&T). The tower compound is 1,932 square feet in addition to any required easements for access, utilities and landscaping.

Please find below a description how Vertex's application meets the criteria of the applicable sections of the Lee County LDC and Comprehensive Plan.

Lee County Comprehensive Plan

POLICY 1.1.5: The Suburban future land use category will consist of predominantly residential areas that are either on the fringe of the Central Urban or Urban Community future land use categories or in areas where it is appropriate to protect existing or emerging residential neighborhoods. This category provides housing near the more urban areas but does not provide the full mix of land uses typical of urban areas. Industrial land uses are not permitted. This category has a standard density range from one dwelling unit per acre (1 du/acre) to six dwelling units per acre (6 du/acre). The maximum total density may only be increased to eight dwelling units per acre (8 du/acre) utilizing Greater Pine Island Transfer of Development Units except in areas that specifically prohibit bonus density. Other forms of bonus densities are not allowed.

Wireless Communication Facilities are needed to service the surrounding residential area(s) and are essential to all land uses; therefore, Towers need to be located within or near residential areas of the County. As the parent parcel and surrounding parcels are zoned residential, the proposed Tower is ideally sited in the utility and maintenance area of The

Forest Country Club in order to serve existing and future residential development. This proposed Tower will also be beneficial by providing another source for emergency communications, promoting the health, welfare, public order and safety of the community.

POLICY 123.10.5: The County will continue to permit communication towers in excess of 100 feet only by special exception. The impacts of such towers on wood storks must be considered in the review of these applications. (Ord. No. 94-30, 00-22, 18-28) **The FCC has strict rules regarding the siting of Towers in accordance with the National Environmental Policy Act (NEPA). Should a negative impact on wood storks be identified in the NEPA, Vertex will notify the County and adjust its Development Order Application accordingly.**

Lee County Land Development Code

Section 34-145.(b) Variances

(3) Findings/review criteria. Before granting a variance, the Hearing Examiner must find the following review criteria are satisfied:

- a. The property has inherent exceptional conditions that cause the application of the regulation to create a hardship (as defined in Section 34-2) on the property owner. **“Hardship” is defined by the Lee County land development code as “an unreasonable burden that is unique to a parcel of property, such as peculiar physical characteristics. Economic problems may be considered but may not be the sole basis for finding the existence of a hardship.” Vertex is applying for two separate variances:**
 - **From Section 34-1447.(b), Table 34-1447. The maximum overall height allowed by administrative approval in residential districts is 35 feet, and the maximum overall height requiring approval by Special Exception is 75 feet. As T-Mobile has a stated need of 145 feet, and Verizon has stated a need of 135 feet, Vertex is proposing a 149-foot Tower in order to accommodate both carriers in addition to two more collocations in the future. Therefore, Vertex is requesting the additional height generally in accordance with other districts’ maximum height of 149 feet by Special Exception.**
 - **Per Section 34-1447.(e)(1)(a), new tower facilities must be set back from the property lot lines a distance greater of the zoning district setback requirements or the overall height of the tower. Therefore, the Tower must be set back from the parent property line a minimum distance of 149’. The proposed tower is approximately 63 feet from the Deer Run ROW, and Vertex is proposing a Variance of 86 feet from this requirement. In order to mitigate the request, Vertex is proposing a 50-foot Fall Zone Radius. Deer Run Southwest was platted via “The Forest Unit One” in Plat Book 33, Page 85, in 1983. If this portion of the roadway were not platted or developed, we would not request this variance, as the next closest parent parcel lot line (to the east) to the Tower is 372**

feet. Vertex exceeds all other district and tower height setbacks. Please see Sheets A-1 and C-1 illustrating the setbacks.

- b. The exceptional conditions are not the result of actions of the property owner taken subsequent to the adoption of the ordinance. **The conditions resulting in the requested variances are pre-existing.**
- c. The variance granted is the minimum variance that will relieve the unreasonable burden caused by the application of the regulation to the property. **The variances Vertex is requesting, if granted, will relieve any hardship or unreasonable burden.**
 - **We are requesting a 149' Tower, as this height is the maximum allowed height in all other zoning districts requiring approval by Special Exception, in order to accommodate the maximum number of collocations on the Tower.**
 - **The Tower is ideally sited in the utility and maintenance area of The Forest Country Club, at least 240% the height of the Tower from the closest residential dwelling. Furthermore, the existence of Deer Run as platted through the property has created a unique circumstance of impacting the tower setbacks.**
- d. The granting of the variance will not be injurious to the neighborhood or detrimental to the public welfare. **Wireless Communication Facilities are needed to service the surrounding residential area(s) and are essential to all land uses; therefore, Towers need to be located within or near residential areas of the County. This proposed Tower will also be beneficial by providing another source for emergency communications, promoting the health, welfare, public order and safety of the community.**
- e. The variance is consistent with the Lee Plan. **The parcel the proposed Tower is sited on has a future land use designation of "Suburban." According to the Lee County Comprehensive Plan, or "The Lee Plan," Policy 1.1.5, "The Suburban future land use category will consist of predominantly residential areas that are either on the fringe of the Central Urban or Urban Community future land use categories or in areas where it is appropriate to protect existing or emerging residential neighborhoods." The intention of the proposed Tower is to provide wireless coverage for these existing and emerging residential area(s).**

(4) *Special findings.* The Hearing Examiner must also make special findings in variances for the following:

- a. *Wireless communication facilities.*
 - 1. Denial would have the effect of prohibiting the provision of personal wireless services; **There is a need for additional wireless capacity in the surrounding area. Please see T-Mobile RF Package and the Verizon Zoning Support Letter.**

2. Denial would unreasonably discriminate among providers of functionally equivalent personal wireless services; **Not applicable**
3. The variance is necessary to ensure adequate public safety and emergency management communications; **The siting of a Tower as a general public service and emergency service use (including E911 and NG911) shall strengthen the wireless service to area and support the health, welfare and safety of the community. Vertex is also amenable to reserving space on the proposed Tower for the placement of any needed emergency communication apparatus and/or device(s) on the structure or the ground compound as requested by the Lee County Department of Public Safety.**
4. The variance is the minimum necessary in order for the applicant to provide broadcast services pursuant to an FCC-issued license or construction permit (existence of an FCC license requiring a broadcast antenna at a given height will constitute a presumption that this requirement has been met); **Not applicable**
5. Denial would have the effect of prohibiting the provision of amateur radio services; or **Not applicable**
6. The variance will obviate the need for additional antenna-supporting structures in the geographic search area. **The proposed Tower will alleviate the need for any additional wireless capacity in the Geographic Search Area. Please see T-Mobile RF Package and the Verizon Zoning Support Letter.**

(5) *Decisions.*

- a. When the Hearing Examiner determines denial is appropriate, the decision must cite to the specific legal authority for the denial. **Noted**
- b. In reaching a decision, the Hearing Examiner may attach conditions necessary for the protection of the health, safety, comfort, convenience and welfare of the general public. Conditions must rationally relate to the variance. **Vertex will comply with any reasonably related conditions attached to the approval of the Variances.**
- c. Decisions of the Hearing Examiner on variances filed from the Airport Compatibility District regulations, must be in the form of a recommendation to the Board. **Not applicable**

Section 34-145.(c) Special Exceptions

(3) Findings/review criteria.

- a. Prior to granting a special exception, the Hearing Examiner must find the Applicant has proven entitlement to the special exception by demonstrating the request:

1. Is consistent with the goals, objectives, policies and intent of the Lee Plan;
2. Will protect, conserve or preserve environmentally critical and sensitive areas and natural resources, where applicable;
3. Will be compatible with existing and planned uses;
4. Will not be injurious to the neighborhood or detrimental to the public welfare; and,
5. Will be in compliance with zoning regulations pertaining to the use and other applicable regulations.

There are no negative material impacts on surrounding land uses or the environment. The Tower is ideally sited in the southern portion of the 280-acre parcel in the utility and maintenance area of The Forest Country Club, and there is adequate existing vegetation in this area to screen the tower from nearby residents. Also, please see response herein above to Policy 1.1.5. The siting of a Tower as a general public service and emergency service use (including E911 and NG911) shall strengthen the wireless service to area and support the health, welfare and safety of the community. Vertex's application for a Tower within the RM-2 district is consistent with the criteria set forth in LDC Chapter 34, Article VII, Division 11, et al.

- b. In the case of new antenna supporting structure wireless communication facilities, the Hearing Examiner must also find, or conclude a finding is not applicable, that:

1. The Applicant is not able to use existing wireless communications facility sites in the geographic search area;
2. The Applicant has agreed to rent or lease available space on the antenna-supporting structure, under the terms of a fair-market lease, without discrimination to other wireless communications service providers;
3. The proposed antenna-supporting structure will not be injurious to historical resources, obstruct scenic views, diminish residential property values, or reduce the quality and function of natural or man-made resources; and
4. The Applicant has agreed to implement all reasonable measures to mitigate the potential adverse impacts of the structures and facilities.

The closest FCC-registered Tower (FCC ASR 1038046) is approximately 1.2 miles to the northeast and is outside of the Geographic Search Area. Please see Existing Towers Map, T-Mobile RF Package and the Verizon Zoning Support Letter. As such, Vertex will allow the collocation of wireless providers under the terms of a fair-market lease. The Tower's location will not be injurious to historical resources, obstruct scenic views, diminish residential property values, or reduce the quality and function of natural or man-made resources. Finally, as Vertex is proposing a 149' non-reflective (galvanized steel) close-mount monopole Tower in order to accommodate the carriers' collocation needs, a non-reflective close-mount monopole will have a much slimmer profile than a tree-type camouflage (monopine), a flagpole, or bell/clock tower design.

(4) Decision.

- a. The Hearing Examiner must grant the special exception unless he or she finds the request conflicts with subsection (c)(3) of this section or the request is contrary to the public interest and the health, safety, comfort, convenience and welfare of the citizens of the County. If the Hearing Examiner determines denial is appropriate, the decision must cite to the specific legal authority for the denial. **The siting of a Tower as a general public service and emergency service use (including E911 and NG911) shall strengthen the wireless service to area and support the health, safety, convenience and welfare of the community.**
- b. The Hearing Examiner may attach conditions necessary for the protection of the health, safety, comfort, convenience or welfare of the general public. The conditions must rationally relate to the special exception. **Vertex will comply with any reasonably related conditions attached to the approval of the Special Exception.**
- c. Decisions of the Hearing Examiner on special exceptions filed with an application to rezone property must be in the form of a recommendation to the Board. **Section not applicable, as this is a Special Exception only.**

DIVISION 11. WIRELESS COMMUNICATION FACILITIES

...

Sec. 34-1443. Applicability and exemptions.

- (a) Except as provided in Subsection (b) of this section, this division applies to the installation, construction, or modification of wireless communications facilities. **Vertex is applying for the approval and use of a new Tower.**
- (b) The following items are exempt from the provisions of this division: **Not applicable...**

Sec. 34-1444. Permissible wireless facility locations.

- (a) Except as provided below, a wireless communications facility may be permitted only in accordance with Section 34-1447 and the provisions of this chapter. Regardless of the process required, the applicant must comply with all submittal, procedural, and substantive provisions of this chapter. Variances or deviations from the requirements of this division may be granted only in accordance with the requirements of Section 34-1453 for a variance. **Per Table 34-1447 (and footnote 4), Vertex is applying for a Special Exception and a Variance for a 149' Tower within the RM-2 zoning district. Vertex meets all other provisions of this chapter, unless expressly stated herein.**
- (b) Exceptions.
 - (1) Broadcast antenna-supporting structures in excess of 250 feet will only be allowed within an Agricultural Zoning District by variance in accordance with the requirements of Section 34-1453. Broadcast studios are not allowed in the Agricultural Zoning District and must comply with all other applicable zoning and development regulations. **Section**

not applicable, as Vertex is applying for a 149' Tower within a Residential Zoning District.

- (2) The first antennas proposed to be mounted on existing buildings or structures must apply for administrative review as set forth in Section 34-1445(b). Collocations, other than those under Section 34-1443(b)(7), shall follow the procedures indicated in Section 34-1445. **Vertex's future collocators shall comply with this Section.**
- (3) On the barrier islands... **Section not applicable.**
- (4) Wireless communications facilities are prohibited in the Density Reduction/Groundwater Resource (DR/GR) Future Land Use... **Section not applicable.**

The design of any facility proposed in these areas must be reviewed in accordance with the provisions of Section 34-1445 and Section 34-1447. **Vertex's proposed Tower meets all the requirements of these sections.**

Sec. 34-1445. Development review process.

- (a) *Preapplication conference.* **Vertex requested and attended a Pre-Application Conference on October 21, 2025, and has complied with all provisions of this section.**
- (b) *Zoning.*
 - (1) *Administrative review.* **Section not applicable.**
 - (2) *Special exception.*
 - a. Where, pursuant to Table 34-1447, a special exception is required, the application must be reviewed pursuant to the provisions of Section 34-145(c) and this division. **Vertex is applying for a Special Exception and Variance (pursuant to Table 34-1447). Please see responses to Section 34-145(c) earlier in this Written Request.**
 - b. Appeal... **Vertex acknowledges this section, and will exercise, if ever necessary.**
- (c) *Building permits and development orders.* Building permits and development orders are required for all wireless communication facilities in accordance with this chapter and Chapters 6 and 10. **After approval of the Special Exception and Variance, Vertex shall apply for the applicable Development Order and Building Permit(s).**

Sec. 34-1446. Application submittal requirements.

- (a) *Minimum required information for all wireless communication facilities applications.* Every application for wireless communication facilities must include the following information. However, upon written request, on a form prepared by the County, the Director may modify the submittal requirements contained in this section where it can be clearly demonstrated that the submission will have no bearing on the review and processing of the application. The request for a waiver or modification must be submitted to the Director prior to submitting the application. A copy of the request and the Director's written response must accompany the application and will become a part of the permanent file. The Director's decision is discretionary and may not be appealed. **Vertex has submitted the minimum information with this Special Exception Application.**
 - (1) Documentation of authority and acceptance of responsibility for compliance with these regulations, executed by the property owner, the applicant, and the provider who will be

placing antennas on the proposed or existing wireless communications facility. **Please see the submitted Special Exception Application documents and Zoning Affidavit #5. Each provider shall provide this information at time of their application for installation.**

- (2) The name, address, and telephone contact information for the owner of all proposed or existing antenna-supporting structures and wireless communication facilities; and an affidavit that such information will be updated annually or upon a change of ownership after the application is approved. **Please see Zoning Affidavit #4 for this information.**
- (3) A license (and for broadcast structures, a construction permit) issued by the FCC to transmit radio signals in Lee County. **Please see FCC Application and T-Mobile FCC Licenses.**
- (4) New antenna-supporting structures must demonstrate there are no existing suitable structures available or higher priority zoning districts in the geographic search area. As part of that demonstration, the application must include a graphical representation of the geographic search area. **See Existing Towers Map. There are no existing antenna structures or buildings of sufficient height within at least one mile. The closest approved, FCC-registered tower (ASR 1038046) is approximately 1.22 miles to the northeast on STRAP 06-46-25-00-00003.0100. Regarding higher priority zoning districts, there are industrially zoned properties on the east side of Tamiami Trail, which are within a one mile radius of the existing FCC-registered tower (ASR 1038046) and are outside the geographic search area. The closest commercial properties are approximately 0.75 miles northeast, where the previously mentioned existing tower (ASR 1038046) is sited in close proximity. The closest CFPD property is over two miles away, which is in close proximity to an existing, unregistered tower. There are no marine-oriented or AOPD parcels within five or more miles. The closest agricultural property is 0.12 miles to the southwest, but this is a part of the Estero Bay Preserve State Park which has a future land use of Conservation and wetlands. There are two RVPD zoned properties to the east, but these are within one mile of where the aforementioned existing tower is located.**
- (5) A statement confirming the overall height of the facility and all other facilities on the subject property, in terms of grade and sea-level. **Please see Site Plans to confirm the height of the proposed Tower, calculated as:**

145' Tower

+ 4' Lightning Rod

149' Overall Height (AGL)

Note: Vertex has applied for an FAA Determination; however, the response has been delayed due to the U.S. Federal Government Shutdown. We will forward upon issuance.

- (6) A letter:
 - a. Demonstrating consent from the Executive Director of the Lee County Port Authority if the wireless communications facilities is to be located within the County airspace notification limits of Section 34-1107; **Due to the U.S. Federal Government shutdown, Vertex has not been able to receive the FAA Determination of No**

Hazard; however, Vertex originally received an FAA Determination for another location on the same parcel, approximately 0.20 miles to the southwest. Additionally, the FAA Pre-Screening results indicate we are not required to file notice with the FAA. See “FAA Pre-Screening Tool Results”. We will submit an application for a Tall Structure Permit once we have received an FAA DNH for the current location.

- b. Confirming review and recommendation from the Lee County Mosquito Control District, the Lee County Sheriff's Department and the Director of Public Safety or their respective designee, for any wireless communication facility exceeding 35 feet; **Please see “No Objection Responses” from LCMCD, LCSO and LCPS.**
- c. Evidence of compliance with applicable Federal Aviation Administration requirements under 14 CFR 77, as amended, and evidence of proper Federal Communications Commission licensure, or other evidence of Federal Communications Commission authorized spectrum use. **As previously mentioned, Vertex is currently unable to obtain an FAA Determination or FCC ASR documents. Once the government resumes operations, Vertex will comply with this section and obtain both an FAA Determination and FCC ASR documents. See FAA Pre-Screening Tool Results and FCC TOWAIR.**

These letters are not required for collocated and surface-mounted antennas. **Noted.**

- (7) A survey of the subject property completed by a registered land surveyor which shows all existing conditions. This requirement does not apply to roof-mounted and surface-mounted antennas. **Please see Boundary Survey.**
- (8) Photo-simulated post-construction renderings of the proposed wireless communications facility, equipment enclosures, and ancillary appurtenances as they would look after construction from areas where the proposed wireless communication facility will be visible according to the balloon test and sight lines. This requirement does not apply to collocations. **Please see Photo Simulation Package.**
- (9) Shared use plan or copy of an executed shared use plan for the existing facility. (This is not required for a broadcast facility until such time as a request is made to collocate personal wireless service equipment.) **Please see Shared Use Plan and Zoning Affidavit #6, which Vertex commits to the shared use and collocation of the approved Tower.**
- (10) For new antenna support structures, to allow a determination that there are no existing structures on which the provider's proposed antennas could be located, a list and map identifying all existing wireless communications facilities to which the proposed facility will be a handoff candidate, including latitude, longitude, and power levels of each. **Please see Existing Towers Map, T-Mobile RF Package and the Verizon Wireless Zoning Support Letter.**
- (11) Floor plans, elevations, and cross sections at a scale no smaller than one-fourth-inch equals one foot (1:48) of any proposed accessory structure. **Please see Site Plans Sheet C-2 for Tower Elevation and Sheet C-3 for the Compound Plan.**
- (12) To scale elevation drawings, indicating the roof, facades, doors, and other exterior appearance and materials of the proposed wireless communication facility (signed and

sealed by a professional engineer). **Please see Site Plans and Photo Simulation Package for information relevant to this application.**

- (b) *Additional required information for wireless communication facilities requiring a public hearing.* In addition to the submittals required by Sections 34-202 and 34-203, and the requirements of Subsection (a) of this section, the following information must be provided:
- (1) Lease required. If the property owner is not a provider, the application must include a copy of an executed lease agreement or memorandum of lease between the applicant or property owner and a provider. Where no lease agreement has been executed, the applicant must include an affidavit signed by a provider attesting to the provider's intent to make application for development order approval to place antennas on the wireless communications facility if the zoning application is approved. **Please see Memorandum of Agreement between Vertex and the Property Owner.**
 - (2) For antenna-supporting structures, the graphic results of the balloon test conducted by the applicant pursuant to the requirements set forth in Subsection (d) of this section. **Vertex will submit the graphic results of the Balloon Test once conducted in accordance with subsection (d) herein below.**
- (c) *Additional information for wireless communication facilities required at time of application for a development order or building permit...* **Vertex will submit the required information at time of Development Order. Please see Zoning Affidavit #7. However, since Vertex is applying for a variance due to tower height setbacks from the property line, we are submitting a fall zone letter in accordance with 34-1446(c)(3) at this time. Please see Fall Zone Letter.**
- (d) *Balloon test.* Within 35 calendar days after an application for an antenna-supporting structure has been deemed complete, the applicant must conduct a balloon test in accordance with the following regulations:... **Vertex shall conduct a Balloon Test in compliance with this section.**

Sec. 34-1447. Development regulations.

The development regulations set forth herein apply to all wireless communications facilities as indicated.

- (a) *Collocations.* **Section not applicable with this application; however, Vertex's future collocations will comply with this section as necessary.**
- (b) *Where permissible, antenna-supporting structures.*

---	---------	---------------

Vertex is applying for a Special Exception with a Variance for 149' Tower within a Residential Zoning District.

(c) *District impacts minimized.*

- (1) *Generally.* Antenna-supporting structures must be located in a manner that is consistent with the County's interest in land use compatibility, within and between zoning districts, as set forth in this chapter's zoning district regulations, Section 34-611 et seq. **Table 34-1447 requires Towers up to 75 feet in the Residential Districts to obtain approval by a Special Exception. As the proposed Tower is 149 feet overall, Vertex is also seeking a Variance – per footnote #4. The intent of the Residential Districts is “to permit various types of dwelling units at various densities in the public service areas where infrastructure exists or can feasibly be extended, and to permit lower-density, single-family conventional and mobile home dwelling units in nonurban areas where the services and conveniences of the urban areas are not provided.” Additionally, this parcel is within an urban area on the Future Land Use Map, further classified as Suburban future land use. Because the closest existing FCC-registered Tower is over 1.2 miles away and this is an urban area, wireless coverage in this area needs improvement. This proposed Tower will be beneficial not only to the nearby residents, but also the future residents, by providing another source for emergency communications, promoting health, welfare, public order and safety.**
- (2) *Siting priorities.* In order to justify the construction of an antenna-supporting structure, the applicant must demonstrate that higher ranking alternatives in the following hierarchy, beginning with Subsection (c)(2)a of this section, do not constitute reasonable, compatible or feasible alternatives. Such demonstration must include a statement of position, qualifications, and experience by a qualified radio frequency engineer.
 - a. Collocated or combined antennas.
 - b. Surface-mounted antennas.
 - c. Roof-mounted antennas.
 - d. Antenna-supporting structures.

The closest FCC-registered Tower is approximately 1.2 miles to the northeast and is outside of the Geographic Search Area. Therefore, siting priority a. is not viable. Additionally, there are no structures that have the height necessary to provide reliable coverage and capacity to this area; therefore, priorities b. and c. are also not viable. Hence, we are proposing a new Tower in this area.

- (3) *Proliferation minimized.*
 - a. *Generally.* No antenna-supporting structure will be permitted unless the applicant demonstrates that the proposed antenna cannot be accommodated on an existing building, structure or antenna-supporting structure. **Please see previous response to 34-1447.(c)(2).**

-
- b. *Additional documentation.* Additional documentation may also be submitted to demonstrate compliance with this section: ... **Please see previous responses that reiterate there are no available viable alternatives.**
- (4) *Zoning district priorities.* In order to justify locating a proposed antenna-supporting structure within a zoning district lower in the hierarchy below, the applicant must adequately demonstrate that siting alternatives within higher ranked districts, beginning with Subsection (c)(4)a of this section, are not reasonable or feasible. This demonstration must include the submission of a statement of position, qualifications, and experience by a qualified radio frequency engineer.
- a. Industrial;
 - b. Commercial;
 - c. Marine-Oriented;
 - d. Community Facilities (CF) and Airport Operations Planned Development (AOPD);
 - e. Agricultural;
 - f. Recreational Vehicle;
 - g. Residential (including Mobile Home);
 - h. Private Recreational Facilities Planned Development (PRFPD);
 - i. Environmentally Critical (EC).

Vertex is proposing a new Tower on a Residential zoned parcel – Priority “g”. Regarding higher priority zoning districts, there are industrially zoned properties on the east side of Tamiami Trail, which are within a one mile radius of the existing FCC-registered tower (ASR 1038046) and are outside the geographic search area. The closest commercial properties are approximately 0.75 miles northeast, where the previously mentioned existing tower (ASR 1038046) is sited in close proximity. The closest CFPD property is over two miles away, which is in close proximity to an existing, unregistered tower. There are no marine-oriented or AOPD parcels within five or more miles. The closest agricultural property is 0.12 miles to the southwest, but this is a part of the Estero Bay Preserve State Park which has a future land use of Conservation and wetlands. There are two RVPD zoned properties to the east, but these are within one mile of where the aforementioned existing tower is located.

- (d) *Visual impacts minimized.*
- (1) *Generally.* Antennas must be configured in a manner that is consistent with the character of the surrounding community and must be of a color that blends with the structure to which it is attached, so that adverse visual impacts on adjacent properties are minimized. Antenna concealment screening should also be used when possible. **Vertex is proposing a galvanized steel, non-reflective close-mount monopole Tower, which has a much slimmer profile than a tree-type camouflage (monopine), a flagpole, or bell/clock tower design.**
 - (2) *Monopole design required.* Unless approved as either a roof-mounted or surface-mounted facility, all antenna-support structures must be a monopole, with all
-

transmission cable/wiring concealed inside. **Vertex is proposing a close-mount Monopole design, which is consistent with this section.**

- (3) *Antenna type priorities.* In order to justify the use of an antenna-type lower in the hierarchy below, the applicant must adequately demonstrate that higher ranked alternatives in the following hierarchy, beginning with Subsection (c)(3)a of this section, are not reasonable or feasible. This demonstration must include the submission of a statement of position, qualifications, and experience by a qualified radio frequency engineer.
- a. Flush-mounted;
 - b. Panel;
 - c. Whip;
 - d. Dish.

To avoid the proliferation of additional towers in this market area, the Tower is designed with flush-mounted antennas to optimally meet new service, E911, and capacity demands.

- (4) *Camouflage, screening, taping, and placement.*
- a. *Color.* Antenna-supporting structures and ancillary appurtenances, including transmission lines, must maintain a galvanized gray finish or other contextual or compatible color as determined by the County, except as otherwise required by the FAA or FCC. **The proposed Tower will have a galvanized finish. Please see Site Plans, Sheet C-2. Additionally, we anticipate the FAA will issue a determination that does not require marking or lighting for aviation safety.**
 - b. *Fencing.* The developer of a wireless communication facility must install a fence or wall not less than eight feet and not more than ten feet in height from finished grade to enclose the base of the antenna-supporting structure and equipment enclosures associated with any wireless communication facility. Access to the antenna-supporting structure must be controlled by a locked gate. The fence must be constructed in accordance with Section 34-1742. Not more than three strands of barbed wire, spaced six inches apart, may be allowed above the fence. **Vertex is proposing a ten-foot tall, PVC fence. Please see Site Plans, Page C-3:4, for details.**
 - c. *Landscaping.*
 - 1. A landscaped buffer of at least ten feet in width must be planted along the entire exterior perimeter of the fence or wall required by Subsection (d)(4)b of this section. Where the proposed antenna-supporting structure will be located adjacent to a residential or public recreational use, or a lot within a Residential Zoning District, the landscaped buffer must be at least 15 feet in width.
 - 2. A buffer required by this section must contain sabal palms planted ten feet on center, and a double hedge row of native shrubs. Section 10-420 planting standards must be met. The hedge must be

maintained at a minimum height equivalent to the fence height. Except where the proposed antenna-supporting structure will be located adjacent to a residential lot, public recreational use, or right-of-way, the landscaped buffer must include six feet in height native canopy trees planted ten feet on center, instead of the sabal palms required above.

3. Where these regulations would require existing facilities to meet current landscape requirements, the Director may reduce or eliminate such requirements if the Director determines that the requirements would be unreasonable, infeasible or otherwise inequitable under the circumstances. The Director's decision is discretionary and may not be appealed. Applicants may apply for a variance from the landscaping requirements herein.

Please see the Landscaping Plans for proposed landscaping. Vertex is proposing all the required plantings within a five-foot buffer due to the existing surrounding berm and vegetation providing extensive screening at the base of the Tower. In order to meeting the full 15-foot buffer width, we would have to remove the berm, many palm trees and other bushes.

Looking north along berm

Looking east at site toward access

- d. *Other facilities.* **Not applicable.**
- e. *Taping.* The developer of a wireless communication facility must install taping around the antenna-supporting structure in conformance with the following:
 1. The tape must be six-inch 3M Diamond Grade™ VIP Reflective Sheeting, Series 3990.
 2. The taping must start at 20 feet above surface.
 3. The taping must be at ten-foot intervals.

-
4. The tape must be wrapped around the support pole and overlap by one inch for a good seal.

Vertex will comply with this section, as necessary.

(e) *General property development regulations.*

(1) *Setbacks.*

- a. *New facilities.* All new antenna-supporting structures must meet the setback requirements for the zoning district in which they are proposed or a distance equal to their overall height from all lot lines of the fee property on which they are proposed, whichever is greater; unless a greater distance is required as a condition of the approval. A monopole with internal antennas must be setback a distance equal to one-half of its overall height from all lot lines of the fee property on which it is proposed, unless a greater distance is required as a condition of the approval, or a variance is granted. **Please see Site Plans, Sheet A-1, for the listed and illustrated tower setbacks, which the proposed Tower mostly exceeds. Vertex is requesting a Variance from the Deer Run right-of-way; please see previous responses for additional supporting details.**
- b. *Replacement facilities.* **Not applicable.**
- c. *Ancillary appurtenances, and equipment enclosures.* Ancillary appurtenances, and equipment enclosures must meet the minimum setback requirements for the zoning district in which they are proposed, as well as those set forth in Section 34-2191 et seq. **Please see Site Plans, Sheet A-1, for the listed and illustrated district setbacks for the compound.**

(2) *Height.*

- a. All antenna-supporting structures must comply with the requirements of Section 34-1008. **Section 34-1008 is reserved; however, Vertex's Tower shall comply with all applicable height requirements, including FAA and LCPA Tall Structure Permit.**
 - b. Antenna-supporting structures on the barrier islands or within the outer islands future land use areas may not exceed 35 feet, or the special height limits set forth in Section 34-2175. **Not applicable.**
 - c. Roof-mounted antennas, attachment devices, equipment enclosures or ancillary appurtenances may be placed on commercial, institutional, industrial and multifamily buildings at least 35 feet in height and may not extend more than 20 feet above the roofline of the building on which it is attached. **Not applicable.**
 - d. Collocations may not increase the existing overall height of an antenna-supporting structure. **Not applicable.**
 - e. In all other cases, the overall height of an antenna-supporting structure approved in accordance with Section 34-1445 may not exceed 149 feet, except as provided below:... **Not applicable.**
-

-
- f. In no event may the provisions set forth in Section 34-2174 apply to wireless communication facilities. **Acknowledged.**
 - g. The overall height of ground-mounted equipment or equipment enclosure may not exceed 12 feet. **Vertex and its future collocators shall comply with this section.**
 - h. Private aircraft and helicopter landing facilities. In addition to the provisions of Section 34-1001 et seq., antenna-supporting structures proposed within a designated notification height boundary of a private aircraft or helicopter landing facility, as specified on the Airspace Notification Map, will be limited to the height specified by that boundary, according to the proposed facility's distance from the runway or landing facility. **Not applicable.**
- (f) *Construction.*
- (1) *Type of construction.* Broadcast facilities may utilize lattice or guyed antenna-supporting structures. All other wireless facilities are limited to monopole antenna-supporting structures. **Vertex is proposing a 149' close-mount monopole-type Tower. See Site Plans Sheet C-2 and Photo Simulations for illustration.**
 - (2) *Accommodation of future collocations.*
 - a. Antenna-supporting structures should be designed to accommodate future collocations. **The Tower is designed to accommodate four carriers overall, including T-Mobile as the anchor tenant. Please see Site Plans Sheet C-2, Shared Use Plan, and Zoning Affidavit #6.**
 - b. The applicant must submit a shared use plan that commits the owner of the proposed antenna-supporting structure to accommodating future collocations where reasonable and feasible in light of the criteria set forth in this section. **Please see Shared Use Plan and Zoning Affidavit #6; Vertex is committed to future collocations.**
 - (3) *Lighting.*
 - a. Except for security lighting and site lighting, other types of lights, signals or illumination will only be permitted on an antenna-supporting structure or ancillary appurtenances where lighting is required by the FAA, FCC, the County, or the Lee County Mosquito Control District. **If the FAA requires lighting, Vertex will comply with this determination. Otherwise, Vertex will not install any sort of illumination or lighting. We anticipate the FAA will issue a determination that does not require marking or lighting for aviation safety.**
 - b. Security lighting. Security lighting and site lighting may be placed in association with an approved equipment enclosure. Site lighting must remain unlit except when authorized personnel are present at the facility. Security lighting and site lighting must be shielded to prevent light trespass. **Vertex is not anticipating installing any security lighting, but future collocators shall comply with this section.**
 - c. Required lighting. **Section not applicable, as Vertex's proposed Tower is 149', below the 150' additional requirements.**
-

(4) *Notice of commencement of construction.*

- a. Forty-eight hours before commencing construction of an antenna-supporting structure, and within 48 hours after the antenna-supporting structure construction reaches its maximum height, the County Port Authority, Sheriff's office, Emergency Medical Services, the local fire district and the County Mosquito Control District must be notified by the entity constructing the antenna-supporting structure. Notice must include the location of the antenna-supporting structure tied to the State plane coordinate system for the Florida West Zone (North American Datum of 1983/1990 Adjustment). **Vertex shall comply with all notifications, prior to construction.**
- b. The tall structures permit application will not be issued if the proposed construction or alteration is found to violate the provisions of this Article VI, Division 10, Subdivision III (Section 34-1001 et seq.), or any other applicable federal or State rules or regulations. No tall structures permit will be issued if all Federal Aviation Administration and County Port Authority comments are not addressed to the satisfaction of the County Port Authority. The applicant will be forwarded a written notice if the tall structures permit is denied, from the County Port Authority. This written notice must specify the reason for objections and suggestions for compliance under this subdivision and all other applicable federal or State rules and regulations. **Vertex is issued the FAA Determination (delayed due to U.S. Government Shutdown), Vertex will obtain a Tall Structures Permit. We will comply with all conditions.**

(5) *Floor area.* Floor area will be calculated based on the total impervious surface associated with an equipment enclosure. Floor area may not exceed 400 square feet per antenna array without approval by special exception. **Vertex will ensure each future collocator complies with this section of no greater than 400 square feet of impervious surface.**

- (g) *Signage.* **Vertex shall comply with all subsections related to signage. Please see Site Plans Sheet C-4.**

Secs. 34-1448, 34-1449. Reserved. N/A

Sec. 34-1450. Fees and insurance.

- (a) Antenna-supporting structures and wireless communications facilities must be insured by the owner against damage to persons and against damage to property. Owner must provide a Certificate of Insurance to the Director annually. **Vertex shall comply with this section, upon or prior to construction of the Tower.**
- (b) Fees for antenna-supporting structures and wireless communications facilities permitting and renewal, monitoring of emissions and inspection of structures, and other fees will be established by the Board. **Vertex shall comply, as necessary.**

Sec. 34-1451. Discontinued use... Vertex will comply with the applicable provisions of this section relating to discontinued use and removal. Please see Zoning Affidavit #8.

Sec. 34-1452. Nonconforming antenna-supporting structures... Section not applicable.

Sec. 34-1453. Variance criteria... Vertex is applying for a 149' close-mount monopole-type Tower in a Residential zoned district; therefore, we will comply with the criteria in accordance with the procedures and requirements set forth in Section 34-145.

SHEET DESCRIPTION

TITLE SHEET

SHEET NUMBER

T-1

General Conditions:

1. These Specifications and Construction Drawings are intended to be fully explanatory and complementary. However, should anything be shown, indicated or specified on one and not the other, it shall be the same as if shown, indicated or specified on both.
2. The intention of the documents is to include all labor and materials reasonably necessary for the proper execution and completion of the work as indicated in the documents.
3. Minor deviations from the design layout are anticipated and shall be considered as part of the work; however, no changes that alter the character intent of the design shall be made or permitted by the Subcontractors, without express written Consent from the Construction Manager.
4. The Contractor is solely responsible for all site safety including but not limited to protection of all site personnel and the general public during the entire site construction period. The Contractor shall take all reasonable precautions to place and maintain barricades, lamps, signs, and the like in accordance with OSHA Safety Act and ANSI occupational guidelines.

Conflicts:

1. The Contractor and each Subcontractor shall be responsible for verification of all measurements at the site before ordering any materials or performing any work. No Change Order, extra charge or compensation shall be allowed due to difference between actual dimensions and dimensions indicated on the neither Construction Drawings nor Specifications. Any such discrepancy in dimension which may inadvertently occur shall be submitted to the Construction Manager for consideration before the Contractor proceeds with the work in the affected area.
2. The Contractor shall contact a subsurface utility locator for location of existing utilities prior to commencement of any construction activities. For assistance in locating existing utilities call "SUNSHINE STATE ONE CALL" at 1-800-638-4097.
3. Damage by the Contractor to utilities or property of others, including existing pavement and other surfaces disturbed by the Contractor during construction shall be repaired to pre-construction conditions by the Contractor. For grassed areas seed and mulch shall be acceptable.

Inspections:

1. The Contractor shall be solely responsible for ensuring that all relevant authority inspections are carried out in a timely manner.

As-Built Drawings:

1. The Contractor shall prepare a red-lined set of As-Built Drawings.

Environmental Protection

1. Noise Level: The Contractor shall ensure that state and local regulations are complied with in regard to noise levels produced by his or his sub-Contractor's equipment or methods of construction.
2. Dust Control: The Contractor shall take all necessary steps to limit the creation of any dust nuisance that might arise during construction to the satisfaction of the local authorities.
3. ALL TRIMMING UNDERTAKEN ON A TREE PROTECTED BY THE LAND DEVELOPMENT CODE SHALL BE IN ACCORDANCE WITH THE AMERICAN NATIONAL STANDARDS INSTITUTE (ANSI) A-300 PRUNING STANDARDS.

Clean Up:

1. The Subcontractors shall at all times keep the site free from accumulation of waste materials or rubbish caused by their employees at work, and at the completion of the work, they shall remove all rubbish from and about the building, including all tools, scaffolding and surplus materials, and shall leave the work clean and ready for use.

Code Compliance:

1. All materials, design, and workmanship shall be in accordance with all applicable codes (some of which are listed below), ordinances, and authorities having jurisdiction over the work. Where no codes exist, the work shall conform to the Florida Building Code 7th Edition (2020), and/or the specifications herein, whichever is more stringent.

City/County Building Codes
Florida Building Code 8th Edition (2023)
EIA/TIA-222 Rev. H
Florida Fire Prevention Code 8th Edition (2023)
Life Safety Code 101
National Electric Code 2020
American Institute of Steel Construction Specifications
American Welding Society
American Concrete Institute
Federal Aviation Authority Regulations
Federal Communications Commission Regulations
American National Standards Institute
American Society for Testing and Materials
National Underwriter's Laboratories
2. It is the Subcontractor's responsibility to verify compliance with the governing codes and to notify the Construction Manager of any discrepancies prior to performing work. Reference to any standard or code of practice in this specification shall be deemed to mean the edition current at the time of award of the contract.

Site Work:

1. The Contractor is required to maintain all ditches, pipes, and other drainage structures free from obstruction until work is accepted. The Contractor is responsible for any damages caused by failure to maintain drainage structure in operable condition.

Structural:

1. All cast in place concrete shall be mixed and placed in accordance with the requirements of ACI 318 and ACI 301, and shall have a 28 day minimum compressive strength of 4000 PSI. Concrete shall be placed against undisturbed soil unless otherwise noted. Minimum concrete cover shall be 3 inches.
2. Each new communication tower must be designed and constructed so that in the event a tower falls it will collapse only within the property lines of the lot on which the tower is located. All applications for development approval shall provide verification of compliance with this design requirement from an engineer registered by the State of Florida. In addition, the construction of new communication towers shall comply with all county construction codes.
3. All reinforcing steel shall conform to ASTM 615 grade 60, deformed billet steel bars. Welded wire fabric reinforcing shall conform to ASTM A185.

Florida Building Code 8th Edition (2023)
FBC Specifications: Risk Category II
TIA Specifications: Structure Class = 2; Exposure = C; Topographic Category 1
Wind Loads (ASCE 7-22)

124 mph nominal design wind speed per FBC 8th Edition (2023)

Site Notes

1. ALL TELECOMMUNICATIONS TOWERS (TOWERS), ANTENNAS, AND EQUIPMENT SHALL COMPLY WITH THE LEE COUNTY COMPREHENSIVE PLAN AND LAND DEVELOPMENT REGULATIONS; ALL APPLICABLE SIRE SAFETY CODES, BUILDING CODES, AND TECHNICAL CODES ADOPTED BY LEE COUNTY; ALL APPLICABLE FEDERAL AND STATE REGULATIONS; AND FAA AND FCC.
2. THE TOWER WILL BE DESIGNED AT A MAXIMUM HEIGHT OF 149 FEET ABOVE GROUND LEVEL.
3. ALL NEW TOWER BASES, OUTDOOR EQUIPMENT, ACCESSORY BUILDINGS, AND ACCESSORY STRUCTURES SHALL BE FENCED.
4. TOWER LIGHTING. TOWERS SHALL NOT BE ARTIFICIALLY LIGHTED EXCEPT AS REQUIRED BY THE FAA OR OTHER APPLICABLE AUTHORITY.
5. THE TOWER AND ANTENNAS MUST MEET THE RADIATION EMISSION STANDARDS SET BY THE FCC.
6. COLLOCATION. THE MONOPOLE TOWER WILL BE DESIGNED TO ACCOMMODATE THE FUTURE ANTENNAS OF FOUR (4) WIRELESS TELECOMMUNICATIONS CARRIERS AT VARYING ELEVATIONS.
7. PARKING AND TRAFFIC. TRAFFIC TO THE TOWER SITE IS APPROXIMATELY ONE TRIP PER CARRIER PER MONTH. AREAS SUFFICIENT FOR THE TEMPORARY OFF-STREET PARKING FOR ONE (1) VEHICLE HAS BEEN PROVIDED.
8. TOWER THAT IS VOLUNTARILY NOT USED FOR COMMUNICATIONS FOR A PERIOD OF ONE (1) YEAR SHALL BE REMOVED AT THE TOWER OWNER'S EXPENSE.
9. UTILITIES. TOWER DOES NOT REQUIRE ANY WATER, WASTEWATER, OR SOLID WASTE DISPOSAL.
10. AT THE TOWER SITE, THE DESIGN OF ANY BUILDINGS AND RELATED STRUCTURES SHALL, TO THE EXTENT POSSIBLE, USE MATERIALS, COLORS, TEXTURES, SCREENING, AND LANDSCAPING THAT WILL BLEND THE TOWER FACILITIES TO THE NATURAL SETTING AND BUILT ENVIRONMENT. OUTDOOR STORAGE IS NOT PERMITTED AT A TOWER SITE.
11. THE APPROVAL OF THESE CONSTRUCTION PLANS DOES NOT AUTHORIZE CONSTRUCTION OF REQUIRED IMPROVEMENTS WHICH ARE INCONSISTENT OF THE EASEMENT OF RECORD.
12. THE CONSTRUCTION OF THIS FACILITY WILL NOT IMPACT TO THE 100 YEAR FLOOD PLAIN.
13. COLOR. TOWERS SHALL EITHER MAINTAIN A GALVANIZED STEEL FINISH, OR CONCRETE, OR BE PAINTED A COLOR SO AS TO REDUCE VISUAL OBTRUSIVENESS, SUBJECT TO ANY APPLICABLE STANDARDS OF THE FAA, EXCEPT FOR CAMOUFLAGE TOWERS.
